Mr. Earl F. Potter, President of The Potter Company, has summarized his letter to us as follows:

BUSINESS: The Potter Company manufactures a complete line of by-pass condensers, filter condenser blocks and interference eliminator condensers for radio and industrial uses. Sales in the industrial field have been growing steadily and we expect continued expansion in this end of the business. Some of the more common uses are, viz.: A-B-C supply units, resistance amplifiers, loud speaker tone control, automatic ignition, circuit breakers, train control, thermostats, telephone and telegraph, electrical measuring instruments and power-

EARNINGS: The business has earned a net profit in each year since its inception. Net sales and net earnings as reported by the Auditors for the three years ending April 30, 1928, after all charges including provision for Federal Income Taxes, have been as follows:

> Year Ending April 30, 1927 1926 1928 Net Sales\_\_\_\_\_\$299,075.88 \$680,293.74 \$1,001,353.33 127,252.16 188,146.81 Net Earnings 74,427.00 Earnings per Share

Present indications are that the current year will be the most profitable in the history of the Company.

**ASSETS**: The audited balance sheet as of August 31, 1928, shows total assets of \$382,093.43. Net assets amount to \$295,871.86, equal to \$5.87 per share outstanding. Our valuable goodwill and patents are carried at \$1.00. Current assets amount to \$218,628.64 and current liabilities amount to \$86,221.57. Working capital is ample for present and prospective needs.

**DIVIDEND:** It is the intention of the Directors to authorize the payment of dividends at the rate of \$1.75 per share per annum payable quarterly, January, April, July and October first.

This Company has agreed to make application to list this stock on the Chicago Stock Exchange at the request of the Bankers.

All legal details in connection with this issue are subject to the approval of Messrs. Good, Childs, Bobb & Westcott for the Bankers and Messrs. Mack & Wickoff for the Company. Messrs. Arthur Young & Company have audited the books of the Company for the three and four months ending August 31, 1928. Appraisals by American Appraisal Co. Delivery of Certificates in temporary form is expected to be made on or about October 10, 1928.

\*Reserved for proposed exchange of preferred stock—85,148 shares. †Including 174,470 shares to be presently issued.

Mr. P. L. Deutsch, President of the Company, has furnished the following information in a letter addressed to E. F. Gillespie & Co., Inc., and A. D. Mendes & Co., Inc.:

HISTORY AND BUSINESS: Acoustic Products Company, hereinafter sometimes called the Company, was organized under the laws of the State of Delaware, in October, 1927, and is the owner of approximately 93% of the total outstanding shares of the Preferred Stock and of approximately 96% of the total outstanding shares of the Common Stock of Sonora Phonograph Company, Inc., a New York corporation. Its purpose is to manufacture, either directly or through subsidiaries, machines and devices which cover the field of sound reproduction, both recorded and broadcast, and also for synchronization of sound with film, for use in theatres, auditoriums, churches and schools.

Sonora Phonograph Company, Inc., was organized in 1913, and has enjoyed a reputation as one of the force.

Sonora Phonograph Company, Inc., was organized in 1913, and has enjoyed a reputation as one of the foremost manufacturers of the finest grades of phonographs, cabinets and reproducing equipment and appliances. Its products have been marketed by over three thousand dealers.

Since its inception Acoustic Products Company has devoted the efforts of its organization to the creating and perfecting of new units. At the present time, through subsidiaries, it is producing a complete line of the latest and most improved type of acoustic phonographs, together with electrical reproducing instruments, both as applied to recorded music and radio, embodying the best that is available in the art to-day. These results have been brought about through the Company's research laboratories and the acquisition of patents and creations in the radio and phonographic art. The Company offers to the trade acoustic phonographs, electric phonographs, radios, loud speakers, records and tubes under one trade name—SONORA.

The field of synchronization of sound with pictures affords an opportunity for the enlargement of the activities of the Company. It has contracts in the religious field, and has important negotiations pending in the amusement industry.

PROPERTY AND ASSETS: The Sonora Phonograph Company, Inc., a subsidiary of Acoustic Products Company, owns and operates the Sonora plants at Saginaw, Michigan, having in excess of 500,000 square feet of floor space. The Acoustic Products Manufacturing Corporation, also a subsidiary of the Company, operates an electrical apparatus plant at Stamford, Conn. The Company's executive offices, salesrooms and accounting departments are in the new Sonora Building, at 50 West 57th Street, New York City, under a long term lease. In this building three entire floors have been devoted to the musical department, and the latest type of recording laboratories have been built and equipped. The building houses research laboratories and engineering departments, and directly adjoins the way and galvanous controlled to the supplied of the s building houses research laboratories and engineering departments, and directly adjoins the wax and galvano departments for making the Sonora records.

The Balance Sheet of the Company, after giving effect to the receipt of the proceeds from the common stock sold since June 30, 1928, as at June 30th, 1928, shows current assets of \$2,331,620.92, and current liabilities of \$254,812.69, or a ratio of ten for one.

EARNINGS: The Company is in a position to produce a superior line of attractively priced instruments covering its entire field. The forecast for the current fiscal year, based on gross sales volume estimated by the management to exceed \$8,000,000, indicates substantial net earnings. There are at present on hand orders in excess of the Company's present productive capacity.

MANAGEMENT: The management is composed of executives, technical experts and production men of high calibre, with years of experience in similar lines of endeavor. Among the executive officers and directors of the Company and subsidiaries are the following:

P. L. Deutsch, President Formerly Vice-President, Brunswick-Balke Collender Co.

## 7% Cumulative Preferred Stock

[With Common Stock Purchase Warrants]

[\$100 Par Value]

Preferred as to dividends, and in the event of liquidation preferred as to assets to the extent of \$110 a share and accumulated dividends. Redeemable in whoie or in part at \$110 a share and accumulated dividends. Dividends payable quarterly, cumulative from August 1, 1928. The Company agrees to acquire on or before each December 31st, beginning with December 31, 1929, by redemption or purchase, at least 3% of the largest par amount of Preferred Stock ever outstanding. No stock shall have any preemptive rights. Transfer Agents: The Chase National Bank of the City of New York. Registrar; Guaranty Trust Company of New York.

Of the Common Stock Purchase Warrants to be outstanding, there will be attached to the certificates of Preferred Stock of this issue Warrants detachable after May 1, 1930 entitling the holder to purchase one share of Common Stock for each share of Preferred Stock held at \$45 a share to and including September 15, 1933, after which the Warrants will be void.

#### CAPITALIZATION

(After giving effect to the recapitalization)
Authorized Outstanding 7% Cumulative Preferred Stock, \$100 par value\_\_\_\_\_\$1,000,000 \$1,000,000 Common Stock, no par value shares 80,000\* 60,000

Mr. E. B. Bronson, President of the Company, has summarized his letter, dated October 2, 1928, as follows:

\*\$20,000 shares reserved against outstanding Common Stock Purchase Warrants.

W. B. Coon Company, a New York corporation, was organized during 1912 as an outgrowth of a business originally founded in 1891. The Company is engaged in the more stable segment of the women's shoe industry which gives greater emphasis to foot comfort and shoe service than to "high style." The shoes manufactured by the Company are sold directly to the retailer under its own trademarks.

EARNINGS: Net profits of the Company available for dividends, for the four years and six months period ended June 30, 1928, after providing for depreciation, and after eliminating mortgage interest (averaging \$11,\$36 a year for the period shown) and non-recurring income and deducting Federal Income Tax at the current rate of 12%, all as certified by Messrs. Ernst & Ernst, have been as follows:

1927	359,905	5.14	289,905	4.83
6 months ended June	30, 1928 151,142	4.31	116.142	1.93

For the four years and six months period shown above, Net Profits averaged 3.99 times the annual dividend requirements of the Preferred Stock presently to be outstanding. For the same period such average Net Profits, after deducting the dividend requirements of the present issue of Preferred Stock, were equivalent to \$3.48 a share on the Common Stock presently to be outstanding.

ASSETS: According to the Balance Sheet of the Company as at June 30, 1928, certified by Messrs. Ernst & Ernst, net tangible assets were equivalent to more than \$197 a share and net current assets were equivalent to more than \$117 a share of the Preferred Stock presently to be outstanding. The ratio of current assets to current liabilities as at that date was greater than 7.7 to 1. One of the Company's most valuable manufacturing assets is in the form of lasts, dies and patterns. This asset is carried on the books at the nominal value of \$1.00.

DIVIDENDS: The Board of Directors has inaugurated annual dividends on the Common Stock at the rate of \$2.80 a share and has declared a quarterly dividend on the Common Stock in the amount of 70c a share, payable November 1, 1928.

MANAGEMENT: The management of the Company will continue in the hands of men who were associated with the founder of this Company for many years prior to his death in 1926, and who have been greatly responsible for its success including Mr. E. B. Bronson, President; Mr. Elmer M. Fischer, Vice-President; Mr. John C. Schelter, Treasurer, and Mr. George H. Harris, Secretary.

PURPOSE OF ISSUE: This issue does not represent new financing on the part of the Company, except that certain outstanding funded debt and preferred stock of the Company will be retired without expense to it.

We offer this 7% Cumulative Preferred Stock with Common Stock Purchase Warrants attached and also 30,000 shares of the Common Stock when, as and if issued and received by us, subject to the approval of counsel, Herbert H. Maass, Esq., for the Bankers and George H. Harris, Esq., for the Company. It is expected that delivery will be made on or about October 16, 1928, in the form of permanent certificates. This Preferred Stock and the Common Stock are offered only on the express condition that no statement herein contained constitutes a representation, guaranty or warranty by us,

THE SEABOARD NATIONAL BANK OF NEW YORK, TRUSTEE

Mr. Everett W. Sweezy, President of the Company, summarizes his letter to us describing these Debentures as follows:

BUSINESS AND PROPERTY: The Utilities Service Company, incorporated under the laws of the State of Ohio, has acquired substantially all of the capital stock and obligations, except current indebtedness, of twenty Ohio telephone companies and four ice companies. In addition, it has acquired a controlling interest in The Lima Telephone & Telegraph Company. It also has acquired substantially all of the capital stock of The Stark Electric Railroad Company, which in turn holds all of the outstanding common stock (except Directors' qualifying shares) of The Alliance Power Company. The aggregate population of the territories served, all situated in prosperous and populous districts of Ohio, is approximately 800,000.

(The Times Publishing Company)

## 6% Serial Gold Debentures

\$125,000 due each September 1, 1931-35 \$225,000 due each September 1, 1941-42

\$175,000 due each September 1, 1936-40 \$550,000 due September 1, 1943

#### Price 100 and Interest

A letter from Mr. Roger M. Andrews, President of the Company, is summarized by him as follows:

The Company: The Times Publishing Company publishes the Detroit Times, which has had one of the most remarkable growths in the history of American newspapers. Its present daily evening net paid circulation is more than 300,000, with the exception of Saturday, and its Sunday circulation more than 325,000.

The Company owns in fee or controls under long term leases valuable metropolitan Detroit real estate and plans to erect a thoroughly modern six-story building to be used in its entirety for the operations of the Detroit Times.

Security: These Debentures will be the direct obligation of The Times Publishing Company and in addition will be unconditionally guaranteed as to the prompt payment of principal and interest by William Randolph Hearst.

Purpose of Issue: The proceeds from these Debentures will be used for the construction of a modern six story building to house the newspaper organization of the Detroit Times, for the purchase of new equipment, for the retirement of obligations and for other corporate purposes.

Assets: The balance sheet as of July 15, 1928, as certified by independent auditors, giving effect to present financing, shows total assets, after deducting all liabilities except these Debentures, of \$4,511,132, and net current assets of \$704,659. Circulation and goodwill having a substantial value are carried on the balance sheet at \$1.00.

Earnings: Net earnings of The Times Publishing Company before depreciation, amortization, Federal Income Taxes and interest have been certified by independent auditors as follows:

Twelve months ended

December 31, 1926	\$376,343
December 31, 1927	390,359
July 15, 1928	588,981
	0401 100

\$461,103 Maximum annual interest

150,000

on these Debentures\_\_\_\_\_

The Company has recently increased the price of its evening paper from two cents to three cents, resulting in an increase in net earnings, the entire benefits of which are not reflected on the above earnings statement.

Control: All of the outstanding capital stock of The Times Publishing Company, except directors' qualifying shares, is owned and controlled indirectly by William Randolph Hearst. The publishing interests of Mr. Hearst consist of a chain of twentyeight newspapers serving eighteen important cities extending from coast to coast, and a group of seven nationally known magazines, which together, comprise the largest publishing business in the world.

A circular fully descriptive of this issue will be sent upon request

# HALSEY, STUART & CO.

UNION TRUST CO.

and redeemable. Interest payable March 1 and September 1 at the off in New York and Chicago without deduction for any normal Federal Income Tax now or bereafter deductible at the source, not in excess of 2% per annum. Coupon Debentures in denominations of \$1,000 and \$500, registerable as to principal only. These Debentures are offered when, as and if issued and accepted by us and subject to approval of counsel. Interim receipts or temporary Debentures later exchangeable for definitive Debentures are expected to be ready for delivery on or about October 18, 1928. All statements herein are official or are based on information which we regard as reliable and while we do not guarantee them, we ourselves have relied upon them in the purchase of this security.

All of this offering of Debentures has been sold.

## \$5,150,000

# Abraham & Straus, Inc.

(Incorporated in the State of New York)

## Fifteen-Year 51/2% Gold Debentures

(With Stock Purchase Warrants)

To be dated October 1, 1928

To mature October 1, 1943

Interest payable April 1 and October 1. Coupon Debentures in denomination of \$1000 registerable as to principal only. Interest payable without deduction for any Federal Income Tax not to exceed 2% per annum. Redeemable in whole or in part on 60 days' notice any time on and after October 1, 1931 at 103 during the year commencing October 1, 1931, with successive reductions of ¼ of 1% during each year thereafter until April 1, 1943, and thereafter at 100, in each case with accrued interest. The Company will agree as provided in the Indenture to refund the Massachusetts income tax not in excess of 6% upon the interest, the l'ennsylvania personal property tax not in excess of 4 mills per annum and the Maryland securities tax not in excess of 4½ mills per annum.

Each \$ 000 Debenture will carry a warrant, non-detachable except when exercised or in the event of redemption of the Debenture, entitling the holder to purchase five shares of Common Stock of the Company, at \$115 per share to and including October 1, 1931 and at \$120 per share thereafter to and including October 1, 1933.

#### CAPITALIZATION

(After giving effect to the sale of these Debentures)

	Authorized	Outstanding
Fifteen-Year 51/2% Gold Debentures	\$5,150,000	\$5,150,000
7% Cumulative Preferred Stock (Par, Value \$100 Per Share)	4,250,000	3,825,000
Common Stock (No Par Value)	250,000 shs.	155,000 shs.

Mr. Simon F. Rothschild, President of the Company, has furnished the following information regarding the business of the Company and this issue of its Debentures:

"The Abraham & Straus store, now the largest department store in Brooklyn, is the outgrowth of a business founded over 60 years ago. The present management has been associated with the business for the past 35 years.

In order to meet the expanding needs of the business, it is proposed to erect, in successive units, an entire new modern store building, the major portion of which will be on leased land, the lease of which is about to be extended and its terms modified, among other things, to increase the rental and togive the Company an option to purchase. The first unit, of eight stories and two basements, will cover about 40% of the store's present ground area, and with equipment and fixtures is estimated to cost about \$7,450,000. The proceeds of the present issue of Debentures will be used toward defraying part of this cost, and it is expected that the balance necessary will be supplied by the Company out of accumulated earnings.

The net sales, and the consolidated net profits after depreciation but before deducting Federal income taxes, as certified by Messrs. Touche, Niven & Co., Public Accountants, were as follows:

Years Ended January 31, 1926	Net Sales \$24,382,925	Net Profits As Above	Times Int. Req. on This Issue
1927	25,226,520	\$1,398,303 1,681,332	4.93 5.93
1928	25,571,149	1,780,968	6.28

For the six months ended July 31, 1928 of the current fiscal year, net profits as shown by the Company's books were substantially in excess of the net profits for the corresponding period of 1927.

The certified consolidated balance sheet as of January 31, 1928 giving effect, as of that date, to the sale of these Debentures shows net assets, after deducting reserves and all liabilities other than this issue, of \$15,571,563, or over \$3000 per \$1000 principal amount of these Debentures; and current assets of \$13,808,331 comparing with current liabilities of \$1,187,722."

The above summary is subject to a fuller description of the Company and its building program set forth in the offering circular, copies of which may be had upon request

The Company has agreed to make application to list these Debentures on the New York Stock Exchange

## Price 101 and accrued interest, to yield 5.40%

A part of the above \$5,150,000 Debentures is being reserved for sale to stockholders

This offering is made in all respects when, as and if issued, and delivered to and accepted by us and subject to the approval of our counsel. We reserve the right to reject any and all subscriptions in whole or in part, to allot less than the amount applied for and to close the subscription books at any time without notice. It is expected that delivery of temporary Debentures or of interim receipts will be made on or about November 12, 1928, at the office of Lehman Brothers, 16 William Street, New York, N. Y., against payment therefor in New York funds.

## LEHMAN BROTHERS

The above statements are not guaranteed, but are based on information which we believe to be true.

#### Financial.

## \$25,000,000

# Missouri Pacific Railroad Company

First and Refunding Mortgage 5% Gold Bonds, Series "G"

Due November 1, 1978.

Coupon bonds in \$1,000 denomination registerable as to principal, exchangeable for fully registered bonds and re-exchangeable under conditions provided in the mortgage. Interest payable May 1 and November 1.

The bonds of this series will be redeemable at the option of the Company, as a whole or in part, upon ninety days' previous notice, on any interest date on or after November 1, 1933, and on or before November 1, 1973, at 105% and accrued interest, and thereafter at their principal amount and accrued interest plus a premium of ½% for each six months between the redemption date and the date of maturity.

The issuance and sale of these Bonds are subject to the approval of the Interstate Commerce Commission.

For further information regarding the Company and this issue of Bonds, reference is made to a letter dated October 4, 1928, from William H. Willams, Esq., Chairman of the Board of the Missouri Pacific Railroad Company, copies of which may be obtained from the undersigned, and from which the following is quoted:

"The purpose of this issue is to reimburse the treasury of the Company for capital expenditures heretofore made, to provide in part for the Company's improvement program for 1929, and for other corporate purposes.

The First and Refunding Mortgage Bonds are secured by a first lien on 3,400 miles of railroad of the Company together with valuable terminal properties, depots and bridges, and, subject to \$125,-181,500 principal amount of prior liens on various parts of the System, for the retirement of which First and Refunding Mortgage Bonds are reserved, on the remaining 3,372 miles of the directly owned lines of the Correct and the apparent terrors. lines of the Company and the appurtenances thereof, a total of 6,781 miles of railroad. They are in addition secured, subject to certain of said prior liens and in respect to part of the equipment subject also to outstanding equipment trust certificates, by lien on all equipment owned by the Company, which. on July 31, 1928, had a depreciated book value of \$74,416,227 over outstanding equipment trust certificates, and on \$23,703,000 par value of preferred stock of The Texas and Pacific Railway Company, on which dividends at the rate of 5% per annum are on which dividends at the rate of 5% per annum are being paid.

After giving effect to this financing, there will be outstanding in the hands of the public, \$137,840,500 principal amount of First and Refunding Mortgage 5% Bonds, being at the rate of \$40,434 per mile on the 3,409 miles of railroad on which the bonds are a first lien. The aggregate of the prior liens and the First and Refunding Mortgage Bonds outstanding will be \$263,022,000 principal amount, or at the rate of \$38,788 permile on the 6,781 miles of railroad subject to the partgage, without making any allowsubject to the mortgage, without making any allow-ance for the other valuable property on which they are a lien. The prior liens may not be increased; they may be acquired or deposited under the First and Refunding Mortgage without impairment of lien, but until so deposited they may not be renewed or extended.

Following the First and Refunding Mortgage Bonds the Company has outstanding \$51,350,000 principal amount of General Mortgage 4% Bonds due March 1 1975, \$71,800,100 par value of Preferred Stock and \$82,839,500 par value of Common Stock having a total present market value of Stock, having a total present market value of approximately \$184,000,000.

In addition to its directly owned lines the company owns 8734% of the stock of New Orleans, Texas & Mexico Railway Company, which is pledged Texas & Mexico Railway Company, which is pledged to secure \$13,156,000 principal amount of the Company's 5¼% Secured Serial Gold Bonds, and over 68% of the stock of The Texas and Pacific Railway Company. New Orleans, Texas & Mexico Railway Company in turn owns all the stock of International-Great Northern Railroad Company. Including these companies and their subsidiaries, the system operated by the Company aggregates 12,590 miles and extends from St. Louis on the East to Kansas City, Omaha and Pueblo on the West and to Memphis, New Orleans, Fort Worth, Dallas, Houston, Galveston, San Antonio, El Paso, the Rio Grande Valley and the Mexican border on the South and West. The Company also owns an undivided one-half interest in the common stock of The Denver and Rio Grande Western Railroad Company.

half interest in the common stock of The Denver and Rio Grande Western Railroad Company.

The Gross Income of the Missouri Pacific Railroad Company for the year ended December 31, 1927, applicable to the payment of interest on funded debt and other fixed charges, before Federal income taxes, amounted to \$20,723,265, while such charges amounted to \$16,199,269. For the eight months ended August 31, 1928, such income was \$15,495,888, as compared with \$12,324,895 for the corresponding period of 1927, an increase of \$3,170,993.

Application will be made in due course to list

Application will be made in due course to list these bonds on the New York Stock Exchange.'

#### THE UNDERSIGNED WILL RECEIVE SUBSCRIPTIONS FOR THE ABOVE BONDS. SUBJECT TO ALLOTMENT, AT 991/4% AND ACCRUED INTEREST TO DATE OF DELIVERY.

The undersigned reserve the right to close the subscription at any time without notice, to reject any application, to allot a smaller amount than applied for and to make allotments in their uncontrolled discretion.

The above bonds are offered if, when and as issued and received by the undersigned and subject to the approval by the Interstate Commerce Commission of the issue proceedings in connection therewith. Temporary bonds or interim receipts of the Company will be delivered against payment in New York funds for bonds allotted, which temporary bonds or interim receipts will be exchangeable for definitive bonds when prepared.

# THE EXPORT ORGANIZATIONS of GENERAL MOTORS

TN addition to its Annual Report and Quar-I terly Statement of Earnings, General Motors issues special booklets from time to time for the information of its stockholders, employees, dealers, and the public generally. Many of the principles and policies outlined in these booklets apply to every other business as much as they do to that of General Motors.

The motor car industry is assured of a satisfactory future volume from the following sources: (1) replacement of existing cars as they wear out or become obsolete; (2) an increase in the number of car owners through more intensive development of the present market as well as through future normal growth in population and wealth; (3) an increase in the number of persons who own more than one car; (4) the constantly expanding demand in foreign markets which already is an important factor, and will become more important year by year.

General Motors has assembly plants and warehouses in twenty-three cities overseas, and in 1927 sold 193,830 cars through 6,000 distributors and dealers in more than one hundred countries. General Motors not merely is selling its cars in these markets, but is using every opportunity to make itself a friendly and effective part in the economic life of these many nations.

COPY of this booklet, entitled THE EXPORT ORGANIZATIONS OF GENERAL Motors, issued by General Motors to its stockholders, will be mailed if a request is directed to Department B-7, General Motors Corporation, Broadway at 57th Street, New York City.

#### The Financial Situation.

The diversion of banking credit into speculative channels, with the resulting growth of brokers' loans, still constitutes the foremost and all-absorbing topic. The discussion of the matter, week after week, naturally grows somewhat tiresome, but it obtrudes itself at every point. Moreover, new occasions for giving consideration to it keep constantly arising. The present week, for instance, both the monthly compilation of the New York Stock Exchange and the weekly statement of the Federal Reserve Banks with reference to these brokers' loans reveal further additions to the total, raising the aggregates in both instances to new high peaks in all time, the previous high records in that respect being left far behind. In the case of the Stock Exchange figures, which are always larger than the Federal Reserve figures, because the Stock Exchange statement is much the more comprehensive, the aggregate has now reached a really appalling magnitude, it being actually in excess of 51/2 billion dollars!

This has occurred while the annual convention of the American Bankers' Association has been in session in Philadelphia, and with these bankers also speculative borrowing has been the chief subject of discussion, as it properly had to be. Many wellknown men had been assigned to deal with it and they responded by the expression of varying views on the issues involved. In addition, the convention itself has been led to adopt some resolutions concerning the all-absorbing subject. These discussions will command the attention which the importance of the matter merits, although it cannot be said—with all due respect to those participating in the same—that they contribute much to the solution of the vexed problem.

One of the early speakers was Colonel Leonard P. Ayres, the Vice-President of the Cleveland Trust Company, who read a carefully prepared paper before the State Bank Division. Mr. Ayres is an able writer and always visions things from a broad standpoint. Referring to the speculation on the Stock Exchange, he speaks without reserve or qualification, and expresses the view that "stocks are now selling on expectation rather than on realization" and then adds: "All the experience of the past points clearly to the conclusion that prices are too high, and must come down. . . . No conclusion is more safe than that the speculative markets in their present mood would promptly sop up for stock margins any additional credit that the Reserve System might make available, if it should attempt to ease off the present credit stringency."

But does Mr. Ayres hold the Federal Reserve responsible for this situation in any way? Apparently not. He goes at length into a consideration of the large imports of gold into the United States since the war, and the recent reversal of the gold current, and undertakes to trace to these gold movements what has occurred. He says absolutely nothing about the \$1,500,000,000 of Reserve credit that is today outstanding and the certain part that this must have had in the speculative furore. He observes: "We have been able to finance simultaneously a business boom, a building boom, a Florida boom, and a stock market boom without the slightest trace of a credit stringency." "Our Federal Reserve system," he goes on to say, "has probably been the only central bank that has for years at a time had no need to take precautions looking to the safeguarding of its reserves, and has only needed to concern itself lest credit should be used unwisely." But can it be said that credit has not been used "unwisely" when Federal Reserve credit is out to an aggregate of \$1,-500,000,000 and when brokers' loans on the Stock Exchange have mounted to above \$5,500,000,000? Is it a strong point or a weak point that we have been able to finance all the different booms enumerated by Mr. Ayres and would it not have been more to the credit of the Federal Reserve if a policy had been adopted on its part to prevent such financing and would these speculations have been at all possible had not Federal Reserve credit been out all the time to an aggregate of between \$1,000,000,000 and \$1,500,000,000?

Colonel Ayres is mainly intent on showing that a transformation is now in prospect and he thinks that the banks ought to prepare for it. Accordingly he outlines a "New Investment Policy" for the occasion, into which, however, it is not our purpose here to go. He says: "Now at last all this has changed, but the transition to a new and more sober era is not going to be easy. The American people are in a mood of invincible optimism. Three years ago they were speculating in Florida land, and finally that bubble burst. Then they speculated in urban real estate, and now they are finding that the rents that are obtainable will not justify the prices to which property had been bid up, and as a result, city real estate prices are rapidly coming down. Now they have turned to the stock market, where prices of the stocks of mail order houses, chain stores, motor companies, and soft drink firms are selling on a basis to yield half as much as the obligations of the U. S. Government"—all of which merely raises the question why the Federal Reserve Banks have not been operated so as to prevent all this.

Congressman Louis T. McFadden, Chairman of the House Committee on Banking and Currency, was also a speaker at this week's meetings of the bankers, his address being delivered before the Clearing House Section. He showed by his remarks that he had a clear understanding of the principles and functions of banking and that he had made a deep study of the present involved situation. Yet the address was nevertheless in considerable measure disappointing, more particularly since it appears to look in the direction of giving the Federal Reserve larger control and greater powers, when what is really needed is a curtailment of the powers it already possesses, or assumes to possess. stance, we find him, while having no definite remedy to suggest, talking in the following strain: "In the first place, we have 49 sovereign powers, which have the right to charter banks and all other forms of corporations designed to buy and sell credit, namely, the Federal Government and 48 sovereign States. If all of the banking instrumentalities and organizations which deal in credit were under the authority of the Federal Government, the task might be simplified. The Federal Reserve Bank was intended to establish the standard of banking practice, but the only banks over which the Federal Government has a supreme control are the 8,000 National Banks and such State chartered banks as are willing to put themselves under the control and direction of the system." It is always a favorite line of argument to ascribe all the ills and troubles of the country to the divided control and divided responsibility that exists as between the Federal Government and the State Government and, by inference and implication at least, it is sought to make us reflect upon how much easier the problem would be if there could be merely a single and all-embracing jurisdiction. In the case of the Federal Reserve Banks, however, we thnk the problems up for solution would be aggravated rather than simplified if the operations of the Federal Reserve Banks were further extended. In our estimation the Federal Reserve Banks, operated as a whole as they are, and with their reserve deposits so greatly enlarged by the war-time amendments, which should have been repealed long ago, are already of such magnitude that only harm could result if more banks were placed under their dominion, supposing that were possible from a statutory standpoint.

Again we find Mr. McFadden saying: "Owing to the important part which the investment of independent money in brokers' loans occupies in connection with our general credit situation and in order to permit the Federal Reserve to retain its control over the total volume of credit, it may become necessary to place the supervision of the future

granting of brokers' loans under the Federal Reserve system." Heaven forbid that any legislative attempt should ever be made to grant authority to any body of men to allot the amount of banking credit to be assigned to any branch or division of the country's activities. We believe that the amount of credit now tied up in brokers' loans is excessive in the extreme, but to let any body of men prescribe the exact amount of credit that should be definitely assigned as a maximum or minimum for any particular purpose, would not only be unthinkable, but could not fail to add to our ills, and, moreover, would be like jumping from the frying pan into the fire.

Besides, what guaranty would there be that the task would be performed wisely? In view of past experience, would there not be the certainty that the Federal Reserve authorities would blunder even more egregiously than they have thus far? Who will deny that the height to which Stock Exchange speculation has been carried has followed directly as the result of the unwise policy pursued by the Federal Reserve authorities in the summer and autumn of 1927 in reducing the rediscount rates of the Federal Reserve Banks to 31/2% and forcing out Reserve Credit in the purchase of several hundred million dollars of U.S. Government securities? Mr. McFadden himself has no doubt on that point. He says: "Apparently the present situation was precipitated by the change of Federal Reserve policy last year to assist England and other central banking countries in their attempt to stabilize their currencies and return to a gold basis. Now that this assistance has been rendered at the cost of America's being thrown into a speculative frenzy, the Federal Reserve authorities are attempting to get back to a normal basis." Here we see the indirect effects of a mistaken policy on the part of the Federal Reserve authorities. Is there the slightest warrant for thinking that if they were given authority to allot the precise amount of credit to be used in brokers' loans, they would be any more successful?

At the conclusion of his address, we find Mr. Mc-Fadden saying: "If this system (meaning the Federal Reserve) is to function in the discharge of its full duty, it must occupy a commanding position over the credit situation in the United States and in order to do this it must be placed in a position where it can control all the elements that enter into this credit situation; and if revision of the law is necessary to accomplish this, the necessary amendments should be made in the law so that the administration of the system will not be handicapped in its service to the 120,000,000 people for whom it was primarily organized to serve." Later along in the address Mr. McFadden adverts to the Federal Reserve "acting as the World banker" and says that this brings an additional responsibility.

The Federal Reserve system is not charged with the duty of acting as the world's banker and should not arrogate any such function to itself or be given authority to so act. On the supposition that the Federal Reserve system is thus endowed, Mr. Mc-Fadden's final declaration is that: "In the discharge of the responsibilities, acting in its capacity as the responsible head of finance in America, it is well to consider whether or not the Federal Reserve System has, or has not, been granted all the necessary authority and power to handle the conditions with which the system is now confronted." Mr. McFad-

den is on the wrong track. The aim of Congress in any amendment of the Federal Reserve Act must be to limit its capacity for further mischief, not for providing it with additional power and facility for doing mischief.

Roy A. Young, the Governor of the Federal Reserve Board, was also one of the speakers before the assembled bankers. His address was delivered before the General Convention of the Association on Wednesday. It was on the whole a well considered address and one statement in particular made by him deserves placarding in every bank and banking institution throughout the length and breadth of the land. In that statement he described accurately the duties and functions of the Federal Reserve banks when he said: "They are in substance a co-operative enterprise among banks for the purpose of taking care of seasonal and emergency needs for credit and currency." The fact that the Federal Reserve Banks were established for the purpose of providing for "seasonal" and "emergency" needs, and not for the purpose of regulating the whole banking mechanism of the United States and indeed of the entire world, as so many would have us believe, cannot be too strongly emphasized. Unfortunately, however, they have never been operated in accord with Mr. Young's theory, but on the contrary have been administered in direct conflict with it, though Mr. Young does not show any comprehension of that

If the Federal Reserve Banks in more recent years had been conducted so as to provide alone for "seasonal" and "emergency" needs, they would never have allowed Federal Reserve credit to an aggregate of from \$1,000,000,000 and \$1,500,000,000 to remain constantly outstanding; and we are ready to warrant that if this huge aggregate of Reserve credit had not remained afloat, the unbridled speculation in the security markets which to-day is disturbing the whole mercantile and financial world would never have arisen.

The distinctive feature, however, of Governor Young's address, as of the address which he delivered before the Indiana Bankers' Association two weeks previously, is the easy feeling of satisfaction with which he views the situation. In the closing part of the address to the Indiana bankers there was a paragraph which has not received the attention which it deserves. In that statement Mr. Young, in effect, advised the member banks to continue their present scale of borrowing, because, forsooth, being so largely in debt already, it would make them cautious about indulging in further borrowing. Lest this be deemed an exaggeration, we quote here his precise words as follows: "If after January 1929, following the return of holiday currency, the banks still owe the System approximately \$1,000,000,000 in rediscounts, I personally would feel that the situation had been handled admirably, and I shall have no cause for concern, because with the tradition which the member banks have about borrowing continually from the Federal Reserve System, a debt to the System of \$1,000,000,000 will have a more moderating efect upon the too rapid growth of bank credit than any other single condition that I know Thus the member banks may possess their souls in peace. If next January, after crop demands have been satisfied, and the return flow of holiday currency has been completed, they still owe the Sys-

tem the insignificant sum of \$1,000,000,000, everything will be satisfactory and they will not be disturbed.

In the same way we find him expressing satisfaction, in his address the present week, over the fact that the country has in recent months lost \$500,-000,000 to the outside world. Here is what he says on that point: "The loss of gold for the past year has been a desirable thing, not only from the point of view of those who received it and used it as the basis of monetary reconstruction, but also from the point of view of the United States. It has removed from the foreign trade of the United States the risks arising from unstable exchanges and disorganized conditions among its foreign customers." The benefit to foreign countries may be admitted and some incidental benefits to the United States as well, but at what great and grave cost! In the words of Mr. McFadden, the cost has been "America's being thrown into a speculative frenzy." This speculation has reached such inordinate proportions that it is bound to collapse in the end, and Colonel Ayres, as noted further above, declares unhesitatingly that it will collapse. When that time comes, what will be the after effects and who will be the sufferers? At that time will it not appear that the price paid has been too high and that the Federal Reserve authorities had better have kept their hands off?

Two statements of brokers' loans have appeared the present week, as noted at the outset of this article, and both statements have established new high records, far exceeding the previous high peaks. The Stock Exchange monthly statement has attracted much the more attention of the two, because the increase runs far in excess of expectations. The further addition during September proved to be no less than \$462,402,280 and this followed \$214,089,826 addition during August, making an increase for the two months combined in the huge sum of \$676,292,106. The further addition in September brought the grand total of this borrowing above 51/2 billions of dollars, the exact amount being \$5,513,639,685, or nearly a quarter of a billion in excess of the previous record total of \$5,274,046,281 established on May 31 last, before the collapse which at that time occurred in the stock market.

The weekly statement of the Federal Reserve Board, issued after the close of business on Thursday, and covering the period up to Wednesday night, Oct. 3, or three days later than the Stock Exchange statement for the end of September, also established a new high record in all time, as already said. As the Federal Reserve statement is much less comprehensive than the Stock Exchange compilation, the totals are not quite so large, and yet are of huge proportions. The Federal Reserve statement this week shows a further increase of \$45,270,000 in the grand total of the loans, and this followed \$54,232,000, \$85,285,000, \$95,982,000, \$54,061,000, and \$34,017,000 increases respectively in the five preceding weeks, giving an expansion for the six weeks combined of no less than \$368,847,000, and bringing the grand total of the loans up to \$4,-569,978,000, or in excess even of the previous high record made on June 6 last when the aggregate stood at \$4,563,240,000.

As compared with a week ago, a large increase appears this time in the loans made by the 45 reporting member banks on their own account, the to-

tal of such loans having run up from \$849,506,000 Sept. 26 to \$929,901,000 Oct. 3. Loans for account of out-of-town banks also increased during the week, rising from \$1,673,943,000 to \$1,682,057,000. The loans "for account of others," however, are somewhat lower the present week, though still of extraordinary magnitude, having fallen from \$2,001,259,000 to \$1,958,020,000. At this latter figure comparison is with only \$922,505,000 on Oct. 5 1927.

In nearly all other respects, also, the Federal Reserve statements are unsatisfactory the present week. Member bank borrowings, after last week's falling off, this week have increased again, the amount rising from \$1,010,766,000 Sept. 26, to \$1,-025,918,000 Oct. 3. At the same time, the twelve Reserve institutions have increased their holdings of acceptances from \$263,419,000 to \$309,976,000 and their holdings of U.S. Government securities from \$229,032,000 to \$230,604,000. The result, altogether, is that there has been an increase during the week in the amount of Reserve credit employed of \$63,281,-000, the total of the bill and security holdings the present week being \$1,571,078,000 as against \$1,507,-797,000 on Sept. 26. The amount of Federal Reserve notes in circulation increased during the week from \$1,681,581,000 to \$1,703,630,000, while gold reserves are somewhat lower, having declined from \$2,633,-002,000 to \$2,616,635,000.

The stock market had a ragged appearance the early part of the week, being rather weak and depressed on Monday, Tuesday and Wednesday, but recovered tone on Thursday and Friday. There were many influences that contributed to the early weakness. On Monday, call money touched 10%. After the close of business on Tuesday came the Stock Exchange statement showing an increase in brokers' loans during the month of September of almost phenomenal proportions, as already set out above. On Thursday the market had to contend with a bearish statement issued by John J. Raskob. Mr. Raskob expressed the opinion that the level of stock prices was much too high, having regard for underlying conditions. As a result, the market suffered a further weak spell on Thursday morning, but enjoyed a sharp rally later in the day, one stimulating influence being a decline in the call loan rate on the Stock Exchange to  $6\frac{1}{2}\%$ . As a result, many of the net changes for the day showed substantial gains. On Friday the rally made further progress, notwithstanding the unfavorable character of the Federal Reserve statements issued after the close of business the previous evening. Call money now dropped to 6% and this infused new energy into the market. Dealings have continued large, the sales at the halfday session last Saturday having been 1,845,170 shares; on Monday they aggregated 3,250,550 shares; on Tuesday, 3,626,640 shares; on Wednesday 4,075,010 shares; on Thursday, 4,236,770 shares; and on Friday 4,363,300 shares. On the New York Curb Exchange, the sales were 557,200 shares on Saturday; 895,500 shares on Monday; 794,100 shares on Tuesday; 917,300 shares on Wednesday; 1,133, 590 shares on Thursday and 913,200 shares on Friday.

Notwithstanding the irregularity of the market, a considerable number of new high records were established for the year, the list including besides the motor stocks separately mentioned below the following among others: Allied Chemical & Dye, Barnsdall Corp. Class A, Bethlehem Steel, Briggs Mfg.,

B'klyn Edison, Burroughs Adding Mach., Byers & Co., Case Threshing Machine, Coty Inc., Paramount Famous Lasky, Federal Mining & Smelting, First National Stores, Gillette Safety Razor, Ingersoll Rand, Internat. Nickel, Lambert Co., Ludlum Steel, Murray Body, Nat, Cash Register, Nat. Dairy Products, Otis Elevator, Pressed Steel Car, Royal Dutch Co. (N. Y. shares), Shell Transport & Trading, Tide Water Oil, Universal Pipe & Radiator, U. S. Industrial Alcohol, and Victor Talking Machine.

The net changes for the week are quite irregular. In the case of the copper group, Anaconda closed yesterday at 81¾ against 815%, the close the previous Friday; Kennecott Copper closed at 99¾ against 100¼; Cerro de Pasco closed at 96¾ against 96¾; Greene Cananea at 124 against 125½; Calumet & Hecla at 31¾ against 33; Chile Copper at 50¾ against 51; Granby Copper at 65¾ against 66¼. U. S. Steel again was one of the active features; it closed yesterday at 1595% against 157% the previous Friday; Bethlehem Steel closed at 69¾ against 63; Republic Iron & Steel at 81¾ against 80½; Inland Steel at 70 against 69; and Ludlum Steel at 79 against 68.

Among the motor stocks General Motors again held front rank in point of activity; it closed yesterday at 2141/2 against 211 the previous Friday; the motor stocks that established new high records for the year were Chrysler Corp., Dodge Bros. Cl. A, Hupp Motors and Packard. Chrysler closed yesterday at 139 against 1171/2 the previous Friday; Studebaker closed at 831/4 against 80; Packard at 96 against 911/4; Nash at 943/4 against 901/2; Hudson at 901/4 against 843/4; and Hupp at 771/8 against The rubber stocks also showed decided strength. U. S. Rubber closed at 41½ against 38½ the previous Friday and the preferred at 701/4 against 671/2; Goodyear Tire & Rubber closed at 71 against 701/8; and B. F. Goodrich at 84 against 837/8. Among the oil stocks Atlantic Refining closed at 180 against 18334 the previous Friday; Marland Oil at 375% against 385%; and Standard Oil of N. J. at  $45\frac{1}{2}$  against  $45\frac{5}{8}$ .

Among the high-price specialties, Montgomery Ward & Co. closed at 257 against 253½ the previous Friday; Radio Corporation at 204 against 206½; Warner Bros. Pictures at 107¾ against 110½; Paramount Famous Lasky at 147½ against 148¾; Stewart-Warner at 103⅓ against 102¾; Allied Chemical & Dye at 203 against 199½; Sears Roebuck at 147⅓ against 147; Union Carbide & Carbon at 183 against 186¼; American Tel. & Tel. at 177⅓ against 179¾; General Electric at 161¾ against 164¼; American Can at 108 against 107¼; International Harvester at 289½ against 288⅓; International Nickel at 139¼ against 123; and Consolidated Gas at 765⅙ against 78⅓.

The railroad stocks were depressed more or less, except in the case of Rock Island. New York Central closed yesterday at 170¼ against 174 the previous Friday; Baltimore & Ohio at 110½ against 1125%; Chesapeake & Ohio at 180 against 182½; Canadian Pacific at 215 against 2165%; Atchison at 1925% against 191; Great Northern at 99¼ against 100½; Northern Pacific at 99% against 100%; Wabash at 78 against 81½; Union Pacific at 198 against 198½; Southern Pacific at 120½ against 122¾; New York Chicago & St. Louis at 122% against 124; Missouri Pacific at 70 against 71¾; St. Louis-San Francisco at 114 against 115½; St. Louis South

Western at 116 against 115; Milwaukee St. Paul pref. at  $50\frac{5}{8}$  against  $52\frac{1}{8}$ ; Rock Island at  $127\frac{1}{8}$  against  $126\frac{3}{4}$ ; and Missouri-Kansas & Texas at 39 against  $41\frac{3}{4}$ .

Insolvencies in the United States during September continued moderately more numerous, and with somewhat larger liabilities, as they did in some of the early months of 1928. R. G. Dun & Co. report 1,635 commercial defaults last month, as compared with 1,573 failures in September 1927, with an indebtedness in that month this year of \$33,956,686, against \$32,786,125 a year ago. The increase in the number of insolvencies for September this year over last year of 3.9% does not vary materially from the increase shown for six of the eight months of the year to date. Defaulted indebtedness last month exceeded the amount reported a year ago by 3.5%.

In only one other month this year were the liabilities reported larger than for the corresponding month of 1927 and that was August, but for that month the increase over last year was very heavy. On the other hand, liabilities for the other seven months of 1928, while quite high, were smaller than in the corresponding months of 1927, and for some of these seven months, the falling off this year amounted to a considerable sum. In August this year, an unusual number of very large failures added materially to the total indebtedness, and the same thing was true as to the first three months of 1928. In the nine months of the current year there were 18,038 commercial failures in the United States with total liabilities of \$373,193,555. These figures compare with 17,333 similar defaults during the first nine months of 1927, involving a total of \$396, 659,570 of defaulted indebtedness. The increase in the number of failures was 4.1%, while the liabilities showed a decrease of 5.9%.

Analysis of the September statement of mercantile defaults shows that the increase in the number of insolvencies last month was largely in the manufacturing division, while the small increase in the liabilities was in the divisions embracing trading concerns. There were in September this year 454 manufacturing failures with a total indebtedness of \$14,727,430; 1,073 trading defaults for \$13,567,064 and 108 insolvencies in the class embracing agents and brokers owing a total of \$5,662,192. In September 1927 there were 389 defaults in manufacturing lines for \$15,348,867; 1,083 trading failures owing \$12,051,799, and 101 in the third division of agents and brokers for a total of \$5,385,459. Among defaults in manufacturing lines, the increase in the number last month was mainly for the classes embracing manufactures of iron; manufactures of machinery and tools; in the lumber manufacturing division, which includes builders; clothing; manufacturers of hats and furs; also, of leather goods, the latter including shoes. On the other hand, there was a marked decrease this year in the class embracing printing and engraving, and slightly fewer defaults occurred among bakers and milling. As to liabilities, some large failures last month added to the indebtedness reported in the divisions embracing manufacturers of iron and of lumber, but the amounts were greatly reduced as compared with a year ago; also, for the leather manufacturing class, heavy failures this year increased the indebtedness shown for that division over September 1927. In the trading class there was a decrease last month in

the total number of defaults as previously noted, but of the fourteen leading divisions into which the statement is separated, embracing nearly 80% of the total number of all trading failures for the month, there were eight classifications in which an increase appeared over last year. The more important of these divisions included grocers; hotels and restaurants; dry goods dealers, and dealers in hardware. A small increase appears in defaults among general stores; furniture dealers; dealers in books and papers; also hats and furs. On the other hand, there were fewer insolvencies reported last month than a year ago among dealers in clothing; leather goods, the latter including shoes; dealers in drugs, and jewelers. As to liabilities in the trading division, the small increase in the amount reported for September this year is traceable mainly to the increase in the grocery class and to some large failures in the dry goods line. Among other classifications in trading lines the sums involved were not especially heavy.

Unlike August of this year and some of the earlier months of 1928, the large failures last month did not involve especially heavy totals. There were in all in September this year 53 insolvencies where the liabilities in each case involved a sum of \$100,000 or more, the total of the indebtedness reported being \$16,164,636. As is usual, the bulk of this amount belongs to the manufacturing division, for which there were 29 of the larger defaults, involving in all \$8,386,375. In the trading division 15 similar insolvencies were reported owing \$3,604,441, and among agents and brokers nine for \$4,173,820. Omitting from the total of all failures for September this year the larger defaults reported, there remained 1,583 other mercantile failures owing a total of \$17,792,050, which allows for an average indebtedness to insolvencies thus included of \$11,247 for each, a somewhat smaller amount than the monthly average shown of late.

European stock exchanges showed considerable irregularity the past week with trading on an increasing scale at most centers, but with sensitiveness to money rates apparently the primary influence. Much attention is being paid to the continued movement of gold from London to Continental centers and to the obvious tightness of money at New York. Hardly less important, however, is the influence exerted by the spectacle of continued enormous dealings in the American securities markets. The London Stock Exchange was active and cheerful all week, with interest centered in the industrial market. Irregularity developed in the first session of the week and was attributed to the financial difficulties of an important bank at Copenhagen. International shares were under pressure, but gilt-edged securities held firm. Oil shares reacted Monday after a sustained rise throughout the previous week. Profit taking in the industrials gave the list a ragged appearance Tuesday, but coal, iron and steel shares were in demand. The withdrawals of gold caused heaviness in the gilt-edged section Wednesday, even though money conditions remained comfortable. Oil shares received support in the midweek session and the buying gained in volume Thursday when the Burmah Company announced a proposal to buy a substantial share interest in Royal Home rails joined in the upward Dutch Shell. movement, while the gilt-edged section continued easier. In yesterday's market gramophone shares led an upsweep that was followed by oils and some specialties. Shipping shares eased in the trading, while artificial silk issues displayed a mixed trend. Home rails were again firmer and the gilt-edged division also was steady.

The Paris Bourse opened the week with animated trading after a fairly easy month-end settlement. Stimulus was derived from the optimistic reports from Wall Street and London. Beginning Tuesday, however, the market became largely a professional affair with a decidedly irregular tendency. Price levels dropped as a whole in Tuesday's trading, and the dullness and heaviness continued on Wednesday until the last fifteen minutes of trading, when a rally took place. Recovery followed on Thursday, with rumors again current regarding operations for foreign account. Trading, however, remained far below what might be termed an active market. The Berlin Boerse was characterized by the same mixed trend noted at the other markets, with upward and downward movements alternating almost daily. Firmness prevailed Monday with specialties showing the greatest activity, but the trend turned downward Tuesday on reports of strikes within Germany and of higher money rates at New York. A better tone and more active dealings followed Wednesday, only to be succeeded in subsequent sessions by renewed weakness. Specialties and textile shares were especially weak in Thursday's market.

Rejection by Washington on September 28 of the Anglo-French understanding as a basis of naval limitation was rapidly followed by unofficial expressions of relief and of optimism in London and Paris. The English and French alike appeared to be much relieved that Secretary Kellogg's note left open the door to further discussion of the difficult problem of naval disarmament, and a corresponding optimism pervaded public utterances. The American note was an identic one to London and Paris in reply to notes of August 1 and 3 respectively from those capitals giving summaries of the compromise agreement, which was to be submitted as a basis of discussion to the next meeting of the Preparatory Commission for the Disarmament Conference which the League of Nations purposes eventually to hold. Summaries were cabled also to Rome and Tokio, but neither the agreement nor the correspondence was made public, and in consequence a great deal of conjecture centered about the new accord. It was charged and never denied that a second or collateral agreement or understanding existed between the two Governments providing for British support of the French position on conscripts in land armies. It was also rumored that the Anglo-French entente had been revived in great part.

Since capital ships and large aircraft carriers are already limited under the Washington Treaty, it appears, the United States note said, "that the only classes of naval vessels which it is proposed to limit under the Franco-British draft agreement are cruisers of or below 10,000 tons, armed with guns of more than 6 inch and up to 8 inch calibre, and submarines of over 600 tons." As against this the note made clear the position of the United States, that any limitation of naval armament, to be effective, should apply to all classes of combatant vessels. The agreement, it was pointed out, provides no

destroyers or submarines of 600 tons or less, which the United States regards as "highly efficient fighting ships." The limitation of 10,000 ton cruisers, the note added, would be "the imposition of restrictions only on types peculiarly suited to the needs of the United States." The proposal was described as "even more objectionable," and "more unacceptable," than the British proposals advanced at the unsuccessful three-power conference at Geneva last year. Although earnestly and consistently seeking real reduction of naval armament, the United States Government, the note said, "cannot consent to proposals which would leave the door wide open to unlimited building of certain types of ships of a highly efficient combatant value and would impose restrictions only on types peculiarly suitable to American needs."

Recalling the proposals made by the American Government at the first session of the Preparatory Commission and at the Geneva Tri-partite Conference, the American note stated: "The purpose of these proposals was that there might be no competition between the three powers in the building of naval armament, that their respective navies should be maintained at the lowest level compatible with national security and should not be of the size and character to warrant the suspicion of aggressive intent, and, finally, that a wise economy dictates that further naval construction be kept to a minimum. The Government of the United States remains willing to use its best efforts to obtain a basis of further naval limitation satisfactory to all the naval powers, including those not represented at the three-power conference in Geneva, and is willing to take into consideration in any conference the special needs of France, Italy or any other naval power for the particular class of vessels deemed by them most suitable for their defense. This could be accomplished by permitting any of the powers to vary the percentage of tonnage in classes within the total tonnage; a certain percentage to be agreed upon. If there was an increase in one class of vessels it should be deducted from the tonnage to be used in other classes. A proposal along these lines made by France and discussed by the American and French representatives would be sympathetically considered by the United States. It expects on the part of others, however, similar consideration for its own needs. Unfortunately the Franco-British agreement appears to fulfill none of the conditions which, to the American Government, seem vital. It leaves unlimited a very large class of effective fighting ships, and this very fact would inevitably lead to a recrudescence of naval competition disastrous to national economy."

Careful reading of the American note in London caused real gratification in the British capital, according to a dispatch to the New York "Times," because of "the studied care with which the United States has kept the door open for further discussions of naval limitations, even while rejecting the Anglo-French compromise as a basis for them." British public, it was asserted, wants its naval expenses cut down, and it was suggested, moreover, that in any consideration of the compromise agreement it is necessary to recognize that the agreement does not represent what Great Britain wishes nor yet what France wishes, but merely the best compromise that the two countries had been able to limitation whatsoever on 6 inch gun cruisers or reach as a basis for future discussions. Especially

gratifying to Great Britain was the declared United States willingness to take into consideration the special needs of the various naval powers in any future discussion. "It is felt here," the dispatch stated, "that conferences of naval experts are proving sterile and that the problem of naval limitation is one requiring political settlement on a basis of international policy rather than on one of weighing gun against gun, ship against ship and class against class in contemplation of possible war which neither the British, the French nor the American people desire and which only blundering on the part of their Governments can bring about."

French opinion, according to a Paris dispatch to the "Times," was favorably impressed both by the form and the contents of the American note. It was considered in the French capital that several roads were left open for further discussion of the limitation of naval armaments in the manner established at the Washington Conference. The French, it was stated, "have never considered their joint program with England as a fixed and final scheme for armament limitation. Whatever London's point of view on it may be, it was here regarded as having more political than technical importance." Meanwhile, the dispatch added, the understanding with England presents too many advantages for France to be lightly abandened. "It belongs, in French opinion, to another category of agreements from any such as the American note proposes for limitation. Most important of all, it sanctions France's right to maintain her own army system and gives a promise that in Geneva disarmament discussions there will not be anything like the deadlock that threatened last year." France's problem, it was pointed out, is entirely political and entirely European. "When the understanding with Britain was made, it is stated here, there was no consideration whatever of its being directed in any way at America. tends always to regard her relations with America as never likely to present any problem at all. But she has other problems, and it was with a single eye on her European situation that she entered into this agreement with England."

Copies of the whole correspondence between London and Paris on the subject of naval limitation were handed Norman Armour, the American Charge d'Affaires in Paris last Saturday, according to a dispatch from Edwin L. James, Paris correspondent of the New York "Times." Mr. James stated that the correspondence thus transmitted to the United States Government concerned only naval affairs and not other matters on which Downing Street and the Quai d'Orsay had come together. In a London dispatch of October 1 to the same journal it was stated that the British and French Government had acted in concert in handing all relevant documents to the United States for study. It was stated, moreover, that the papers bearing on the naval agreement sent to Washington included those pertaining to Britain's acquiescence in France's standpoint concerning the computation of military reserves. The French Government, it appeared subsequently, is prepared to publish immediately all the essential parts of the correspondence and the agreement itself, but the British Government continued to oppose early pub-It was said in official British circles, Thursday, that the decision for publication may not be made until Parliament meets in November.

Premier Raymond Poincare of France made a declaration in regard to German reparations in the course of a speech at Chambery, a small village in the Department of Savoie, last Sunday, that was obviously intended to dispel any doubts that the French people might have as to the recent Geneva conferences on the Rhineland and reparations between Chancellor Hermann Mueller of Germany and the representatives of five former Allied nations. "If it is sought to review again the question of reparations," the Premier remarked, "we are obliged to recall that, to be fair, whatever settlement is made should guarantee us from our debtors, besides the total payment of what we owe our creditors, a clear indemnity for our war damages. And although prudence advises us not to give up our guarantees with a light heart, we have every hope and wish that future negotiations will be successful." words created the impression at Washington that the French Premier was predicating a reduction of reparations on a reduction of the French war debt to the United States. In any event, Secretary Mellon stated Monday that war debts had nothing to do with reparations and that there was, therefore, no reason to discuss such a question. Coolidge also, in reply to questions put to him Tuesday by press correspondents, reiterated that reparations are a separate and distinct problem from the war debts owed by European nations to American taxpayers. Reports of the President's remarks, cabled back to Paris, caused amazement in French official circles, according to a Paris dispatch of October 3 to the New York "Times." "For a moment," the dispatch said, "the Ministry of France considered the advisability of putting out an official statement in reply to the White House statement, putting this situation in definite form, but finally the Premier decided to stand on what he had said and to disregard what he looked upon as a misintepretation, which he believed had had its origin in American politics."

Political maneuvering in anticipation of British general elections in 1929 gave more than ordinary significance to the annual conferences of the two great opposing parties in Great Britain, the Conservatives and the Laborites, during the last ten days. The Conservative Party conference was begun at Yarmouth, September 27, Premier Stanley Baldwin making the opening address as the leader of his party. Speaking almost entirely on domestic policies, the Premier declared that the Government is content to make the campaign on the strength of its record. Indications of revolt within the party on the tariff issue were skillfully countered by the Premier, who refused to go before the country on the issue of protection. At the same time, he assured his fellow Conservatives that he proposed to simplify the method whereby individual industries might seek protection under the Safeguarding of Industries Act. Unemployment is still the national problem, Mr. Baldwin admitted, but he voiced the hope that progress would soon be made with the empire settlement scheme for promoting emigration and with the plans for shifting miners to other industries. The Premier indulged in a number of lively tilts at the Liberal and Labor Parties.

Representatives of the Labor Party gathered at Birmingham last Sunday for their annual rally and conference. Former Premier Ramsay MacDonald. in making the "keynote" speech of the campaign for his party, laid great emphasis on the foreign relations of Great Britain. He called on the Government to publish immediately all correspondence relating to the Anglo-French naval agreement. The party's manifesto on foreign affairs demands immediate unconditional withdrawal of all foreign troops from the Rhineland; a drastic reduction of British military expenditure; leadership by Great Britain in pushing the work of the Preparatory Conference on Disarmament; abandonment of any Anglo-French agreement; signature by Great Britain of the general act of arbitration, conciliation and judicial settlement which was adopted by the last Assembly of the League of Nations and abandonment of any reservations to the signature of the Kellogg Treaty. The party took action Monday to bar all Communists from its ranks. After three days of deliberation the party adopted, Wednesday, a massive political platform containing no less than 65 planks. The Labor conference also approved a special committee's report on the problems of banking and currency which includes virtual nationalization of the Bank of England. The report points out that already many of the functions of the Bank of England are quasi-Governmental, notwithstanding the fact that the bank is a private institution owned by shareholders. The Bank acts always, as a matter of practice, in co-operation with the Chancelolr of the Exchequer. The Labor Party report contends that the Bank constitution should be altered so as to bring the "Old Lady of Threadneedle Street" directly under public control and make its Governing Board responsible to the community and not to individuals. The Bank, it was said, should be taken over by a public corporation.

Almost all European countries with motion picture industries have inaugurated some form of restriction on the importation of American films within recent years and it now begins to appear that the American industry will meet with further difficulties in the distribution of films in Europe early in 1929. The possibility of making all the various restrictive decrees uniform is to be considered at a special meeting of the International Chamber of Commerce in Paris, on November 14. Representatives of all the film producing countries of the world probably will attend the session. "The injection of the influential International Chamber into the film problem is of particular importance to the American film industry," a Paris dispatch to the New York "Times" points out. "So numerous, so complicated and so transitory are the foreign restrictions that the time is rapidly approaching when a situation bordering upon chaos—certainly for the Americans—will be reached," the dispatch added. Competent American observers in the French capital are said to have expressed the opinion that the next film season, 1929-1930, looms as the most troublesome in the history of the American film industry in Europe. Chief among the factors on which this opinion is based are the results of the recent anti-trade-barrier conference at Geneva, which voted to abolish "frontier" import restrictions on films, but left the door open for "internal" restrictions.

Frontier restrictions are at present applied by Germany, Austria and Hungary, while Great Britain, France and Italy have what are considered to be internal restrictions. It would appear cer. President Coolidge. Costa Rica caused somewhat

tain, the "Times" dispatch states, that Germany, Austria, Hungary, Czechoslovakia, Spain and probably several other nations will institute some form of internal restriction not in contravention with the letter of the Geneva treaty. In Germany there is active agitation for a 50 per cent. quota on American exhibitors from July 1, next year, when the present system of limited censor licenses is expected to terminate. In Great Britain, it is said, the ten-year film quota law bids fair to reduce America's 90 per cent. participation in that market to 60 per cent. or under. In France also there is evidence that the present compromise arrangement agreed upon when Mr. Will Hays was in Paris last Spring will come up for reconsideration next year. "It will therefore be readily seen," the report concludes, "that unless the American industry, which to-day obtains about 25% of its total gross income from European markets, formulates a united policy and aggressively protects its rights it stands in danger of losing many millions of dollars revenue from a field which everyone agrees is merely in the development stage." British and Continental producers, a subsequent report indicated, will turn out about 500 pictures during 1928 at an aggregate cost of \$26,000,000 to \$27,000,000, compared with a production last year of 450 films which were made for \$17,000,000.

A serious movement against the newly established monarchical Government in Albania, smallest but not the least troublesome of the Balkan nations, was reported October 1 in the Vienna newspaper, "Politika." Ahmed Zogu, who was President of the Albanian Republic, was unanimously proclaimed King of that country on September 1, by the National Assembly in Tirana. The change to a monarchy had been heralded for some weeks previously by the official press agency of the Albanian Government, which reported "great demonstrations" on the part of the Albanian populace in favor of the coronation of Zogu. On being proclaimed King, Zogu announced that he would take the title "Scanderbeg III" at the official coronation late this year. Zogu as President was the subject of a number of conspiracies in which his life was threatened, and those familiar with the course of events in the little mountainous State were not inclined to think that his reign as King would be more peaceful. There is a tendency, for this reason, to accept as substantially accurate the Vienna reports of further disturbances, even though Vienna rumors regarding the Balkans are not always reliable. The "Politika" stated on Oct. 1 that Zogu was being closely guarded in his palace at Tirana, while Albanian and Italian police agents were trying to round up plotters against the new regime. Uncensored dispatches stated that 11 persons had been executed as conspirators in the seaport town of Durazzo, while 200 others had been arrested. The uprising against the throne is said to have begun in the northern part of the country, where the population is chiefly Catholic. Resentment has been caused, it is declared, by Zogu's Mohammedanism. A strict censorship is in effect on dispatches from the country.

High praise of the Monroe Doctrine was expressed by Senor Don Manuel Castro Quesada, the newly appointed Costa Rican Minister to Washington, upon presenting his credentials Tuesday to of a flurry in international councils last summer by addressing to the League of Nations an inquiry regarding its stand on the Monroe Doctrine. The League officials made a reply to the Central American State which was never published, but which apparently was satisfactory to the Government at San Jose. The impression that his country was hostile to the Monroe Doctrine was completely dispelled by the new Minister, who expressed the warm friendship of his Government for the United States. He referred particularly to the esteem in which his people hold distinguished Americans for their services as arbitrators of boundary and concession disputes. The United States, a Washington dispatch to the New York "Times" quoted him as saying, has rendered to his country "the greatest services throughout its entire history." The American people, he pointed out, has ever been the first to extend a helping hand in time of catastrophes in Costa Rica, where earthquakes have on occasion caused great damage.

"Numberless are the benefits for which Costa Rica is indebted to the generous American nation," Senor Quesada said. "Apart from the maintenance of its very existence, which, like that of the other Republics of the continent, is mainly due to the insuperable wall raised more than 100 years ago by President Monroe, we Costa Ricans have been able equitably to solve our boundary disputes, thanks to the just decisions of two distinguished Americans, President Cleveland and Chief Justice White." In reply, President Coolidge said in part: "I have noted with gratification the references which you are pleased to make to certain occasions upon which the Government of the United States, following its traditional policy of friendship toward all nations on this continent, has fortunately been able to render helpful services to Costa Rica. You may be sure, Mr. Minister, that in the future, as in the past, the United States will always be glad to extend the helpful hand of friendship to your country whenever such action will be appropriate and welcome."

Further clarification of the status of the Nanking Government in China and of the Mukden regime which rules over Manchuria was brought about late last week. In Washington the State Department admitted on Sept. 27 that it considers de jure recognition of the Nanking Government to have been involved in the conclusion of the treaty of last July 25, wherein China was granted tariff autonomy on a most favored nation basis. Legal experts of the Department had studied the question and had agreed that no other conclusion was possible, it was said. On the following day, Count Yasuya Uchida, Privy Councilor and former Foreign Minister of Japan, reached Washington on his way home from Europe to Japan. His mission, he stated frankly, was to explain to American officials the policy of the Japanese Government in Manchuria and to clear away any misunderstandings concerning the actions or motives of Japan in that part of Asia.

Japan, he said, desires only to protect its treaty rights and vested interests in Manchuria and is opposed to any policy of annexation or to the establishment of a protectorate there. Furthermore, he declared, Japan considers Manchuria an integral part of China and is pledged to the observance of the policy of the "open door" with equal opportunity for all. In a speech at New York Tuesday evening,

the eminent Japanese stated: "We can only watch patiently and wait for the emergence of a unified China and a stable and responsible Government out of these long years of turmoil. We are far from being hostile to the Nationalist movement. In fact, our people as a whole look with profound sympathy upon the suffering masses of China and are always ready to lend their support to any sincere movement which aims at the stabilization of China. We realize China's difficulties. Our friendship for China as a neighbor remains unchanged. We hope that ere long she will find a way to unity, peace and order." At Mukden, Manchuria, General Chang Hsueh-liang, hereditary ruler of the Three Eastern Provinces, made it clear on Sept. 27 that re-incorporation of Manchuria with China proper is one of his ideals.

The Hungarian National Bank on Oct. 1 raised its discount rate from 6% to 7% in order to check heavy borrowing. Otherwise no changes have been reported this week in discount rates by any of the central banks of Europe. Rates continue at 7% in Germany; 6½% in Austria; 5½% in Italy and Norway; 5% in Denmark and Madrid; 4½% in London, Holland and Sweden; 4% in Belgium, and 3½% in France and Switzerland. In London open market discounts are now 4½%4 3-16% for short bills, and 4¼% for long bills, against 4½%4 3-16% bor both on Friday of last week. Money on call in London yesterday was 3½%. At Paris open market discounts remain at 3¼% and in Switzerland at 3¾%%.

A loss in gold, of no small amount, and a further decline in the reserve ratio, are the features of this week's Bank of England statement, issued on Thurs-The loss in gold, which amounted to £4,978,079 and the increase in note circulation of £513,000 caused a loss in the reserve of gold and notes in the banking department of £5,492,000. The ratio of reserve to liabilities continued its downward climb, this week's ratio being 47.10% against 51.54% last week; two weeks ago the ratio was 53.18% and on Sept. 12 the percentage was 55.13%, which represents the highest ratio for several years. In the "deposit" items, public deposits rose £311,000 but "other" deposits dropped £1,295,000. Loans on Government securities gained £5,429,000 and loans on other securities fell off £910,000. The total of bullion held by the bank has been dropping recently and now stands at £168,226,578, in comparison with £176,584,000 on Sept. 12 when the gold holdings of the Bank of England were the largest in history. At this time last year the total was £151,178,562 and two years ago £154,865,287. Note circulation aggregate £135,007,000 in comparison with £136,-989,220 last year. The Bank's minimum rate of discount  $(4\frac{1}{2}\%)$  remains unchanged. Below we furnish comparisons of the various items of the Bank of England return for five years.

a includes, beginning with April 29 1925, £27,000,000 gold coin and bullion previously held as security for currency note issues and which was transferred to the Bank of England on the British Government's decision to return to gold standard.

b Beginning with the statement for April 29 1925, includes £27,000,000 of Bank of England notes issued in return for the same amount of gold coin and bullion held up to that time in redemption account of currency note issue.

In its statement for Sept. 29, the Bank of France reports an increase in note circulation of 1,641,000,000 francs raising the total to 62,654,259,145 francs, the highest ever recorded by the bank. This exceeds the previous high figure, attained on Sept. 1, by 470,-483,415 francs. Circulation last week amounted to 61,013,259,145 francs and for the week before 61,321,259,145 francs. On the other hand creditor current accounts dropped 90,000,000 francs and accounts and deposits fell 597,000,000 Gold holdings, which gained 94,288,101 francs during the week now aggregate 30,662,538,043 francs. French commercial bills discounted also rose 1,557,000,000 francs while credit balances abroad fell 293,043,337 francs, bills bought abroad 1,000,000 francs, and advances against securities 4,000,000 francs. A comparison of the various amounts of the bank's return for the past three weeks is shown below.

In its statement for the last week of September, the Bank of Germany reports an increase in note circulation of 730,084,000 marks, raising the total of that item to 4,830,152,000 marks. For the corresponding week last year circulation amounted to 4,182,435,000 marks and for the year before to 3,251,077,000 marks. On the other hand, other daily maturing obligations dropped 72,202,000 marks and other liabilities 2,531,000 marks. On the other side of the account gold and bullion rose 61,165,000 marks, bills of exchange and checks 554,793,000 marks, advances 67,477,000 marks and other assets 21,251,000 marks, while reserve in foreign currency dropped 8,449,000 marks, silver and other coin 22,599,000 marks and notes on other German banks 18,298,000 marks. Deposits abroad and investments remained unchanged. Below we furnish a comparison of the various items of the banks' return for the past three years:

The prolonged strain in the New York money market caused by the tremendous absorption of credit in securities speculation was accentuated early this week by the month end requirements. As a result, call money rose sharply in Monday's market from a renewal figure of 7% to a high of 10%, the latter figure duplicating the high for the year established July 2. Withdrawals for the day were approximately \$50,000,000. The strain was eased but slightly on Tuesday, the call rate fluctuating between 8% and 9%, while withdrawals again were heavy,

amounting to \$40,000,000. Beginning Wednesday, however, the rate sagged a little, dropping from 8% to 7% in the course of that day, while outside loans were reported at 6½% and 6%. On Thursday, Stock Exchange call loans moved from 7½% to 6½%, while outside funds were again available at 6%. In Friday's market the rate fluctuated between 7% and 6% on the Stock Exchange, closing at the lower figure. No outside loans were offered below this rate.

Two compilations of brokers loans against stock and bond collateral were published this week as already noted above and both were startling in their evidence of the mounting use of credit for stock market speculation. The monthly tabulation of the Stock Exchange authorities, released Tuesday evenning, showed an expansion in such borrowings by members of the Exchange for the month of September of \$462,202,280. The weekly compilation of the Federal Reserve Bank of New York showed an increase in loans made by or through the 45 reporting New York members banks of \$45,270,000 for the week ended Wednesday night. Both totals were new high records. Two gold engagements of a total value of \$7,500,000 were made at London during the week for shipment to New York. The actual movements of gold through New York for the week ended Wednesday were chiefly outward, the exports totaling \$2,194,000, while imports were \$82,000.

Dealing in detail with the rates from day to day the renewal charge for call loans on Monday was 7% but on new loans the rate spurted to 10%. On Tuesday, the renewal rate was marked up to 8%, but on other loans the rate was 8%. On Wednesday the renewal charge was again 8% but on new loans there was a drop to 7%. On Thursday the renewal rate was marked down to 71/2% and the general rate fell to  $6\frac{1}{2}\%$ . On Friday the renewal charge was 7%, while as the day advances new loans were negotiated at 6%. Time loan rates held firm and the quotation for 30, 60 and 90 day periods remains at  $7\frac{1}{4}\%$ , while the figure for four, five and six months maturities is still 7%. Commercial paper has shown a rising tendency and names of choice character maturing in four to six months are now quoted at  $5\frac{1}{2}$ @ $5\frac{3}{4}$ %, with the bulk of the business being transacted at the latter figure and with 90-day names of strong character selling at  $5\frac{1}{4}$ %. For names less well known the quotation is 6%. rate for New England mill paper is  $5\frac{1}{2}@5\frac{3}{4}\%$ .

The posted rates of the American Acceptance Council for prime bankers' acceptances eligible to purchase by the Federal Reserve banks have not been changed during the week and remain at  $4\frac{5}{8}\%$  bid and  $4\frac{1}{2}\%$  asked for bills running 30 days and also for bills running 60 and 90 days,  $4\frac{3}{4}\%$  bid and  $4\frac{5}{8}\%$  asked for 120 days, and 5% bid and  $4\frac{1}{8}\%$  asked for 150 and 180 days. The posted rate of the Acceptance Council for call loans against acceptances remained at  $5\frac{1}{2}\%$  throughout the whole week. Open market rates for acceptances have remained unchanged as follows:

Kansas City		June 7 1928	4
Dallas	434	May 7 1928	4
San Francisco		June 2 1928	1 4

Sterling exchange continued under pressure throughout the week and on Thursday touched a new low for the year when cable transfers sold down to 4.84 25-32, which was below the 1927 low of 4.84%. The range this week has been from  $4.84\ 13-32$  to  $4.84\frac{5}{8}$  for bankers' sight, compared with 4.84½ to 4.84¾ last week. The range for cable transfers has been from  $4.84\ 25-32\ \text{to}\ 4.85$ , compared with 4.84% to  $4.85\ 1-16$ a week ago. The market has been extremely dull. As during the past several weeks, the underlying causes have been largely of a seasonal character, with the pressure further accentuated because of the high money rates prevailing here. However, this week the easier tone in London money rates is described as an additional factor, as was also the recent decline in mark exchange. The "Wall Street Journal," commenting on the relation of mark exchange to the decline in sterling, said: "With marks at 23.831/2 or 23.84, the sterling-dollar rate was supported by German purchases of gold in London. With marks at 23.81½, the sterling-dollar rate could go lower without stimulating more German gold purchases in London, as the sterling-mark rate was below the point at which gold could move from London to Berlin. In other words, the point of support for sterling is the point at which any country can take gold from London. Last week it was about 4.84 15-16, as at the equivalent sterling-mark rate Germany found it possible to buy large sums of gold in London. Now that the sterling-mark rate does not permit gold to flow to Germany, the sterling-dollar rate found no support. A sterling rate at 4.84 13-16 makes it more profitable for Americans to import gold, and if the mark rate does not rally immediately, gold will undoubtedly flow to New York."

This week, as already noted, the call money rate in New York was inclined to be easier after Wednesday with the completion of shifting of balances incident to October 1st requirements. On Thursday the rate dropped to  $6\frac{1}{2}\%$  and yesterday to 6%. So long as call money in New York remains at 7% or higher and collateral time money above 7%, London bankers believe that there can be no lasting recovery in sterling. The present easier trend in the London money market further accentuates the difference, although this is believed to be a temporary phenomenon. It is considered highly anomalous that with sterling at gold export point discounts should remain easy in London. It is believed in banking circles that the Bank of England rate will continue unchanged unless the gold export movement to New York should threaten to exceed \$25,000,000.

This week the Bank of England shows a loss in gold holdings of £4,978,079, bringing the total down to £168,226,578. On Monday the Bank of England

sold £832,000 in sovereigns and exported £15,000 to Holland. On Tuesday the Bank sold £1,958,000 in gold bars. On Wednesday the Bank sold £521,000 in gold bars and released £500,000 in sovereigns to Switzerland. On Tuesday dispatches reached New York to the effect that Goldman, Sachs & Co. purchased for import to New York £500,000 in gold. This, it is understood, was part of the above sale of £1,958,000. The American Exchange Irving Trust Co. announced yesterday (October 5) that it had arranged for the importation of £1,000,000 in gold bars from London, for shipment on the steamship "Mauretania," and it is believed that other shipments of gold to New York are going forward on the "Mauretania." At the Port of New York the gold movement for the week September 27-October 3, inclusive, as reported by the Federal Reserve Bank of New York, consisted of imports of \$82,000, chiefly from Latin America. Gold exports totaled \$2,194,-000, of which \$2,031,000 was shipped to Italy, \$66,000 to Straits Settlements, \$49,000 to Mexico, and \$48,000 to Germany. Canadian exchange is weak and irregular. On Saturday last Montreal funds were at par, but throughout this week were at a discount ranging from 1-64 of 1% to 1-16 of 1%. The weakness in Canadian funds in New York is believed to be due chiefly to the flow of temporary funds for investment in the New York collateral loan market.

Referring to day-to-day rates, sterling on Saturday last experienced renewed pressure. Bankers' sight was 4.84 9-16@4.845/8; cable transfers, 4.84 15-16@4.85. On Monday the rate continued lower. The range was  $4.84\frac{1}{2}$ @ $4.84\frac{5}{8}$  for bankers' sight and  $4.84\frac{7}{8}$ @ 4.84 31-32 for cable transfers. On Tuesday the market was dull and inclined to ease. The range was 4.84½@4.84½ for bankers' sight and 4.84½@ 4.84 31-32 for cable transfers. On Wednesday the market was steady. Bankers' sight was 4.841/2@ 4.84 9-16; cable transfers, 4.84 \( \frac{1}{8} \) \( \text{@4.84 29-32.} \) On Thursday sterling went to a new low for the year. The range was 4.84 13-32@4.8455 for bankers' sight and 4.84 25-32@4.84 for cable transfers. On Friday the range was 4.84 7-16@4.8455 for bankers' sight and 4.84 13-16@4.84% for cable transfers. Closing quotations yesterday were 4.84½ for demand and 4.84 % for cable transfers. Commercial sight bills finished at 4.843/8; 60-day bills at 4.80 9-16; 90-day bills at 4.78 15-16; documents for payment (60 days) 4.80 9-16, and seven-day grain bills at 4.83 13-16. Cotton and grain for payment closed at 4.84%.

The Continental exchanges have been dull and have for the most part shown greater weakness than at any time in several weeks. The decline in German marks is the outstanding feature of the week. Although German interests purchased most of the gold available in London in the early part of the week, on Wednesday the mark declined to a point at which it is believed that Germany can no longer take gold from London until there is a recovery in the rate. Should the easier mark rate continue, it would enhance the chance that New York can obtain large sums of gold in London. Bankers believe, however, that the decline is temporary and results from recent heavy purchases of gold in London. It is believed that if the Reichsbank considered a cessation of gold imports desirable either because of internal considerations or because of Bank of England opinion in the matter, it could easily manipulate the mark rate

so as to make the gold imports unprofitable. Bankers point out that it is more than a coincidence that the decline in marks followed immediately after a hurried visit of President Schacht of the Reichsbank to Foreign exchange traders say that the London. Reichsbank could keep the mark rate below the sterling gold point by increasing its purchases of foreign balances. Foreign balances and gold are considered as reserves at the Reichsbank. The Reichsbank's purchases of foreign exchange could release the same amount of credit for domestic purposes as would the import of a similar amount of gold. This week the Reichsbank shows an increase of 61,165,000 marks in gold holdings, making the total 2,396,971,000 marks, compared with 1,852,097,000 marks a year ago. The Reichsbank's gold reserve has risen 274,000,000 in the past three months. This week, as noted above, a shipment of \$48,000 in gold was sent from New York to Germany. This makes eight successive shipments of approximately the same amount in as many weeks.

French francs have been inclined to weakness for several weeks past, but the quotable rate has been maintained through Bank of France operations in lifting the peg. This has been done chiefly to offset any possible outflow of gold from France to Germany. This week the Bank of France shows an increase in its gold holdings of 94,000,000 francs and a decrease in its sight balances abroad of 293,000,000 francs. Since June 1st the Bank of France has bought 1,700,-000,000 lire in gold francs from hoarders, equivalent to approximately \$63,000,000. It is believed that the actual hoards accumulated when the war began were large enough to admit of further acquisitions by the Bank, but a great quantity of the gold coin thus held after 1914 was melted down during and since the war and was illegally sold for bullion. It is thought in financial circles, however, that from 400,000,000 francs to 500,000,000 francs may yet be obtained. The Bank of France sales of exchange have been heavy in recent weeks. These sales have been necessary in order to support the franc rate.

Italian lire have been ruling much firmer than the other Continental currencies. This is due largely to the steady improvement in the Italian economic situation, to heavy immigrant remittances, and to the steady flow of American and South American funds to Italy for investment in securities. An index of the prosperous conditions in Italy is found in the increase of 1,700,000,000 lire in savings deposits which has occurred since the beginning of 1927. The Bank of Italy's gold reserve, which was around 2,500,000,000 in September 1926, has increased approximately 5,200,000,000 lire. Money continues fairly easy in Italian centres and stock markets are reported firm with a generally upward tendency.

The London check rate on Paris closed at 124.07 on Friday of this week, against 124.06 on Friday of last week. In New York sight bills on the French centre finished at 3.905/8, against 3.90 13-16 a week ago; cable transfers at 3.907/8, against 3.91 1-16, and commercial sight bills at 3.903/8, against 3.901/2. Antwerp belgas finished at 13.89 for checks and at 13.893/4 for cable transfers, as against 13.891/4 and 13.90 on Friday of last week. Final quotations for Berlin marks were 23.801/2 for checks and 23.811/2 for cable transfers, in comparison with 23.83 and 23.84 a week earlier. Italian lire closed at 5.235/8 for bankers' sight bills and at 5.237/8 for cable transfers, as against 5.223/4 and 5.23. Austrian schillings have not changed from 141/8. Exchange on Czechoslovakia

finished at 2.9615, against 2.9615; on Bucharest at 0.603/4, against 0.61; on Poland at 11.25, against 11.25, and on Finland at 2.52, against 2.52. Greek exchange closed at 1.29 for checks and at 1.291/2 for cable transfers, against 1.29 and 1.291/2.

The exchanges on the countries neutral during the war have been dull, ruling generally lower in sympathy with sterling and affected more by European transactions than by movements from this side. The guilder rate shows the greater weakness. This is partly a seasonal matter arising from the accumulation of grain and cotton bills in the Holland markets. However, much of the weakness in the guilder arises from transfers of funds from Amsterdam to London and Berlin, and doubtless to some extent to New York, owing to more attractive opportunities for employment than Holland affords at the present juncture. The Scandinavian exchanges, while ruling fractionally lower than a few weeks ago, are on the whole steady. Swedish exchange is the firmest of the three Scandinavians. Sweden has been importing gold from London and is regarded as one of the "unknown buyers" in London. The gold for Sweden is taken by the Riksbank. According to Swedish gold standard law, the import of gold into Sweden is permitted only to the Riksbank. object of this restriction is to safeguard the country against a repetition of its experience during the war, when it was flooded with gold. Denmark has been losing small amounts of gold to Germany in recent The fluctuations in the Scandinavian weeks. exchanges, however, are so slight as to be quite immaterial. London dispatches on Tuesday stated that the Danish National Bank has arranged to advance to depositors in the savings department of the Copenhagen Privatbank 50% of their deposits with pass books as security. Spanish pesetas have fluctuated more widely than any of the other neutrals. The peseta was on offer mostly in London on further unfavorable political reports from Spain. The drop in the peseta rate is the more singular considering that a strong consortium was organized a few weeks ago to preserve the rate from attack by either bear or bull operators in foreign exchange.

Bankers' sight on Amsterdam finished on Friday at 40.07½, against 40.09¾ on Friday of last week; cable transfers at 40.09½, against 40.11¾; and commercial sight bills at 40.05, against 40.06½. Swiss francs closed at 19.24 for bankers' sight bills and at 19.24¾ for cable transfers, in comparison with 19.23¾ and 19.24½ a week earlier. Copenhagen checks finished at 26.65 and cable transfers at 26.66, against 26.66 and 26.67. Checks on Sweden closed at 26.74 and cable transfers at 26.75, against 26.74 and 26.75, while checks on Norway finished at 26.64¾ and cable transfers at 26.65¾, against 26.65½ and 26.66½. Spanish pesetas closed at 16.26½ for checks and at 16.27½ for cable transfers, which compares with 16.47 and 16.48 a week earlier.

The South American exchanges have been dull. Argentine pesos have been under pressure and inclined to ease. On Saturday last in a dull market the Argentine peso went to a new low on the present movement, when cable transfers sold at 42.02, which is a very close approximation to the gold shipping point. Traders still feel, however, that little gold is likely to come from Argentina except that which is shipped by the Government in connection

with its debts to New York bankers. This feature of Argentine exchange was discussed here last week. Argentine paper pesos closed yesterday at 42 1-16 for checks, as compared with 42 1-16 on Friday of last week, and at 42½ for cable transfers, against 42½. Brazilian milreis finished at 11.94 for checks and at 11.97 for cable transfers, against 11.94 and 11.97. Chilean exchange closed at 12.10 for checks and at 12.15 for cable transfers, against 12½ and 12 3-16, and Peru at 3.99 for checks and at 4.00 for cable transfers, against 3.99 and 4.00.

The Far Eastern exchanges continue quiet and show little change from a week ago. The Chinese quotations are comparatively strong owing to a growing feeling of confidence in the political outlook which has a stimulating effect on business, with the result that Chinese centers continue to absorb silver, it would seem, as fast as it is offered from any There is nothing new of importance pertaining to the Japanese yen. The currency shows a weak undertone for reasons frequently stated here in recent weeks, the depressed state of business in several staple lines. The Chinese boycott of Japanese goods, and the export of capital for investment abroad. Preliminary estimates for Japanese foreign trade for the last ten days of September show exports amounting to 58,357,000 yen and imports of 47,577,000 yen, leaving an export balance of 10,-780,000 yen. Closing quotations for yen checks yesterday were 45.61@45%, against 45.80@46 on Friday of last week; Hong Kong closed at 50.05@  $50\frac{1}{4}$ , against  $49.90@50\frac{1}{8}$ ; Shanghai at  $64\frac{1}{8}@64\frac{1}{4}$ , against 635/8@63 11-16; Manila at 493/4, against 493/4; Singapore at 56 11-16@57, against 56 11-16@ 563/4; Bombay at 365/8, against 361/2, and Calcutta at 365/8, against 361/2.

Owing to a marked disinclination on the part of two or three leading institutions among the New York Clearing House banks to keep up compiling the figures for us, we find ourselves obliged to dis-

continue the publication of the table we have been giving for so many years showing the shipments and receipts of currency to and from the interior.

As the Sub-Treasury was taken over by the Federal Reserve Bank on Dec. 6 1920, it is also no longer possible to show the effect of Government operations in the Clearing House institutions. The Federal Reserve Bank of New York was creditor at the Clearing House each day as follows:

DAILY CREDIT BALANCES OF NEW YORK FEDERAL RESERVE BANK AT CLEARING HOUSE.

Saturday, Sept. 29.		Tuesday, Oct. 2.	Wednesd'y, Oct. 3.	Thursday, Oct. 4.	Friday, Oct. 5.	Aggregate for Week.
137.000.000	\$ 130,000,000	\$ 137 000 000	3 149,000,000	118 000 000	116 000 000	Cr.787.000.0

Note.—The feregoing heavy credits reflect the huge mass of checks which come to the New York Reserve bank from all parts of the country in the operation of the Federal Reserve System's par collection scheme. These large credit balances, however, reflect only a part of the Reserve Bank's operations with the Clearing House institutions, as only the items payable in New York City are represented in the daily balances. The large volume of checks on institutions located outside of New York are not accounted for in arriving at these balances, as such checks do not pass through the Clearing House but are deposited with the Federal Reserve Bank for collection for the account of the local Clearing House banks.

The following table indicates the amount of bullion in the principal European banks:

Banks of-		Oct. 5 1928.			Oct. 6 1927.	
Banks of-	Gold.	Silver.	Total.	Gold.	Silver.	Total.

a These are the gold holdings of the Bank of France as reported in the new form of statement. b Gold holdings of the Bank of Germany are exclusive of gold held abroad, the amount of which the present year is £4,281,300. c As of Oct. 7 1924 d Silver is now reported at only a trifling sum.

## The Death of Clarence W. Barron.

The death this week of Clarence W. Barron, publisher of the "Wall Street Journal," the Boston News Bureau and several other publications, removes from the world of financial journalism a distinguished and notable figure. Financial journalism in this country dates from the establishment of the "Commercial and Financial Chronicle" in July, 1865, by the late William B. Dana, immediately after the close of the Civil War. Mr. Dana set the standard high. Mr. Barron started his venture in the daily financial field 22 years later, in 1887, with the publication of the Boston "News Bureau." Mr. Barron had a unique personality which he succeeded in impressing upon the new publication and it quickly advanced to a position of importance in the financial world. It was not merely that Mr. Barron had mastered the art of collecting news and was untiring in gathering it, but that he knew how to present it in an interesting and graphic way—a way to compel attention.

It should not escape notice that Mr. Barron started his enterprise in Boston, not in New York. He did not enter the New York field, with the larger and wider opportunities it afforded, until fifteen years afterwards, in 1902. The financial world of Boston has always had something distinctive about it. Imbued with conservatism, which insured an adherence to sound principles, it yet possessed great energy and daring, which made it a willing agent in the support of ventures opening up new fields of endeavor. Many of the most important Western railroads had their origin in New England and were supported and carried through with New England brains and New England capital. The Chicago Bur-

lington & Quincy and the Atchison, Topeka & Santa Fe were pre-eminently New England enterprises financed in Boston and the Union Pacific largely so. The Mexican Central belongs in the same category. The men identified with these enterprises rank as the most eminent in the country's history. In these early days, New York had not yet assumed the prominence and the dominance it later did under the guidance and the aggressive force of the late J. P. Morgan.

Mr. Barron fitted well into this distinctive New England atmosphere and became an inseparable part of it. But he did not limit himself to the New England horizon. He gathered news-presented facts and figures-with reference to all the country's enterprises and all its various industries. To emphasize the fact that his primary purpose was to collect news and to present it in a truthful and unbiased way, the Boston "News Bureau" for very many years carried no advertisements whatever, which, of course, increased its hold upon its subscribers. It was not until its reputation was firmly established and confidence in its integrity so deeply rooted that no well informed person would be inclined to think that advertising matter would be allowed to influence its presentation of news, that the original policy not to accept advertisements at all was abandoned.

The experience and success attained in the publication of the Boston "News Bureau" naturally paved the way for Mr. Barron's entrance, through the acquisition of the "Wall Street Journal," into the New York field. This occurred in 1902, as already noted. He immediately impressed his personality on this publication, too, and by the employment of the same methods. He gave such complete and detailed reports regarding corporation affairs and regarding the country's industries that to any one in need of daily information of that kind, it became indispensable. Its editorial discussions likewise were broad and disinterested. The daily news slips of Dow, Jones & Co. were a part of the news dispensing service. Mr. Barron later extended his activities and established the Philadelphia "News Bureau," and more recently began publishing "Barron's," a financial weekly.

All these are publications of a high type and a high standard. In his writings, Mr. Barron had a style peculiarly his own. No one could take up a contribution of his without reading it through. It always held one's interest. Besides this, he had a wonderful capacity for work. While necessarily all that appears in the Barron publications carries much weight and influence, he never published anything for pecuniary gain. He never sought any personal advantage for himself. He never mentioned a fly-by-night scheme except to condemn it. Nor did he ever engage in promotion schemes of any kind. It should be said, too, that in the large news gathering force that he built up, he not only recognized merit, but tried in every way to develop it. He put every man on his mettle and tried to bring out the best in him. In brief, Mr. Barron was a distinct credit to the publishing world in which he occupied such a prominent part. The present Editor and owner of the "Chronicle" has been connected with the paper ever since he was a boy thirteen years of age, over half a century ago, and hence has been in a position to observe the course of affairs in

the countless number of other tributes that are coming from every quarter.

# American Policy Again Declared—The Poincare Speech and the Kellogg Note.

The thoughtful American may well wonder why it should be necessary, at this late day, for the United States to reaffirm, as it has affirmed many times before, its position in regard to reparations, Allied war debts, or the limitation of armaments. Over and over again, in language so plain as to admit, it would seem, of no possible misunderstanding, the American Government has made known its policy regarding each of these questions. It is difficult to see how European statesmen, accustomed to scrutinize with care the phraseology of official communications and to read them between the lines, can have failed to realize the full force and significance of what has been declared, or can have imagined that argument, importunity, or alternative suggestions would somehow induce the United States to take some different stand. Yet the events of the past few days have thrown all three of these controversial issues once more to the front, and apparently pushed further into the future the settlement of matters which Europe, quite as much as the United States, must certainly wish to see disposed of satisfactorily to all the parties concerned.

Last Sunday, in a speech at the unveiling of a war memorial at Chambery, Premier Poincare let fall certain remarks which seemed clearly to indicate that he still held to the old position of linking the payment of reparations with the settlement of the war debts. "If," he said, "it is sought to review again the question of reparations, we are obliged to recall that, to be fair, whatever settlement is made should guarantee us from our debtors, besides the total payment of what we owe our creditors, a clear indemnity for our war damages. And although prudence advises us not to give up our guarantees with a light heart, we have every hope and wish that future negotiations will be successful. Our dead call on us not to disavow their sacrifice or repudiate our victory, and to maintain the patrimony of France safe from foreign covetousness." An Associated Press dispatch from Paris on Monday, referring to the speech, stated that the speech "was interpreted to-day as again putting the question of a cut in reparations and a cut in the French debt squarely up to the United States;" summarized the declarations of the speech by saying that "the Premier reiterated the French policy that any reduction of Germany's reparation debt to the former Allies must be accompanied by a corresponding cut in the interallied debts to the United States," and added that "it is thought in American quarters that should the French Government remain adamant in such a policy it would be practically impossible to make real progress in future negotiations regarding reparations and evacuation of the Rhineland without the active participation of representatives of the United States in the discussion.

such a prominent part. The present Editor and owner of the "Chronicle" has been connected with the paper ever since he was a boy thirteen years of age, over half a century ago, and hence has been in a position to observe the course of affairs in the financial world. He is glad to add his tribute to

tions owed to France and the other Allies with war debts owed to this country by these European Governments. The President let it be known with some bluntness that once and for all, so far as he and the Administration were concerned, there was unqualified opposition here to the theory that the billions of dollars in war debts owing the United States by Europe and the billions owed by Germany were inseparable, and that the latter could not be revised downward without reduction of the former. The President considers the rights of the American taxpayer in the case are inviolable, and the taxpayer, in his opinion, should not be called upon to pay German reparations . . . In the President's opinion, settlement of the war debt question is a closed incident."

Mr. Coolidge's remarks appear to have created something of a sensation in France. A Paris dispatch to the New York "Times" on Wednesday represents M. Poincare as "getting one of the biggest surprises of his life" when he read the report of what Mr. Coolidge said. According to French officials, the correspondent stated, the Chambery speech "in no way suggests that France is seeking a reduction of her debts." All that Premier Poincare is interested in, it was insisted, is "in getting enough to pay France's creditors and enough in addition to pay for the damage inflicted in the war. On that position he is prepared to stand firmly in all negotiations with Germany, and leave it for those who are anxious that Germany should be let off from some of her payments to arrange it so that France will have to pay less. She will not ever under the present Premier be a petitioner for a reduction of her just debts to America and England."

If the officials thus quoted spoke with the authority of the Premier, the disclaimer must, of course, be accepted, and the Chambery speech classed with those unfortunate statements which even the most experienced statesmen sometimes make. The disclaimer itself, however, is far from clear, and its reference to "just" debts is curiously reminiscent of a contention which has been urged in France ever since the debt settlement had been under debate. The fact remains that the Mellon-Berenger agreement has not yet been ratified by the French Parliament, that there is as yet no indication that it will be ratified, and that M. Poincare's speech, however otherwise it may be interpreted, seems clearly to imply that ratification will be delayed until France shall have obtained from Germany, actually or by satisfactory assurance, an amount sufficient to enable it to pay such of its war debt as it considers "just." Under such circumstances, there was nothing for President Coolidge to do but to reiterate, as plainly as the resources of language allow, the absolute refusal of the United States to permit the reparations issue to enter into a discussion of the debt question. The debt incident, as President Coolidge bluntly declared, is closed.

Secretary Kellogg's identic note to Great Britain and France regarding the secret Anglo-French treaty, made public in extenso last Saturday, is another illustration of the necessity which the United States has been put to of repeating what it has already made indubitably clear. The note points out that the only classes of naval vessels which it is proposed to limit under the treaty are "cruisers of or below 10,000 tons, armed with guns of more than six-inch and up to eight-inch calibre, and sub-

marines of over 600 tons." The treaty "provides no limitation whatever on six-inch gun cruisers, or destroyers, or submarines of 600 tons or less," all of which types of craft are "highly efficient fighting ships." In practice, such limitations as the treaty contemplates would apply to vessels of a character most useful to the United States, and leave without limitation the types must useful to Great Britain and France. The United States, on the contrary, since the meeting of the three-Power Conference at Geneva, has insisted that limitation, if it is adopted at all, shall apply to all classes of naval vessels, and has advocated as a basis an agreement regarding the total tonnage to be allowed to each class of combatant vessels, the maximum tonnage of a unit vessel in each class, and also the maximum calibre of gun to be allowed. The Anglo-French treaty, when it does not run directly counter to the American program, evades it. As a basis for discussion by the Preparatory Commission of the League of Nations, accordingly, the treaty is manifestly unacceptable to the United States. What is more, while the American Government, as Mr. Kellogg remarks, "has no objection to any agreement between France and Great Britain which those countries think will be to their advantage and in the interest of limitation of armament," it "naturally cannot consent that such an agreement should be applied to the United States."

The Kellogg note, while couched in language familiarly described as "courteous but firm," does not close the door to further conference over disarmament. Its expression of entire willingness to give sympathetic consideration in any conference to "the special needs of France, Italy or any other naval Power for the particular class of vessels deemed by them most suitable for their defense," such needs to be met by "permitting any of the Powers to vary the percentage of tonnage in classes within the total tonnage, a certain percentage to be agreed upon," and "if there was an increase in one class of vessels it should be deducted from the tonnage to be used in other classes," appears to have aroused some interest in France, a similar proposal having been made by Paul Boncour in 1927 to the Preparatory Commission. The French Government is also reported to be ready to publish the text of the treaty, and has already communicated to the United States certain additional correspondence relating to it. The British Government, on the other hand, notwithstanding the implications of the Kellogg note, and the severe denunciation of its policy at the annual Labor Party Conference at Birmingham, is apparently indisposed to publish the treaty, at least until formal replies from Italy and Japan have been received.

The immediate result of the Kellogg note and M. Poincare's speech is a mixed and rather disquieting situation. The Anglo-French treaty, as a basis for general armament limitation, is apparently dead, since there will be no general limitation of naval armaments to which the United States does not agree. On the other hand, the remaining provisions of the secret treaty, generally believed to contain important agreements regarding military and air forces, are manifestly regarded by France as of so much importance as to make it unlikely that France and Great Britain will find themselves separated on the issue of naval armament, since the whole program of the treaty is apparently intended to stand

together. For all practical purposes, the treaty appears to have revived the Anglo-French entente, irrespective of any attitude that those two Governments may have taken, or may eventually take, towards naval armament. If any statement from an American source could end the persistent agitation in France for a linking of reparations and war debts, Mr. Coolidge's outspoken expressions would seem to have done so, but M. Poincare's speech, even with the disclaimer put forward at Paris, undoubtedly complicates the proposed settlement of reparations by laying down at least one hard and fast condition which such a settlement must meet. Already one hears intimations that the whole controversy will now drag along until after the November election here, and possibly until after the election which it is expected will take place in Great Britain early next summer. With such an outlook, the country is to be congratulated upon Secretary Kellogg's frank dissection of the real nature of the Anglo-French treaty, and his emphatic declaration that the United States will have nothing to do with it, and Mr. Coolidge's equally frank refusal to reopen the debt question or allow reparations and war debts to be joined. The only wonder is that, with the position of the United States on each of these issues already as clear as day, political leaders in Great Britain and France should have allowed themselves to evoke another statement of the American position.

### All-Steel Cars—and Farm Relief.

While we are working ourselves into a white heat over the "election," the general round of business continues in about the same ratio as last year. Of course, there are speculations as to the effect of elections on industry and trade. We do not consider these discussions. The best opinion on this subject is that year by year "politics" has less influence on business. What we shall attempt to do is to suggest the continued growth of industry independent of our quadrennial elections. Transportation affords a text. In 1902 a leading railroad system began a systematic study of passenger cars with a view to making them "stronger, safer and more comfortable." As a result of this study, a "steel car" was constructed at this company's works in 1906 and placed in use. And in 1907 an "all-steel" car was completed, "and since it took the rails, none but all-steel cars have been built for the railroad's service." Now, it is announced that on the completion of orders by the end of 1928 none but all-steel passenger cars will be in use on this great system of railroads-the Pennsylvania RR. Like progress, in varying degrees, has been at work on other lines. In this single item of railroad equipment, we have an example of the steady improvement of our railway service.

There may not seem to be any connection between this item of news and the repeated announcements that our political parties are organizing for the most "efficient campaign" ever conducted in the history of our national elections. But to our mind it suggests a truth of great importance to the people. And it is this: Under any and all elections and administrations the natural growth in our industrial advance goes on independent of politics and government. We do not say that industry is not influenced by partisan politics, and by the political principles advocated by the two parties, and by the success of

one or the other of the parties, and the consequent making and administration of laws. But there is inherent in all industry an advance that is independent of law and government in that it grows by the law of service, giving always the best for the least money. An Inter-State Commerce Commission as a government agency may make certain requirements, issue certain orders, compel certain restrictions, but within the conduct of the railroads there is a natural law which invites profits through improvements and which if there were no Commission would constitute a motive for betterment.

There is, to be sure, a political suggestion in this year as to combination of railroads into systems. But it attracts no attention and will cause little if any discussion. This of itself shows that the people in fact do not look to government for industrial welfare. Railroad systems are already forming independently. Politics does, however, introduce into platforms planks offering schemes of conduct to be fostered by law and government, as in the case of "farm relief" sought by so-called "agriculture." But the sober thought of the voters is not much moved thereby—and would not be at all save by the excitement of a campaign. What the people do know is that there is a constant progress in every division of industry by the existence of the law of better service as induced by the call of a developing want and need on the part of the patrons and people. Allsteel cars are on a par with the reaper-threshers now so rapidly appearing on Western farms. There is saving and service that at once attracts purchases and fosters production on the part of manufacturers. No party, no law, no government is needed to furnish forth this form of help.

When the people fully realize the folly of appealing to government for industrial help, they will turn to a study of the tendencies of legislative control of our common affairs and discover the insidious growth of bureaucracy. But that is not our present theme. How can laws that originate in political theories run parallel to the natural laws under which we live and cannot escape? When a dirtfarmer makes two leaves of grass to grow where one grew before, does the impulse, the initiative, the process come from the wisdom in Congressional halls? When the inventor, burning the midnight oil in some remote attic, hits on the idea of a cast iron stove to radiate heat more constantly than a smoky fireplace, does he gain his inspiration from a clause in the Constitution of the United States? And while ownership and distribution of power of our public utilities bids fair soon to become a matter of political controversy can a Federal law, in and of itself, control the flow of the stream or direct the flow of the electric current generated alone by a law of physics?

Nor does this unwearied search of mind depend upon "making money," though that is a legitimate and prime motive. Man is athirst for knowledge and eager for power. Millions of men working in thousands of occoupations actually enjoy their work and delight in proficiency. And associations of men are zestful to build the plant larger, to make it better, to devote it to higher human service. An "all-steel passenger car" is illustrative of a hundred voluntary improvements in railroad service. It is true that the evolution takes time. Profits cannot be disregarded because capital is worth its hire just as truly as labor. There are interruptions, failures,

competition, unforeseen inventions that compel immediate acceptance, obstacles that nature reveals only on trial—but the object is to build wisely and well and to round out a harmonious whole that can be enlarged, strengthened, and made more useful, and thus more profitable.

These advances, this constant growth, does not wait on State or national law. You may say that safety devices are ordered by the Inter-State Commerce Commission. But not one of these orders can anticipate the experience of railroad operation or be discovered before the service reveals their need and nature. Take any one of the recent inventions: the wireless, the radio, the television and movietone; by no stretch of the imagination can any of these be related to artificial laws. Nine times out of ten efforts at control coming after the fact are failures because blind interferences. It is, also, not alone the genius who discovers, it is the pull of the intellect of the workers, that brings forth the new invention. Factories now often offer prizes for suggestions as to plant efficiency? Why? Because it draws together the many minds by the thought that there are waste energies, lost motion, and ways to perfection that scores may indicate, thus pointing to concentration in one line.

Railroads! A tremendous industry—a long story of development! Aided at first, when the country traversed afforded scant returns, by grants of public lands; but for the rest, levelling the grades, increasing the strength and weight of the rails, introducing airbrakes and block signals, building new terminals, constructing better bridges, adding feeders, perfecting grade crossings, now completing the substitution of steel for wooden cars, meeting all the vicissitudes of monetary panics, losing actual control through a world war, paying millions on millions in damages and taxes, but asking and receiving no subsidies. Has the industry of agriculture any more right to governmental help than the railroads? Can an individualistic business by its very nature ever be organized or systematized to receive governmental assistance without by the very act destroying itself? Are all-steel cars bought by public funds; should plows, planters, harrows, reapers, threshers, be so bought? Is it the purpose of government under the Constitution to equalize the returns or profits between agriculture, transportation, manufacture, mining? If wheat happens to pay more than corn, must wheat "divvy" the profits with corn? There are some things in labor, industry and production that are as they are, and cannot essentially be altered by any law. We have all-steel cars without legislation!

## The Business of Politics.

In a democracy every citizen is supposed to be interested in the State. He supports it, maintains it, and reaps his reward in "liberty under law." But it cannot be said that he makes a business of politics. Once in four years, for a few months, he rouses from his lethargy; advocates party control; discusses the "issues"; makes a choice among "candidates"; votes more or less under the stress of excitement; acquiesces in the results of an election; and then sinks back into an individualism content to pursue his own affairs and gather the rewards of his own efforts. But there are those who do make a business of politics, and of these it may be said they gather their chief harvest in our quadrennial

elections. Despite our inner respect for our political system, we have come to apply words and phrases to those who continually take an interest in creating the machinery of government—we refer to them as "the politicians" and to their efforts as "the game"—"the great game of politics." And while sometimes we come near to a sneer when we refer to this class of "office-seekers" and "spoils-hunters," we must admit that though not seldom tainted by selfishness, their zeal far outruns our own, and they keep the "home fires burning" more candidly and strenuously than do we, who appear to take a superior stand during the heat and strife of a campaign.

The chief prize in politics is the Presidency. We hold the office in high esteem. We hold up the prize before our children as possibly within the reach of each of them. And when the four-year campaign rolls around, we see in the candidates of the parties the great "leaders" who shall guide us, as we hope, into peace and prosperity. But for millions of us, our duty is chiefly done when we vote. We are willing to devote our time and talents to elections for a six months. And for the rest we either forget, and work for our business enterprises; or, following the reports of Executive and Legislative action, we silently approve or loudly complain of what is done. "Democracy" is not quite a perpetual motion machine always turning out the best there is in law and government. Not a few would be willing to have a Presidential election once every six years, for they find the "turmoil" not to their taste and more or less distracting to "business." "professional politician" never sleeps; and, whatever else may be said of him, he works in season and out for the cause he most glorifies-"the good of the people." Perhaps his chief fault is that he demands the "loaves and fishes" as pay for his workbut he does not preach Fascism or Bolshevism, though he believes the "laborer is worthy of his

What we call "issues" in a campaign are valuable in proportion to their relation to the form, purpose, structure and functions of government. We have the form, structure and purpose of our representative democratic government. The functions may change somewhat to meet the passing of the years, the progress of the people, the changing environment, but not much. The Constitution, while not rigid or changeless, is fixed in that it embodies fundamental principles—such as the protection of individual rights and the liberty of conscience, of speech, of the press, of ownership of the rewards of labor. As a rule, "issues" are mere excrescences grown by theorists upon the body politic. It follows that when the campaign is over the issues disappear while the Government remains. Questions of section, class, industry, necessarily temporary, leave nothing in their wake, whether won or lost. How many enactments in furtherance of the issues of this campaign are probable or possible? There may be some change in the enforcement act of prohibition. But repeal or continuance is the only way to settle the "question." "Farm relief" is not properly within the range of law making (though a bureau may be created as in other instances of defiance of the Constitution), and is therefore not permanently before the people. Prohibition touches human rights and liberty because it already is in the Constitution by a lapse from the purpose and spirit of our government and will naturally reappear. But farm relief is no more pertinent to government than might be labor relief, capital relief, merchant relief, and so on, and unless we amend the Constitution or distort the functions of Government must disappear. "Immigration" is so well settled as to excite little more attention in the future than now. So that we have a campaign largely shaped and operated by politicians for politicians.

Under these conditions citizens (desirous of maincaining the government by the ballot, cast after study and meditation), cannot, therefore, by reason of an election campaign be either enlightened or energized in their permanent civic duties. They are the victims of their politicians. They cannot, and in fact do not, to any worthy extent, make a business of politics. The rumble and roar of the hustings, the necessity of voting one way or the other, the arousement of a contest, excites them, emotionalizes their judgment, and when all is over, "things go on much as before." This is not conducive to the preservation of the spirit of Constitutional liberty or of the fundamental form of the Government. An "issue" which cannot live through more than one campaign, unless distinctly stated and decisively settled, is a mere chimera. If, as so often said, we are in the present to choose between men, then the whole working of the machinery of the campaign is lost labor. Let the candidates present views, and retire. Unfortunately-perhaps this is too strong a term-in a Presidential campaign there are Governors, Senators and Representatives, Legislatures, and County tickets to be chosen. These candidates and their friends "work"the storm grows apace, then subsides in a day.

To the honor and glory of our government, it may truthfully be said that our people are satisfied with it so far as its form and purpose are concerned. Socialism is decadent, and Communism is despised. Being satisfied they seem to rest upon their rights. And campaigns that are based on opportunism, that drag in controversies over religion, that descend to "whispering," that appeal to sections and industries, that grow blatant over corruption in office as if it stamped corruption on parties the membership of which are profoundly honest, do not lead the way to continuous thought upon the ever present problem of governing ourselves wisely. They befuddle thought rather than clarify it. They lead the earnest citizen away from the duty of filling the interim between elections with constant study and reflection. He grows indifferent because he feels that elections as far as principles and policies are concerned are ineffectual.

Our schools, colleges and universities give more than six months once in four years to the study of Civil Government. But scholasticism is not patriotism. Academics are not popular contemplation. In the classroom the desire to embrace all historical knowledge does not admit of proper concentration on the facts existent before us. Theories of what ought to be are mushrooms that grow in a single semester. Concentration becomes diffused, and the "issues" born of the schools do not reach the people engaged in the unceasing bread-and-butter battle. It were better, when the election is over, that the voters meet and discuss the issues as presented in the campaign. This would be making a business of politics. It would pave the way for a future campaign on

fundamentals. It would prevent much wild legislation born of fulsome election promises and campaign expediencies. Campaigns that veer with every wind that blows are not conducive to the permanency of representative republican government. The higher the fever the longer the recuperation. Are our elections growing more dignified, thoughtful, pertinent to their purpose, or less?

## Business Accounting Amid the New Sciences.

The Chicago University Press has published a new book, Accounting Method, by C. R. Rorem, one of the University professors, aimed at improving methods of business at the source. The American business man of high or low degree would be irritated if anyone should assume that he does not know his business in all its details. Yet suddenly disclosed losses are constant. These extend from petty sums taken through a series of years, often with the excuse of intention to repay, to the revelation of the abduction of practically all the available assets by the aid of cooked reports, forgeries, or even by carefully planned plunder. To these is to be added the little regarded drying up of essential sustaining factors. Wonder is constant that there was not early discovery. Here is a book from competent hands, both expert and practical, intended to indicate how by a proper method of accounting such evils may be guarded against; and also that this method may be taught to as many young people as possible who are planning to enter a business life, or who may be sought for it.

Accounting is defined as a method of measuring and of interpreting the economic transactions of a specific enterprise. This is broader than mere bookkeeping, and is by no means limited to strictly business affairs. It has application to every conceivable occupation in which a man may desire to know the relative value of his work or his investment, and the immediate results so far as these can be measured in relation to their cost and appreciable returns. Measurement means exact record of all essential economic facts; and interpretation involves classification and comparison of the accounting data. It is more than the familiar system of double entry, and it supplies information for discriminating in values, and the possibility of administrative control. The extent and variety of the information may vary with the particular enterprise and its relation to individuals. The aim is precise quantitative information, whatever the activity, whether producing, purchasing, marketing, financing, or personnel, these as related to the profit of the business or of an organization, charity, lodge, library, church, school, hospital, for guiding and controlling its activity. It is concerned with all sources of income and expenditure.

In the business of the State and all forms of organized public service, it is essential for information and control, as it is also in supervising chartered organizations, railroads, banks, trade corporations, &c. It provides permanent records as well as immediate information. Modern business is often so extensive and complex that no one person is competent to supervise and direct it all. In its departments it must have responsible heads, and they and their departments must present records giving complete information. Private business also often involves a variety of transactions, continuity of direction, and well enforced control, the lack of which only too often means loss, if not disaster. Diversity

of method and form of accounting, for example, in a city, a railway, a great factory, even a university, or a co-operative marketing organization, or labor union, shows how desirable such a system is, not only that the responsible heads may know what is required, but that men having to direct any department may have the same accurate knowledge.

Accounting differs from statistics in that accounting usually limits its measuring of economic phenomena to the facts which can be expressed in terms of money. Statistics deals with them in any aspect, and may present but one portion of an enterprise, or the entire economic order of which it is a part. The events which change the status of an enterprise, such as the investment of funds, purchase of materials, payment of wages, sale of merchandise, or use of supplies in manufacturing operations, one and all, are the concern of the quantitative method which characterizes real accounting. The different elements involved, and they are even more than those here suggested, indicate the different measures to be applied. It may be value in food, furniture, labor, what you will. The dollar may be the unit of measure in exchange value, but it does not indicate the loyalty of an employee, the power of a motor, the heat of a blast furnace, yet these may be determinative in financial success. Failure also in applying any standard of measure may make it valueless. The purpose of the measure likewise conditions its value, as the use to which the article or the process is to be put may vitiate any ordinary estimate.

Consequently data need to be summarized to show the condition at different times or with reference to different use. Various devices, graphic and tabular serve for this, though tabular reports are most in use. Valuation with reference to these uses and to possibility of renewal enters into accounting interpretation. Double-entry bookkeeping in business transactions with direct balance sheet of financial results is common, but much more is often necessary, and full details of this are given covering expense, credit and debit accounts, and the use of standard and specialized journals with their recent Partnership and corporation acimprovements. counting, valuation of assets, investments, liabilities, measurement of income, expense and profit, are taken up in different chapters of the book, and with comparative balance sheets and the administrative use of the data of cost and the method of their use, are fully described.

The last chapter deals with the special application of accounting to social control of economic activity, as this relates to Government, to non-profit institutions, public utilities of all kinds, and to groups of private enterprises when joined for increased activity and profit. This concerns the business man in his larger relations.

The Government is in fact the agent of the citizens. It is far more than a custodian with a few simple duties of collecting and using or distributing certain funds. Nor is it created primarily to increase its own wealth. It collects certain money to be used for certain definite purposes. Its scope is fixed in its creation or by legislative action. Each fund has a distinct entity and must be used and accounted for in that relation. Fund accounting is therefore the core of Governmental accounting. The records must show the origin, course and application of the fund. Usually they do not tell how it was spent, but that is coming to be demanded that | bullion in its vaults. The panics of 1825 and 1837 provoked

the administration may be judged. The efficiency of departments or processes is compared, establishing standards and fixing responsibility.

Non-profit institutions and public service corporations have become so large and so numerous that their accounts are required to be almost as elaborate as private business. The Inter-State Commerce Commission, for instance, has been given authority to require more than reports of revenue and expenses, and also to prescribe a uniform classification of accounts and to require its adoption. The Transportation Act of 1920 empowers the Commission to determine a fair return. The Federal Trade Commission, created in 1914, is empowered to examine the organization, management and conduct of partnership corporations and the like to prevent their using unfair methods of competition, and has published for their benefit various new systems of accounting in order to record and secure this result. Similar private enterprises have found it desirable to enlarge the scope of their methods of account in order to obtain improved internal administration as well as better relations with the public and escape from cut-throat competition arising largely from ignorance of actual costs. The U.S. Chamber of Commerce has advocated these methods of accounting and has issued various bulletins on "Uniform Cost Accounting in Trade Associations." It says that probably 200 of these associations have made attempts to interest their members in uniform systems of accounting.

All this points to the unique position now occupied by the accountant, both public and private, and the interest which every business man has in the subject. If accounting is in fact a matter of "economic control," it cannot be disregarded in any business, large or small. As it comes to be so understood by the public, we shall not have business corporations so often suddenly collapsing, or dragged into court, senior partners aghast at what has been brought to light or occurred since their retiring, the defalcation of men and of houses far above suspicion, astounding undetected fraud, and privates estates in impossible condition when presented for probate, as these from time to time now are seen. Accounting ought not to be thought so little practical or so difficult of understanding that it should not be heeded, or thought only a matter for the few.

As our author says: "Accounting may be regarded as part of a complete education for the purpose of living, as well as for making a living; it is possible that some day it will be looked upon as a necessary equipment for a citizen who wishes to play his proper role in a democratic society."

## Reserve Bank Notes and Business-A Suggestion.

Security Building, St. Louis, Mo., Sept. 20 1928.

Editor of the Commercial and Financial Chronicle, New York City, New York.

Dear Sir .- In 1825 the Bank of England performed two posit and discount. In the former character it provided a currency more convenient than gold for ordinary cash transactions, and in the latter received and loaned the credits of its depositors. Prior to 1844 it had been the practice of the Bank to merge or mingle these two functions, and in its effort to aid merchants to the full extent of its power, to use notes sometimes without regard for the amount of a parliamentary inquiry into the causes of these crises, and as a result of its hearings the Committee reached the following conclusions:

A paper currency in order to serve successfully as a substitute for gold must not only at all times be convertible into gold but vary in amount precisely as the circulation would have varied if it had been metallic.

If the gold in the Bank is decreasing, a corresponding decrease in its notes should be accomplished.

The observance of this principle is incompatible with the use of notes to augment the lending power of the Bank.

In support of its conclusions, the Committee submitted the following considerations.\* Where a gold currency only is used, the stock of gold in the various countries having commercial relations will vary from time to time in conformity with the general level of local prices as compared with prices elsewhere; that is, gold will tend to flow from a country where prices are high and capital is cheap to a country where the contrary is true, and to return under Such fluctuations ought not to be opposite conditions. interfered with, because it is advantageous to all concerned to buy where goods are relatively cheap and gold is abundant and to sell where the contrary is true. Money is after all nothing but a commodity, and the best use that can be made of it is to exchange it for relatively cheap goods. So only can the level of international prices be maintained in proper equilibrium and so only can each country retain its proper amount of currency.

To substitute notes for outflowing gold is to maintain prices and prevent the return of the gold; and if such substitution be carried too far, suspension of specie payments must follow. In this connection the Committee pointed out that before the panics of 1825 and 1837 the stock of gold in the bank had become so low as to threaten the convertibility of its notes, and the bank was compelled in one instance to borrow gold from France. The Committee therefore recommended that where gold is leaving the country, a corresponding reduction be made in the paper currency.

To this view it was objected that if notes be not used to supply the place of outgoing gold at a time when the business of a country requires increasing credits, the banks will be compelled to withhold assistance from business when it is most needed and so fail in their public duty.

The Committee frankly admitted that such a restriction of notes to the gold on hand might have the effect suggested, but insisted that periods of excitement, rising prices and ever-trading ought not to be encouraged, and if the restriction tended to prevent or arrest the progress of such over-trading, it ought not on that account to be deprecated.

The argument of the Committee was approved by parliament and its recommendations were embodied in the Peel Act of 1844.

The Reserve banks are banks of issue and deposit. If the considerations which prompted the Peel Act be sound, they also should be conducted in accordance with the principles upon which the act rests. Yet the Reserve Act seems to contemplate, and it has been the practice of the Reserve banks to do, precisely what the Peel Act forbids. So we are forced to reconsider the questions involved.

With respect to the propositions laid down by the Committee, there should be no controversy. Our own history confirms them. For a hundred years our State banks used notes to supplement their lending resources, and always with the same result. The notes added to the excitement of the moment and a collapse, repudiation, insolvency and prostration followed. During the recent war a like use of notes was made by all the nations. Put out in great quantities, they inflated prices, stimulated industry, induced delirium and then a general collapse. Pound sterling notes were worth \$3.19, francs 4, marks 4 and lira 3 cents, in 1919. The depression which followed the war is too notorious to require discussion. Our own banks, less foolish perhaps, while maintaining specie payments with the fugitive gold of Europe, put out two and a half times as many notes as the gold dollars on hand. Prices advanced 100%, the cost of living became excessive, buying was arrested and a forced liquidation, a violent collapse and general disaster followed.

The objection urged against the adoption of the Peel act is not less foolish now than it was then. Every thoughtful man knows that prosperous trade provides its own credits. Under such circumstances, deposits always increase. they do not, something is wrong. Declining deposits and rising discounts are proof positive that over-trading has gone too far, and goods bought or made can not be disposed of at cost. To use notes to supplement the lending resources of the banks is the worst possible policy, because it facilitates borrowing when paying is becoming increasingly difficult: and must ultimately result in insolvency. It did in 1919-1921. It will always do so. No sort of banking can prevent over-trading. The utmost banks can do is to restrain it. The best restraint, the only effective check within reach is afforded by the limited resources of the banks. If they can not lend, foolish traders cannot borrow.

To-day trade is active and profitable, prices advance, merchants borrow to buy and sell to pay, and deposits and discounts rise ratably; to-morrow trade is arrested, goods cannot be disposed of, discounts increase, deposits fall, production is curtailed, workmen are discharged, and prostration follows. Such fluctuations occurred before and after the Civil War, when banks used notes and when they did not. Always the issue of notes to help trade under such circumstances resulted in disaster. It did in 1921.

To-day the Reserve banks seem to have no policy and to be guided by no principles. During the speculative mania of 1928, although \$500,000,000 of gold left the country, they made no corresponding reduction in their notes. Their efforts to control speculation during the current year seem to have been fruitless. They have not checked the flow of credit to Wall Street. Between June 30 1927 and June 30 1928 the loans and investments of the 8,929 Reserve member banks increased \$2,500,000,000, and during the same period their demand deposits declined \$59,000,000.

Were these investments and discounts prudent? If not, should the Reserve banks, assuming they are authorized to do so, issue notes to rescue them? If they do, what should be the consequences? To borrow and buy a stock or bond worth \$1,000 for \$1,050, is to confront a loss from which the investor cannot be rescued, and it is foolish to attempt to do so. It is equally true that to buy a commodity for more than the market will pay for it, is to invite loss; yet in the latter case the reserve banks are expected to lend help, and as they have no other resources they must resort to notes for the purpose if they attempt to do so.

I know that in the current year the Reserve banks have refrained from such indiscretion, yet in 1918-1919 they did not, and the public is to-day firmly convinced that it will somehow be rescued by them, however daringly imprudent its ventures.

The old rule, patiently and laboriously arrived at, which has been verified by all subsequent experience, is a better guide than any visionary scheme of benevolence. Notes should never be used to supplement the lending resources of the banks, but should be and remain at all times as nearly warehouse receipts or certificates of deposit as the exigencies of the moment permit.

It is true that these conclusions seem to have been overthrown by the events which followed the adoption of the Act of 1844; for in 1846, 1857 and 1866 the government found it necessary to suspend the restriction of the act and the panics of those years were instantly arrested by the generous use of notes; but the exceptions prove the rule. If notes had been put out prior to the panics to supplement the resources of the banks in the periods of over-trading which resulted in the panics, they could not have been used effectively afterwards.

The Reserve banks are not bound to issue notes. They may withhold them for emergencies and compel the member banks to be prudent at the right time. They should let business alone and compel it to rely upon the credits it creates. If they wait until these shall have been exhausted and the member banks shall have applied all the pressure the occasion requires; if they will but stand by until all proper expedients shall have been tried and failed, and then use notes to check the fear that follows, their intervention will be at once timely and helpful.

Such was the practice of the banks prior to 1913. At times they were overwhelmed by the tide of speculation,

yet by resort to Clearing House certificates, confidence was speedily restored. The notes put out by the Bank of England in 1846, 1857 and 1866 answered the same purpose. But these notes and certificates carried a high rate of interest and were retired as soon as the crisis had passed. Reserve notes properly used, temporarily, at high rates, and then retired, would be equally effective. They should not be otherwise used except to provide a more convenient currency than gold.

I have entered upon this discussion not for the purpose of criticising the Reserve System, but to show the absurdity of the prevailing notion that it is its duty to help men to folly Notes should be reserved for emergencies. So only can they be of service to the community. The restriction of the Act of 1844 was wise. The policy it suggests should be adopted by the Reserve banks. The adoption of such a policy would at once simplify the operations of the Reserve Banks and relieve them of responsibilities which can not safely be entrusted to anybody, much less to banks having a motive to make money by the sale of artificial credit.

I. H. LIONBERGER.

## Plight of Small Borrowers—Senator Pine Protests to Federal Reserve Board.

Editorial Arrice in New York "Journal of Commerce" Sept. 24 1928.

Senator Pine of Oklahoma charges that the small banks of the farming districts are being "cleaned out" by the bank examiners. He is protesting to the Reserve Board and the Treasury against the continuance of policies which in his opinion are forcing local banks to place their funds and make their loans in other parts of the country. The result, according to Senator Pine, is that local deposits that should be available for local borrowers are transferred to New York and other centers to be used in the stock market or else they are placed in commercial paper or employed in direct purchases of stocks and bonds.

Such criticisms probably do scant justice to the bank exminers, who no doubt find themselves confronted with many unpleasant but necessary duties involved in the elimination from bank port-folios of nonliquid paper. Their zeal instead of being excessive is more likely to prove inadequate to the task set them. Nevertheless the charges made direct public attention to a situation that demands serious consideration. Whatever the reasons, whether due to officious supervision or voluntary action, the resources of many banks in rural regions are finding a large and growing employment outside the districts which they are supposed to serve. Large numbers of banks assert that the funds in their possession are too great to find profitable local employment under safe conditions on terms that are acceptable to a commercial bank. In some sections of the United States this is without question the situation and, under any circumstances, a judicious amount of outside investment in securities and in commercial paper is essential in the interests of safety, as a guarantee against those local catastrophes and specialized misfortunes that often affect the credit standing of good and bad risks alike.

When, however, the trend away from home to the financial centers becomes so pronounced as to deprive local borrowers in good standing of the credit accommodations that they have in the past been accustomed to obtain, a legitimate cause of complaint arises. Senator Pine's protest is based upon the belief that this is the situation in his own State, but his disapproval is aimed at examiners, not at the banks themselves. It is not necessary, however, to envisage all country banks as victims of Government examiners in order to understand why their funds are going into securities sold to them by persuasive investment houses with active selling agencies. Neither is it difficult to comprehend why the rates of interest ruling in the call market to-day lure the resources of rural banks to New York.

Although the cityward trend of country bank funds is in part due to temporary causes, the movement as a whole has been a development of steady growth, finding counterparts in the conditions that prevail in other countries. Everywhere—in Europe as in the United States—there is deep dissatisfaction with the failure of the banks and credit agencies to supply the legitimate needs of small industries and of agricultural borrowers. On the Continent the negected state of these applicants for credit is attributed to

the centralization of banking facilities in the large centers combined with a tendency to direct branch operations from those centers with too little feeling of responsibility for local needs. The chief virtue enshrined in the midst of the many admitted defects of our independent system of non-branch banking has always been considered to be the better provision for local credit needs afforded by the existence of local banks.

If such banks do not recognize any responsibility for meeting the demands of local customers, if they transfer their resources to other districts, moving them in search of profits, on a scale not required in the interests of sound diversification, this supposed peculiar efficacy becomes a myth and our banking organization becomes a legitimate object of criticism.

# Views on Business Expressed by Bankers at A. B. A. Convention—President Preston Finds Present Era One of "Reasonably Well Distributed Prosperity."

Bankers gathering at Philadelphia from all parts of the country for the 54th annual convention of the American Bankers Association were asked for their individual views on the business outlook. A number of officers of the Association and delegates to the convention expressed themselves as follows:

Thomas R. Preston, President Hamilton National Bank, Chattanooga, Tenn., President American Bankers Association:

Any comment on the business situation must take into consideration the fact that we have a very different economic panorama to consider than only a few years ago. I do not mean to imply that fundamental economic princi les have changed, but the dimensions of many phases of business through which these princi les work are very much changed. The reduced value of the dollar means that it takes numerically more than before to do the same amount of work and we therefore must get used to larger financial figures. Again, in many fields of commerce and industry larger business units are proving increasingly effective and are being built up through mergers and enlargements of capital.

Yet again, a larger proportion of economic enterprise is in the corporate form than formerly and this had led to larger supplies of securities. At the same time more people are familiar with corporate securities both through investing and through employment by corporations which have also largely fostered employee investment in them. All these factors have led to larger volumes of transactions in the securities markets and the application of greater volumes of credit for this purpose than when securities and investors were fewer.

So fast have changes come about that many observers have become startled or even alarmed at the magnitude of our business figures to-day. But what would have been inflation under former conditions to-day largely represent the normal dimensions of these larger times.

I believe the nation is economically sound in virtually all departments. Agricultural prospects are good; industry and employment, except in one or two lines, are active and commerce is vigorous. Inventories of goods are not swollen, and although prices generally are somewhat higher than a year ago, I do not think they have reached the point of inflation.

The stock market presents a mixture of sound and unsound speculation, and it is to be hoped the better phase will prevail. Interest rates are high because of the very active competitive demand that has developed coincidentally with the shrinkage of our reserves through gold exports, but there is as yet no actual money stringency, and I believe the supply of credit will be adequate to carry on the nation's fall business. The political campaign has not been an unsettling influence in business.

I feel that the present era may be considered one of reasonably well distributed prosperity and that the year will continue along the same lines.

#### Craig B. Hazlewood, Vice-President Union Trust Co., Chicago, First Vice-President American Bankers Association:

The present credit situation is the result of changes in fundamental factors and is not simply an artificial situation. Although it is true that it possesses some serious possibilities, there is no doubt but that normal conditions can be restored without checking the good business to which we have become accustomed in this country. Fortunately, the tightening of money rates has not depressed general business up to this time, nor have we seen inflation in the prices of consumers' goods. With the exercise of the proper degree of caution by the banks of the country, and with the fundamental soundness and flexibility of our Fedeal Reserve System, we should be able to smooth out any unevenness in the present credit situation.

#### John G. Lonsdale, President National Bank of Commerce, St. Louis, Second Vice-President American Bankers Association:

Conditions appear favorable for increased trade and extended industrial activity during the fall months of this year, due chiefly to the new wealth produced by agriculture, the basic industry. Virtually all sections of the nation have shared in excellent crops, records having been broken in many localities. Corn production has reached a new peak; wheat generally has exceeded expectations; cotton at this writing has favorable prospects; there is an abundance of forage crops, fruits and vegetables, due to favorable weather; dairying is experiencing a profitable era, and livestock and produce are paying good returns. The increased purchasing power of the farmer is already being reflected in many lines and should extend eventually to virtually all forms of business.

Other favorable economic factors, too, appear in the picture—such as moderate inventories, sustained building operations, activity in the iron and steel business and automobile manufacture, but the chief consideration is the improved conditions of agriculture.

With the banking situation fundamentally sound, it appears there will be ample credit available for seasonal demands. Firm money rates may retard some business activity but it is anticipated that this will be a minor influence in comparison with the demand resulting from low inventories and an increased agricultural purchasing power. It would appear then that the

last six months of 1928 should set a relatively better mark than the first half of the year and a distinctly better mark than the second half of 1927.

W. S. McLucas, Chairman of Board, Commerce Trust Co., Kansas City, Mo., President Trust Company Division, American Bankers Association:

In the Kansas City trade territory and in the West generally conditions are fairly prosperous. Taken as a whole, we probably have the most abundant crops on record and I can see no reason why fairly good conditions should not continue.

Credit conditions generally are more satisfectory than for many years past and our banks are easily able to take care of the requirements of our customers. It is, however, the view of many who have considered this question from the angle of the United States generally that there is food for serious thought in our enormous reduction in gold supply, when coupled with the large increase in discounts with the Federal Reserve Banks and other banks, in the face of relatively small increase in deposits. Since 1924 a large proportion of the funds of our banks has gone into stock exchange loans, bonds, securities and commercial paper. The discussion in banking circles concerning the proper ratio of such use of bank funds is attracting consideration of all bankers.

Credit has been extended in extraordinary proportions and more individuals have available credit of one kind or another to-day than ever before. That there is now an over-extension of credit in securities, as well as in the distribution of merchandise, is a reasonable conclusion and men administering the financial affairs of the country have a great responsibility for maintaining a proper balance in use of available funds.

## R. S. Hecht, President Hibernia Bank & Trust Co., New

The credit situation in the South is sound, but total bank loans are the highest they have been in over five years. Deposits are substantially lower than at the beginning of the year, and many millions have been withdrawn by individuals and corporations to be loaned out on call in New York.

Crops are promising, but somewhat late. As a consequence country bank borrowings are heavier than usual at this season. Fall requirements of trade and industry are just about normal, and the higher rates prevailing do not appear to have been harmful to business generally.

As elsewhere the main expansion of loans has been largely on the class of those secured by stocks, bonds and other collateral.

At the moment there are no signs that money in our section will become appreciably easier before the end of the year.

Thornton Cooke, President Columbia National Bank, Kansas City, Mo.:

The Middle West is looking forward to a prosperous fall and winter. The yields of wheat and corn are both exceptional and while grain prices are lower than a year ago most farmers will nevertheless have excellent profits for their year's work. The supply of hogs is below normal, and of cattle there is a distinct shortage, but prices of both are high and live stock men have made good money. As a result there is a much better feeling in the business world, shared by merchants, manufacturers and bankers

The only misgiving one hears expressed arises from the strain upon credit caused by security operations in New York. As we of the West view it, debt is still debt no matter how vast the scale. When our farmers try to carry their wheat and live stock too long on borrowed money, they usually have to take a lower price in the end. For that reason it is hard for the Middle West to believe that stocks and bonds that are being carried with five billion dollars of borrowed money can finally be marketed without serious credit disturbance

At the same time, it is impossible to believe that there could be a real The reserve ratio of the Federal System is smaller than a year ago by about 10 points, but would still be considered ridiculously high by any other central banking system in the world. It ought to be kept high, of course, until the abnormal concentration of gold, arising out of war and post-war conditions, has been corrected and the policy of the Federal Reserve Banks directed toward that end this year has so far prevented speculation and gold shipments from reaching proportions that would have endangered business itself.

In short, because of unusually large agricultural production, trade is good in Western centers, and factory products ought to find satisfactory markets here. Politics is not disturbing business

#### J. W. Barton, Vice-President Metropolitan National Bank, Minneapolis, said in part:

The peculiar condition that has arisen in our credit structure would not merit much serious consideration, in my opinion, if it were in fact a seaso expansion in rediscountable bills in the face of contracting gold reserves, but it is not, and that is why it is peculiar. We have a very large expansion in the nature of stocks and bonds, long time non-eligible securities, in the face of contracting gold reserves; the result, a material decrease in bills eligible

for discount at the Federal Reserve Banks.

Because of the low rate at which practically all corporations of any size continue to sell their preferred stocks and bonds to the public within the past few years, this method of financing has been indulged in to produce working capital by such a large percentage of corporations and to such an extent that at no time of the year are these concerns using their lines of credit at banks for seasonal requirements as formerly, which thereby produced paper eligible for discount under the Federal Reserve Act. Not only is this eligible paper now diminished by the long time financing method resorted to so universally, but many of these same concerns are now loaning money on call in large amounts. Many of them are in the call money market several months out of each year. Too much long time financing in my opinion is proving detrimental to our economic structure, in that it is defeating the intended function of our Federal Reserve System, which was created to give us an elastic currency based on the business volume

#### Burton M. Smith, President Bank of North Lake, North Lake, Wis., Chairman Agricultural Commission, American Bankers Association:

The situation for the livestock farmer with a well-balanced program is good. Poultry and dairy products are commanding good prices. Cattle sheep and hogs are selling satisfactorily. While the market for some of the feed grains appears low, the farmer who markets his crops through livestock has no complaint.

As far as farm credit is concerned, the livestock farmer in good standing has no difficulty in securing all the money he needs. In many of our prosperous dairy and livestock sections the farmers' loans are not sufficient in volume to take care of the loanable funds and banks must seek commercial

#### Dan H. Otis, Director Agricultural Commission, American Bankers Association:

Agriculture is still on the upgrade. The purchasing power of farm products in the last few months has ranged from 89 to 95% of pre-war times, in May and June reaching the highest since 1920. More efficient methods in farm practices are reducing the costs of production. This has been shown by the greater increased activity in the farm implement business. While farm labor costs remain high, the use of improved m-a chinery has so reduced production costs that wheat, for instance, can be produced at as low a cost per acre as before the war.

Banking resources are ample for the credit needs of the farmers who deserve credit and are in position to use it wisely.

#### . H. Puelicher, President Marshall & Ilsley Bank, Milwaukee, Chairman Public Education Commission, American Bankers Association:

In spite of the widely accepted conviction that the Presidential year would bring uncertainties which would result in slowing up business, nothing of this nature has been true in the Middle West. My particular section, Wisconsin, has been fortunate in continuing a wide diversification in its industry, as well as in agriculture, and there has been, in general, improvement in both. A few individual lines have not fared quite so well, but as a whole the profit for the first six months is reported above the first six months The large expansion in the automobile trade has been favorable of 1927. to our section, and the increased production during the summer in that and the metal trades has brought up employment figures. Wages are high and the metal trades has brought up employment figures. Wages are high and the community in general seems prosperous. One-half the gross agricultural income of Wisconsin is derived from the sale of milk and cream. The consumption of dairy products is increasing and the price of milk as well as butter and cheese has been higher in Wisconsin for the first seven months of 1928 than for the same period of 1926 or 1927. As in other sections the growth of chain-merchandising and chain-banking is being watched with both interest and apprehension, many feeling that the independence of the individual is slowly disappearing and that the basic advantages of individual attainment in this democracy are disappearing with it.

As in other parts of the country, the high return on stock exchange loans has induced some banks to withdraw their support of the commercial paper market, and to loan their excess funds on Wall Street, and what is more surprising, has induced large industrial concerns to withdraw bank balances for use in Wall St. While the practice of industrialists going into the banking business is somewhat new and has as yet not had opportunity to stand the test of experience, it would nevertheless seem unwise when tested from the viewpoint of the whole situation. Bankers who do not believe in the encouragement of the speculative tendencies which seem so apt in human nature generally, have in the face of high rates and quick turn of funds insisted upon supporting the commercial paper market, taking a considerately lesser rate because of the feeling that it is the duty of a banker to support the enterprises, first, of his own community, then of industry and commerce generally. And when the industrialist withdraws his funds from the bank account, goes out of his own line of endeavor into the banking field for making profits, and into that branch of the banking field which many bankers feel they should not go into unless there is absolutely no use for their excess funds in industry and commerce, he appears to be venturing on a strange journey indeed. He appears to be advancing the cost of money to industry and commerce, that is, the cost of money to the group of which he is a part, and while he may be the fortunate one to get the large return on his Wall Street banking ventures now, there may come a time when he is the borrower, and other industrialists are advancing the cost of money to him. Many of the conservative bankers are looking on with wonder and wondering.

#### C. S. McCain, President National Park Bank, New York City:

I look for very excellent business for at least the next six months. crops in the Middle West and the South are excellent and are being marketed at fine prices which will yield the farmer a handsome profit. As a result of this the agricultural sections of the country will be in the best financial condition that they have experienced since 1920. The added purchasing power which this will give will be reflected in all lines. One of the greatest benefits of this condition has been the interest in the purchase of farm lands as they have practically had no market since 1920.

Politics has had less effect on business this year than at any national election for many years, although the campaign is evoking intense interest in all parts of the country. Business has nothing to fear from the success

of either party.

The money situation is abnormal and unquestionably must have religistment. When we see call money lending at from 7 to 9% we must adjustment. realize that this is a danger signal because we are not a 7 and 9% country. These rates are prevailing not because of commercial demand but the unprecedented demand for Stock Exchange loans by reason of the large turnover in the stock market. The shipment of over five hundred million dollars in gold abroad, with the resultant contraction in credit in the face of the continued demand for Stock Exchange loans, has brought about the present situation. These rates will I think prevail for the remainder of this year, at least, and I see no possibility of a change until we have had a decided liquidation in securities. I do not believe that there are large amounts of undigested bonds and stocks in the market at this time as most of these have been liquidated during the last ninety days

The business of the country is so fundamentally sound and the banks are in such excellent condition that I feel confident the present money situation will be worked out without any great disturbance to the country as a whole,

#### W. R. Morehouse, Vice-President Security Trust & Savings Bank, Los Angeles:

No great concern is manifest in Southern California over conditions existing in the credit structure of the country. It appears that the present situation is one of transition, which will be worked through safely to a more stable basis before many months have passed. It is true that a great volume of stock market credit has grown up, but a great volume of credit has been available and, not finding other employment, has gone into speculation because conditions have been favorable. In spite of prosperous business relatively less credit has been required because after the post-war depression business learned the lesson of excessive inventories. Efficient transporta-tion and the commodity price structure have contributed to operations on smaller margins, thereby lessening the demand for credit.

There is no present indication that there will be any sudden, excessive demand for credit from business. On the other hand, there are indications that stock market interest will slacken.

Meanwhile. business acceleration, the withdrawal abroad of some of our gold reserves and conservative discouragement of recklessness by the Federal Reserve system and the commercial banks themselves may be expected to effect equilibrium without undue disturbance. Business has been active this summer, manufacturing output, except in a few lines, has been well-maintained, the agricultural outlook is promising and all together point to a gratifying volume of autumn trade.

# Annual Convention of American Bankers' Association.—Speeches Featuring the Meeting.—Retention of Present Form of Organization Decided Upon.

More than usual interest centered in the addresses which figured in the programs of the general convention of the American Bankers' Association and its various Sections and Divisions. Meeting in Philadelphia this week, for its fiftyfourth annual convention, the bankers had an array of speakers whose subjects were of particular import. The expanding volume of credit formed the principal topic of discussion, Representative Louis T. McFadden, Governor Roy A. Young of the Federal Reserve Board and Leonard P. Ayres, Vice-President of the Cleveland Trust Co., among others, having something to say on the subject. Because of the interest which the remarks of the foregoing have awakened, we are giving further below their addresses in full, together with that of Comptroller of the Currency McIntosh. We may note here that all of these addresses will likewise appear in our annual number—the "American Bankers' Convention Section"-which will be issued Oct. 20, and which will contain a full account of the deliberations of the convention, including the speeches and reports which made up the programs of the convention proper, the Divisions and Sections. In Governor Young's speech he made the statement that:

Since the Federal Reserve banks furnish the basis of credit growth in any field, whether it be commerce, industry, agriculture or the trading in securities, the Reserve System feels concern about excessive growth in any line of credit. It is impossible for a Reserve bank to earmark the credit it releases, but when too rapid growth in any line of credit threatens to upset the financial structure of the country and make undue demand on the reserve funds, which should be conserved for the legitimate growth of the country's business, the Reserve System can properly use its influence against these undesirable developments.

In the "Times" Philadelphia dispatch, Oct. 3, we find the following:

The speech did not create the stir among bankers that did the one of Representative McFadden, who declared on Monday that "the apparent efforts of the Federal Reserve management to restrict the speculative position have proved unsuccessful."

The Federal Reserve Governor declined after his speech to answer ten written questions propounded to him by newspaper men concerning his attitude on brokers' loans, supervision of the loans by the Federal Reserve, possible changes in the Federal Reserve Act and other questions pertinent to present financial problems.

In addition to the addresses which we mention above, that of R. S. Hecht, President of the Hibernia Bank & Trust Co. of New Orleans, before the State Bank Division, on "Our Unit Banking System" is one of equal interest, and will of course, be incorporated in our forthcoming annual number. Resolutions on the credit situation were adopted by the general convention at its concluding session on Oct. 3, and these will be found elsewhere in our issue to-day. In his address as President of the association, Thomas R. Preston proposed the formation of a world-wide association of banks which would promote fuller comprehension of "the difficulties which beset every country and would make for more cordial and sympathetic understanding" among the nation. President Preston said:

I would recommend the forming of an International Bankers Association. It seems to me it would be impractical to have any other kind of an association except a delegated one. Such an association would not only help us solve financial and industrial problems, but would bring to the world a better understanding of the problems and difficulties which beset every country, and would undoubtedly make for a more cordial and sympathetic understanding among the countries of the world.

If the United States is to maintain its financial and industrial supremacy it must continue to lend, invest and sell abroad. Foreign business will be more important in the future than in the past. We are so closely related to other countries that what affects one section of the world affects all. It would be desirable to have a meeting of representatives of all the banks of the world at some convenient point like New York, London, Paris or Berlin at intervals of two to three years.

Resolutions favoring the formation of an international banking association and closer and more mutually helpful relations between member banks and the Federal Reserve System were adopted by the National Bank Division of the American Bankers Association. A third resolution adopted opposed the redemption of United States 2% consols in 1930.

On Oct. 1 the Committee on Reorganization of the American Bankers Association appointed last year at the close of the association's Houston convention, reported to the Executive Council of the A. B. A. in favor of retaining the present form of organization. This means that the present divisions of "national bank," "saving bank," "State bank" and "trust company" will be retained. Because of changes

in banking laws and practices by which practically all banks are performing commercial, savings, trust and investment functions it was proposed that the old division names be dropped and new ones, based on these functions, be substituted. While reporting in favor of keeping the present form of organization, the Committee recommended, however, that where the present divisions have common interests that they co-ordinate their interests more definitely than at present. The report was accepted by the Executive Council.

Declaring that clearing-house work by its very nature always results in creating a new spirit of mutual respect, co-operation and uniformity of action which makes for safe and sound banking, the Clearing House Section of the association, by resolution, on Oct. 1, outlined a program of action for the coming year. Among its features are the following:

The survey and continuing study of payroll problems which has been helpful in protecting payrolls, preventing holdups and insuring the speedy arrest and commitment of guilty parties.

Active co-operation with the United States Department of Commerce and the National Association of General Contractors in developing and adopting uniform negotiable warehouse contracts and receipts.

The continued installation of county and regional clearing house associations, thus permitting country banks to avail themselves of the benefits and safeguards of clearing house association facilities.

The universal adoption of standard-size checks and uniform face arrangement of essential data which already has resulted in an immense saving of time and expense.

The study and preparation of uniform financial statement forms for corporations, firms, individuals and farmers, simplifying and standardizing without omitting any salient features of those now in use.

Reiterating its stand that there should be greater harmonization of the banking laws of the several States and that continued efforts be made to secure the greatest possible degree of uniform and efficient State banking service, the State Bank Division at its convention meeting on Oct. 2 urged that the office of State Bank Commissioner be made as free from entangling partisan politics as the judiciary itself and that it be divorced from all other functions of State government. "We are convinced," read the resolution, 'that the tenure of office of the bank commissioner should be made more secure and lasting, with salary and function adequate to attract to the office and retain the services of men of outstanding executive ability, courage, resourcefulness and successful banking experience. We further believe that to men of this type, larger discretionary powers in the administration of the State banking laws may safely be given." The division declared itself in advocacy of certain general banking provisions in the States. This resolution will be given in full in our annual convention number. The newly elected officers are noted elsewhere in to-day's issue of the "Chronicle." Below we give the four speeches referred to

## Dynamic Banking

By Louis T. McFadden, Chairman of the House Committee on Banking and Currency, Washington, D. C.

The keen observer who travels through our country cannot fail to be impressed by the restless energy of our people. We work hard and we play hard. We have harnessed the forces of nature to drive the machinery, we have invented to produce and distribute and consume the things we need and the things we want. We move about rapidly in fair weather and foul weather, not even waiting for the light of day to show us our way. We plunge along at high speed over guarded rails of steel and over twisting, climbing roads of gravel, dirt and concrete that lead us with certainty to our destination. Our cities present a spectacle of ceaseless motion, force and power, while the highways and by-ways that run therefrom into the open country are seldom without some manifestation of power in motion.

This is a dynamic country, and we live in a dynamic age, created by our desire to better our condition and to get the material things necessary for our welfare, comfort and pleasure. We have created and set in motion a high-speed, powerful machine to supplant our puny, physical efforts, but the machine seems to have reacted upon us, and to have imparted to us some of its power and speed until we have become the wonder and the envy of our

old world friends in our ability to accomplish material results and get ahead. We do not wait for what we want to come to us. We go after it. Thus we are known as "go-getters." We do not wait to be told what kind of service we should give, but we invent various kinds of service and persuade our neighbors that, although they may not know it, the only thing they need to make them prosperous and happy is the particular kind of service we can sell them.

All of this boosts civilization. A people devoted only to fulfilling the primary needs of life, such as food, shelter and clothing, have not progressed very far. It is when they begin to demand satisfactions beyond these prime necessities that civilization begins to bud and flower. Thus we find that the luxuries of a past generation are the necessities of the present one, while the luxuries of today will be regarded as necessary by those who live when we are gone. To supply these necessities and luxuries we speed up the old machine and sometimes we create more than we can use. We cannot eat all the food we raise; we cannot occupy all the houses we build, and in many other ways our productive capacity—the result of our dynamic force—exceeds our capacity to consume.

In this world of force and energy every instrumentality that contributes thereto, or results therefrom, takes on some of the attributes of force and energy. Therefore, it is not strange that some students of the subject regard the present aspect of banking, as practiced in this country, as dynamic. Such a view is entirely in harmony with the spirit of the age.

Fifty years ago three kinds of banking were practiced in the United States, each one devised for a specific purpose and each one confining its operations to work for which it was created. First, there was the bank of circulation and discount, otherwise known as the commercial bank, used as an adjunct by producers and merchants to create and distribute their commodities among the people. Second, there was the savings bank which afforded the people an opportunity to save something out of their earnings and income and thus become capitalists. Third, there was the investment bank, which supplied capital for new enterprises and distributed income-producing investments to those who had become capitalists through the saving habit. Each one of these three kinds of banks dealt in a particular kind of credit, and very rarely one invaded the field of the other. There seemed to be a clear conception of the function of each one of the five primary divisions of credit. Personal, or consumptive credit, rarely found its way into the banking world, for it was considered improper to use the credit of commerce or the savings of the people to enable a person to supply his personal needs or wants. Commercial credit, that is to say, the deposits of manufacturers and merchants, was used exclusively to create banking credit, which was turned back into the domain of industry and commerce to bring into present use the future or potential value of things produced and held for sale. To tie up such credit in investments of long maturity was considered unfair to industry and commerce which produced it. On the other hand, capital credit gathered by the savings bank and the investment bank was used strictly in its proper field and not loaned on the hazards of business. Public credit, to serve the needs of the State, was supplied from surplus capital saved from income and earnings.

To-day as the result of our great prosperity and the increasing complexity of our economic and social life, the three foregoing classes of banking have been augmented by other forms of banking that are carried on under various names. We have fiduciary banking, which manages the estates of living and deceased persons. We have building associations, which perform the functions of savings banks. and some of them carry on a deposit banking business. We have credit companies that gather up surplus capital to be used in the domain of personal credit and investment credit. We have investment trusts that pool the money of individuals who trust it to their care, with which they speculate or buy securities, according to the spirit or the intelligence of the management. In addition to the foregoing forms of banking, many of our largest industrial concerns have grown so rich and powerful that they are in

a position to lend funds to others and thus supply capital for various purposes.

It is obvious that if everyone who is engaged in business, or who saves something out of his earnings or income, should keep his funds locked up, we would not have anything like the business of banking. So, banking, in whatever form it is practiced, is based on gathering up into a pile the unused surplus funds in the community to be taken care of and used for productive purposes by lending them to those who can use them profitably. Thus communities are built up, strengthened and improved, and business is kept going by the pooling of the surplus resources of the men of business and those who have a supply of funds in excess of their immediate needs. This is the appeal that every form of banking, regardless of the name under which it is conducted, makes to the public. "Deposit your funds with us, we are skilled in their use and we will take care of them for you and pay you in service or divide with you part of the profit we make." Thus, in addition to deposit banking for the benefit of producers and merchants, very many other instrumentalities that apply the principle of banking to their transactions, have come into existence with the result that we have to-day a highly complex banking machine moving at high speed throughout the country. This machine is composed of thousands of parts, represented by over 30,000 banks of every description, and hundreds, if not thousands, of other corporations that are dealing in credit in one way or another.

As the individuals in a community unorganized, and each one acting for himself, cannot make effective use of idle funds, but must accumulate them in relatively large amounts in the hands of trained bankers in order to make them effective, so in turn the primary and important needs of the productive process cannot be met unless all of our banking instrumentalities act in harmony in the use of the credit within their keeping. It was to achieve this end that the Federal Reserve system was brought into existence. As the production and distribution of the necessities of life take first place among our activities, the provisions and the rules and regulations of the Federal Reserve system were designed to permit the men of industry and commerce to have access to our storehouse of credit ahead of all others. The primary thought back of the establishment of the Federal Reserve system in 1913 was "Credit for production with special reference to our domestic situation." Under the provisions of the Federal Reserve Act the only paper that is eligible for rediscount consists of short-time self-liquidating obligations arising out of the production and sale of staple, marketable products. Obligations based on personal or consumptive credit and on capital credit are excluded. While it is true that public credit represented by United States bonds can be used by member banks for short loans, this was a war-time measure and directly opposite to the theory on which the system Some think that Government securities, was founded. like instrumentalities of capital credit, should be excluded as the basis of loans to member banks. In this connection there seem to be two opposed schools of thought with respect to the use of Federal Reserve bank credit. One school believes that the original principle of rediscounts based solely on commercial credit should be adhered to. Another school would open the doors of the Federal Reserve system to the instrumentalities of capital credit of all kinds as a basis for rediscounts. If such a result is ever achieved, the Federal Reserve system will become ineffective to serve industry and commerce, and it will inevitably be used to foster speculation, and will eventually destroy itself.

Prosperity has been defined as a balanced condition of production, distribution and consumption, under which the producer can market all he produces at a profit, and the consumer can supply his wants at the price he can afford to pay. Prosperity is an ideal, which has rarely been completely achieved here or elsewhere, but the principle involved is the goal of all of our business activities. Stable credit conditions are essential to prosperity, and such attainment may be defined as a balance between the volume of commercial and banking credit, and the volume of capital credit. If a large amount of banking and commercial credit is withdrawn or withheld from industry and commerce, and sent out of the country through the purchase of

foreign securities, or if it is locked up for long periods through purchase of the evidence of capital credit, such as bonds, debentures and mortgages, or if it is invested in the evidences of personal credit, that are repaid slowly on the installment plan, or if it is used to promote speculation to a large extent, there is danger that the proper balance between the volume of banking and commercial credit and capital credit will be disturbed, and industry and commerce will suffer or be compelled to pay dearly for its credit needs. Such a condition seems to confront us to-day and although industry and commerce do not appear to be suffering now, nevertheless there is danger that the volume of speculation and the fight for credit, if it is not ended and a proper balance established with respect to the use of the two classes of credit, will penalize industry and commerce.

There is ample credit of all kinds in the United States for normal and legitimate use in supplying the necessary tools of production and in creating adequate methods of distribution, in addition to producing all we can consume and export, provided it is properly used or managed. The difficulty in that respect is that there seems to be no standard of practice in the proper use of credit and no instrumentality that has the power, or if there is one that has the power, it seems to be loath to use it, which can lead or direct, or in an emergency force, those who deal in credit to subscribe to and follow sound principles which have been established by the experience of mankind. It is the duty of wise statesmanship to establish a standard and preserve the proper balance to the end that capital needs and the needs of industry and commerce shall not suffer, but there are many difficulties in the way, which must be considered frankly, if one would attempt to point out how it can be done. In the first place, we have 49 sovereign powers, which have the right to charter banks and all other forms of corporations designed to buy and sell credit, namely, the Federal Government and 48 sovereign States. If all of the banking instrumentalities and organizations which deal in credit were under the authority of the Federal Government, the task might be simplified. The Federal Reserve Bank was intended to establish the standard of banking practice, but the only banks over which the Federal Government has supreme control are the 8,000 National banks and such State-chartered banks as are willing to put themselves under the control and direction of the system. Thus the very nature of our political institutions makes it difficult to establish and maintain a unified control and set up a harmonious banking policy. Is not the condition that exists to-day due in some measure to that fact?

Another factor in the equation is the development of departmental banking by commercial banks, the indiscriminate mixing of credit handled by them, and the struggle for business at the expense of sound banking practices. Banks compete with each other by offering high rates of interests for deposits; they make capital loans out of their demand deposits; they encourage the transfer of commercial deposits into time deposits because of the lower reserve required against such deposits, and they keep their funds working at high speed by seeking every profitable investment available, looking for the highest interest rate possible, and when they have any idle money in reserve they force it out on call loans to brokers on the theory that the Federal Reserve system will pull them out of any difficulty which may overtake them through their efforts to speed up banking. In short, they deem it to be the duty of the banker to "bank" under all conditions. Many of them may have to do this in order to meet the high cost of doing business, and keep a fair return on the capital invested. The theory that the banker must "bank" under all conditions is just as absurd as the theory that the producer must produce under all conditions, even though he faces a market saturated with his product.

Some of the remedies suggested to right this condition are: Segregation of savings deposits and loans made thereon from demand deposits and loans made out of such funds, which will result in the use of demand deposits for making self-liquidating commercial loans, and the investment of savings deposits in capital credit; a change in the rate of reserve that banks are required to carry, in an effort to check the flow of commercial deposits into the sav-

ings departments; strengthening of the banking situation by consolidation, to the end that banks will not feel under obligation to force their funds into action indiscriminately in order to earn a fair return on the capital invested; the abandonment of the foolish practice of bidding against each other for business by offering high interest rates.

The business of finance is not a thing in itself, but rather a supplementary service to the production, transportation, distribution and consumption of goods. These latter processes are fundamental in society and must be carried on. Financial methods and financial institutions are changingly useful in direct proportion as these indispensable processes are actually assisted. Financial men are sometimes too much inclined to view their methods of organization and of operation as ends in themselves. If a financial plan seems meet and logical on paper bankers are apt to favor it without always considering its wider utility to the processes of production, distribution and consumption. I have always felt that just this sort of thing occurred when the Reserve system was originally organized. Under the circumstances it was probably necessary. But many practices and organization methods were written into our Federal Reserve Act, not because they corresponded with the actual needs of American production, distribution and consumption of goods, but because a workable system based upon them had operated in London, Berlin and elsewhere. My own experience in endeavoring to adapt foreign banking methods for use in this country has led me to realize how easy it is to find very successful and workable methods abroad which, when brought to this country, do not correspond with our economic background and hence are largely unworkable here in practice. An instance is the term "settlement system" employed on foreign stock exchanges. Our Reserve system has always stressed the importance of bankers' bills, largely deriving this attitude from the experience of London. But America is not England and New York is not London. Bankers' bills mostly arise from foreign trade in which they are undoubtedly necessary. But in domestic trade such bills, although employed to varying degrees in different countries, are not necessary in the same way. Obviously, therefore, the nations in whose whole trade foreign exports and imports bulk very large must develop facilities for handling bills. And these facilities when so created will inevitably play a very large part in their whole money market and banking system. On the other hand, nations in whose whole trade the foreign trade is a small proportion will not equally develop a broad bill market, nor will this bill market be large enough in proportion to the domestic trade to form a suitable basis for the country's whole banking and money market system. In England roughly one-half of the total trade is foreign trade, as a result there is a broad supply of bills in London, sufficient to create a genuine discount market regulated not so much by the manipulation of few banking institutions as by broad factors of supply and demand. Hence the Bank of England has always had a simple method of fixing its discount rates-by keeping its rate slightly above the bill market rate and raising or lowering its rate as the bill market rate itself rises or falls by reason of conditions of supply or demand. In this country our foreign trade amounts to something between 5 and 10% of our total trade, with the result that the supply of bills in New York from this source has regularly been insufficient as a basis for our entire banking system. As long as we remain the kind of country which we are there seems little reason to believe that this condition will change. Therefore, while the development of a bill market here is in itself a splendid and most praiseworthy thing, the theoretical assumption that the New York bill market is or will be largely utilized for central banking and rate making purposes in the same way as England has done, is not realistic or practical, no matter how neat it may seem as a financial method or however eloquently British financial its utilization in London.

Many years ago a great need for safe and liquid shortterm loans in this country led to the establishment of a cash settlement system on the New York Stock Exchange, and the making of security collateral loans on demand or "call." This call loan market has come through many severe tests in the past, including civil and foreign wars, almost all species of currency heresies, inflations, depressions, periods of great activity and periods of business stagnation. It has been so strengthened by the necessity to survive these almost constant crises in the past that to-day it is the best organized security collateral loan market in the world.

A good test of a high degree of organization in any market is the extent to which its operations are impersonal. In poorly organized markets the personal factor is very important, while in highly organized markets standardization of practice arises and the personal equation vanishes. The New York call loan market is almost entirely impersonal. When a bank lends money at the money desk on the Exchange floor, it does not know to what Stock Exchange firm the loan will be made, nor does it particularly care. Similarly the Stock Exchange member borrower usually cares very little from just which lender his funds come. Call loans are diversified as to collateral, standardized in units of \$100,000, and permit of ready substitution in the collateral and can be handled even for out-of-town lenders with extraordinary facility. I imagine there is no denying that call loans on listed securities made to Stock Exchange members are the safest and most liquid loans for these lenders that exist in American banking. There seems to be no record of such a loan causing any loss to any lendera statement which, of course, cannot be made of bankers' bills, United States Liberty bonds or other superior banking investments.

Because of the ready availability of this class of loan for the investment of surplus funds, bankers, individuals, corporations and other holders of available funds logically turn to this market when rates are made attractive as at the present time. Such a market sucks into it all available funds in the country. And because of the large accumulation of savings and the turning of national resources into liquid wealth, together with the improved credit facilities, enhanced also by large foreign lendings in this market, the total of brokers' loans are at the highest peak in their history. This too at a time when our banks are being called upon to finance the annual crop movements (which movements usually involve a temporary, though considerable, expansion of credit) and when many of the present reserves, which ordinarily are available for this purpose, are being utilized in speculative directions, would indicate that the present monetary stringency accompanied by present high rates, unless relieved by a release of additional credit by the Federal Reserve system, will continue into the late autumn and even over the turn of the coming year. This is made more certain by the fact that the apparent efforts of the Federal Reserve management to restrict the speculative position have proved unsuccessful. There is evidence that the Federal Reserve authorities are now releasing funds through the open market transactions to provide additional credit which is found necessary for the strain incident to crop moving. In the Federal Reserve system's attempt to restrict speculative tendencies they are confronted with the realization of their lack of control over a vast amount of credit that is made available to the speculative market when high rates of interest prevail. They readily recognize the burden that rests on the Federal Reserve system in case of a sudden withdrawal from the speculative market of these independent funds through a loss of confidence, a lowering of rates, or the use in commercial or industrial lines.

Owing to the important part which the investment of independent money in brokers loans occupies in connection with our general credit situation and in order to permit the Federal Reserve to rotain its control over the total volume of credit, it may become necessary to place the supervision of the future granting of brokers' loans under the Federal Reserve system.

The recent ruling of the New York Clearing House, limiting the accessibility of this market to loans of \$100,000 or multiples thereof, emphasizes the necessity of some kind of supervision over this particular market.

A leading economist has recently pointed to the fact that more credit is being used in brokers' loans at the present time than is being extended to our entire agricultural industry, or than is being employed in our whole foreign trade, or than is being used in the automobile industry, or the steel industry, or any other single manufacturing in-

dustry in the United States and that brokers' loans are greater to-day than were all the savings bank deposits in the United States at any time, prior to 1917 and they are more than half as great as are the aggregate savings bank deposits of the American people at the present time.

The Federal Reserve system are charged with a grave responsibility in dealing with this situation because it would be easy for them to produce a business slump without intending to do so. In this connection it is interesting to note the views of a leading British authority on the subject of finance, who is a student and close observer of our Federal Reserve operations: "I am now more concerned lest the Federal Reserve authorities should accidentally bring about a general business depression by attempting to take action toward the stock markets which, however well meant, is not really compatible with the system's duty toward business. I think the Federal Reserve system may have been quite right to try to frighten the speculators a few months ago, but this having failed, I think they would be much better advised to leave Wall Street alone and let it boil over of itself, rather than do things which, if continued, will certainly put at risk the general prosperity of the country."

Apparently the present situation was precipitated by the change of Federal Reserve policy last year to assist England and other central banking countries in their attempt to stabilize their currencies and return to a gold basis. Now that this assistance has been rendered at the cost of America's being thrown into a speculative frenzy, the Federal Reserve authorities are attempting to get back to a normal basis. In considering this dilemma, another noted English authority expresses the opinion that it is very apparent that there is no inflation in commercial credits and commodities and, therefore, no need to restrict commercial credits, but there is evidence of inflation in the stock market and in real estate operations, and he suggests that if Federal Reserve credit is being used as is indicated, that it is a serious risk. And all this might have been obviated six months ago if the Federal Reserve management had been more drastic in dealing with the well defined speculative tendency then indicated.

This same responsible authority further says that Federal Reserve management cannot ignore speculation in real estate or the stock market when it is definitely known that Federal Reserve credit is being used, particularly when these loans are secured by collateral based upon very high or inflated values, because in the event of collapse in either case the banking system is bound to be weakened which might precipitate serious banking as well as industrial trouble. He points out, besides, that just as real estate and stock market booms in the past have encouraged spending, so the collapse of these booms will necessarily discourage spending and thus injure trade. He further points out that it is utterly impossible for the Federal Reserve management to cencentrate attack upon any particular form of inflation, but if they desire to check speculation either in real estate or the stock market, they must penalize general trade to some extent and that it is better to face these facts in the early stages of speculation when neither checks nor results of them need to be so severe as when action is delayed, and in the present predicament it will be a mistake if the Federal Reserve management allow a reduction in money rates before the present volume of brokers' loans are materially reduced. Also, member banks must not be continuous borrowers else they may regard such borrowing as the rule rather than the exception, and such a policy would seriously weaken the Federal Reserve management of the credit situation. The same authority considers it unwise for the Federal Reserve management to put into operation the machinery designed to reduce volume of credit unless they really intend to reduce it. The only result will be embarrassment and decreased efficiency in the management. This authority approves of the policy of the Federal Reserve system during the last six months and feels that it has been in the right direction but not sufficiently drastic.

Reserve credit is made more accessible in times like the present by the use of short-time government securities as collateral by member banks and by the Federal Reserve banks themselves in open market operations. The availabili-

ty of Government securities for the release of Federal Reserve credit is partly responsible for the non-development of trade acceptances and bankers' acceptances in this country. Federal Reserve authorities, recognizing the powerful influence to buy and sell in the open market, so long as the law permits Government securities, because of their ready availability, to be purchased and sold in the open market, have insisted upon a continuance of this war-time authority, and no doubt such use has influenced the Treasury in continuing to re-finance approximately two billion dollars worth of the Government temporary debt (now represented by short time certificates of indebtedness) in this form of security rather than the funding of this short time debt over a long time.

I have heretofore directed attention to the fact that the Federal Reserve system permits the use of Government securities as a basis for a release of Federal Reserve credit to a greater extent than is perhaps judicious. Careful consideration should be given to this subject, particularly as it is through this source that credit can be relsased in a speculative market, and when so released, even though for commercial, industrial, or marketing purposes, it is quite apt to go directly into the speculative loans which will result in an inflation of what is perhaps an already over-inflated, high-priced stock market.

The speculative minds in this country, realizing how dependent their business is upon ample credit facilities and easy access thereto, oppose, of course, any restrictions being placed on the release of credit through the use of Government securities. At the same time, they are not too adverse to this and have already suggested a method whereby additional credits can be provided through the Federal Reserve system of making eligible for rediscount brokers' loans in the form of what is known in the English market as Lombard loans. To my mind, to make eligible this class of investment securities for direct discount and thus cause an additional release of Federal Reserve credit, tends to inflation and is contrary to the principles underlying the organization of the Federal Reserve system. If, however, our contemplated use of the Federal Reserve facilities to accommodate commerce, industry and agriculture in this country has changed, and we have come into a new era where industry, commerce and agriculture are being financed differently than intended in the original act, the act should be changed to meet the new conditions.

The development of mass production, centralization of industrial production and distribution, coupled with the centralization of individual banking endeavor, must be recognized, and just as truly as we have developed from the beginning of banking, we are going to continue to expand because banking must keep pace with the needs and requirements of advancement in commerce and industry and improved marketing conditions in agriculture.

Our central banking system as now operated by the Federal Reserve system is necessary in order that we may maintain a gold standard and finance our domestic and international trade as well as our own governmental and financial transactions. If this system is to function in the discharge of its full duty, it must occupy a commanding position over the credit situation in the United States and in order to do this it must be placed in a position where it can control all the elements that enter into this credit situation; and if revision of the law is necessary to accomplish this, the necessary amendments should be made in the law so that the administration of the system will not be handicapped in its service to the one hundred twenty million people for whom it was primarily organized to serve. And the management of this system should never forget that they are trustees of the people of this country whose destinies are to a great extent in their hands.

Much criticism has been expressed as to the policy pursued during the past year and a half by the Federal Reserve management. Much of this criticism has not been well founded but has been due to a lack of correct information as to the purposes to be served by the changed policy of the system.

In the light of present information as to why discount rates were lowered to 31/2% a year ago and credit provided for through open market operations, which prepared the way for the release for export of some \$500,000,000 worth

of gold to aid in the rehabilitation of Europe, looking toward stabilization of currencies and a return to a gold basis of their major countries, I believe is recognized as of benefit not only to the countries served, but to the United States. The consequences resulting from the changed policy of the system have been noticeable in this country in greater activities in stock market and by a somewhat improved condition in commodity prices and have not resulted in business depression, but on the other hand, it is fair to assume, have encouraged the improvement in business conditions which are everywhere manifested at the present time. The desired results abroad have been accomplished. Our own domestic situation, so far as industry, commerce and agriculture are concerned, remains satisfactory, and the disturbed credit situation, occasioned by the change of policy, seems to be at the present time well in hand. It would, therefore, seem that the decision made by the Federal Reserve authorities to render this assistance was wise and proper, and that any harm that may have been wrought or may yet be in store will be greatly overbalanced by the good that was accomplished by this move.

In this new association, the importance and responsibilities of the operation of the Federal Reserve system have been increased in its relationship with the central banks of the leading countries of the world, and as the association has become known through its accomplishments, attention has been directed to the subject of central banking because of the fact in this consortium the Federal Reserve Bank of New York has been acting for the Federal Reserve system and virtually functioning as a central bank and the other central banks look upon their contact with this country through the Federal Reserve Bank of New York as "The Central Bank of the United States." Therefore, because of our close association now with central banking, it is well for us to familiarize ourselves with the functions of central banking. Students of banking economics are of the opinion that such co-operation is necessary and helpful and should be continued, but with certain limitations.

In this connection, it is interesting to note the views of Professor Gustav Cassel, of the University of Stockholm, who recently appeared before the Banking and Currency Committee of the House of Representatives in Washington, when he said:

"You have a Federal Reserve system and the most prominent function of the whole system is to keep up the gold standard. You ask the Federal Reserve system to do that and you find it quite natural they should be able to exercise that function and nobody doubts that the Federal Reserve system is able to keep up the gold standard in this country.

serve system is able to keep up the gold standard in this country.

"This is a function of the central banks, because inevitably the central banks have an influence on the value of gold. I want to add that this is the only point where the central banks necessarily have an influence on prices. Therefore, you would abstain from adding any other duties to the central bank. It is not the function of the central bank to influence the relative prices of different commodities; it is not the function of the central bank to increase wages or stabilize trade or enceurage industry or protect the farming interest or do anything like that; it is not even the business of the central bank to influence the rate of interest on capital. Therefore, nothing of that sort should be put into the program of the Federal Reserve system."

In the discharge of the responsibilities acting in its capacity as the responsible head of finance in America, it is well to consider whether or not the Federal Reserve system has or has not been created with all the necessary authority and power to handle the conditions with which the system is now confronted, and in this connection it is well to consider the powers that are exercised by other central banks of the world.

The practice of central banking is a matter of comparative recent date. England is the home of Central Banking and the foundations of the present system were laid in the year 1844.

Besides the management and regulation of the currency system, many other important functions are performed by the Bank of England. These powers have been the outcome of a gradual and almost unnoticeable evolution.

While other countries developed central banking systems somewhat differing from the English plan, it was not until twenty years ago that the subject really attracted worldwide attention, which was considerably accelerated by the severe crisis in this country during the year 1907.

The next crisis directing attention to central banking was the complete collapse during the World War of many of the currency and banking systems of the countries involved, A careful examination of the causes of the failures of these central banks under the stress of war conditions has revealed that political pressure was put upon the central banks to abandon the fundamental principles of sound central banking and to subordinate financial stability to political expediency.

The next incident to attract the public to central banking was the meeting of the Financial Commission of the International Economic Conference in Genoa in 1922. The reports of this conference really established the basis for the formation of central banks in several of the European countries.

Wiffle the Federal Reserve system had long prior to this time established its contact with central banks, particularly with the Bank of England, the importance of these unofficial conferences and contacts were daily assuming larger proportions and influences, and because of this the management of our system became aware of the advantages of these associations to the industrial, agricultural and financial interests of this country. And at the same time with international movements.

Apparently New York is now the money center of the World. It is of primary importance that the assets of the New York Federal Reserve Bank, and in fact the assets of the entire Federal Reserve system, who are co-operating in this "decentralized system" of central banking be of the most liquid character possible. It is of real importance that the Bank should have the fullest power possible in case it needs to increase or curtail the total volume of credit in order to protect the central reserves and maintain the gold standard, and because of this, its assets should at all times consist of securities of short maturity and of such a character as to be readily available.

Acting as the world's banker brings an additional responsibility, as it is incumbent upon such an institution to meet sudden withdrawals of credit and gold in international transactions.

The Federal Reserve system is the most potential influence in the world today, and because of this fact it is natural that attention should be focused on its management and operation. The law provides that annually the Federal Reserve Board shall make a report to Congress. Each year this has been done. The annual report, however, outside of an analysis of figures, showing size, growth, or decrease of its operation, gives very little explanation of the operations carried on by the system except for brief explanations of possible change of policy during the year, with some references to economic conditions.

During the past two years the Banking and Currency Committee of the House of Representatives have been holding hearings on a bill proposing to direct the Federal Reserve Board on the question of stabilization, and by the appearance at these hearings of members of the Federal Reserve Board, officers of the various Federal Reserve Banks, leading economists and students of financial and Federal Reserve operations, not the least of whom was the Governor of the Federal Reserve Bank of New York, a valuable record of a part of Federal Reserve operations from the date of its organization has been made.

Outside of the consideration that was given to the subject of the hearings, much valuable information as to the operations of the Federal Reserve system has been recorded. Many critics of the system feel that the public are kept altogether too much in the dark as to present operations of its banking system. They feel that they should know something as to the time, the whys and wherefores of a change in policy on the theory that uncertainty causes speculation. And supported further by the thought that the banking system should be the servant rather than the master of commerce, industry and agriculture, they point to a growing tendency of secrecy and apparent domination by its management. In this connection, we must recognize the powers that are vested in the management of the system. three great powers, outside of the influence of gold, are the discount rate, open market operations and publicity. The delicacy of the management of any central financial institution, because of the importance of the exercise of the necessary functions within its control to proper management by the system in the discharge of its full responsibilities in the protection of gold and the volume of credit. is such as to tend to secrecy.

It is a well demonstrated fact that advance information in regard to a change of policy on the part of a central bank might defeat the very purpose for which the change was made. The wits of those who are engaged in speculative enterprises to-day are so keen and their facilities for information and its utilization so perfect that any leak of inside information, particularly that pertaining to so vital a subject as Federal Reserve policy, might be used to their own selfish purposes, thus tending to defeat the aim of the bank.

The effect of the utilization of any one of these three important powers by the Federal Reserve management might be entirely destroyed and their usefulness of no avail if the public were apprised in advance of the contemplated action.

I am quite satisfied that no specific further direction should be given in the law to the Federal Reserve management on the subject of stabilization. I am impressed, however, with the fact that if the system is to run successfully and function fully to meet the needs of the public that centralized and intelligent direction is absolutely essential, and it is extremely important also that the people of this country should have complete confidence in such management and that the knowledge of the daily operations of the system be kept inviolate.

## The Banker's Responsibility

By Roy A. Young, Governor Federal Reserve Board, Washington, D. C. If the economic life of the country be compared to the automobile, the natural resources represent the machinery, and human endeavor the fuel. The function of the banking system in this machine would be to provide proper lubrication. Banks can not create natural resources nor can they be a substitute for human labor, but they can work toward a more efficient use of resources and a more effective application of labor and thereby contribute to a smoother and more even-working of the mechanism to prevent overheated parts and possible explosions.

There is nothing in the country's business life that approaches the banks in the wide-spread influence of their activities which are not confined to any particular line of commerce or industry but reach and influence all lines of endeavor. It is for this reason that banking can not be considered as a purely private business and so banks are supervised by Government agencies and regulated by statutory limitations.

Essentially, the function of a bank is to convert a person's ability to pay in the future into ability to pay at once. A storekeeper who wishes to lay in a stock of goods may not be in a position to pay for all of them at the time, but will be able to pay for them after some of the goods have been sold to the public. It is the bank's function, by lending him money, to enable him to convert his future paying capacity into present paying capacity. This is a simple and fundamental function. It involves no great or complicated mechanism and contains no mysteries in its workings. The great Dunbar said many years ago: "These functions imply no very complex operations. They require prudence, integrity, and patience, but they have no mystery."

With this definition of the primary functions of banks in mind, let me analyze the nature and order of importance of their responsibilities. First and foremost, their responsibility is to their depositors who have entrusted them with funds and are entitled to receive them either on demand or on dates stated in their deposit contract. In order to provide additional safeguard for the interests of the depositors, the owners of the banks contribute capital, and to this they gradually add undistributed profits in the form of surplus. These funds placed by the owners of the business in a bank, vouch for the good faith of the proprietors. They are also a buffer between the bank's liabilities to their depositors and their claims on their borrowers. An adequate proportion of capital funds is, therefore, essential to the discharge of a banker's responsibilities.

More important, however, than the capital contribution is the exercise of care in making loans and buying investments. A bad loan is rarely a kindness to the borrower. Too many bad loans are a betrayal of the trust placed in the banks by the depositors. Therefore, the banker must discharge his responsibility to depositors by a careful scru-

tiny of his loans. If it were possible for a banker to confine all his advances in his own community to conservative and safe loans based upon production and distribution, with the assurance of assistance from the Federal Reserve Bank for seasonal and emergency requirements, there could be no serious objection to his conducting his institution in such a manner. However, I know from my own experience that loans of this character are not always available and even if they were available, such a policy would result in the banker having his deposits employed only a part of the time.

Loans of a capital or speculative nature made locally, even though they are good, do not always represent good banking. A bank should not be entirely dependent for solvency on developments in its own community, but should, in the great majority of cases, carry secondary reserves in the form of liquid investments—funds placed on deposit with out-of-town banks, commercial paper, bankers' acceptances or security loans the liquidity of which depends upon the marketability of the securities back of the loan. A certain proportion of funds not directly dependent upon the developments in a community has come to be considered as a fundamental condition of sound banking.

Second to the banker's responsibility to his depositors is his responsibility to the bank's stockholders. They have contributed capital to the enterprise and are entitled to as large a return on this capital as can be obtained by safe and legitimate use of the funds. It is the universal acceptance of the priority of the depositors' claims over those of the stockholders that indicates the extent to which a bank is a public utility. Fortunately, however, the concern of stockholders about bad loans is greater than that of the depositors; in fact, depositors begin to be concerned about bad loans only when their magnitude is such as to endanger the bank's ability to meet its liabilities. Stockholders, on the other hand, are constantly interested in the success of the bank's operations, because every profit made by the bank increases the value of the stockholders' equity in the business.

Responsibility of banks does not end with their depositors and stockholders. Banks also have a responsibility to the community in which they are located and from which they derive their deposits. If a bank invests all of its deposits in outside loans and securities, it is not fair to its community. If its outside loans and investments are safe and profitable, it is dealing fairly with its depositors and stockholders, but it fails in its responsibility to its own community. In so far as the use of a bank's funds in its own community is consistent with safety, local industries and enterprises are entitled to the first claim on these funds. This does not mean that bankers must be philanthropists. It simply means that their self-interest must be intelligent and far-sighted. For if a community should be constantly deprived of its funds by investment outside, sooner or later this is bound to arrest its growth and prosperity. Ultimately it would lead to a drying up of the flow of deposits which supplied the bank with funds for its operations. responsibility of the banker to his community is an application of enlightened self-interest. In popular parlance, the banker must play the game and do his bit in the commu-

At this point I want to consider in what way the Federal Reserve Banks enter into the picture. Their capital, as you know, is supplied by their members. They are in substance a co-operative enterprise among banks for the purpose of taking care of seasonal and emergency needs for credit and currency. They prevent excessive strains by lending the support of the financial strength of the entire System to the needs of any community that requires and is entitled to it. Even more than the commercial banks, the Federal Reserve Banks are public institutions and the public interest is paramount in their responsibilities.

It is the business of the Reserve Banks to see to it that there is no shadow of doubt cast upon the validity of their note issue. The Reserve Banks must also safeguard their own deposits, which are the reserves of the other banks. These deposits must be used in such a way as not to permit the slightest doubt of their immediate availability upon demand. It is for this reason that the Federal Reserve Act prescribes rigid limitations about the use of Reserve Banks funds. While the direct responsibility of the Reserve Banks

on deposits is to their member banks, it goes beyond that. It extends to the depositors of the member banks, because the safety of their funds depends to a certain extent upon the safety of their reserves carried with the Reserve Banks. Back of these reserve balances of the member banks are the reserves of the Reserve Banks themselves. These are the ultimate reserve basis of our entire banking structure. An all-important responsibility of the Federal Reserve System is the conservation of these reserves upon a proper gold basis.

At the risk of tiring you by stating what you already know, I remind you that for \$100 of deposits carried by a member bank, the Reserve Bank receives on the average about \$7.50 as a reserve balance. Against this reserve balance of \$7.50 the Reserve Bank must hold about \$2.50 in gold or lawful money. Thus the \$2.50 held by a Reserve Bank is the basis of \$100 of member bank credit. This in turn may be the basis of a still larger amount of non-member bank credit, because a large part of the reserves of non-member banks is held with member banks. This apparently narrow base of our credit structure is sufficient for safety only because of the co-operation of the banks through the Federal Reserve System. It emphasizes the extent of th responsibility of the Reserve Banks in protecting these reserves. The Reserve Banks must take a far-sighted view of the needs of the community and must maintain a stock of gold sufficient to provide for the country's growing needs.

It is, therefore, a responsibility of the Federal Reserve System to shape its policy in such a manner as to protect our gold reserves against too rapid depletion. During the past year, we lost \$500,000,000 in gold, and no one knows whether the redistribution of gold has been completed or whether the United States will lose additional gold to the rest of the world. Our gold reserves at the present time are \$1,000,000,000 in excess of the legal requirements and it is fortunate that they are, because it puts the bankers in a position to handle further export movements of gold if they should develop and to meet the growing credit needs of the country. The loss of gold for the past year has been a desirable thing, not only from the point of view of those who received it and used it as the basis of monetary reconstruction, but also from the point of view of the United States. It has removed from the foreign trade of the United States the risks arising from unstable exchanges and disorganized conditions among its foreign customers. The Reserve System's responsibility is to make such use of its reserves as are in the interests of the country in the broadest sense of the word. This involves close attention to developments both here and abroad and makes the framing of Federal Reserve policies not only a matter of national but of international importance of the first magnitude.

The Federal Reserve System has also a measure of responsibility for the rapidity of the growth of bank credit in this country, although the experience of the last 14 years has demonstrated conclusively that this movement frequently attains such momentum that it is some time before Federal Reserve policies become effective. You are familiar with the methods at the disposal of the Reserve System to accomplish these ends. They are primarily changes in discount and open-market rates and open-market policies in the purchase and sale of Government securities. Through these means the System can be an influence toward easier or tighter conditions in the money market, even though the influence may be slow in operating. It can, therefore, to a certain extent, encourage or discourage the growth of bank credit. All loans and investments of the member banks result in the creation of deposits. growth of deposits in turn increases reserve requirements of member banks and when these are met by rediscounting, reserve policies and rates begin to be effective. It is a mistake, therefore, to assume that only one or another class of loans or investments may be supported by the Reserve Banks, while other classes of loans and investments may not.

Since the Federal Reserve Banks furnish the basis of credit growth in any field, whether it be commerce, industry, agriculture or the trading in securities, the Reserve System feels concern about excessive growth in any line of credit. It is impossible for a Reserve Bank to earmark the credit it releases, but when too rapid growth in any line of credit threatens to upset the financial structure of the

country and make undue demands on the reserve funds, which should be conserved for the legitimate growth of the country's business, the Reserve System can properly use its influence against these undesirable developments.

Within the limits of its powers, the responsibility of the Federal Reserve System is for the credit structure as a whole. A healthy banking situation must be forever the primary concern of the managers of the Federal Reserve banks and of the Federal Reserve Board. These responsibilities are sufficient to require our best efforts in the determination of the wise course of action. This is one of the reasons why it would be unfortunate if the Federal Reserve System were to be charged with still further responsibilities which are not directly related to banking, such as responsibility for the stability of the general price level or for the moderation of ups and downs in business conditions. It is my conviction, and I want to leave this thought with you in conclusion, that a healthy banking situation is the best guarantee of a healthy economic development in so far as it depends on the use of bank credit. It is towards sound banking conditions that the Federal Reserve Banks must work in co-operation with their member banks and with other banks which are a part of our banking structure. In my opinion, the country's entire banking system, from the smallest country bank to the greatest financial institution, and this includes the Federal Reserve System, can best discharge its public responsibility by concentrating its efforts on the maintenance of sound banking conditions.

# A New Investment Policy for a New Economic Era By Leonard P. Ayres, Vice-President of the Cleveland Trust Company, Cleveland, Ohio.

Probably the most important business and banking fact of 1928 is that we have lost a half a billion of our monetary gold. This is about one-ninth of our total gold stock. Only once before in our history have we had a loss of gold comparable with this one, and that was in 1919 and 1920 when gold exports amounted to almost as much as they have this time. On that occasion, however, the loss was speedily made up by a return flow of gold, and this time it seems unlikely that anything of that sort will hapuen. It seems more probable that most of this loss will prove to be relatively permanent.

If this proves to be the case, the year 1928 may well turn out to be the end of one economic era in this country, and the beginning of another. The era which it will bring to a close will be the fourteen-year period from the outbreak of the World War up to this present year, which has been for the most part a time of great credit expansion based on huge gold imports. No one can foresee what the next few years will be like in a business way, but it is safe to say that they will be very different from those that are just behind us.

## The Golden Age.

The fourteen years that have elapsed since the outbreak of the World War have been in reality, as well as figuratively, the golden age of American business. When the Great War began we had in this country something less than two billion dollars of monetary gold, which constituted then, as it does now, the basis of the credit supply with which we do business. During the first few months after the declaration of war in 1914 gold flowed out from this country, so that by the end of that year we had lost some 4% of our holdings. At the same time we experienced a severe business depression.

Then gold began to flow in again, and this continued until in a little more than two years our gold stock had increased by over 70%. War orders came in also, and there ensued a period of business activity and industrial prosperity such as neither this country, nor any other country, had ever before experienced. Industrial profits rose to undreamed-of heights, our national income doubled, and our national wealth increased prodigiously.

The gold that came in during the war is mostly still here. We lost some of it in the price inflation periods of 1919 and 1920, and that loss was again closely followed by a severe business depression. However, the tide turned promptly, and in the four years following 1920 we gained more gold than our entire national holdings had been when the war

began. This increase was in addition to most of the tremendous imports of 1915 and 1916 before our own entrance into the conflict.

During these years since the outbreak of the war our gold holdings increased about two and a half times. The volume of credit extended by our banks advanced in closely similar proportion. The interest and dividend payments of our corporations increased about two and a half times. Our national wealth per capita also increased about two and a half times. It is apparent that there has been a close relationship between the rapid increase in our gold holdings, the consequent rapid growth in our volume of bank credit in use, and finally the vigor and rapidity of the growth of our national wealth and prosperity.

#### What Happens to Gold Imports.

It was inevitable that the great gold imports should enormously increase our prosperity, and our business and industrial activity. Gold is the basis of our credit system. When an importation of gold enters this country it is received by one of the commercial banks, which promptly deposits it with a Federal Reserve Bank, and gets a credit for the amount which it adds to its reserves. This addition enables the commercial bank to increase its loans, and very shortly each newly arrived dollar of gold has brought into existence ten dollars or more of that new credit which we commonly refer to as money. It is not to be wondered at that we have been prosperous since the outbreak of the war, nor is it astonishing that our prosperity was sharply interrupted when we temporarily lost some four hundred and fifty millions of gold in 1919 and 1920.

If anyone questions the importance of gold imports and exports as related to the prosperity of the country, he will do well to seek in the reports of the Comptroller of the Currency the figures showing our gold holdings, and the amounts of the deposits in all American banks from 1914 up to the present time. He will find that during that entire period the volume of bank deposits has been about ten times as great as the amount of our gold holdings. This means that every time one dollar of gold has been imported some one has shortly thereafter had ten dollars more deposited to his credit in some bank than he had before. Moreover since bank loans and investments are considerably larger in amount than bank deposits, the arrival of each new dollar of gold has meant that bank credit in use has promptly expanded by about twelve dollars.

Moreover an examination of these same two columns of figures in the Comptroller's reports, showing our gold holdings and the totals of deposits in our banks, reveals another fact that arrests the attention. It is that our gold holdings decreased by 300 millions from the middle of 1919 to the summer of 1920, and then that bank deposits decreased by about two and a half billions from the middle of 1920 to the summer of 1921. This means that on that occasion every time one dollar of gold was exported some one shortly thereafter had about eight dollars less in his bank deposit than he had before. The expansion of bank credit through gold imports is pleasant, and produces contentment. Its contraction following gold exports is painful, and results in discontent.

#### The Federal Reserve System.

Another fundamentally important factor besides gold movements has been shaping our business and financial history during these same fourteen years. The Federal Reserve System came into existence the year that the great war began. Under its leadership our banking and fiscal systems passed successfully through the stresses and strains of the war period. Even if there had been no war the advent of the Reserve System would have operated to increase the credit resources of this country, because the System made our gold reserves more efficient than they had en under the former banking system. What actually did happen was that two sets of factors combined to increase American credit resources. In the first place we received from abroad huge and unexpected increases to our stock of money gold, and in addition to that we changed our banking system so as to use those swollen gold reserves more efficiently than ever could have been done under our pre-war banking system.

#### Gold Flows Out.

During 1927 and 1928 we have lost about half a billion dellars of our gold, or about one-ninth of our entire stock. All that gold had been used as the basis of banking credit which is still outstanding. The half billion that is gone was used while it was here to support perhaps six or seven billion dollars of bank loans. If it had not been for our Federal Reserve System its departure would have brought about a severe business crisis. But one of the functions of the System is to meet emergencies, and it has effectively done so this time.

The bank credit is still outstanding, but while it was formerly based on the gold, it is now supported by an equal amount of loans that the member banks have secured from the Federal Reserve Banks. How these loans are to be paid off is a serious question which must be answered in the main by the bankers who have received them. Perhaps they will be reduced in part by the receipt of new importations of gold, but that does not appear likely to happen on a large scale. Possibly member banks will continue in debt to the Reserve System in larger amounts than those to which they have been accustomed in the past, but that does not seem either probable or desirable. It may be that the Reserve Banks will increase their holdings of securities, and so by their open market operations enable member banks to reduce their indebtedness. Perhaps a deflation of outstanding credit is impending. It seems probable that all four of these developments will take place.

However this may prove to be, the fact that has the most important bearing on the future prospects of banking and business in this country is that heavy and regular imports of gold seem to be things of the past. During more than two thirds of all the months from the beginning of 1915 to the end of 1927 our stock of monetary gold increased, and most of that increase came from imports. The rest of the world was shipping its gold to us, and making us rich. These imports have now ceased, and heavy exports have taken place. The present prospects are that we shall be compelled to earn the future increases in our gold reserves by working and saving in full competition with the other nations.

If this turns out to be the case it means that important changes are coming in American life. During the past four years this country has enjoyed a redundant credit supply such as no other country ever had. We have been able to finance simultaneously a business boom, a building boom, a Florida boom, and a stock market boom without the slightest trace of a credit stringency. Our Federal Reserve System has probably been the only central bank that has for years at a time had no need to take precautions looking to the safeguarding of its reserves, and has only needed to concern itself lest credit should be used unwisely.

## Speculation.

Now at last all this has changed, but the transition to a new and more sober era is not going to be easy. The American people are in a mood of invincible optimism. Three years ago they were speculating in Florida land, and finally that bubble burst. Then they speculated in urban real estate, and now they are finding that the rents that are obtainable will not justify the prices to which property had been bid up, and as a result city real estate prices are rapidly coming down. Now they have turned to the stock market where prices of the stocks of mail order houses, chain stores, motor companies, and soft drink firms are selling on a basis to yield half as much as the obligations of the United States Government. Probably it can be mathematically demonstrated that on a yield basis the prices of representative groups of industrial stocks are now selling at prices literally twice as high as similar stocks have ever sold before at the tops of the most excited of previous bull markets.

Stocks are now selling on expectation rather than on realization. All the experience of the past points clearly to the conclusion that prices are too high, and must come down. The public appears to be mistaking the past for the future, and confidently believing that the credit inflation based on the gold that is gone will somehow suffice to support the market prices for their stock equities until something else can take its place. No conclusion is more safe

than that the speculative markets in their present mood would promptly sop up for stock margins any additional credit that the Reserve System might make available, if it should attempt to ease off the present credit stringency.

### Investment Policy for Banks.

However, our concern here and now is not about what may happen in the stock market. We know that all exceptional waves of speculative fever ultimately run their course and flatten out. Our concern relates rather to the problems involved in shaping a bank's investment policy for the new economic era which we appear to be entering. It is safest to assume that this new era will be one in which gold imports and exports will be smaller in volume than those of the years since 1914. Probably they will mostly result from the normal transactions of international trade, instead of being caused by the collapse and rehabilitation of the fiscal systems of foreign nations. It is likely too that future waves of exports and imports will in general more nearly counterbalance one another than they have in the recent past.

If this type of development takes place, we shall probably enter upon a period in which bond yields and short-term money rates will once more have relationships something like those that maintained in the years before the war. The old records, as far back as one may care to follow them, conform to one simple rule which probably embodies the basal principle which should guide the bank in shaping its own policy for the investment of its secondary reserve funds. That rule is that it is profitable to shift funds into short-term paper when the discount rates on that paper are higher than the yields available from high-grade bonds, and to get out of the short-term paper, and repurchase high-grade bonds, when bond yields are above short-term paper yields.

#### A Simple Rule.

This rule, when stated that way, sounds almost too simple to warrant much discussion. It is merely to shift funds from bonds to paper, and from paper back to bonds, whenever the published yields show that the shift would be profitable. Nevertheless the rule, if followed, is likely to save the bank from important losses in its bond account. The reason for this is that bond prices tend to fall during the period that the short-term paper rates are higher than the bond yields, and they tend to rise during the time that bond yields are above the paper rates. If the shifts are made when the two classes of yields cross one another, the bank will get the advantage of the advances in bond prices at times when they are rising, and avoid the losses when they are declining.

Probably the easiest way to apply this rule is through watching the data supplied monthly in the reports of the Standard Statistics Co. The change in policy should be put into effect when the rate on four to six months prime commercial paper crosses the rate on the Standard 60 high-grade bonds. The last time the commercial paper rate fell below the bond yield was in December of 1923. If typical highgrade bonds had been purchased at that time, and held until February of this year, when the yields next crossed, the yield on the bonds would have been at the rate of over 5% during the four year period, and the appreciation in their price would have been nearly 20%. If the proceeds had then been put into short-time paper or call loans the yields so far this year would have been of the sorts you know all about, and a shrinkage of about 3% in the bond prices so far would have been avoided.

Another method for conveniently following the yields of high-grade bonds is to look in the "Wall Street Journal" about the middle of each month for their index of 40 bonds. This index is simply the bond yield capitalized at 4%, so that the easy way to find out what the yield was is to divide the number 400 by their index number. This will give the bond yield figure. The commercial paper rates may be taken from the same source.

## A New Economic Era.

The point that I have been attempting to make in all this discussion is that we appear to be entering a new economic era in which business can no longer depend on having the stimulus of successive large increases in the national credit supply due to heavy imports of gold. We appear to be

leaving behind us the wonderful golden age that we have enjoyed must of the time since the depression of 1921, during which prosperity has promised to be perpetual, the old fashioned business cycles with their recurrent booms and depressions have been in abeyance, and the trend of stock prices has been almost constantly upward.

We may look forward to the longer future with confidence, for we still have a larger gold supply in proportion to our needs than has any other country, and we have a central banking system that is probably more effective and efficient than that of any other country. A period of readjustment to new conditions probably lies ahead, and it may be expected to present important difficulties, but we shall surmount them. The great rewards of business and banking during the next decade will probably go to the plodders rather than to the plotters, to the calculators instead of to the speculators, to the thrifty and not to the shifty. It may even be that the hour of the old-fashioned virtues in business life is about to strike.

## Purchase of Investment Securities by Bankers

By J. W. McIntosh, Comptroller of the Currency, Washington, D. C.

The decline in the bond market has probably done more than anything else to focus the attention of the banker on his security list. The item "appreciation" cannot now, in many cases, be pointed to with pride and gleefully counted on to take care of some loss set up by the bank examiner -it has evaporated and in its place stands "depreciation."

Investment lists of all banks feel the effect of a decline in the investment security market, but how much more severe is its effect on the bank which has not invested wisely, the bank which has not diversified, and which has bought from the standpoint of high yield instead of safety and stability, and this bank is more often found among the country banks than the city banks. The reasons for this are obvious and several in number.

The average metropolitan bank is in closer touch with the investment security market and with the high grade investment houses. It has on its staff experts in the investment field and becomes a specialist in this line. The country bank, in many cases, cannot equip itself as effectively. It generally cannot stand the overhead and it is difficult for the country banker to find the time to study the matter, for his time is fully occupied in attending to local credits and operation of his bank. The result is that the bank approaches the task of buying and selling investment securities with little or no experience or training in this field and with a judgment in such which is naturally unseasoned and immature. What happens? While the directors are giving consideration to a loan of \$500, the Cashier of the bank swallows whole the talk of a high pressure salesman of a low class securities house and buys \$50,000 of high-yield, unliquid, low grade securities. I do not mean to convey the impression that this is typical of a majority of country banks, but it well illustrates several cases which have come to my attention. It is to the correction of such a situation I wish particularly to address myself.

Since the passage of the McFadden Act, National banks purchase investment securities for three main reasons:

- For secondary reserve, For permanent investment, and
- 3. For sale to their clients.

It is healthy for the bank to engage in these purchases when wisely handled, for not only should the bank have the reserve which is created thereby but the bank's client has a right to and demands these services, and in addition it offers a new source of income beyond interest and discount.

In approaching the problem which confronts him, the country banker should bear in mind:

First.—That a personal call from a securities salesman does not insure the securities purchased from him. In this connection the increased competition among underwriters of securities for the high grade issues with low rates of interest has cut to the quick the margin of commission or profit to be had on such issues. The outcome has been that the large city banks and sound investment houses cannot afford to spend large sums in selling such securities through-

out the country. It is impossible for them to send their salesmen with considerable frequency to call upon the country banker and are often compelled to make their offering by mail-a method which is admittedly less effective than a personal call, which is obviously much more expensive.

Second.—That unsound securities no matter how high the yield which they give, are fore more likely to produce losses than profits. Most country banks have suffered loss through unwise loans and many have been brought to liquidation for this reason. In the eagerness to secure yield, the safety of principal is forgotten or neglected and the results have been disastrous. The same kind of thing has begun again, this time with securities as the asset which is causing the trouble. Far too many bankers when they buy bonds are buying yield and are paying little attention to safety or liquidity, and a few losses of the principal of securities which default in the course of a year will not only wipe out the extra interest but are likely to turn net income into a loss. This has occurred in a number of cases which have come to my attention.

Third.—That unsound securities do not add to the liquidity of a bank's assets but on the other hand detract from it. Many country banks have found themselves in difficulty because of the frozen condition of their assets, even when the underlying securities appear to be ample. The same thing is happening in the case of securities. Poor investment securities, even though they are not in default, lack liquidity at all times. Thus in times of stress when a bank wants to rely upon investment securities for liquidity, it will find that poor securities fail them. From this standpoint they can only be sold—if they can be sold at all—at a heavy

Fourth.-Diversification. Diversification which will provide the desired safety, liquidity and high yield. Diversification according to types of bonds, governmental, State and municipal, public utility, railroad equipment, trust, industrial, corporation and foreign government. Diversification in respect to management, especially in so far as public utility and railroad securities are concerned. Geographic diversification for all types of bonds and diversification in respect to maturity.

Fifth.—The purchase of investment securities adapted to its own particular needs and requirements. What the needs of a bank in purchasing investment securities are must necessarily rest with the bank. Some banks have large sums available for investment in bonds, other have hardly enough funds available to purchase securities purely for a secondary reserve account. The division of deposits between demand and time deposits will determine in a large measure the situation of a bank in this respect, as well as serve as a basis for the determination of the size of the secondary reserve. The fluctuation in deposits and local loans, the number of large accounts and the amount of the variation in their deposits, the cyclic changes in the business of the community will all have their influences over the size and character of securities purchased. Obviously, yield must be sacrificed to some extent to obtain both safety and liquidity. Liquidity cannot be neglected but it will be found that most, if not all, bonds of sufficiently high quality to be included in an investment account of a bank will also have adequate liquidity.

These are questions of the most vital importance to the bankers, city as well as country, but as I have previously pointed out, it is difficult for the country banker to find time to study the question. Of course, he should certainly study these problems as intensively as he can but he should take another step upon which I place great emphasis and which I desire to emphasize as a solution and that is he should communicate with his correspondent bank and ask its aid and assistance in making his investments. To do this he should at once stop buying his securities pro ously from every "Tom, Dick and Harry" salesman who calls at his bank. His correspondent bank will not only offer him every assistance in his problems but it will recommend to him high class security investment houses from which he may deal with safety. Moreover, the correspondent bank or a good investment house often offers a service which is valuable, that is the analysis of the bank's security holdings. An analysis of this sort which is of great value to the banker is one which analyzes his reserve and investment needs and measures his actual situation against these requirements. Such an analysis when intelligently and conscientiously made is invaluable to a banker in dealing with his problems. Such an analysis may perhaps be new to many bankers but they are being made.

With this purchasing problem solved, the country banker is better equipped to deal with his clients and in this connection he must consider two main points:

First.—Possible profit to be gained in the selling of investment securities.

I have touched on the cost of distribution of high grade securities to banks as compared with possible profits to be gained by handling these securities by the large underwriting and distributing houses and this applies equally well to the sale of securities to individual customers outside of the large centers. The country banker, however, is not confronted with the same large costs of retail distribution as the big city house in its efforts to reach the purchaser. The bank's clients are constantly coming in its doors and while there the wise banker can make his sale to them without the necessity of special salesmen and heavy traveling and advertising expenses. The country bank of moderate size which has built up a substantial security business in this way can obtain wholesale prices from the distributing syndicates. The smaller bank can frequently make arrangements to sell off of the list of its correspondent city bank or some high grade investment house subject, of course, to confirmation. The profit, naturally, is smaller, but the country bank by so doing ties up none of its funds and assumes none of the risk. Here is a field of operation which yields a profit to a bank, provided, and this provision is most important, it sticks to sound lines.

Second.-Service and duty to the community.

Country banks owe a real service and duty to their community in seeing that the funds of the community go into safe investments. The same houses whose salesmen are forcing the banks into buying poor securities are selling the same securities to the people in the community which the bank serves. The outcome is often the loss of personal fortunes on the part of the individual and loss of finances to the community from which the bank must inevitably suffer, as well as the loss to the bank of the profit which it might have made by selling good securities itself to its clients. The country banker has a real personal interest as well as a duty to his community to combat the losses which result to his client-actual and potential-from unsound securities being sold in his community by high pressure selling organizations of dubious standing. The slogan "Consult your banker before you invest" should be more frequently used by the country banker and in this connection he should really wage a campaign of education. There is great need for it, as is evidenced almost daily by the experience of the Treasury Department in listening to the stories of those who have been deprived of part of their life savings by the exchange of their Government securities for worthless securities.

There is one other phase of the duty of banks to the community they serve, upon which I desire to touch. Banks which have trust powers should not become trustees for security issues of doubtful value. An example of the effect of such practice was most vividly brought to my attention when I found in one case that twelve banks had purchased doubtful or worthless securities—the sole reason for such purchases being the fact that a large bank was named as trustee. The purchases in this case resulted in the failure of three of the banks. When the name of a large bank or trust company as trustee is dangled before the prospective customer, it is often the deciding factor in the purchase of the security offered. When that security is of dubious character it reflects no credit on the bank.

American Bankers Association in Resolutions at Annual Convention Urges Limitation of Loans on Stock Exchange Collateral—Suggests Federal Reserve Board Penalize Banks Abusing Privilege of Adjusting Reserve Weekly—Other Resolutions.

Taking cognizance of the advance in market values to unprecedented levels and the increasing demand for Stock Exchange loans, the American Bankers Association at the

concluding session in Philadelphia on Oct. 4 of its annual convention adopted a resolution expressing it as its "opinion that the development of the practice of withdrawals from banks by corporations and others for the purpose of making loans on Stock Exchange securities should be limited in some reasonable manner, possibly based upon the maintenance of normal balance which should not be disturbed by those who take part in Stock Exchange loans." The Association suggested in its resolution that "bank depositors who have funds for investment co-operate with their bankers to the end that nothing unsound shall develop that might result in the disturbance of the healthy business conditions." In recording its views in the matter the Association also made the statement that "we look upon the present situation as one which will undoubtedly correct itself as time goes on, until the banking system of the country again has a proper control over the surplus funds of the country." The resolutions declare that "the recent change in the rule governing the adjustment of reserves of banks located in cities having a Federal Reserve bank, or branch thereof, has imposed an unnecessary burden upon such banks," and the Association suggests "to the Federal Reserve Board that it again permit a weekly adjustment of reserves and penalize only those banks which abuse the privilege." It is further suggested "that the percentage of reserve be based upon the bank's condition at the beginning of the day." According to a Philadelphia dispatch to the "Times," the resolutions, unanimously agreed to by the delegates, were not completed in committee until after more than a day of heated debate. The dispatch also states:

Some members of the committee wanted more drastic recommendations; others wanted to leave it to Congress; still another group wanted to put the onus for solution of the problem directly up to the Federal Reserve. The absence of any reference, either in commendation or criticism, to the present Federal Reserve policies attracted wide attention among the

delegates

The following are the resolutions as presented by the Committee on Resolutions and adopted by the Association:

The Credit Situation.

For the purpose of assisting in the necessary stabilization of the currencies and exchanges of foreign countries and their return to the gold standard, and to enable foreign countries to buy our commodities freely, the Federal Reserve System stablished low discount rates. During the same period, this, together with the plethora of capital, accumulated since 1921, seeking investment, made it possible for corporations of this country to obtain funds through the issuance of securities of various types.

As a result, the large corporations through the sale of their securities

As a result, the large corporations through the sale of their securities liquidated their indebtedness, and thus a large volume of paper eligible for rediscount at the Federal Reserve Banks has been eliminated. Further, many corporations have been supplied with funds in this manner, for which they have had no use during the major part of their fiscal years and which

they have had no use during the major part of their fiscal years and which they have utilized by making loans against stocks and bonds.

At this same time, we continued to make loans to Europe which followed by exports of gold, resulted in a net loss of five hundred million dollars in gold which lessened to that extent our surplus reserves. Never before in our history has the public taken the same interest in stock investments or speculation as it has during the past six months, and this coupled with favorable business developments, has caused market values to advance to un-recedented levels, thus increasing the demand for stock exchange loans.

We recognize the fact that as corporations which have secured funds through the issuance of securities in excess of current requirements continue to expand, they will gradually return to their former relations with their bankers, under which they naturally borrow through the issuance of eligible paper while processing materials and distributing production.

We therefore look upon the present situation as one which will undoubtedly correct itself as time goes on, until the banking system of the country again has a proper control over the surplus funds of the country. But it is our opinion that the development of the practice of withdrawals from banks by corporations and others for the purpose of making loans on stock exchange securities should be limited in some reasonable manner, possibly based upon the maintenance of normal balances which should not be disturbed by those who take part in stock exchange leans.

We respectfully suggest that bank depositors who have funds for investment co-operate with their bankers to the end that nothing unsound shall be allowed to develop that might result in the disturbance of the healthy business conditions upon which we must all depend for our comfort and

happiness

It is highly desirable that the Federal Reserve Beard in its regulations give due consideration to the situation of the great body of member banks. The recent change in the rule governing the adjustment of reserves of banks located in cities having a Federal Reserve Bank or branch thereof, has imposed an unnecessary burden upon such banks, most of which have never abused the privilege formerly accorded them of adjusting reserves weekly. We suggest to the Federal Reserve Board that it again permit a weekly adjustment of reserves and penalize only these banks which abuse the privilege. We also suggest that the percentage of reserve be based upon the bank's condition at the beginning of the day.

Capital Gains Tax.

The United States of America is the only country in the world that levies a capital gains tax. We believe such a tax in peace times to be uneconomic and unsound in principle and in practice and, tending to check the wheels of progress. The imposition of such a tax is doubtless one of the factors in the speculative situation in the stock market, as many persons who have large paper profits hesitate to liquidate now in view of the large tax they would have to pay; and this situation alone appears to be a good argument in favor of the repeal of such a tax. Great Britain treats capital gains as an increment to capital, and it is recommended that the United States pursue the same policy.

State Tazation of Banks.

There are now pending before the Congress of the United States various bills to amend that portion of Section 5219 of the Revised Statutes of the United States which authorizes taxation by the States of the steckholders of National banks, the effect of which amendments would undo the longestablished underlying principle embodied in that section, which the United States Supreme Court has stated was designed to render it impossible for States to discriminate against National banks in taxation.

States to discriminate against National banks in taxation.

We deem it vital to the banking system of the United States that the integrity of the established principle of Section 5219 for the protection of National banks against discriminatory taxation by States be firmly maintained, as the principle embodied therein operates also in a large measure for the protection of the stockholders of State banks.

for the protection of the stockholders of State banks.

Therefore, we recommend that this Association reaffirm the resolution adopted in 1927 at its annual convention at Houston, Texas, and declare its opposition to any amendments to Section 5219 which tend to infringe upon the integrity of the protective principle thereof and directs its Special Committee on Taxation to carry out the purpose of this resolution.

#### Agriculture.

We view with satisfaction the fact that within the present year the prices of most farm products have recovered more nearly to their pre-war relation to the prices of the products of other industries than has been the case in any other year since the war. We believe that this represents a national readjustment, due in part to a more intelligent control of agricultural production in relation to the consumption demand, and in part to lower costs of production in other industries which are reducing the prices of goods which the farmers must buy. We urge the co-operation of our members in the activities of our Agricultural Commission in the introduction of improved livestock and improved methods of production and marketing in their own localities. We believe that an important contribution to remedying the agricultural depression lies in the adoption of methods which will lower the unit costs of production, and believe that the agricultural colleges and experimental stations are successfully developing the means by which they may be accomplished.

We believe also that agriculture suffers from the lack of a comprehensive national agricultural policy, due to the complexity of the subject which has required wide national discussion, and we urge upon Congress diligent continued attention to the remedying of this situation.

#### Unsound Practices.

Due to the strong competition which has arisen throughout the country between banking institutions, unsound practices have developed which tend to lower the high standard of our banking practice. We have in mind especially the rendering of various classes of service without proper compensation, and paying high rates for money left on deposit.

#### Hosts and Speakers.

The Association extends the sincere thanks to the bankers, hotels, press, ladies and general public of the city of Philadelphia for the manifold kindnesses and gracious hospitality extended to all of the delegates and their families. Likewise, the Association is indebted to the speakers at the various sessions of the Convention, Divisions and Sections, who by their carefully prepared addresss have helped to make the Fifty-fourth Annual Convention of this Association one of profit and enjoyment to all those who were privileged to be present.

#### Respectfully submitted,

CHARLES A. HINSCH, Chairman: GEORGE E. ROBERTS, EVANS WOOLLEN, WALTER LICHTENSTEIN, THOMAS B. PATON, E. H. SENSENICH, TAYLOR R. DURHAM, W. J. EVANS, W. F. AUGUSTINE, FRANK WARNER, BURTON M. SMITH, FRED I, KENT.

#### Next A. B. A. Convention at San Francisco.

San Francisco was chosen on Oct. 1 by the Executive Council of the American Bankers Association as the meeting place for the 1929 convention of the Association. The next conclave, the fifty-fifth in the history of the A.B.A., will take place during the week of Oct. 14. The invitation to the Association to come to the city by the Golden Gate was offered on behalf of the San Francisco Clearing House Association by W. E. Wilcox, Vice-President and Cashier of the Anglo & London-Paris National Bank of that city and former President of the California Bankers Association.

## C. B. Hazlewood Chosen President American Bankers Association.

Craig B. Hazlewood, Vice-President of the Union Trust Co., Chicago, was elevated to the Presidency of the American Bankers Association at a general session of the Association's convention at Philadelphia on Oct. 3. He had been First Vice-President of the Association. John G. Lonsdale, President of the National Bank of Commerce in St. Louis, who has been Second Vice-President of the Association, was elected First Vice-President. Rome C. Stephenson, Vice-President of the St. Joseph County Savings Bank, South Bend, Ind., was chosen as Second Vice-President.

#### W. F. Augustine New President of Clearing House Section of American Bankers Association.

W. F. Augustine, Vice-President of the National Shawmut Bank of Boston, Mass., was elected President of the Clearing House Section of the American Bankers Association at its meeting at the Hotel Bellevue-Stratford in Philadelphia, on Oct. 1. H. Y. Lemon, Vice-President of the Commerce Trust Co., Kansas City, Mo., was elected Vice-President and G. H. Mueller, Vice-President of the Fletcher American National Bank, Indianapolis, Inc., and Clark G. Mitchell, President of the Denver National Bank, Denver, Colo., were elected members of the Executive Committee.

#### Regional Savings Conference Cities Chosen by Savings Bank Division of A. B. A.

San Diego, Birmingham, Grand Rapids and New York were selected on Oct. 3 by the Executive Committee of the Savings Bank Division of the American Bankers Association as the meeting places for the Division's regional conferences during 1929. The dates for the conferences will be decided later.

#### Newly Elected Officers of Savings Bank Division of American Bankers Association.

Taylor Durham, Vice-President of the Chattanooga Savings Bank & Trust Co., Chattanooga, Tenn, .was on Oct. 1 elected President of the Savings Bank Division of the American Bankers Association at the Division's meeting of the Association's 54th annual convention in Philadelphia. Other officers chosen were: Vice-President, Austin McLanahan, President of the Savings Bank of Baltimore; member Executive Committee, one-year term, Col. J. C. Person, President of the American Traders National Bank, Birmingham, Ala.; members Executive Committee, threeyear term, Jay Morrison, Vice-President of the Washington Mutual Savings Bank of Seattle, Seattle, Wash.; Myron F. Converse, President of the Worcester Five-Cent Savings Bank, Worcester, Mass., and Howard Whipple, Executive Vice-President of the United Security Trust & Savings Co., San Francisco.

## State Bank Division, A. B. A., Elects Officers.

S. J. High, President of the Peoples Bank & Trust Co. of Tupelo, Miss., was on Oct. 2 elected President of the State Bank Division of the American Bankers Association convention in session at Philadelphia. Dan V. Stephens, President of the Fremont State Bank, Fremont, Neb., was chosen Vice-President. Members of the Executive Committee elected were R. O. Lord of the Guardian Bank, Detroit, Mich., and T. O. Hammond of the Montana Trust & Savings Bank, Helena, Mont.

#### New Officers of National Bank Division of A. B. A.

Edgar H. Sensenich was on Oct. 3 elected President of the National Bank Division of the American Bankers Association. He is president of the West Coast National Bank of Portland, Ore. Harry J. Haas, Vice-President of the First National Bank of Philadelphia, was elected Vice-President of the National Bank Division. Walter W. Wilson, President of the First National Bank, Milton, Pa., was elected a member of the Executive Committee of the National Bank Division of the American Bankers Association, representing the Third Federal Reserve District.

#### Arthur V. Morton Elected President Trust Company Division of A. B. A.

Arthur V. Morton was elected President of the Trust Company Division, American Bankers Association, at the annual convention at Philadelphia, Oct. 3. He is V.-Pres. of the Pennsylvania Company for Insurance on Lives and Granting Annuities, Philadelphia. Mr. Morton was born Sept. 2 1873 in Philadelphia. Upon completing Haverford College in 1893 his first position was with the Quaker City National Bank. In 1894 he became associated with the Pennsylvania Company for Insurance on Lives and Granting Annuities, of which firm he is now Vice-President. He is also a director of the Philadelphia National Bank, the Union Traction Co. of Philadelphia, the American Dredging Co., Philadelphia, and the Mutual Assurance Co., Phila. From 1919-1920 he was President of the Pennsylvania Bankers Association. Mr. Morton was elected Chairman of the Executive Committee of the Trust Company Division, American Bankers Association, in 1927.

#### President Coolidge Sends Greetings to American Bankers Association in Convention at Philadelphia.

President Coolidge on Oct. 2 sent his greetings to the American Bankers Association, in convention at Philadelphia in the following message, addressed to the President of the Association, Thomas R. Preston, President of the Hamilton National Bank of Chattanooga, Tenn., which was read at the opening general session of the Association's 54th annual convention:

I have a very high regard for your organization, its aims and purposes are high, and its achievements have been to the benefit of the financial and business interests of the country. I wish for you a most successful meeting. Please extend my greetings and best wishes to your members.

## Indications of Business Activity

#### STATE OF TRADE—COMMERCIAL EPITOME.

Friday Night, Oct. 5 1928.

The dominant note in the trade of this country is cheerful. The volume of business is gradually increasing, where the weather has been cool and seasonable. In some other sections where it has suddenly reverted to warm conditions, trading has fallen off for the time being. At Chicago the temperature has latterly been up to 78, at Cincinnati and Cleveland to 82 and at Kansas City to 86. But in the nature of the case this must be temporary. Collections, it is true, might be better than they are. In some sections, indeed, they are slow. That is partly accounted for by the holding back of wheat and cotton. Secretary of Agriculture Jardine has been advising the farmers to hold back their wheat crops for higher prices. He has also advised farmers to feed some 50,000,000 bushels of corn to livestock in addition to the usual amount. The corn crop may turn out to be 100,000,000 bushels less than was at one time expected. The holding back of crops naturally to some degree impairs the buying power of the farmer, but it has not gone to extremes. The chain and mail store systems are doing an excellent business. Carloadings are gaining. Corn has been in better demand, partly for export, at rising prices. In fact, corn for some deliveries is selling at the highest prices of the season. The domestic cash demand is good, and Europe evidently wants a certain amount of American corn for early delivery. Southwestern and Northwestern wheat prices seem to be getting nearer the export basis and prices lately have been advancing, although actual export trade has not generally been large; far from it. The pronounced firmness of wheat prices at Winnipeg has had an effect on all the world's wheat markets. It now looks to many as though India and Russia will be importers rather than exporters of wheat this year. The other day India was credited with buying several cargoes of Manitoba and Argentine wheat and to-day export sales of wheat were about 1,000,000 bushels, largely American durum. No. 2 hard American wheat is cheaper at the Gulf than Canadian. Moreover, there has recently been a tendency to oversell the wheat market. It seems plain enough that the technical position is good.

The political situation as well as the cheapness of the price is cited as an argument against any further material decline. No. 2 red c.i.f. domestic has latterly been quoted at 20c. a bushel lower than at the same time last year. On the other hand, livestock prices have risen in recent weeks to a point that ameliorates the condition of the farmers. That fact is exciting attention. It is such things rather than political moves of one kind or another that seem more likely to relieve the agricultural situation. However unwelcome the advice may be in the long run, it will come down to this: that the grain farmer must produce for the market and not overproduce. In other words, he must regulate his acreage as the manufacturer has to regulate his output, in accordance with the law of supply and demand. There is no evading anything so fundamental as this. The livestock farmers of the corn belt see the point. It is recalled that on September 17, according to the Corn Belt Farm Dailies, four of the largest livestock markets, namely, Chicago, Kansas City, Omaha and St. Louis, paid the farmers of the corn belt \$16,500,000 in cash for cattle, hogs and sheep in one day at a season of the year when the marketing is comparatively small. This sounds highly suggestive. If the farmer finds a dull market for one thing he may find a better market for something else. In any case the old homely rule applies against carrying all the eggs in one basket. Latterly, there has been a better export demand reported for rye and exporters seem to be taking some oats. Exports of cotton have tended to increase. Cotton has declined moderately. The undertone, however, has been on the whole steady with the general expectation that the Government report on Oct. 8 will put the yield at something like 14,150,000 bales against 14,439,000 on Sept. 8, 12,955,000 the harvested crop last year and 17,911,000 in 1926. Meanwhile, the demand for the actual cotton at the South is so good that the daily sales are running well ahead of those on the corresponding days last year. Furthermore, the demand for cotton goods is better. A signifi-

cant fact is that mills in the Carolinas are abandoning curtailment. An attempt to bring about a general strike of textile workers in France has met with a decided check in the big Lille district. One hundred thousand cotton workers, it is true, have struck in Poland for a 20% wage increase. The strike among cotton mills at Bombay has ended. Persistent efforts are being made to end the strike at New Bedford. It has been running for 25 weeks because the manufacturers under the stress of poor profits wanted to reduce wages 10%. Latterly they offered to make the reduction 5%. But the workers refused to accept the compromise. They may think better of it in the near future. It would not be a bad idea. A strike lasting six months is certainly of no benefit to cotton workers in New England which has to face such sharp competition from the South. Most cotton goods of late have advanced and it is now said that some mills cannot deliver on new business before Jan. 1. Larger sales are noticed of finished cottons, especially blankets not to mention bleached goods and percales, which are wanted in liberal quantities for fall delivery. Also, it was gratifying to notice that a larger business at least for immediate delivery is being done in woolens and worsteds, in overcoatings, suitings and dress goods. That seems to indicate that buyers have allowed supplies to become depleted. Broad silks, moreover, have been in better demand for prompt delivery. Raw silk has been in good demand and at times higher although some of the Yokohama cables seem to intimate that there has been an increase in the crop of 5%. The business of the Silk Exchange here is gradually broadening out.

The mail order sales of three large concerns in September were \$54,424,390 against \$47,936,995 in August this year and \$44,660,880 in September last year. The same three concerns for nine months ending Sept. 30 did a business of \$407,765,867 against \$358,646,625, an increase over the same time last year of 13.7%. The mail order sales in September gained 13½% over those of August, and 21.8% over those for Sept. last year. Chain store sales in September in the case of eleven concerns gained 16.3% over those for September last year and for nine months gained 10½% over a like period in 1927. The significance of such figures is plain enough.

Mine and smelter employees have had their wages increased. There is some falling off in the output of automobiles, but that is usual at this time, and, besides, the production is still large. The decrease in employment is small at Detroit. There is a better demand for coal, but prices are irregular. Stove factories are busy and are well sold ahead. Lumber on the Pacific Coast has been firm. The north Pacific trade in canned salmon is brisk with the pack twice as large as that of last year. The shoe manufacturing trade is active and benefited by the recent decline in leather and hides. Radio manufacturing is also on a larger scale. Recently prices for cattle and hogs have been firm, though those for sheep and lambs have declined. Of cattle the receipts in the last couple of weeks have been the largest for the year and for a time rather overburdened the market, but in spite of all this, there has latterly been a significant firmness of prices. One of the signs of the times is the increased production of electricity by public utility power plants. They exceed anything ever before known. Raw sugar has declined to 21/2c. cost and freight with some pressure to sell and no very ready market. Refined sugar has been in no great demand even at some recent easing of prices. Coffee at one time reacted a little in a dull market but latterly had advanced somewhat, though transactions have still kept within a very moderate compass. Brazilian interests are supposed to have bought to some extent while Europe sold Santos for May delivery. It is plain enough that the Brazilian Defense Committee still has the situation pretty well in hand. How such artificial methods will turn out in the long run is another matter. At the present time Santos coffee is apparently not quite so much wanted as Rio and Victoria. neither of which is in abundant supply here.

The stock market this week has shown the usual price vicissitures as money rose and liquidation pressed on the one hand, or as money dropped as it did to-day, to 6% and

shares advanced. Trading has continued on a historic scale to which some attach political significance. But aside from such theories, trade is gradually improving, industries show a tendency to expand, some farm products have advanced and the stock market is regarded by many as a fingerpost pointing the way to still better times. Five millions more of gold are to come here from London or about \$10,000,000 thus far this fall. Prices to-day advanced on transactions of some 4,300,000 shares with the high light on such stocks as Chrysler now up over 80 points from the low this year. Railroad shares lagged because, it seems, of the suggested dropping of the proposed Southwestern merger plan. Bonds were in better demand to-day and stronger with marked attention to Seaboard bonds at a rise of 1 to 5 points and noticeable and so-called speculative trading also in Barnsdall 6s, Andes 6s, Public Service 41/2s as well as Seaboard Air Line 6s and Seaboard All-Florida 6s. A seat on the Stock Exchange was sold on the 2d inst. at the high record price of \$425,000, an advance of \$10,000.

New Bedford wired that manufacturers following the rejection of the mediation offer are inclined to open their plants next Monday morning for those who desire to resume work at the 5% reduction. Manufacturers present a solid front. Boston reports a better yarn market. At Greensboro, N. C., the Proximity Manufacturing Co., operating the Cone Mills, has announced the end of curtailment in the Proximity and White Oak plants, employing about 2,500 people and chiefly occupied with the manufacture of denims. At Gastonia, N. S., the Aven Mills, large yarn plant, have resumed operations following several weeks' shut down. Charlotte, N. C., reported that a better demand for yarn was apparent. Buyers increased the size of their orders and inquiry was good. Prices held stronger and spinners are optimistic that real improvement is near. At Lincolnton, N. C., the Roseland Cotton Mill, which the Fudihill Spinning Co. recently purchased, has begun fulltime operations both day and night. This mill is reported te be equipped with 5,000 spindles and has been remodelled and doubled in size. New machinery was added and the plant now makes fine combed yarns.

September sales of Montgomery, Ward & Co. showed a gain of 27% over last year and for the nine menths totaled \$148,362,025, an increase of 10.3% over the same period last year. Sears, Roebuck & Co.'s sales in September were \$\$0,004,372 against \$28,985,684 in August this year and \$24,608,712 in September last year. S. S. Kresge Co.'s sales for September were \$11,914,263, an increase of 14.3% ever September, 1927. Sales for the first nine months of this year were \$96,559,482, an increase of 11.4% over the corresponding period last year. F. W. Woolworth Co. reports sales of \$190,316,767 for the nine months ended Sept. 30, an increase of 6.27% over the same period last year. Sales for September showed an increase of 9.12% ever last year. Seven chain stores gained in September 22.3%. Sales totaled \$24,329,930 against \$19,887,490 a year ago. Sales for the nine months show an increase of 14.1%.

On the 2d inst. the temperatures here were 51 to 61 degrees; in Boston 42 to 58; in Chicago 54 to 68; in Cincinnati 56 to 72; in Detroit 54 to 70; in Kansas City 50 to 76; in Milwaukee 46 to 64; in Philadelphia 48 to 64; in Portland, Me., 38 to 58; in San Francisco 54 to 68; in Seattle 50 to 54; in St. Paul 40 to 64. Of late the weather has been milder here with the temperature up to the summer level on the 4th inst. of 76 degrees. To-day it was 60 to 70. Boston was 58 to 78; Chicago 62 to 78; Cincinnati 67 to 82; Cleveland 66 to 82; Detroit 64 to 80; Kansas City 54 to 86; Milwaukee 58 to 74; Philadelphia 60 to 74; Portland, Me., 48 to 74; San Francisco 58 to 68; Seattle 48 to 56; St. Paul 42 to 70.

## Loading of Railroad Revenue Freight at Highest Point of Year.

Loading of revenue freight for the week ended on Sept. 22 totaled 1,143,214 cars, the largest number of any one week so fur this year, the Car Service Division of the American Railway Association announced on Oct. 3. Compared with the preceding week this year, this was an increase of 4,902 cars, increases being reported in the loading of all commodities except forest products, merchandise less than carload let freight and miscellaneous freight. The total for the week of Sept. 22 was also an increase of 16,812 cars above the same

week in 1927, but a decrease of 32,193 cars below the corresponding week two years ago. The details are as follows:

Miscellaneous freight loading for the week totaled 459,967 cars, an increase of 12,424 cars above the corresponding week last year and 11,657 cars above the same week in 1926.

cars above the same week in 1926.

Coal loading totaled 180,955 cars, a decrease of 3,119 cars below the same week in 1927 and 30,344 cars below the same period two years ago.

Grain and grain products loading amounted to 60,217 cars, a decrease of 62 cars below the same week last year but 10,768 cars above the same week in 1926. In the Western districts alone, grain and grain products loading totaled 46,639 cars, an increase of 1,401 cars above the same week in 1927.

Live stock loading amounted to 36,798 cars, an increase of 4,199 cars over the same week last year but 2,975 cars below the same week in 1926. In the Western districts alone live stock loading totaled 29,190 cars, an increase of 4,296 cars compared with the same week in 1927.

Loading of merchandise and less than carload lot freight totaled 266,187 cars, a decrease of 2,879 cars below the same week in 1927 and 3,328 cars below the corresponding week two years ago.

Forest products loading amounted to 64.576 cars, 4.472 cars below the same week last year and 5.318 cars under the same week in 1926.

Ore loading totaled 64,360 cars, 10,040 cars above the same week in 1927 but 9,903 cars below the corresponding week in 1926.

Coke loading amounted to 10.184 cars, 681 cars over the same week in

1927 but 2,150 cars below the corresponding week in 1926.

All districts reported increases in the total loading of all commodities compared with the same week last year except the Pocahontas and Southera, which showed decreases, but all except the Central Western, Northwestern and Southwestern reported decreases compared with the same period two years ago.

Loading of revenue freight in 1928 compared with the two previous years follows:

follows:		
Four weeks in January 3.447.723	3,756,660	3,686,696
Four weeks in February 3,589,694	3,801,918	3,677,332
Five weeks in March 4,752,031	4.982.547	4,805,700
Four weeks in April 3,738,295	3,875,589	3,862,703
Four weeks in May 4,006,058	4.108,472	4,145,820
Five weeks in June 4,923,304	4.995,854	5,154,981
Four weeks in July 3.942.931	3.913.761	4,148,118
Four weeks in August 4,230,809	4.249.846	4,388,118
Week ended Sept. 1 1,116,948	1.117.360	1,143,448

## Production of Electric Power in United States in August Increased About 12% Over Same Month in

The total production of electric power by public utility power plants in the United States in the month of August amounted to about 7,484,942,000 k.w.h., an increase of approximately 12% over the corresponding month last year when output totaled about 6,693,000,000 k.w.h., according to the Division of Power Resources, Geological Survey. Of the total for August of this year, 4,442,873,000 k.w.h. were produced by fuels and 3,042,969,000 k.w.h. by water power. The "Survey" further shows:

PRODUCTION OF ELECTRIC POWER BY PUBLIC UTILITY POWER PLANTS IN THE UNITED STATES (IN KILOWATT HOURS).

Dieiston.	Totals by	Change in Output from Previous Year.			
	June.	July.	Aug.	July.	Aug.
New England	442,679,000	446,377,000	481,107,000		+8%
Middle Atlantic		1,730,090,000			+6%
East No. Central	1,621,147,000	1,657,950,000	1,747,123,000		+15%
West No. Central	406,150,000	420,114,000	454,212,000	+6%	+11%
South Atlantic	895,346,000	898,570,000	928,577,000	+34%	+30%
East So. Central	260,809,000	241,675,000	258,886,000	14%	-14%

Pacific	1,000,749,000	1,033,076,000	1,053,965,000	+9%	+9%
Totalin II S	7 009 636 000	7 140 330 000	7 484 942 000	+10%	+12%

The production of electricity by public Utility power plants in August exceeded all previous figures of monthly output, with a total for the month of 7,485,000,000 k.h. The average daily rate of production was 241,500,000 k.w.h., exceeding the previous maximum daily rate of 237,200,000 k.w.h. in February by about 2%.

There was a marked increase from July to August, indicating that industry in general is apparently in a satisfactory condition. The large increase in demand for electricity during August was taken care of by fuel-burning power plants, as the amount of electricity produced by the use of water power in August was less than in July. The heavy precipitation in August in the eastern part of the United States did not increase the flow of streams used for power development, as was expected.

The increase in fuel consumption in August, as compared with July, was about 250,000 tons of coal, 50.000 barrels of oil, and 650,000,000 cubic feet of gas.

TOTAL MONTHLY PRODUCTION OF ELECTRICITY BY PUBLIC UTILITY
POWER PLANTS IN 1927 AND 1928.

	1927 a	1928.		Produced by Water Power.

#### Life Insurance Companies Lead All Industries in Growth of Assets According to Clinton Gilbert.

The life insurance business is growing more rapidly than any other business in the country, according to figures submitted by Clinton Gilbert, insurance stocks specialist, which show that the assets of the life insurance companies are gaining at the rate of \$123,000,000 a month or \$1,476,-000,000 a year. At this rate of growth it is estimated that the total admitted assets of life insurance companies of the United States will be equal to more than \$15,800,000,000 by by end of 1928. Growth of the assets of life insurance companies, it is stated, is exceeding that of the public utilities, the railroads, and even of the automobile companies, which ran only about 5% ahead for the first 6 months of 1928 compared to an increase of about 11% for the life insurance companies. This growth of the insurance companies is said to be due both to the taking out of larger policies and to the greater number of policies per unit of population by the people of the United States. It is only in recent years, it is pointed out, that the public has fully awakened to the desirability of insurance and that our rich men have insured themselves for amounts to correspond with their wealth. For the first 8 months of 1928, total of all classes of insurance written was \$8,035,772,900 against \$7,593,452,000 in 1927 a gain of 5.8%. Much of the available capital of the life insurance companies is going into new securities. More than \$3,000,000,000 railroad securities or more than 10% of all the railroad securities in the country, are now held by the life insurance companies. Their holdings of Government obligations are steadily declining, while those of public utilities are constantly increasing. December 1922 the 41 leading life insurance companies had Government bond holdings of \$1,269,645,000. By June 1928 this figure had dropped to \$905,000,000. Holdings of public utility securities on the other hand, advanced from \$250,622,000 in December 1922 to \$1,112,000,000 in June 1928. At the end of June of this year 43% of the assets of these companies were invested in mortgages, while in December 1922 only 34% were invested in mortgages.

#### Further Falling Off in Detroit Employment.

The Detroit Employers' Association reports employment for week ended Oct. 2 as 294,829, a decrease of 2,744 from last week, but an increase of 100,229 over the corresponding period of last year.

#### Annalists Indexes of Business Activity.

A precipitous decline in live stock prices, following the pronounced rise which occurred late in the summer is mainly responsible for the sharp decrease shown this week by The Annalist Weekly Index of Wholesale Commodity Prices, which now stands at 150.9, as against 152.6, the revised figure for a week ago and 153.5, the recent peak index number of Sept. 11. The Annalist continues:

The collapse of live stock prices resulted in a drop of more than 31/2 points in the weighted average of farm products, the sharpest decrease which has occurred in any single week in more than three years.

The weighted average of food products is also sharply lower, but in nonagricultural commodities the tendency has been toward further advances at least the maintenance of prices at the higher levels recently established The outstanding example of the former tendency is supplied by iron and steel products, in which higher quotations have this week become definitely The generally firm condition of prices in other industrial commoditiesis examplified by copper and petroleum, in which, if trade reports are to be trusted, further advances are probable sooner or later. Textile products, particularly those of cotton construction, are also quoted at

The following table gives the usual comparison of The Annalist Weekly Index of Wholesale Commodity Prices by main commodity groups, the base being 100 as the average for the year 1913:

Passe sandrate	Oct. 2 1928.	Sept. 25 1928.	Oct. 4 1927
Farm products	151.6	155.2	
Food products	153.4	185.4	157.1
Textile products	154.0	153.3	187.9
Fuels	165.2	*165.2	157.1
Metals	122.4	121.9	119.8
Building materials	154.3	154.3	156.0

Miscellaneous	122 4	122.3	123.9
All commodities	150.9	*152.6	148.9
*Revised.			

#### Industrial Activity in Cleveland Federal Reserve District at High Point at Close of September.

In its Monthly Business Review Oct. 1 the Federal Reserve Bank of Cleveland states that September closed with industrial activity in the Fourth District at a high point. Iron and steel plants during September, it adds, were ableto expand operations on a rising price scale. Heavy automotive demand has been a strong factor in the situation, reacting as it has on the District's steel, accessory, rubber, paint, and glass industries. Various other lines, such as electrical supply and machinery, are likewise doing more business than a year ago. The Bank states that "money rates are firm, but no shortage of credit for commercial usage is reported from the District's leading financial centers. An increase in speculative activity on the part of the public is reported by several localities." In its survey of the rubber and tire industry the Bank says:

Reports indicate that operations in Fourth District tire factories in August were about the same as in July. The seasonal shrinkage which usually develops in the industry at this time of year does not appear to be as noticeable as it was a year ago. Manufacturers report a larger volume in the number of tires produced as compared with 1927, but due to the fact that selling prices are lower, the dollar volume is about the same as last year. The automobile industry shows exceptionally large production for this time of year, and the demand for tires as original equipment has consequently been very heavy

Orders for sundries, rubber boots and shoes are increasing, as is the cus-

tom in the fall of the year

Total shipments of tires during July, the latest figure available, were 5.924.156 casings, an increase of almost 600,000 from the previous month, and 1.161,557 from July, 1927. This figure exceeded the actual monthly production, 4,873,716, by 1,050,440 units, resulting in a corresponding decline in stocks in manufacturers' hands.

There has been little change in crude rubber prices lately, first latex (spot) being quoted at 19.4 cents a pound in New York on Sept. 18, about the same as a month ago. It is interesting to note that on Sept. 20 1927, crude rubber was quoted at 33½ cents a pound. The drop is due principally to the decision of the British Government to abandon the Stevenson Re-

The Bank states that "the majority of manufacturing lines in this District are doing from 5 to 25% more business now than a year ago." It adds:

Some other report conditions about the same as lst year, while almost no cases are evident of declines from 1927. In most instances, furthermore, conditions improved during August and the first half of September as compared with July.

There appears to be very little disposition on the part of customers to increase their forward buying, in spite of the rise in the general price level during the past few months. Orders, although heavier, centinue to be very largely for quick delivery. It may be said, however, that what little change has taken place is in the direction of more advanced purchasing rather than toward an even more restricted buying policy. The tendency until recently has been in the latter direction.

#### National Park Bank Finds Satisfactory Showing for Key Industries.

Observing that "most of the country's key industries are making a satisfactory showing and a preliminary computation of the August production discloses the highest index reported in any month," the National Park Bank of New York, under date of Oct. 3, states that "if the present pace is sustained the results for 1928 will be extraordinary, with the chances favoring the best showing ever made for American industry during any twelve month period. The bank further says:

Prosperity is never altogether evenly distributed, however, and even in the most prosperous years there are weak spots that have to be strengthened and sections where conditions are not as favorable as in others. the significant feature of the present showing is that the peak this year came in mid-summer rather than in the Spring which is usually the season when the high record figure is touched. . . .

The steel output for the first eight months of the year was unpre for the season, and since the chief steel consuming interests are getting into high production, the indications are that this greatest of all basic industries will have a record year. The industry is very active providing virtually full time employment for an immense body of skilled workers. The story of the automobile industry is equally remarkable, and there is little doubt that the total 1928 output will surpass all precedents. The public is buying new cars on a seale that would be possible only in a year when the nation's spending power was close to, if not at, a new peak level.

#### Building Totals This Year Above 1927 According to Indiana Limestone Co.

Three-quarters of the year closes with a total of more than five and a half billion dollars spent for new building in the United States, says a survey Oct. 5 by the Indiana Limestone Co. This is based on reports from several hundred cities and towns. Building totals this year continue

above those of 1927. "The building industry which, it is generally conceded, is the source of about 10% of the total volume of business, maintains its extraordinary virility," says Thomas J. Vermoa, Vice-President. In his further observations he says:

Decrease in the amount of speculative building is noted. The outlook for the remainder of the year is good. Since modern construction methods have made winter operations safe and sound, the seasonal peaks and valleys, with consequent periods of unemployment, have been definitely eliminated.

While the early part of September gave signs of a slight falling off in volume from the same period last year. contracts awarded the latter part of the month have brought the total well over any previous September. According to preliminary reports, construction volume for the month had a value of approximately \$650,000,000.

Public works and utilities construction will continue very active well into next year. Commercial building is showing greater volume at the present time than for several months. The amount of building construction for educational work for September was practically double that of the same period last year, while industrial operations have tripled September of 1927. Residential construction, of course, continues in greater volume than ever before.

In New York and New Jersey, residential building leads all other types, with public works, commercial and industrial following in good volume in the order named.

The New England States show greatest activity in residential buildings with public works, commercial and educational following in importance. Middle Atlantic States also show residential construction in the lead with commercial, educational and public works following. The Pittsburgh The Pittsburgh district reports greatest activity in public works. Residential, commercial and industrial projects rank in the order named.

The Central West gives no signs of recession. Residential construction chalks up more than 40% of the entire program, while public works, industrial and commercial buildings show a continued upward swing.

Almost 50% of the total spent in the Northwest was for public works, and in this type the Southern and Western States likewise show principal

In volume of building permits, New York easily leads other cities, with Ohicago, Philadelphia, Detroit, Los Angeles, Cleveland, Boston, Pittsburg, St. Louis and Seattle following.

#### Monthly Indexes of Federal Reserve Board.

The monthly indexes of August production, employment and trade of the Federal Reserve Board were issued as follows Oct. 1. The terms "adjusted" and "unadjusted" used below refer to adjustments for seasonal variations.

#### Farm Price Index Shows Advance for September.

The index of farm prices on Sept. 15, at 141, was 2 points higher than on Aug. 15 and 1 point higher than the index for September of last year, according to the Bureau of Agricultural Economics, United States Department of Agrighture. The Department's advices Oct. 1 state:

This advance was caused by sharp advances in the farm prices of hogs and veal calves, moderate advances in the farm prices of other livestock and seasonal advances in the farm prices of dairy and poultry products which more than offset a continued geenral decline in the prices of grain crops and lower farm prices for cotton and cottonseed.

From Aug. 15 to Sept. 15, the group indices of farm prices advanced as follows: Poultry products, 16 points; meat animals, 14 points, and dairy products, 6 points. Cotton and cottonseed declined 11 points; fruits and vegetables, 10 points; and grains 3 points.

The farm price of hogs made a sharp advance of about 12% from Aug. 15 to Sept. 15, the seasonal advance during this period being stimulated by a reduction in market receipts and an unusually heavy movement of pork and lard from storage. From Aug. 15 to Sept. 15, the corn-hog ratio advanced from 10.2 to 11.7 for the United States and from 11.5 to 13.0

The farm prices of sheep and lambs advanced about 1% from Aug. 15 to Sept. 15, despite a sharp advance in receipts at seven principal markets during the first two weeks in September. Factors accounting for higher lamb prices are increased pelt values, higher prices for competing meats,

and the strong demand for feeding lambs.

The farm price of corn continued downward from Aug. 15 to Sept. 15, declining about 3% for the country as a whole. This decline in the farm price has been accompanied by a slight slackening in demand due to the smaller pig crop and the availability of oats and barley for feeding

The 4% decline in the farm price of oats for the United States from Aug. 15 to Sept. 15 was accompanied by indications of a slight increase the prospective 1928 crop.

The farm price of wheat continued downward from Aug. 15 to Sept. 15, but the decline during this period amounted to only about 1% for the country as a whole. This decline has probably been influenced by further improvement in crop prospects and current uncertainty as to the strength of European demand.

The farm price of potatoes made a further decline of approximately 11% for the country as a whole from Aug. 15 to Sept. 15. The principal factors influencing the decline in the farm price of potatoes for the United States during this period were indications of slightly higher prospects for the 1928 crop than expected in August and a slight increase in car-lot shipments.

The decline in the farm price of cotton which started in August was continued from Aug. 15 to Sept. 15 with an additional decline of 1.2

### Dun's Report of September and Third Quarter Failures.

The insolvency record compiled by R. G. Dun & Co. for September and the third quarter reveals moderate increases in both the number and liabilities of commercial failures in the United States over the totals for 1927. Returns for September, which afford the best indication of existing conditions, disclose 1,635 defaults, exclusive of banking and other fiduciary suspensions, and the indebtedness of these mercantile reverses is \$33,956,686. Comparing with the 1,573 similar insolvencies of the same month last year, the present number is larger by about 4%, while there is an expansion in the liabilities of a little more than 31/2% over the \$32,-786,125 of September 1927. On the other hand, last month's indebtedness is fully 40%, under the \$58,201,830 of August of the current year, when the aggregate was swelled to an unusually high point by several failures of exceptional size. Moreover, the liabilities last month also are below the figures for September of 1924, 1923 and 1921, in which years the amounts exceeded the average for the period. The number of last month's defaults is, in contrast, above the totals for September of earlier years, although some part of the increase is accounted for by the steadily rising number of firms and individuals engaged in business.

In common with the exhibit for September, the statistics for the third quarter show a larger number of insolvencies and also a heavier indebtedness than in 1927, but the differences are not marked. Thus, the 5,210 failures of the three months just ended compare with 5,037 for the same period last year, or not quite 31/2% more, and the present year's liabilities of \$121,745,149 are about 53/4 % higher than the \$115,132,052 of the third quarter of 1927. The amount for the latest quarter was exceeded in the corresponding quarter of only two preceding years—namely, 1924 and 1921—and the number this year establishes a new maximum for third quarter.

Monthly and quarterly failures, showing number and liabilities, are contrasted below for the periods mentioned:

	Number.			Liabilities.

#### New York Federal Reserve Bank's Indexes of Business Activity.

The Federal Reserve Bank of New York, in its "Monthly Review" Oct. 1, states that its indexes of business activity showed no consistent change from July to August. Carloadings of merchandise and miscellaneous freight declined slightly, after seasonal allowance, while loadings of bulk freight, which have been comparatively small, increased somewhat says the Bank, which adds:

The various other indexes of business and financial activity also showed mixed changes, but, in general, indicated a fairly high level of general business activity.

(Computed trend of past years=100 per cent; adjusted for seasonal variations).

#### Substantial Seasonal Increases in Wholesale Trade in New York Federal Reserve District.

The Federal Reserve Agent at New York states that August sales of wholesale dealers in this district, reported to the New York Federal Reserve Bank, showed substantial seasonal increases in a majority of lines, but compared with a year ago indicated mixed conditions. Conditions in the wholesale trade are further indicated as follows in the Oct. 1 Monthly Review of Credit and Business Conditions of the New York Reserve Bank:

Hardware sales showed a substantial gain over last year, following de creases in the two months preceding, and machine tools continued far above the level of a year ago. There were smaller increases also in sales of drugs and paper, but decreases of varying amounts were reported in In some cases, notably shoes and stationery, these decreases followed increases in July.

Stocks of shoes remained much smaller than a year ago, while stocks of silk goods reported by the Silk Association showed an even larger increase over last year than in July. Increases in stocks compared with a year ago were reported also in drugs, hardware, jewelry and diamonds. Collections in a majority of lines were a little slower than in August 1927.

Wholesale Trade during August as Reported to Federal Reserve Board-Sales Seasonally Larger Than in

According to the Federal Reserve Board sales of wholesale firms reporting to the Federal Reserve System were seasonally larger in August than in July and for most of the lines the increases were larger than usual. Under date of Sept. 28 the Board continues:

Compared with August of last year sales were somewhat smaller, owing chiefly to the fact that trade in drygoods and wearing apparel in August of last year was unusually large for that month. Sales of groceries, meats and drugs were larger than in August of last year, while those of drygoods. clothing, shoes, hardware and furniture were smaller. The largest increase in sales as compared with a year ago was reported by meat packing firms.

A summary of the changes in sales, by lines, in August as compared with July 1928 and August 1927 is given in the table:

CHANGES IN VALUE OF WHOLESALE SALES.

Line.	Percentage of Increase (+) or Decrease (—) in Sales in August 1928, Compared with—			
	July 1928.	August 1927.		
Groceries Meats Drygoods Men's clothing Women's clothing Boots and shoes Hardware Drugs Furniture	+9.4 +3.8 +48.0 +117.5 +100.7 +21.6 +7.7 +13.1 +39.6	+3.0 +5.9 -12.1 -10.3 -6.0 -2.1 -1.1 +4.4 -2.2		
Total, nine lines	+25.0	-2.4		

Note.—A description of the new index of wholesale distribution and of the data upon which this report is based were published in the Federal Reserve Bulletin for December, and the index numbers from 1919 to 1927, by months, were also given in that Bulletin.

Sales of agricultural machinery and farm implements were slightly smaller in August than in July, according to reports by 76 manufacturers to the Federal Reserve Bank of Chicago. Compared with August of last year, however, sales continued at a much higher level. Orders for machine tools were larger than in July and continued larger than in the corresponding period of last year.

a Index of wholesale distribution is described in the Federal Reserve Bulletin for Dec. 1927. Index numbers by lines from Jan. 1919, to date are published in that bulletin and may be had upon request to the Federal Reserve Board.

Stocks of Wholesale Firms.

Stocks of merchandise carried by reporting wholesale firms in six lines of trade—groceries, drygoods, beots and shoes, hardware, drugs, and furniture—were slightly smaller in August than in July. Compared with a year ago stocks of boots and shoes, drugs and furniture were larger, while those of groceries, drygoods and hardware were smaller.

#### Department Store Sales in New York Federal Reserve District Below Volume of Year Ago.

August sales of leading department stores in the New York Federal Reserve District were 7% smaller than a year ago, according to the Oct. 1 Monthly Review of Credit and Business Conditions issued by the Federal Reserve Bank of New The Bank also comments as follows:

In August 1927 sales were unusually large, however, whereas in August this year, weather conditions were unfavorable to the sale of fall apparel and other merchandise. All of the reporting stores in New York City, and most of the stores in leading cities up-State, had a smaller volume of business than in August of last year. The large apparel stores also refe-ted smailer sales than a year previous for the first time since last October. The leading mail order houses, however, continued to report very substantial increases over the sales of a year ago.

Stocks of merchandise on hand at the end of the month remained only slightly larger than a year previous. Collections were slightly smaller, relative to the amount of accounts outstanding, than in August 1927.

	Augu Compas	entage ange at 1928 red With at 1927.	Per Cent. of Accounts Outstanding July 31 Collected in August.		
Localty.	Net Sales.	Stock on Hand End of Month.	1927.	1928.

#### Gains in Chain Store Sales in New York Federal Reserve District.

Regarding the chain store trade, the Oct. 1 Monthly Review of Credit and Business Conditions by the Federal

Reserve Agent at New York says:

Saies in most of the principal types of chain store trade showed larger increases over a year ago in August than in July. An exception was the ten cent store business, which showed the smallest increase since April. Candy chains reported the largest increase in total sales in several years, although, due to rapid opening of new stores during the past year, average sales per unit remained smaller than last year. Grocery chains again were the only type to show any considerable increase over last year in sales per unit.

	Percentage Changes August 1928 Compared With August 1927.					
Type of Store.	Number of Stores.	Total Sales.	Sales per Store.

Ten-cent	+8.6	+3.8	-4.4			
Drug	+5.8	+4.4	-1.2			
Tobacco	+3.8	-1.5	-5.2			
Shoe	+10.0	$+9.6 \\ +19.6$	-0.3			
Variety			+0.2			
Candy	+19.4	+12.1	-6.1			
Total	+5.3	+8.3	+2.9			

#### Federal Reserve Board's Survey of Retail Trade in United States during August-Sales Seasonally Larger Than Previous Month.

Stating that department store sales were seasonally larger in August than in July, the Federal Reserve Board, in its survey of retail trade in the United States during August (issued Oct. 1) says:

The increase, however, was slightly less than that which usually occurs between July and August, and the Federal Reserve Board's index of department stores sales which is adjusted for seasonal changes, decimed from 108 in July to 106 in August. Compared with August of last year, sales averaged about 5% smaller. A large part of the decline from last year was due to the fact that sales a year ago were much larger than is usual for August.

of chain stores reporting to the Federal Reserve System were larger than a year ago in all lines of trade except cigars and tobacco. Sales of groceries, apparel and dry goods, and drug chains stores were reported to be about 20% larger than in August of last year; those of candy and shoe chain stores were 8 and 11% larger, respectively, and those of five-and-tencent chain stores were 3% larger. The reporting chain store companies have more stores in operation than a year ago and the increase in sales reflects the growth in the number of stores as well as changes in the volume of trade. Sales of mail-order houses were 20% larger than in August of last year. These companies are also opening additional outlets and a part of the growth in total sales reflects the business of the new stores.

A summary of the changes in retail sales in August 1928, compared with August 1927, and of the number of stores reporting is as follows:

August 1927, and of the number of stores reporting is as follows: CHANGES IN VALUE OF RETAIL SALES AND NUMBER OF STORES REPORTING.

	P. C. of Inc. (+) or Dec. (-) in Sales	Number of Stores.		
Type of Store.	Compared with August 1927.	August 1928.	August 1927.	
Department stores	-4.7 +20.3 +2.9 +19.2 +21.2 -1.6 +7.8 +11.1 +20.2	510 29,253 3,082 1,213 1,019 3,591 669 329	510 28,926 2,878 1,018 852 3,461 609 277	

Number of separate stores operated by mail-order houses is not available.
 Department Stores Sales and Stocks by Federal Reserve Districts.

Department store sales were smaller than in August of last year in seven Federal Reserve districts, about the same as a year ago in two districts, and larger in three districts. The largest decreases were in four northern and eastern districts and in the St. Louis discrict. In the Aitanta, Kansas City and San Francisco districts sales were slightly larger than in August of 1927.

Inventories of department stores were increased in August in anticipation of larger sales in the autumn. They continued smaller, however, than in the corresponding period of last year, averaging for the country as a whole about 2% smaller. Stores in nine Federal Reserve districts reported smaller stocks than in August a year ago and those in three districts reported stocks to be slightly larger.

#### Improved Business Activity in New England in August Reported by Federal Reserve Bank of Boston.

In summarizing the business situation in its District the Federal Reserve Bank of Boston in its Monthly Review Oct. 1 says:

Business activity in New England in August showed some improvement over July, but, as in the preceding months, the influence of the depressed textile industries was almost entirely responsible for a lower rate than that which prevailed a year ago. While New England industries are fairly well diversified, and are becoming even more so, it cannot be denied that the influence of the condition in cotton textiles on general business at this time is considerable. A study of the accompanying chart reveals that only total building, employment, and department store sales, aside from cotton and woollen textiles, were lower in August than in the same month a year ago, whereas increases have taken place in check payments, carloadings, electric power production, sales of new motor cars, residential

building, silk mill activity, and shoe production. Furthermore, the New England Business Activity Index, corrected for purely seasonal changes, although rising nearly 1.5% between July and August, was still 1.8% below August, 1927, but the textile group contained in this index was 26.4% below August a year ago. The textiles, although on a much lower plane than a year ago, showed some improvement in August, as compared with July. Cotton consumed by New England mills and the production of fine cotton fabrics were larger, after seasonal adjustment, than in the month. The cotton goods markets were reported as somewhat more active in August than a month or two earlier, although still abnormally dull. Activity in the woolen and worsted mills, as measured by the quantity of wool consumed, although not as low as in the cotton mills, was much less than in August last year. Slik mills are an exception in this group, as operations for the first eight months were 10% larger than in the same months of last year, and in August nearly 14% larger than in August, 1927. The total building volume, which has been consistently larger this year than in corresponding months of last year, in August was slightly less than in that month a year ago, although the total for the first eight months was 18% higher than for the same period of 1927. The distribution of merchandise, as indicated by loadings of merchandise and miscellaneous classes of freight, is well maintained, and has recently been in excess of the same period of 1927. New England department store sales, after improving in May, June, and July, in August were 7.6% less than a year ago, although sales in that month of 1927 were unusually large. The commodity markets, especially metals, have shown further strength. Money rates have again increased, and are now higher than at any time since early in 1921.

#### Business Conditions in Philadelphia Federal Reserve District—Substantial Seasonal Expansion Reported.

Further evidence of substantial seasonal expansion of business in the Philadelphia Federal Reserve District has appeared during the last few weeks, says the Oct. 1 "Business Review" of the Federal Reserve Bank of Philadelphia. The Bank goes on to say:

Both industrial operations and commercial transactions have been in considerably larger volume than during the summer, while in many instances the volume of trade now exceeds that of last year. "Factory employment in Pennsylvania showed a gain of 2.5% from the July level, while the number of employee-hours worked by reporting plants was nearly 10% larger in August. Payrolls of reporting establishments showed a similar gain from July to August and in the latter month were only 2% smaller than in the same period last year. The metal manufacturing industries, which continue exceptionally active for this period, showed an increase of nearly 4% in payrolls as compared with August 1927. Among other groups of industries which enlarged their working forces in August were textile products, foods and tobacco, lumber, chemical, leather and rubber products, and paper and printing industries.

Production records of various industries in this district also idicate material improvement in operating conditions. In August large increases occurred in the output of shoes, hosiery, pig iron, iron and steel castings, anthracite and bitumineus coal, cement and electric power, and in the consumption of wool, while sales of electric power to industries in the district showed a gain of 6% as compared with July and of 23% as compared with last year. That further expansion of productive operations has taken place is evident from reports of State employment offices in Pennsylvania which show substantial improvement in the demand for industrial workers.

Distributive activity has also increased considerably since mid-summer. Freight car loadings in the Allegheny district reached the highest point for the current year in August and have not been exceeded since October 1927. Loadings of merchandise and miscellaneous commodities in the week ending Sept. 1 were also larger than in any previous week in 1928. Wholesale trade in August showed improvement in all lines; the total volume was 6.8% ahead of July, but nearly 5.8% less than in August 1927. Retail sales of reporting stores were only slightly larger than the July volume and were 10% less than in August 1927, which was an exceptionally active month. Check payments in the district, though considerably smaller than in August 1927 by 3%.

in July, exceeded the volume in August 1927 by 3%.

Following a very active building season both in this district and in the country as a whole during the first half year, substantial declines have occurred recently in contract awards and building permits. Building permits in August were 7.5% less than in the same month last year, while contract awards declined by more than 36%. Real estate transactions in Philadelphia, as measured by number of deeds and value of mortgages recorded, also showed large declines from July and as compared with last year.

In its survey of wholesale and retail trade the Bank says:

#### Wholesale Trade.

The wholesale market is seasonally active, and sales have increased appreciably in nearly all lines since the middle of last month, according to preliminary reports. The largest gains in demand are noted in shoes, dry goods, groceries, jewelry and paper. Prices continue firm and unchanged, except for some advances in groceries.

Sales during August showed a gain of nearly 7% as compared with those for the preceding month and of about 6% from the volume in the same month last year. All lines reported substantial increases in the month, but only electrical supplies, paper and groceries registered gains over a year earlier, sales of the remaining five lines being smaller.

Inventories carried by wholesalers generally were smaller than at the end of August 1927. Most lines showed a larger volume of accounts outstanding in August than in the month before; this is also true in three out of seven lines as compared with a year before. Collections decreased during the month, except in electrical supplies and groceries.

#### Retail Trade.

Early reports indicate that retail trade is fairly active, although no pronounced improvement in sales has been noted since the middle of last month. Except for some advances in leather products, retail prices remain unchanged.

Sales in August, while increasing slightly from the preceding month, were about 10% smaller than in August 1927, when retail sales reached an unusually large volume for that month. With the exception of credit and shoes stores, and men's apparel stores outside of Philadelphia, all lines experienced a noticeable decline. Of eleven city areas only Harrisburg and Wilmington showed gains. Sales in the first eight months of this year were nearly 4% less than in the same period last year.

Inventories carried by retailers increased seasonally, but were smaller than at the end of August 1927. The rate of turnover showed little change in the month

# Manufacturing Activities in Chicago Federal Reserve District—Increase in Output of Shoe Factories— Midwest Distribution of Automobiles.

In its survey of manufacturing activities and output in its district the Federal Reserve Bank of Chicago, in its "Monthly Business Conditions Report" Oct. 1, states:

Shoe Manufacturing, Tanning and Hides.

Shoe factories in the Seventh Federal Reserve District increased their production 23.8% in August over the preceding month, according to preliminary estimates of the United States Department of Commerce. Reports sent direct to this bank by representative companies in the district show a larger quantity of leather tanned during the period than in July or last year; sales also gained in the first comparison, but totaled somewhat less than a year are. Quotations for leather tended to ease.

less than a year ago. Quotations for leather tended to ease.

Chicago trading in packer green hides and calf skins decreased in August from the preceding month. Shipments from the city and purchases by district tanners, however, were reported in excess of July. Prices declined.

Furniture.

Twenty-four furniture manufacturers of the Seventh District booked orders in August totaling 10% less than in the preceding month and 6.9% below the corresponding month of 1927. In the former comparison, however, the majority of companies showed gains, and ten firms had a larger volume of orders than a year ago. Shipments increased seasonally 40.6% over July, but were 7.7% smaller than last August. A larger volume of shipments than new orders, plus cancellations received, resulted in a reduction in the amount of unfilled orders on hand Aug. 31 of 5.4% from those

held July 31; the amount was 3% smaller than on Aug. 31 last year. Operations increased during August and exceeded the rate of a year ago.

Automobile Production and Distribution.

August data on automobile production in the United States show output the largest of any month on record. Passenger cars produced totaled 400,689, or 18.5% above July and 46% larger than last August. Truck production in the United States of 57,740 increased 8.8% in the monthly

comparison and was 67.6% above a year ago.

Midwest distributors of automobiles sold fewer cars at wholesale during August than in July, but more than in the corresponding month of 1927. The number sold at retail showed little change in the monthly comparison, and the value declined; both remained at a level above a year ago. Used car sales were smaller than in July, though larger than in August 1927. Stocks on Aug. 31 of both new and used cars gained over a month previous, while new cars on hand declined from last year and used car stocks gained. Deferred payment sales of 26 dealers reporting the item averaged 46.7% of their total retail sales in August, compared with 53.4% in July and 43.8% a year ago.

#### Improved Farm Conditions Indicated by St. Louis Joint Stock Land Bank Report.

Improvement in farm conditions in the central Mississippi Valley is reflected by the third-quarter statement of the St. Louis Joint Stock Land Bank, operating in Missouri and Arkansas, which now has farm loan bonds outstanding in the amount of \$20,600,000. A letter from L. L. Beavers, President of the St. Louis Joint Stock Land Bank, sent to stockholders with October dividend checks, states that after payment of the October dividend of \$1.50 per share on the capital stock of \$1,430,000, the bank has reserves aggregating \$391,255. This represents an increase in reserves of \$29,916 since June 30. Present book value of the stock is \$127.36 per share, an increase of \$2.10 for the quarter. Net earnings of \$51,366 for the third quarter are said to be equivalent to an annual rate of 14.3% on the present capital stock. Joint Stock Land Banks are required to pay into permanent reserve account 25% of their net earnings until that account equals 20% of the capital. Thereafter, the reserve account need only be increased annually by 5% of net earnings. The permanent reserve account of the St. Louis Joint Stock Land Bank is now \$286,000, equal to 20% of the present capital. Therefore, it is pointed out, from \$25,000 to \$30,000 which would have been required, in a normal year, for addition to permanent reserve account, will now be available for the further strengthening of the undivided profits account, or for dividends, at the discretion of the directors. The President's letter further states that the sale of real estate by the bank is proceeding in a satisfactory manner, and that such sales are now more or less constant, indicating a material improvement over conditions of 1926 and 1927 in the territory in which the bank operates. The bank claims to be in a strong cash position, with an additional loaning capacity of \$1,500,000 before an increase in the capital stock will be necessary. Within the past few months, the bank has retired \$850,000 of its own bonds through purchase in the open market.

# Business Conditions in Kansas City Federal Reserve District.—High Rate of Activity Reported.— Improved Employment Conditions.

In the "Monthly Review" Oct. 1, of the Federal Reserve-Bank of Kansas City it is stated that "the reports from the seven States whose areas or parts form the 10th (Kansas City) District reflected material improvement." In further discussing employment conditions in its district, the Bank

Release of labor from the harvest fields witnessed the return of many transit workers to the cities, but most of these were finding employment in the many forms of outdoor work. Kansas reported a strong call for farm help, while the harvesting of sugar beets in irrigated sections of the Rocky Mountain regions and the Upper Great Plains created a demand for field workers. The starting of the sugar refineries in September was expected to provide employment for large forces for three or four months. Vegetable and fruit canning factories were at the height of the season's operations in many parts of the district. Coal mine operations expanded seasonally while zinc and lead mines were operated below normal. Metal mining in the mountain states was quite active with the supply and demand for this classof labor well balanced. In the oil fields there has been some recent improvement in employment, and the majority of the refineries were reported working on full time. Building activity continued at a high level, with fairly satisfactory employment for craftsmen in most of the cities and towns. Considerable municipal improvement and highway construction was in progress in cities throughout the district, providing employment for manyworkers. Railroad repair shops at division centers have recently added to their forces as the result of heavy movements of freight. Some gains incomployment were registered at meat packing houses, and an increase in flour mill operations called for employment of full forces,

In its survey of business conditions in the district, the Bank says:

Business in the 10th District moved through August with quickened stride and entered September showing a high rate of activity for the early fall. The output of manufactures and minerals, taking the aggregate for the various industries, and the volume of distributive trade, exhibited about the usual seasonal increase and both were larger than a year ago. Loans of member banks of the Federal Reserve System fluctuated around the year's high levels, and investments of the banks mounted to new high records. Net demand deposits receded slightly, while time deposits and savings deposits were larger than in either the previous month or the corresponding month in 1927. . . .

Following the high record receipts of new wheat at 10th District markets in July there was a sharp decline in the movement in August, indicating a steady and orderly flow of wheat through market channels this fall and winter. Marketings of other farm products were seasonally heavy. Prices received by farmers for wheat, oats, barley and potatoes were lower in August than in the same month last year, while the price of corn was a shade higher.

The situation for the livestock industry continued favorable with some further advance in prices of cattle and hogs and but slight change in the prices of sheep and lambs. Market receipts of all classes of livestock, except hogs, were larger in August than in July, while as compared with a year ago receipts of cattle and calves were smaller and receipts of hogs and sheep were larger.

Flour mills in this district were operated during August at a higher percent of full-time capacity than in any previous month of the current year and the output was larger than in the corresponding month of last year. At meat-packing centers the August slaughter of cattle and hogs was smaller than in either July or in August last year, although the number of sheep and lambs dressed during the month was larger than in either of the two former monthly periods with which comparison is made.

The Bank has the following to say regarding wholesale and retail trade:

Wholesale: Combined sales of reporting wholesale firms located at distributing centers in this district were seasonally larger in August than in July, and this year's August sales were larger than in the same month last year. All six reporting lines—dry goods, groceries, hardware, furniture, drugs and millinery—reported their August sales were larger than in the preceding month. Compared with the same month last year, August sales of dry goods and millinery were smaller and those of groceries, hardware, drugs, and furniture were larger. Sales of agricultural implements and machinery, as reported by distributors in this district, showed a substantial increase over the preceding year.

Comments of wholesalers indicated August trade conditions throughout, the district generally were satisfactory, although in some sections where hot weather caused injury to corn and some other late crops, conditions were not so good as a month earlier.

Stocks of merchandise of wholesalers of dry goods, drugs and hardware were smaller at the end of August than at the end of July, or at the end of August of last year. Stocks of furniture showed a small decrease from the preceding month-end, but an increase as compared with a year ago. Greery stocks were larger.

Retail: The volume of retail trade in the 10th district during August showed about the usual seasonal increase over July, and, taking the combined reports for all lines, was slightly higher than in the corresponding month last year.

Sales at department stores, although affected in some cities by unfavorable weather conditions, were 21.2% larger than in July and 1.2% larger than in August last year. Accumulated sales of department stores covering the first eight months of the year were 0.04% larger than in the corresponding eight months of 1927.

August sales of apparel stores, reported to this bank, were 10.1% smaller than in August 1927. Retail shoe stores reported an increase of 11.1% insales over last year, retail furniture stores a marked decrease and chain grocery stores an increase of 24%.

grocery stores an increase of 24%.

Inventories of department stores showed stocks on hand at the end of August were 11.5% larger than at the close of July but 0.7% smaller than at the close of August last year. Stocks of apparel stores were larger than a year ago by 3.7%, and at shoe stores were smaller than a year ago by 0.3% while stocks of retail furniture stores were 6.2% larger than a year ago.

## Industry and Trade in San Francisco Federal Reserve District Above Levels of Year Ago.

Industry and trade in the San Francisco Federal Reserve. District were seasonally more active during August than during July and were at levels above those of a year ago. According to Isaac B. Newton, Chairman of the Board and Federal Reserve Agent, of the Federal Reserve Bank of San Francisco, under date of September 20, Mr. Newton

In the industrial field, lumbering, copper mining, and flour milling showed the inquestian field, lumbering, copper mining, and flour milling showed the largest increases in activity during the month and year. Sales at retail and at wholesale, and merchandise carloadings, of freight were larger in volume during August than during July, and both sales and carloadings were larger than during August, 1927. Employment conditions in the District are reported to have improved during August, as compared with July, 1928, and are better than in August, 1927.

The agricultural situation continues generally satisfactory except in certain restricted areas where specialty crops predominate. It is estimated that aggregate production of the principal crops grown in the District during 1928 will be slightly less than a year ago. Prices for many farm products important in this District, such as livestock, citrus fruits, and most dried fruits, excepting raisins, are higher than a year ago. Higher prospective returns for these products are about offs.t, however, by the lower returns in prospect for wheat, potatoes, and certain other field crops.

The amount of credit extended by member banks of the District has risen by a substantial amount since August 1, as a result of both seasonal and non-seasonal increases in commercial loans and loans on securities. Borrowing at the Federal Reserve Bank of San Francisco also rose during this period, all of the increase being in discounts of city member banks. Reserve Bank discounts for country member banks (not including country branches of city member banks) were reduced during September to the lowest figure since last April, and to the lowest figure for the season of the year during the entire post-war period. Interest rates on loans to commercial borrowers and correspondent banks, charged by member banks in the principal cities of the District, have not increased during recent months and are practically the same as those which prevailed throughout most of 1927.

#### Compromise Plan to Effect Adjustment of New Bedford Textile Strike Rejected By Unions.

A proposal for the settlement of the New Bedford, Mass. textile strike on the basis of a 5% wage cut, instead of the 10% reduction which had precipitated the strike in April last, was rejected on Oct. 1 by the unions. New Bedford advices to the New York "Journal of Commerce" regarding the action of the unions on the 1st inst. said:

Voting this morning on whether to accept or reject the compromise jointly proposed last Tuesday (Sept. 25) by the State Board of Conciliation and Arbitration and the Citizens' Mediation Committee, four of the seven unions cast a majority of their ballots for rejection, formally ending the hopes of those who had seen "settlement" written in large letters over the

proposal.

The unions' action followed the lead of their strike committee, which promptly rejected the compromise when it was made and passed it back to the full Textile Council only at the insistence of the mediators.

Just as promptly as the union representatives rejected the proposal Tuesday did the manufacturers' conference committee accept it, and on the following day the full Manufacturers' Association formally accepted the compromise plan.

As the Textile Council met this afternoon, Secretary William E. G. Batty announced that the weavers, loom fixers, warp twisters and carders had voted to continue the strike by rejecting the compromise. The slashers, mule spinners and ring twisters voted to accept the compromise.

#### Total Vote Withheld.

Secretary Batty refused to make public the total vote cast or the vote by unions, saying that "the result is all that counts." but from strikers who had been present at the morning meetings of their unions reporters learned that in four of them the vote had been: Loom fixers, 194 accept, 294 reject; weavers, 299 accept, 462 reject; warp twisters, 45 accept, 53 reject; slashers, 71 accept, 24 reject. A comparison of these figures with the votes of the same unions when the strike was called reveals that only 66% as many votes were cast for and against ending the strike as were checked for and against beginning it last April.

The weavers' vote was the first disclosed. At about 11 a. m. the members rushed out of their meeting shouting: "No reductions, no reductions. broadcasting the count of thei vote. An hour later the loom fixers saw their ballots counted on a table in full view of all the meeting and listened to

President John Purcell call for silence and solemnly read and the result: 294 against, 194 in tayor of the compromise.

Meeting Friday, the Textile Council had decreed that all union votes must be in by 5 p. m. to-day and that the council would receive and an-nounce the result at 7:30 to-night, but the unions all ballotted early to-day and the council's meeting hour was set ahead to one this afternoon. before three the result was known, but until that time speculation kept

Varders' Vote Decides.

The carders' vote was the last to be polled, and, since until that time the vote by unions stood three to three, this local's ballot was the deciding one. That it was for rejection was the greater surprise to those in close touch with the situation than the full Textile Council vote. Regarded as the akest union of the seven because its membership is drawn from some of the lowest paid operatives in the industry and because its finances have en known to be in a sad state ever since the strike. the carders' vote was almost universally expected to be in favor of the compromise, and on the basis of this expectation hope had grown that the compromise would be accepted from the time that it leaked out that three unions had voted to end the strike until the final, decisive ballot was turned in.

"We have been awaiting the outcome of the vote, so no plans have been prepared as to future action by the manufacturers," said Andrew Raeburn, director of the New Bedford Cotton Manufacturers' Association, when word of the union's action was carried to him. Mr. Raeburn was speaking in the absence of President John Sullivan, who is in New York. "I really don't know what to say." he added. "When the manufacturers voted to accept the compromise recommended by the Citizens' Mediation Committee and the State Board of Conciliation and Arbitration consideration was not given to what they would do in the event that it were rejected. so I am in no position to say what the next move will be. The Manufacturers' Association has no meeting scheduled for the near future, Mr. Raeburn said.

Length of Offer in Doubt.

Since the subject had not been discussed when the manufacturers voted upon the mediators' recommendation, Mr. Raeburn said it was impossible for him to state whether the 5% compromise offer would hold indefinitely

One of the surprising features of the ballotting to-day was the unusually mall number of union members who voted in comparison to the vote taken A, rii 12, when the operatives decided so overwhelmingly in favor of cting the 10% cut announced by the manufacturers three

In the vote taken by the Weavers' Union to-day the total number of ballots was 761, compared with 1,140 on April 12, or less than 67% of the total vote of almost twenty-five weeks ago. The number of members voting to-day in the Loom Fixers' Union was 488. compared with 791 on

voting to-day in the Loom Fixers' Union was 4-85, compared with 791 on April 12, or less than 62% of the number votin; on the previous occasion. The total vote of the slashers at to-day's billotting was 95, compared with 110, or a percentage of 68% of the total vote cast April 12. The warp twisters, with a vote of 98 against 121 last April, had a percentage of 81 registering their ballot to-day. Taking the total vote of these four unions, the number registering their ballots to-day was 1,442, compared with 2,171 that voted on the strike issue last April, or slightly better than 66% of the vote cast on that occasion. Union beeds were unable to account of the vote cast on that occasion. Union heads were unable to account for this sparse vote, unless it was due to a number of skilled weavers and loom fixers having left the city to take employment in other textile centers. Many others, it was thought, were indifferent to voting on the compromise question, being under the impression that the unions would be opposed to

#### United Textile Workers Plan Drive for \$100,000 to Help New Bedford Strikers.

The following is from the New York "Times" of Oct. 5: Plans were completed yesterday by the United Textile Workers' Union for a drive to raise \$100.000 to aid the New Bedford, Mass., strikers. The decision was made yesterday by the union's Executive Board, meeting at the Bible House. Thomas F. McMahon, President of the textile union, announced that the Executive Board had approved the plan drawn up last Tuesday at a meeting in Fall River for a continuation of the strike. "The textile workers are determined," he said, "to keep on until the

mills take down the 10% reduction notice, acknowledge that the employees

are human beings and bargain with them collectively."

The United Textile Workers' Union in 1922 raised more than \$1,000,000 to support the mill strikers in New England, said Mr. McMahon. The same money raising methods used then are to be applied in the present drive. The co-operation of churches, labor unions, civic organizations and citizens will be sought in an effort to enlist sympathy for the 28,000 strikers who have been out since Anril

#### Report of Finishers of Cotton Fabrics.

The National Association of Finishers of Cotton Fabric s at the request of the Federal Reserve Board, arranges for a monthly survey within the industry, and the results of the inquiries for August are herewith presented in tabular form. The Secretary of the Association makes the following statement Sept. 28 concerning the tabulation:

The figures on the attached memorandum are compiled from the report of 28 plants, most of which are representative plants, doing a variety of work and we believe it is well within the facts to state that these figures represent a cross section of the industry.

Note.—(1) Many plants were unable to give details under the respective headings of white goods, dyed goods, and printed goods, and reported the totals only; therefore, the column headed "total" das not always represent the total of the sub-divisions, but is a correct total for the district.

(2) Owing to the changing character of business changes in equipment at various finishing plants, it is impracticable to give average percentage of capacity operated in respect to white goods as distinguished from dyed goods. Many of the machines used in a finishing plant are available for both conversions, therefore the percentage of capacits operated and the work ahead is shown for white goods and dyed goods combined.

#### September Figures of Raw Silk Imports, Stocks Deliveries, &c .- Imports During Month Fall Off 15,644 Bales.—Stocks Decline 511 Bales.

During the month of September imports of raw silk decreased 15,644 bales, as compared with the previous month when 62,930 bales were imported, according to figures issued by the Silk Association of America, Inc. Total imports in September 1927 were 52,475 bales. Approximate deliveries to American mills last month amounted to 47,797 bales, as against 50,821 bales in August and 50,107 bales in September 1927. Stocks of raw silk on Oct. 1 1928 totaled 50,464 bales as compared with 50,975 bales on Sept. 1 and 58,986 bales on Oct. 1 1927. The following statistics have been released by the Silk Association:

#### Paterson Silk Workers Vote to Strike.

From Paterson (N. J.) Oct. 4, the "Journal of Commerce" reported the following:

reported the following:

Unless manufacturers accede to the demands of operatives for higher wages and a 44 hour week between 5,000 and 6,000 employesof slik mills here will walk out Wednesday morning.

This announcement following a closed meeting of a committee of 50 representatives of the various groups of workers, all of whom are making the same demands as to hours, although their wage demands differ.

Workers to-morrow will submit their new price list to manufacturers. Whether the mill managements will recognize the union the Associated Slik Workers of America, will be determined at a meeting of manufacturers' representatives and two conciliators of the Department of Labor Monday. Operatives, it was announced, will hold a final meeting Tuesday before

Operatives, it was announced, will hold a final meeting Tuesday before the walkout is called the following morning.

On Oct. 2, Paterson advices to the "Times" stated:

The workers explain that their principal grievance is the action by some manufacturers in working the employees nine or more hours a day. The Broad Silk Manufacturers Association held a meeting this afternoon after which Harry Barr, President, issued this statement:

"The manufacturers are committed to the eight-hour day. The mills working more than eight hours are in many cases urged by the workers to do so and these mills would readily go back to the eight-hour day if the workers so desire."

No indication was given whether the manufacturers had discussed rec-

ognition of the union or wage increases at their meeting.

Official estimates place the number of silk workers here at 16,600 as against more than 25,000 a few years ago. The decrease is said to be due to slackness in the industry and the moving of many of the workers to Pennsylvania.

#### Report on Hosiery Industry in Philadelphia Federal Reserve District.

The Federal Reserve Bank of Philadelphia makes available the following preliminary report on the hosiery industry by 131 hosiery mills in the Philadelphia Federal Reserve District from data collected by the Bureau of the Census

#### Review of Meat Packing Industry By Chicago Federal Reserve Bank.-Drop in August Production.-Falling Off in Wages.

August production at slaughtering establishments in the United States aggregated less than in the preceding month land was considerably under a year ago. Employment for the fast payroll of the period decreased 1.7% in number, 1.4% in hours worked, and 2.0% in value from the corresponding igures for July, it is learned from the Oct. 1 "Business Conditions Report" of the Federal Reserve Bank of Chicago. from which we quote further as follows:

Domestic trade was slightly better for lard, remained good for smoked goods, boiled ham, and sausage, and averaged fair for fresh pork and dry salt meats. Demand for beef and lamb was rather slow during the first half of the month, but tended to improve a little at the close. The value of sales billed to domestic and foreign customers by 59 meat packing companies in the United States totaled 3.8% more for August than for July and was 10. United States totaled 3.8% more for August than for July and was 5.9% ahead of a year ago. Domestic demand showed an improvement at the beginning of September over the p eceding month. August prices of nearly all products were higher than those of July; quotations for lamb eased. September 1 inventories at packing plants and cold storage warehouses in the United States fell considerably below the level of August 1 and a year ago, with several of the items showing a reduction from the transportation. Level and mutter stocks continued in system of last year and 5-year average. Lard and mutton stocks continued in excess of last year and the 1923-27 September 1 average

Shipments for export were slightly smaller than in July, although some companies reported an increase. Foreign business remained rather quiet.

A good demand for hams developed early in the month in the United
Kingdom but slackened later; the Continent made some inquiries for fat backs; the lard trade continued in small volume for this time of year. Prices in Europe trended downward during the month and closed below United States parity. Consigned stocks already abroad and in transit to European countries were indicated as slightly smaller on September 1 than at the beginning of August.

### West Coast Lumbermen's Association Weekly Report.

According to the West Coast Lumbermen's Association, reports from 193 mills show that for the week ended Sept. 22 orders were 1.46% under production and shipments exceeded output by 0.2%. The Association's statement follows:

#### Decline in Production of Natural Gasoline Checked.

The decline in the production of natural gasoline was checked in August, when the total output amounted to 143,-700,000 gallons, according to the Bureau of Mines, Department of Commerce. This represents a daily average of 4,640,000 gallons, an increase over July of 20,000 gallons and over August 1927 of 290,000 gallons, or 7%. No outstanding increases in production were recorded in any of the seven major districts in August. The output of the Appalachian and California districts increased slightly, Indiana-Illinois, Texas and Louisiana-Arkansas were unchanged, but a decline in Oklahoma-Kansas was counterbalanced by an increase in the Rocky Mountain area.

The decrease in stocks occasioned by a heavy motor fuel demand was continued in August, when the total at plants declined from 20,044,000 gallons to 17,408,000 gallons. The latter was the lowest point recorded since early in 1926. Blending at the plants showed a material decrease in August. The Bureau further shows:

OUTPUT OF NATURAL GASOLINE (IN THOUSANDS OF GALLONS).

			Jan		Stocks End of Month.

## New National Metal Exchange to Open Early in November.

Erwin Vogelsang, President of the recently organized National Metal Exchange, announced on Oct. 3 that the exchange will be open for trading early in November. Trading will be confined to tin futures at first, and it is expected that other metals will be taken up later on. "The new exchange will be thoroughly representative of the metal industry not only in America but in Europe as well," said Mr. Vogelsang. He added:

"We look for a heavy volume of tin business from Europe to pass through the exchange as soon as active trading begins, and the interest manifested in the London market and among the industry here confirms my belief that we are opening under most auspicious circumstances."

The Board of Governors will meet on Oct. 10 to elect sufficient members to complete the membership roster. Work on the quarters of the exchange on the second floor of 27 William Street is being expedited and it is expected that the trading floor will be completed within the next two weeks. An item regarding the Exchange appeared in our issue of Sept. 29, page 1743.

#### Crude Oil Output in United States Shows Slight Change.

The American Petroleum Institute estimates that the daily average gross crude oil production in the United States for the week ended Sept. 29 1928 was 2,509,800 barrels as compared with 2,508,850 barrels for the preceding week, an increase of 950 barrels. Compared with the output of 2,536,950 barrels per day for the week ended Oct. 1 1927, the current figure shows a decrease of 27,150 barrels daily. The daily average production east of California was 1,884,300 barrels, as compared with 1,877,350 barrels, an increase of 6,950 barrels. The following are estimates of daily average gross production (in barrels) by districts for the periods stated:

Weeks Ended-	Sept. 29 '28.	Sept. 22 '28.	Sept. 15'28.	Oct. 1 '27.
Oklahoma	735,100	731,750	726,550	809,700

Tetal	0 500 000	0.500.050	0 504 000	2 526 050

The estimated daily average gross production of the Mid-Continent field including Oklahoma, Kansas, Panhandle, North, West Central, West. East Central and Southwest Texas, North Louisiana and Arkansas, for the week ended Sept. 29 was 1.556,200 barrels, as compared with 1.555,400 barrels for the preceding week, an increase of 800 barrels. The Mid-Continent production, excluding Smackover, Arkansas heavy oil, was 1.500,600 barrels, as compared with 1,499,800 barrels, an increase of 800 barrels.

The production figures of certain pools in the various districts for the current week, compared with the previous week follow (figures in barrels of 42 gallons):

	-Week	Ended-	— Week	Ended-
Oklahoma-	Sept. 29	Sept. 22	North Louisiana Sept. 29	Sept. 22
Tonkawa	12.050	11,850	Haynesville 5,800	5.800

#### Petroleum and Its Products—Revise Kern River, Calif. Crude Prices.

Standard Oil Co. of California Oct. 3 revised its posted prices for Kern River crude to 45 cents a barrel for oil of 11 to 11.9 degrees, 55 cents for 12 to 12.9 degrees, and 65 cents for 13 to 13.9 degrees, the latter the highest gravity posted in that field. The changes represented declines of 30, 20 and 10 cents a barrel respectively, from the previously posted price of 75 cents for oil of 14 degrees gravity and under. Standard of California announced that it would make no further contracts for Kern River crude.

Production of all U. S. fields continued to gain, averaging 2,509,800 barrels daily for the week ending Sept. 29. This was the largest total attained thus far in 1928. Production totals are expected to show further increases.

Operators in Oklahoma will meet shortly to consider plans for increasing the State's production to 750,000 barrels

daily from the present maximum of 700,000 barrels. Lack of cooperation on the part of some opeators, and the desire of other producers to increase the permitted outlet, is the cause of the meeting. In the period during which the operators had agreed to hold production to a maximum of 700,000 barrels a day, daily output has been ranging 740,000 to 760,000 barrels.

Refiners in the Midcontinest area were reported decreasing their runs of crude, due to falling demand and prices in the gasoline market. Runs to stills established a new high record in August, when the daily average throughout for all U. S. refineries was 2,632,000 barrels, as compared with 2,289,000 barrels daily in the same month last year, an increase of 343,000 barrels, or 15%. Of the total runs to stills in August, 74,592,000 barrels were domestic crude and 6,990,000 barrels imported crude.

The extent of refinery operations in August was indicated by the Bureau of Mines summary for that month, showing that 534 remeries, with rated daily crude oil capacity of 3,186,000 barrels, were operating at 83% of capacity in August, against 82% in July. Quotations are:

Spindletop, 35 deg. and up---- 1.37 GASOLINE DECLINES-KEROSENE STRONG.

U. S. Motor gasoline was generally selling at 11½c. a gallon in tank car lots, Bayonne, last week, a reduction of 1/4c. from the previous quotation of 113/4c., which was also the high for the year. Some sellers were going under the 11½c. basis, although leading refiners held at that level. The "official" price was still 113/4c., but this was little more than a gesture. Leading Oklahoma and Kansas refiners were holding gasoline unchanged at 91/2 to 93/4c., but smaller factors in that territory were freely offering at as low as 91/8c. Export prices for bulk gasoline were 1/8 to 3/8c. a gallon lower for the week, although cased gasoline was without change. Spot U. S. Motor gasoline declined 1/8c. at Chicago on Oct. 5, offering at 95/8 to 93/4c. Gasoline stocks at Midcontinent refineries showed an increase of 1,500,000 gallons during the week ending Sept. 29.

Kerosene was in short supply in New York. Standard Oil Co. of New Jersey advanced its quotation ½c. to 9c. a gallon, tankcar lots, f. o. b., Bayonne refineries on Oct. 2, following the increase made late in the previous week by Sinclair Refining, Acewood Petroleum and others. Supplies were more adequate at other points, however, the market being weak in the Midcontinent, and 1/8c. lower at 61/4 to 63/8c. at Chicago.

Fuel oil was steady and unchanged at \$1.05 a barrel, bulk, f. o. b. Bayonne. Gas cil was also steady. This division of the market was showing a better tone, due to the heavy increase in demand for furnace oil. Installations of oil burners this year are estimated to have shown an increase of 25% over last year, largely in the Eastern territory. There are about 600,000 oil burners now in use in the country as a whole, with a potential market of 20,000,000. It is estimated that close to 35,000,000 barrels of furnace oil will be required to take care of the home oil heating units which will be in operation this winter. Inasmuch as the South American crudes now being largely run by Atlantic seaboard refineries have large fuel oil content, the importance of the steadily widening market for furnace oil cannot be exaggerated. Large factors in the New York furnace oil market are Standard Oil Co. of New York, Petroleum Heat & Power Co., Warner-Quinlan Co., Tide Water Oil, Gulf Oil Corp., Sinclair Refining and others. Standard Oil Co. of New Jersey does a large furnace oil business. Prices are:

#### Copper Firm Despite Reduced Sales Volume-September Business at Record Level-Good Demand for Lead.

Trading in copper in the past week has been the quietest in more than two months, but the breathing spell is welcome to the producers, "Engineering and Mining Journal" reports. Prices of copper, lead and zine are virtually unchanged from recent levels. Silver and tin are somewhat higher. September sales of copper for combined domestic and foreign account approximated 500,000,000 pounds, a record that is likely to stand for some time, it is stated. Foreign sales, while large, did not quite equal the huge tonnage sold in May. The report then goes on to say:

The indications are that foreign consumers still have considerable copper to buy for fairly early delivery, but domestic requirements appear to be well covered through November. Prices are entirely without change at 15% cents, Connecticut basis, and 15% cents in the Middle West. Export prices continue on the basis of 15½ cents c.i.f.

Lead was in fairly active demand, with the market steady at 6.50 cents per pound, New York, and 6.325 cents East St. Louis. manufacturers were responsible for a large proportion of the week's business.

Bullish news in tin from London served to stimulate the market and onsumer demand has been good. The price reached 50 cents a pound on Monday.

Nothing new can be reported in the zinc market, either as regards price

or volume of business.

#### Steel Output Continues at High Level-Pig Iron and Steel Prices Continue.

Heavy bookings, lengthening deliveries and added strength in prices of both finished and primary materials place the iron and steel industry on an unusually stable basis as it enters the final quarter of the year, declares the "Iron Age" of Oct. 4 in its weekly survey of the iron and steel markets.

The September bulge in specifications against third quarter contracts gave steel producers excellent backlogs. Mills are 4 to 6 weeks behind on deliveries of bars and some finishes of sheets, and the size of their obligations is influencing their attitude on prices, continues the "Age," which further states:

A test of the market was not expected so soon after the close of a quarter, but an encouraging volume of business has already been placed at fourth quarter prices, which for black and galvanized sheets, bars, plates and shapes represent an advance of \$2 a ton.

This fact points to a demand for steel that is based on actual consump-on. While buyers, in some cases, have been rebuilding their stocks, there has been no evidence of speculative purchases. The flow of business this year has been even steadier than in 1927. The decline from the peak rate of output in April to the low point in June was only 17%, compared with a 30% dip last year

Pressure on the mills for steel has resulted in the lighting of additional blast furnaces. Out of 17 stacks blown in during September, 10 were started in the last week of the month. The net gain in active furnaces was 14, of which nine were steel works units. Such an increase may indicate a further expansion in steel output in October, which in the past has frequently been the premier month in production in the second half of the Heavier pig iron output may be dictated also by the growing scarcity of scrap.

An increasing quantity of scrap is being shipped out of the country, and a considerable amount is being diverted to new domestic markets. Exports of scrap in August, at 70,500 tons, were the largest on record, representing nearly ¼ of our total outward movement of iron and steel. Shipments of scrap from Detroit, one of our largest producing centers, are moving more largely by water to Lake Erie ports instead of by rail, as formerly, to the Lake shipments so far this season to one Buffalo consumer alone Valleys. Lake ship total 200,000 tons.

A direct result of the diversion of Detroit district scrap is an advance of 75c. a ton on basic pig iron in the Valleys. An inquiry for 12,000 tons of that grade found producers uninterested because they expect to consume all that they can make.

Meanwhile heavy melting scrap has advanced 25c. a ton at Pittsburgh and Chicago, and 50c, at Philadelphia. Prices at Pittsburgh are the highe since January 1927.

Among the consuming industries, the railroads are taking a more promi-The Detroit, Toledo & Ironton has placed 12,500 tons of rails. nent role. and purchases by the New York Central and the Pennsylvania are expected next week. The Canadian National is inquiring for 15,000 tons. The rail buying movement, it is believed, will result in fully as large bookings as that of a year ago

The Louisville & Nashville plans to purchase 2,000 cars, and the Santa Fe is a prospective buyer of equipment. The Canadian National has ordered 55 locomotives, and is inquiring for five additional engines and 1,500 box cars, besides tank and passenger cars.

Prospective construction work likely to be placed in the fourth quarter calls for 425,000 tons of structural steel, not including projects of less than 1,000 tons each. Mill bookings of structural shapes in September were

the largest of any month this year.

The buoyancy of consumption is indicated by the continued pressure for shipments, following heavy deliveries in the third quarter. Shipments by Chicago mills in that period were 15% larger than in the preceding quarter. Steel ingot production at Chicago is now slightly over 85%, which continues to be the average rate of the Pittsburgh district, as well as the Steel Corporation subsidiaries. Sheet production is particularly high exceeding 90% of the capacity of the country.

Pig iron production in September, according to data collected by "The Iron Age," was 3,062,314 tons, compared with 3,136,570 tons in August. The average output, page day, however, above 15 to 15 to

Pig iron production in September, according to data collected by "The Iron Age," was 3,062,314 tons, compared with 3,136,570 tons in August. The average output per day, however, showed an increase was less than 1%. Nevertheless, with the blowing in of furnaces toward the end of the month, the daily capacity of stacks in blast Oct. 1 was 106,755 tons, against 98,730 tons Sept. 1.

This sharp gain appears warranted, in part, by the record of nine months' production. The steel ingot tonnage so far this year will prove to be some 10% greater than that of the corresponding period of 1927, while the pig iron output is 1% less, comparing the same periods. In both 1926 and 1927, for every 100 tons of steel made 83 tons of pig iron was produced. So far in 1928 the ratio is 100 to 75.

Both of "The Iron Age" composite prices have advanced, that for pig

Both of "The Iron Age" composite prices have advanced, that for pig iron reaching \$17.84 a gross ton, the highest figure since the end of Oct. 1927. The finished steel composite is 2.362c. a lb., compared with 2.348c. in the previous eight weeks, as the following table shows:

Finished Steel.	Pig Iron. Oct. 2 1928, \$17.84 a gross ton.

Pig iron and steel enter the fourth quarter of the year on a higher price and production basis, the "Iron Trade Review" of Cleveland declares in its Oct. 4 summary of trade conditions. Recent pig iron advances are being firmly established, while for finished steel the sustained volume of demand, absence of speculative buying, and directness with which material is moving into consumption, give the new prices real substance and foundation. Specifications on third quarter contracts are being rapidly worked out; most obligations will be completed by the middle of October. On all new business the higher fourth quarter figures are in effect. Some of the hesitancy among buyers noted recently is disappearing, and covering of requirements is proceeding with more speed, says the "Review," adding:

Production of pig iron in September was augmented by the blowing in of 11 stacks, making 194 active Sept. 30. Output of coke pig iron in the 30 days amounted to 3,063,530 gross tons, against 3,137,995 tons in the 31 days of August, a loss of 74,465 tons. The daily output in September was 102,117 tons, 924 tons more than in August. September was the second consecutive month to show an improvement in the daily rate. The rate in September 1927 was 92,750 tons, and this figure was a drop from the August rate.

September shipments of pig iron exceeded those of August by 15% or more, and were the largest of any month to date this year. Sales while continuing in good volume were not equal to those of August, marking the peak of the fourth quarter buying movement. Some large melters are asking for prices for first quarter, makers refusing to quote, or naming 50 cents over current figures. About 20,000 tons additional have been booked for shipment by barge from Buffalo to eastern districts before winter sets in. An Ohlo steelmaker is reported to have closed on a portion of a 5,000-ton inquiry for basic at \$17, valley, and while this grade is scarcer, \$16.50 has not disappeared. Production and shipments of Connellsville beehive furnace coke are expanding.

Activity in the sheet market is unusually brisk. Consumers are buying further ahead, as mill deliveries become more deferred. On some of the ordinary finishes shi ment cannot be made short of three to four weeks, ranging to ten weeks on certain grades. The leading interest in Pittsburgh is producing at 90%: Youngstown district independents at 89%, while Chicago output is at the peak rate of the year. New business is going on the books at an advance of \$2 a ton over third quarter for blue annealed, black and galvanized. Opposition to the reduced cash discount rate is gradually subsiding.

A survey of structural projects in the East and West which now are in the market or will come in during the fourth quarter shows approximately 425,000 tons of structural work ahead, not including projects of less than 1,000 tons. Current awards are more numerous, mill schedules generally are being filled up, with deliveries beginning to be extended. Awards include 15,000 tons, added to 45,000 tons previously placed, for the Chicago merchandise mart; 9,500 tons for two jobs in Pittsburgh, and others involving 1,000 to 5,000 tons. An Asheville, N. C., silk company is in the market for 6,000 to 10,000 tons. Featuring the market for reinforcing bars is an award of 1,400 tons for an automobile service station in New York.

Plate specifications were unusually heavy in the last week of September, and new business is increasing in volume, with good prospects for continued improvement. A moderate revival in western oil tank requirements is noted, with inquiries from the Pacific coast for 8,000 tons of plates, following awards in the week amounting to more than 3,000 tons. New York pipe line projects now in the market call for over 15,000 tons of plates. Four eastern railroads are negotiating for fourth quarter requirements. Demand for steel bars is holding up, Chicago mills working at capacity, and production in the Pittsburgh district at the highest rate of the year.

Further inquiries for rails are developing, following distribution of orders for more than 100,000 tons as a result of purchases a week ago. The Chicago, Burlington & Quincy's orders for 30,000 tons is expected to be placed this month. Canadian National railways have entered the market for 15,000 tons, and also 1,500 box cars, 43 coaches and 30 tank cars. This interest placed 35 locomotives. Lackawanna is inquiring for 20 locomotives. Steel corporation units are operating at an average of 86% this week,

compared with 84% a week ago. Independents average also slightly higher at 85%. A year ago the corporation units were operating at around 69%, and the independents at 63%.

and the independents at 63%.

The "Iron Trade Review's" composite of 14 leading iron and steel products is \$35.30 this week, compared with \$35.29 a week ago.

Automobile builders are pressing rolling mills for shipments of sheets and strips, states the "Wall Street Journal" on Oct. 2. Early shipments is difficult to obtain because mills are sold up. Backlogs in flat rolled steels are now at the year's peak in independent mills in the valley. Principal consumers have covered on requirements over the quarter but others have not signed full quarter contracts, hoping to obtain better prices, adds the "Journal," which is further quoted:

Leading automotive interests are protected on the quarter's needs.

Strip steel demands have been well sustained during the past 45 days and show no signs of a let-up, mills continuing high operating rates.

Steel makers with pig iron capacity who have been in the merchant market are withdrawing because of iron demands of their own steel departments. This will improve conditions for strictly merchant melters and is likely to cause resumption of some stacks now cold. It is planned to blow in three blast furnaces in the Mahoning Valley during the fall.

Buying of steel rails by the railroads is getting well under way. In addition to good sized orders already placed by various roads it is estimated at least 1,000,000 tons will be bought within the next 60 to 90 days.

The St. Louis pig iron market is strengthening with melters' needs growing.

Cleveland jobbers have raised prices of black and galvanized sheets \$2 a ton.

Iron and steel scrap quotations continue to climb in the Chicago district.

Iron and steel scrap quotations continue to climb in the Chicago district. Heavy melting steel is up another 25 cents a ton at \$13.25 to \$13.75 with small lots reported sold at \$14. Railroad scrap is scarce. No sign of break in the upward trend of the scrap market is appearing. Heavy demand for toluol and benzol, which are by-products of coke manufacture, features the market for light oil distillates.

### Pig Iron Output in September Shows Small Gain.

According to the "Iron Age" this week, September pig iron output, from data collected largely by wire on Oct. 2, made a small increase over August. There was, however, a large net gain in furnaces, most of them put in operation during the closing days of the month. Seventeen were blown in and three shut down, a net gain of 14. Total September coke pig iron output was 3,062,314 gross tons or 102,077 tons per day for the 30 days as contrasted with 3,136,570 tons or 101,180 tons per day for the 31 days in August. This is an increase of 897 tons per day or 0.88%. In August the increase was 2,089 tons or 2.1%. The September daily rate last year was 92,498 tons, which was a decline from August of that year of 2,575 tons. As in August this year, the September output showed an increase over the preceding month, contrasting with decreases last year.

#### Capacity Active on October 1.

On Oct. 1 there were 197 furnaces active having an estimated operating rate of 106,755 tons per day. This compares with an operating rate of 98,730 tons per day for the 183 furnaces active on Sept. 1. Many furnaces during September were operated at a higher rate than in August.

Of the 17 furnaces blown in during September, six were Steel Corp. stacks, five belonged to independent steel companies and six to merchant producers. Only two Steel Corp. stacks were blown out and one merchant stack. Thus the gain for the month was nine steel-making furnaces and five merchant.

### Steel and Merchant Iron.

Steel-making iron last month was made at the rate of 82,590 tons per day or slightly less than the 82,642 tons per day in August. There was an increase in the merchant iron daily rate of production in September over August, or 19,487 tons per day against 18,538 tons per day.

#### Furnaces Blown In and Out.

During September the following furnaces were blown in: One Susquehanna stack of the Hanna Furnace Co. in the Buffalo district; the Brooke furnace in the Schuykill Valley; one Carrie and one Clairton stack of the Carnegie Steel Co.; one Midland stack of the Pittsburg Crucible Steel Co., and one Monessen stack of the Pittsburg Steel Co. in the Pittsburg district; one Haselton furnace of the Republic Iron & Steel Co. in the Mahoning Valley; the Sharpsville furnace in the Shenango Valley: one Joliet and one Gary stack of the Illinois Steel Co.; one Federal furnace and one Iroquois stack of the Youngstown Sheet & Tube Co. in the Chicago district; one furnace of the Colorado Fuel & Iron Co. in Colorado; one furnace of the Gulf States Steel Co.; one Woodward stack of the Woodward Iron Co., and one Bessemer and one Fairfield stack of the Tennessee Coal Iron & Railroad Co. in Alabama.

The three furnaces blown out or banked were the Pulaski stack in Virginia and one Joliet and one South Chicago furnace of the Illinois Steel Co. in the Chicago district.

### Possibly Active Stacks Unchanged.

The Crumwold furnace of the Reading Iron Co. in the Lehigh Valley has been sold and will probably be dismantled. The new No. 6 Fairfield stack of the Tennessee Coal, Iron & Railroad Co. at Fairfield, Ala.,was blown in during the month, leaving the number of possibly active furnaces in the United States unchanged at 339.

#### Iowa Coal Mine Wage Agreement.

According to Associated Press advices from Des Moines, Iowa, Sept. 29, a wage scale for Iowa coal miners based on a minimum daily wage of \$5.80 was agreed upon by representatives of miners and operators on Sept. 28, laying the foundation for peace in the industry after a year and a half of strife. The dispatch continued:

Although the daily wage is 30 cents less than the basis for the recently adopted Illinois scale, the new Iowa scale is considered equivalent to it because of a smaller reduction on the "yardage" and "dead work" rates. In Illinois, the rate for this work was reduced 20% from the Jacksonville scale, while the Iowa rate will be reduced but 14%

Only the formality of a referendum among members of the Iowa district of the United Mine Workers of America and a vote of the Iowa Coal Operators' Association, ratifying the scale, remain before it goes into effect.

### Arizona Copper Mine Wage Rise-Operators in Bisbee District Voluntarily Increase Pay by 10%, Effective

From the "Wall Street Journal" of Sept. 29 we take the following:

Wages in the Bisbee district have been advanced 10%. This advance has been given voluntarily by Phelps-Dodge Corp.. Calumet & Arizona Mining Co. and Shattuck Denn Mining Corp. and is effective October 1. The same wage advance will be made by Phelps-Dodge Corp. at its properties in the Morenci and Clifton district of Arizona. New Cornelia Copper Co. will also increase its wages 10% on October 1, and, so far as can be learned, there will be a general advance of 10% in mine and smelter wages by all operating companies in Arizona as result of a meeting of mine

Anaconda Copper Mining Co. and other companies operating in Butte, Mont., district have also made a similar wage advance of 10%, effective October 1, to all classes of mine, mill and smelter labor.

The increase was previously referred to in our issue of Sept. 29, page 1743.

#### Effect of Mine Wage Raise-Labor Makes Up Nearly 50% of Copper Production Cost, Depending on Method Used.

From the October 1 issue of the "Wall Street Journal" we take the following:

It is generally assured that labor makes up close to 50% of the cost of producing copper. This is a general rule and varies with the different companies, dependent largely on how the ore is mined—underground by some form of the caving system that requires little shoveling or by openpit mining with steam-shoveling of the ore, or whether the ore is mined with some system of square-set mining or a horizontal slice and fill system involving more labor expense.

It is probably safe to assume average cost of producing copper is around s a pound for western mines. Consequently a 10% increase in wage would figure out roughly an increase in cost of producing copper amounting to close to 1/4 cent a pound.

This would about equal the two recent advances of 1/4 cent a pound each, and makes it probable that price of copper will be advanced another quarter cent a pound in the next week or two, depending on buying volume.

#### Slight Decrease in Output of Bituminous Coal-Anthracite and Coke Production Higher.

According to the United States Bureau of Mines, production of bituminous coal during the week ended Sept. 22 amounted to 10,035,000 net tons as compared with 10,-197,000 tons in the preceding week and 9,870,000 tons during the week ended Sept. 24 1927. Output of anthracite during the week ended Sept. 22 1928 is estimated at 1,496,000 net tons as against 1,519,000 tons in the corresponding period last year and 1,414,000 tons in the week ended Sept. 15 1928. Production of beehive coke in the United States during the week ended Sept. 22 last totaled about 76,000 net tons, an increase of 3,000 tons as compared with the preceding week, but 31,000 tons less than produced in the week ended Sept. 24 1927. The Bureau of Mines report is

The total production of soft coal during the week ended Sept. 22, including lignite and coal coked at the mines, is estimated at 10,035,000 net tons. Compared with the revised estimate for the preceding week, this shows decrease of 162,000 tons, or 1.6%. Production during the week in 1927 corresponding with that of Sept. 22 amounted to 9.870.000 tons.

a Minus one day's production first week in January to equalize number of days in the two years. b Revised since last report. c Subject to revision.

The total quantity of soft coal produced during the calendar year 1928 to Sept. 22 (approximately 225 working days) amounted to 341,932,000 net Figures for corresponding periods in other recent years are given below:

As already indicated by the revised figures above, the total production of soft coal for the country as a whole during the week ended Sept. 15 amounted to 10.197,000 net tons. This is an increase of 1.262,000 net tons over the output in the preceding week, when working time was curtailed by the Labor Day holiday.

The following table apportions the tonnage by States:

Estimated Weekly Production of Coal by States (Net Tons).

### Increase in Employment and Wages in Pennsylvania Anthracite Collieries in August as Compared with

Both employment and payrools of anthracite mines in Pennsylvania increased in August from the low levels reached in July. Employment was nearly 2% higher in August but almost 9% below last year's level according to index numbers prepared by the Federal Reserve Bank of Philadelphia on the basis of operators' reports to the Anthracite Bureau of Information. Payrolls of the same operators increased 39.5% from July to August, but in the latter month were 4% below last year. Index numbers of employment and

payrolls for recent months as made public Oct. 1 by the Philadelphia Reserve Bank are shown below: NDEX NUMBERS-1923-25 MONTH AVERAGE

## Current Events and Discussions

### The Week with the Federal Reserve Banks.

The consolidated statement of condition of the Federal Reserve banks on Oct. 3, made public by the Federal Reserve Board and which deals with the results for the 12 Reserve banks combined, shows increases for the week of \$15,200,000 in holdings of discounted bills, of \$46,600,000 in bills bought in open market, of \$1,600,000 in United States Government securities, of \$22,000,000 in Federal Reserve note circulation and of \$33,700,000 in member bank reserve deposits, while cash reserves declined \$19,700,000. Total bills and securities were \$63,300,000 above the amount held on Sept. 26. After noting these facts, the Federal Reserve Board proceeds as follows:

The principal changes in holdings of discounted bills were increases of \$16,400,000 at the Federal Reserve Bank of New York, \$11,900,000 at an Francisco and \$4.500,000 at Chicago, and decreases of \$8,300,000 at Richmond, \$3,000.000 at Dallas, \$2,800.000 at St. Louis and \$2,400,000 at Minneapolis. The System's holdings of bills bought in open market increased \$46,600,000, of Treasury notes \$1,100,000 and of certificates of indebtedness \$700,000, while holdings of United States bonds declined

Federal Reserve note circulation was \$22,000,000 higher than a week ago, an aggregate increase of \$28,100,000 reported by ten Federal Reserve banks having been partly offset by decreases of \$3,500,000 at the Federal Reserve Bank of Cleveland and \$2,600,000 at Philadelphia.

The statement in full, in comparison with the preceding week and with the corresponding date last year, will be found on subsequent pages—namely, pages 1914 and 1915. A summary of changes in the principal assets and liabilities of the Reserve banks during the week and the year ending

Oct. 3 is as follows:

#### Returns of Member Banks for New York and Chicago Federal Reserve Districts-Brokers' Loans.

Beginning with the returns for June 29 1927, the Federal Reserve Board also began to give out the figures of the member banks in the New York Federal Reserve District, as well as those in the Chicago Reserve District, on Thursdays, simultaneously with the figures for the Reserve banks themselves, and for the same week, instead of waiting until the following Monday, before which time the statistics covering the entire body of reporting member banks-now 635—cannot be got ready.

The following is the statement for the New York member banks and that for the Chicago member banks thus issued vance of the full statement of the member banks, which latter will not be available until the coming Monday. The New York statement, of course, also includes the brokers' loans of reporting member banks, which this week show an increase of \$45,270,000, the grand aggregate of these loans on Oct. 3 being \$4,569,978,000. This is the highest total these loans have ever attained, the previous peak being \$4,563,240,000, which was reported nearly four months ago, on June 6.

#### Complete Returns of the Member Banks of the Federal Reserve System for the Preceding Week.

As explained above the statements for the New York and Chicago member banks are now given out on Thursdays, simultaneously with the figures for the Reserve banks themselves, and covering the same week, instead of being held until the following Monday, before which time the statistics covering the entire body of reporting member banks, now 635, cannot be got ready.

In the following will be found the comments of the Federal Reserve Board respecting the returns of the entire body of reporting member banks of the Federal Reserve System for the week ended with the close of business Sept. 26:

The Federal Reserve Board's condition statement of 635 reporting member banks in leading cities as of Sept. 26 shows declines for the week of \$81,000,000 in loans and discounts, of \$24,000,000 in investments of \$80,000,000 in net demand deposits, of \$41,000,000 in Government deposits, and of \$83,000,000 in borrowings from Federal Reserve banks.

Loans on stocks and bonds, including United States Government obligations, were \$53,000,000 below the Sept. 19 total at all reporting banks, declines of \$71,000,000 reported by member banks in the New York district and of \$8,000,000 in the Chicago district being partly offset by increase \$13,000,000 in the San Francisco district and \$9,000,000 in the Atlanta district. "All other" loans and discounts declined \$27,000,000 at all reporting banks, \$14,000,000 in the San Francisco district, \$12,000,000 in the Chicago district, \$9,000,000 in the Cleveland district, and \$7,000,000 in the Atlanta district, and increased \$6,000,000 in the Dallas district.

Holdings of United States Government securities declined \$28,000,000 at all reporting banks, \$9,000,000 in the San Francisco district and \$7,000,000 in the Atlanta district, while holdings of other bonds, stocks and securities increased \$7,000,000 in the New York district and \$4,000,000 at all reporting banks.

Net demand deposits, which at all reporting banks were \$80,000,000 below the Sept. 19 total, declined \$33,000,000 at reporting member banks in the New York district, \$25,000,000 in the San Francisco district, \$23,-000,000 in the Chicago district, \$7,000,000 in the Philadelphia district, and \$6,000,000 in the Boston district, and increased \$6,000,000 in the Kansas City district. Time deposits declined \$8,000,000 in the St. Louis district and increased \$12,000,000 in the San Francisco district and \$9,000,000 at all reporting banks.

The principal changes in borrowings from Federal Reserve banks were reductions of \$66,000,000 in the New York district and \$24,000,000 in the San Francisco district and increases of \$6,000,000 and \$5,000,000, respectively, in the Chicago and Dallas district.

A summary of the principal assets and liabilities of 635 reporting member lanks, together with changes during the week and the year ending Sept. 26

# Summary of Conditions in World's Markets According to Cablegrams and Other Reports to the Department of Commerce.

The Department of Commerce at Washington releases for publication Oct. 6 the following summary of market conditions abroad, based on advices by cable and radio:

#### ARGENTINA.

Business throughout the week continued to be good. The 1929 national budget shows an increase in expenditures of 55,000,000 paper pesos as compared with the previous year. The total foreign trade during the first eight months increased 5.6% and imports 9.1%, as compared with the corresponding period of 1927. The Government of the Province of Buenos Aires has authorized to call for bids for the construction of 110 school houses at a total cost of 12,000,000 paper pesos, and also authorized its Executive to spend 1,000,000 paper pesos for the construction of a branch provincial railway line connecting El Trigo with Las Flores. A first Argentine official estimate places the area planted to cereals and linseed in 1928 at 13,859,000 hectares, an increase of 1,067,000 hectares over 1927. This increase is distributed as follows: Wheat, 5%; linseed, 4.7%; oats, 13.9%; barley, 7.6%; rye, 29.1%, and birdseed, 24.1%.

#### AUSTRALIA.

Retail trade in Melbourne has improved considerably since the opening of the agricultural shows which featured American automobiles and other equipment imported from the United States. No substantial rains have been reported from wheat-growing areas during the past week. The wharf strike continues. As a result of this strike wool sales have been suspended and other trade dislocations are noted. The annual report of one large Australian company gives sales at 42% below estimates.

#### BRAZIL.

General business in Brazil continued fair and exchange was firmer with more export bills on the market. Foreign trade figures for the first seven months of 1928 show a favorable balance of £7,000,000. Trade this year has been considerably heavier in both exports and imports, and the substantial favorable balance this year is the reverse of that of last year when there was a deficit throughout the first semester. Heavy coffee shipments and higher prices are largely responsible for the present favorable balance of July and August shipments, which are usually the largest during the year, being considerably greater than in 1927. The tariff bill is still in the hands of the committee, but it is expected that it will soon go before Congress. Porto Alegre, Rio Grande do Sul, reports September business very dull because of floods, but prospects for the coming months are good.

#### BRITISH MALAYA.

Viewing the rubber situation from the local stock position, it appears that there will be a large accumulation of rubber stocks by Nov. 1. On Aug. 30 stocks of Malayan estates of over 100 acres and of dealers in the Straits Settlements restriction area amounted to 65,052 long tons, while Singapore and Penang dealers' stocks amounted to 18,971 tons, making a total of 84,023 tons, compared with a similar total of 81,384 tons on July 31. August production of rubber in British Malaya is estimated at 27,000 tons.

#### CANADA.

Cooler weather during the past week gave a fresh impetus to trade, particularly in seasonal lines. Electrical appliances are said to be enjoying a good sale and an increasing demand is reported for radio equipment, heaters, weatherstripping, ammunition and hunters' equipment. Footwear is selling more actively and clothing retailers are getting more business in middle-weight garments. A reduction in the price of denims is expected to benefit overall manufacturers. The logging situation in British Colombia is reported to be brisk with a shortage of cedar. The stock of fir logs is plentiful but sales are slow. Hemlock stocks are normal.

#### CHINA.

Manchurian conditions are generally prosperous. An unprecedentedly huge influx of immigrants from Shantung and Chihli Provinces have per-

manently settled upon new farm lands, principally in North Manchuria. This has made for a larger use of tractors for breaking land and in a greater demand for kerosene engines. New railway construction is increasing, telephone and telegraphic communications are improving, and the growing prosperity of agriculture in that region has brought increased revenues for all Manchurian railways. A rapid advance in the use of automobiles is also noticeable, and in the main section of Harbin automobiles have almost completely replaced transport by ricksha and carriage. Noteworthy also is the rapid expansion of the great commercial centres of Dairen, Mukden and Harbin, in all of which may be noted many new and substantial business, industrial and residential structures. Prospects for this year's crops in Manchuria are generally excellent, although the bean crop will require dry weather during the next few weeks to assure a successful harvest.

Wheat crops of North China are reported to be below normal. Their movement is also hindered through a lack of transportation. Walnut crops of North China are slightly greater in quantity and superior in quality to those of last year. The color of shell is good, comparatively free of spots, of very satisfactory size and sample cracks have yielded about 95% sound kernels. The present cotton crop is normal, both in quantity and quality, although the quantity is not likely to be equivalent to the record for the year just closed.

#### COLOMBIA.

Business in general is semewhat slower than heretefore, while the security market is more active with higher prices. The real estate market is also active and building is only restricted by the scarcity and high cost of building materials. Importers are becoming more cautieus in placing orders, due in part to overbuying in the past. The decline of New York prices for Colombian coffee has caused some uneasiness and the uncertainty of the future tendency of prices has resulted in a weakness of the coffee market, although very small stocks are on hand. Disagreement ever freight rates between the Government and navigation companies operating on the Magdalena River has resulted in cessation of shipping on the upper Magdalena River (the section between Beltran and Girardot), with consequent congestion of freight on the lower river which is assuming strious proportions.

#### CUBA.

The general state of business depression continued with little appreciable change in September, but improved sales are reported in some lines. There appears to be a better feeling among bankers and merchants as a result of the general belief that the policy of the Cuban Government affecting the sugar industry will be changed and that the mills will be allowed to grind the 1928-29 crop without governmental limitations. No official announcement as to the Government's future policy has been made and it is not expected that one will be forthcoming before December. Despite the absence of an official announcement, the general understanding prevails that the coming sugar crop will not be restricted and plans are being made accordingly by the mills and growers. The result has been a considerable buying movement affecting agricultural implements and farm machinery, and there has also been a moderate ordering of repair and replacement parts for the sugar mills. It seems to be the consensus of opinion among prominent merchants that there will be a larger distribution of merchandise during the coming winter. This is based on the more general distribution of money expected from an unrestricted sugar crop, even though the price of sugar does not improve.

of sugar does not improve.

During the past year merchants have been buying cautiously in an effort to reduce inventories, and as a result merchandise stocks have been largely liquidated. Consequently, the replenishment of stocks in anticipation of the seasonal improvement of sales at the end of the year has commenced early and any real improvement in basic conditions will be reflected immediately in increased purchases abroad. The seasonal outflow of money is apparently ceasing early this year, indicating a turn for the better in the business situation. Bankers continue to advise caution in the handling of individual credits pending a more tangible improvement in the basic situation, as they feel that the present activity is largely seasonal. A number of new industrial ventures have been reported in recent weeks and the necessary initial purchases of equipment and supplies for this expansion program have been a factor in the improved sales noted in the past month. Governmental expenditures on public works construction remains a favorable factor in the trade situation.

### ESTONIA.

Financial conditions in Estonia have shown a steady improvement since the first of the year when the funds from the international loan became available for the execution of the currency and banking reforms. At the private banks operations have also shown a general increase in activity.

#### FRANCE.

It is reported that the number of strikers in the textile establishments of the north of France now total about 20,000, but the movement is still localized and Lille and other important centres are only slightly affected. Employers are holding out against wage increases and failure of the strike is predicted. A feature of the money market is the large amount of French capital seeking employment in other countries and notably in the United States, owing to high rates in those countries. The Bourse shows no pronounced tendency and the volume of trading is small.

#### HAITI.

The volume of sales of general merchandise continues at a low level. The circulation of currency is expanding slowly but gradually, indicating a general quickening of trade activity as the coffee crop is marketed. By the first or middle of November a considerable betterment of trade conditions should be realized. Collections are still poor, but should improve as soon as the coffee crop is moving in volume. Coffee prices are being maintained at a high level. The motor trade is being well maintained and prospects are for improved sales in the coming months. The economic loss resulting from the hurricane which swept over the southern peninsula in August is expected to prove less serious than previously reported.

#### HUNGARY.

Hungarian business improved somewhat in September, due to the record wheat crop. Money is plentiful for short-term credits at steady rates, but long-term funds are unavailable. The stock exchange is slack with prices declining. A severe shortage of the corn and fodder crops is feared, menacing the livestock industry, and as a result the import duty on corn for cattle fodder has been removed; the corn shortage is estimated at 500,000 tons. Savings deposits in the Postal Savings Bank and in thirteen leading commercial banks in Budapest how amount to more than \$82,000,000, with the steady accumulation continuing. Unemployed belonging to labor organizations numbered 13,000 in July.

#### ITALY

The Italian industrial and commercial situation during Septenth showed a slight improvement except in the northern Adriatic districts, where shipping and shipbuilding stagnation has adversely affected conditions. It is generally felt throughout the country that the process of adjusting prices and costs of production to the new first valuation is practically completed and it is anticipated that remunerative operations in most

lines of industry will be possible when winter demands begin. The prevailing problem before the country to-day is that of preserving lira parity in face of an adverse trade balance and the ban on foreign loans. Imports through August exceeded exports by 5,200,000,000 lire, which is almost 500,000,000 lire more than for the full year 1927, but it is hoped that heavy agricultural exports during the next few months will lead to a more favorable situation for the remainder of the year. Totals of employment have increased slightly and the situation is reported as having been aided by the better conditions prevailing in the heavy industries and textile trades. Public savings in Government institutions show remarkable gain and it is expected that the increase in purchasing power will be reflected in a growing market for luxury goods. Money is still plentiful and interest rates low on deposits and loans, but the latter are still subject to careful scrutiny. Exchanges are still seasonally quiet. The metallurgical trades are maintaining their recent improvement and in addition to heavy Government orders have several substantial private bookings. The smaller automobile producers are also busy with Government orders, and, although the largest automobile manufacturer has produced less this year than last, improved domesite sales cause optimism. Silk demand is still weak, covering only immediate requirements. Cotton spinners are only fairly active for export. The demand for leather is moderately good and expected to increase. The building trades have been very quiet.

#### TADAM

The Japan Spinners Association has extended the restriction on output to June 30 1929, with special exemption applied to those mills which abolish night work prior to that date. The first local forecast of Korea's rice crop is estimated at 13,600,000 koku (1 koku equals 5.12 bushels), a decrease of 27% compared with last year's crop.

#### LATVIA.

The slow general improvement in financial conditions in Latvia continued throughout the early part of September. The improvement in business conditions is reflected in the marked decrease in protested notes and bank-ruptcles during the first half of the year.

#### NETHERLAND EAST INDIES.

Sugar and rubber markets continue dull. Export trade in coffee, however, was active during the week previous. Rubber shipments from all the Netherland East Indies in August totaled 29.828 long tons, of which 5.668 tons were from Java and Madura, 7,438 from the East Coast of Sumatra, and 16.722 from all other sections.

#### NEWFOUNDLAND.

The economic outlook in Newfoundland is improving. The firm prices ruling in the salt fish trade have stimulated fall buying in both wholesale and retail lines, the general tone of domestic industry is good, and there is little unemployment.

#### NEW ZEALAND.

Merchants are growing more optimistic as improved conditions are reported from all sections of the trade. Wholesale trade is active and dairying districts are ordering more heavily as the result of an excellent season. Butterfat production is higher and prices are better than at this time last year, and cattle raisers are enjoying high beef prices. The wool outlook is good. The automotive outlook is bright. While stocks are commencing to arrive in good quantities, many consumer customers are still awaiting the delivery of cars. The demand for passenger automobiles appears to be increasing, and commercial sales are reported as steady. Motorcyle sales are still slow. The demand for building material is active. Stock exchange prices are generally firm.

#### PHILIPPINE ISLANDS.

No improvement was registered in copra and abaca markets during the past week. Arrivals of copra at Manila continued very heavy. It is estimated locally that deliveries for September will total 500,000 sacks and that 420,000 sacks will be received in October, with total arrivals for the balance of the year well above the same period last year. New trading is expected to be slack for the next two weeks, as present prices are below those contracted by dealers for heavy deliveries to the oil mills, all of which are operating, and provincial prices are above Manila offers. F. o. b. quotations for resecado (dried copra) are now 11,47 pesos per picul of 139 pounds delivered at Manila; Hondagua, 11.75; and Cebu, 11.77 pesos (1 peso equals \$0.50). With practically no demand for any grades, abaca trade continues stagnant. Arrivals of poor grades of fiber are heavier than at any time in the past two years and no improvement is expected until prices decline, as producers are stripping large quantities hurriedly in order to secure cash. Prices are nominal at 21.50 pesos per picul for grades F and I; JUS, 17; JUKk, 15, and L, 12.50 pesos.

#### PORTO RICO.

For the present the commercial situation is somewhat stabilized. The decision of the Red Cross to purchase all possible supplies locally will redound to the benefit of local merchants and has prevented possible cancellations of order in the States. The business community, fruit and tobacco farmers, and the public generally are showing increasing optimism and a disposition to meet the situation with courage. Local trade and agricultural associations are considering a plan to assist the farmers and other producers in their recovery from the effects of the recent hurricane. This would include a survey to determine the extent of the damage, followed by endeavors to obtain long term loans to individuals and thus rehabilitate local industries. Reconstruction work in San Juan is progressing rapidly to the accompaniment of good retail trade in construction material, builders' hardware, plumbing and electrical goods and a fair trade in furniture and household equipment. On the other hand, sales of clothing, textiles and shoes are very slow.

#### SPAIN.

The outlook for Spanish business during the coming winter is dimmed by generally unfavorable cereal yields. Wheat production is 10% below normal with barley and rye yields also under average. A decline from last year's record olive crop is indicated, but important stocks remain on hand. Both public and private financial conditions are strong. Bank clearings have exceeded those for the same season last year and transactions on the stock exchange have also increased considerably, with quotations on bank, railway and industrial stocks showing general advances. The Government committee formed to protect peseta exchange is now in a position to function actively with the aid of New York and London credits. The revenues of the Government have been higher than expenditures and are also well above estimates. A new bank called the Exterior Bank of Spanish trade organized with a capital of 150,000,000 pesetas to promote Spanish trade and foreign investments; an organization for export insurance has also been authorized, part of whose risks is to be borne by the Government.

### TURKEY.

Commercial activity has failed to improve despite the advance of the expert season. This situation is due in a large part to the drought, which

has resulted in a shortage of cereals, and to the disappointing activity of the Smyrna fruit market. The drought has also affected the purchasing power of the peasants, who have been forced to restrict their ordinary purchases, with unfavorable effects on the import trade. The Turkish pound has been firm around \$0.515. The new Latinized Turkish alphabet is being widely introduced. Its official adoption by law is anticipated when Parliament convenes in November.

#### UNITED KINGDOM.

Trade at least experienced no further general set-back during September. Figures now available for the first half of the month show that there has been a slight expansion in employment, following the long, steady unemployment increase which is now apparently checked. The transfer of unemployed miners to other industries is proceeding slowly, and the decision of the trade union conference to support the scheme for general co-operation between workers and employers is expected to have wide beneficial effect throughout British industry. Latest trade returns show continued increases in exports of manufactured products and an expansion in imports of raw materials. No marked improvement, however, is shown in the output of textile and heavy industries. General commodity prices are slightly lower and retail trade is fair. The iron and steel trade is steady but quiet, with fall demand still undeveloped although the situation is considered to be improving. Increased Continental prices, partly due to cartel quota restrictions, have enabled British makers to obtain a large share of domestic and foreign orders. Sheet makers are well occupied as is also the case with timplate mills. The seasonal increase in demand is causing an improvement in the coal industry and production an employment are showing an upward trend. The competitive position of British coal in export markets is also improving with consequent favorable prospects for an all around betterment during fall and winter months, although no sudden alteration is expected.

#### Premier Poincare's Reported Proposal to Link Reparations Issue and French Debt to United States— President Coolidge takes Stand that Debt Question Is Closed.

Accounts (Associated Press) from Paris Oct. 1 announced that a speech by Premier Poincare at Cambrey, where he unveiled a war memorial on Sept. 30, was interpreted as again putting the question of a cut in reparations and a cut in the French debt squarely up to the United States. The Paris cablegram went on to state:

The Premier reiterated the French policy that any reduction of Germany's reparation debt to the former Allies "must be accompanied by a corresponding cut in the inter-allied debts to the United States."

M. Poincare insisted, especially, that France still considered the interdependency of reparations and Rhineland evacuation problems as definitely correlated to the interallied debt question. His reference to debts was brief but clear, the Premier saying:

If we are to consider the reparations problem anew, we are obliged to remember that an agreement to be equitable must guarantee France from our debtors beyond the integral amount of what we must pay our creditors, a clear indemnity for our war damages.

The Premier said the peace treaties assured France two things, security and reparation. All steps by France since the armistice, even the occupation of the Ruhr, he said, had been made with a view to promoting either of those ends.

It was thought in American quarters that, should the French Government remain adamant in such a policy, it would be virtually impossible to make real progress in future negotiations regarding reparations and evacuation of the Rhineland without the active anticipation of representatives of the United States in the discussion.

The American Government has repeatedly insisted the reparation and Allied debts' questions must be kept distinct. Such was recently stated to be the Washington attitude when it appeared that an attempt would be made to bring the United States into the reparation and education discussions determined on by France, Great Britain, Belgium, Japan, Italy and Germany, at Geneva.

M. Poincare somewhat modified the apparently irreconcilable aspect of

M. Poincare somewhat modified the apparently irreconcilable aspect of his sreech when toward the conclusion he said that while France must be prudent in the whole business of reparations and debts, the Governments had no concealed intention of "dragging out the negotiations which have been started or making them fall."

On Oct. 2 it was reported in a Washington dispatch to the "Times" that President Coolidge on that date met the suggestion of Premier Poincare that the war debts owed to America be associated with German reparations, by redefining the Administration's policy and making it plain to White House callers that this policy was settled and not subject to any modification. We quote further from the dispatch as follows:

In his opinion, sentiment in this country would insist upon considering reparations separate and distinct from the debts owed by European nations to American taxpayers. He feels that the Administration policy founded upon this program, and based upon the ability of the debtor nations to ray is a just one.

He thinks it not unlikely that efforts to make some arrangement by which the taxpayers of America will pay German reparations will continue, but such a proposal, in his opinion, will not be discussed by this country.

Since all the debtor nations have concluded settlements, with the exception of France, the President cannot see, it was stated, that any goed result will be accomplished by discussing it in the press. He has made it a settled policy to refrain from public discussion concerning the continued renewal of such suggestions. In fact, he desires it to be known that he considers the "incident closed."

In considering the "incident closed" the President virtually served notice upon the foreign Governments that might have some hope of obtaining a modification of the debt agreements that there could be no change of policy which considers the reparations problems and debts owed the United States as co-related subjects to be dealt with together and made dependent on one another.

President Coolidge holds that there is no real division of American sentiment on this subject, and that it is a duty to the American taxpayers to see that the debtor nations shall settle according to their ability to pay.

The President's restatement of the American position, officials say, should bring to an end the agitation in France and lead to a serious consideration of the debt settlement plan and the tackling by the proposed commission at Geneva of reparations adjustment without in any way

connecting with reparations war debts due the United States by the countries receiving reparations.

In its issue of Oct. 4 the "Times" contained the following cablegram from Paris, Oct. 3:

Premier Poincare got one of the biggest surprises of his life when he read a dispatch from Washington this morning in which President Coolidge was represented as replying to his speech of Sunday by saying that the subject of the Allied war debts to the United States was closed, and Mr. Mellon's statement that there was no connection between reparation payments and repayment of war debts.

Neither on Sunday nor at any other time, French officials say, has the French Premier made any statement which could be construed in such a manner, as for some obscure purpose his Sunday's speech has been construed. What he said was quite definite and quite accurately cabled to the New York "Times" in Mr. James's dispatch. It amounted to this: "Whatever revision of reparations may be made, France intends to

"Whatever revision of reparations may be made, France intends to recover from Germany enough to pay her creditors, plus a fair allowance for reconstruction."

Premier's Exact Words.

The Premier's exact words were:

If it is to be equitable, any settlement ought to guarantee to us from our debtors a clear indemnity for our war losses over and above integral payment of what we owe our creditors.

That statement of France's position, officials here insist, is clear and definite. It in no way suggests that France is seeking a reduction of her debts. She is not a petitioner. Her position is precise. If she must pay her debts in full she must recover from her debtors the wherewithal to do so and something over for herself.

and something over for herself.

For a moment the Ministry of Finance considered the advisability of putting out an official statement in reply to the White House statement, putting this situation in definite form, but finally the Premier decided to stand on what he had said and to disregard what he looked upon as a misinterpretation, which he believed had had its origin in American politics.

It seems to him sufficiently clear, according to the French, that if any one is asking for a new deal on the whole questoin it is Germany. All he is interested in is in getting enough to pay France's creditors and enough in addition to pay for the damage inflicted in the war. On that position he is prepared to stand firmly in all negotiations with Germany and leave it for those who are anxious that Germany should be let off from some of her payments to arrange it so that France will have to pay less. She will not ever under the present Premier be a petitioner for a reduction of her just debts to America and England.

#### Argentine Obtains \$10,000,000 Loan from One of Its Own Banks.

Under date of Oct. 2 Associated Press advices from Buenos Aires said:

The Argentine Government has accepted a loan of \$10,000,000 from the Banco Argentino-Uruguayo for one year at 5.25%. The Government last week refused to renew a credit of \$12,000,000 in the United States, claiming the rate of 7.5% asked by New York bankers was too high.

The repayment of the \$12,000,000 loan negotiated for in New York was noted in our issue of Sept. 29, page 1749.

#### Dr. Schacht Re-elected President of the German Reichsbank.

Dr. Hjalmar Schacht has been re-elected President of the Reichsbank to serve four years, according to Berlin advices in the "Wall Street Journal" of Oct. 1.

#### Reopening of Privat Bank of Copenhagen, Denmark.

From its London office the "Wall Street Journal" of Oct. 3 announced the following:

Privat Bank of Copenhagen has reopened. The present capital of 60,000,000 kroner is being written down to 12,000,000. New capital of 28,000,000 kroner has been provided and 15,000,000 kroner have been guaranteed by National City Bank, Guaranty Trust Co., Hambros Bank and Enskilda Bank.

London bankers say difficulties of the Privat Bank were due largely to losses incurred from the Aarhus oil factory earlier in the year, in which it lost 3,500,000 kroner, and failure of a German subsidiary, Teutonia Co., in Hamburg. London creditors of the Privat Bank represent a considerable

The closing of the bank was referred to in our issue of Sept. 29, page 1749.

### Cauca Valley (Columbia) Revenues Increase.

Department of Cauca Valley, Colombia, reports to J. & W. Seligman and Co. that revenues pledged as security for its 7½% sinking fund gold bonds amounted to \$3,156,233 for the year ended June 30 1928, equivalent to 7.96 times the service charges on the bonds for the year. These revenues compared with \$2,949,835 for the year ended June 30 1927 and \$2,438,158 for the 1926 fiscal year.

## Foreign Bonds Rise \$237,724,473 in Market According to Stone & Webster and Blodget.

Foreign Government bonds on New York exchanges have appreciated \$237,724,473 in market value from dates of listing until Aug. 31, according to a study by Stone & Webster and Blodget, Inc. The 209 issues analyzed include all foreign Governmen obligations except those of Russia and Mexico. In number of loans Argentina is first with 23 national, State and municipal bond issues. British bonds led in market value increase with a total of \$44,320,820. The survey also reveals that domestic bonds declined with the rise in money rates from a high of 93.60 on May 3 (New

York Times Index) to a low of 89.24 on Aug. 14, a loss of 4.36 points. In the same period foreign bonds reached a high of 107.42 on April 5 and a low of 105.51 on June 13, a total decline of only 1.91 points.

### Portion of Republic of Uruguay Bonds Retired.

Hallgarten & Co., and Halsey, Stuart & Co., Inc., announce that \$174,000 principal amount of Republic of Uruguay 6% external sinking fund gold bonds, due 1960, have been tendered to the sinking fund for retirement, leaving outstanding \$29,175,500 par value of bonds.

#### A. J. Mount of Bank of Italy Sees Early Return to Farm Prosperity—Better Marketing Facilities and Not Increased Credit Needed.

The American farmer needs better marketing facilities rather than increased credit, in the opinion of A. J. Mount, Senior Vice-President of the Bank of Italy, in attendance at the convention of the American Bankers Association in Philadelphia. Carrying this year's crop into next year or harvesting only part of the crop, permitting the rest to perish, will not solve his problem. Such a policy is uneconomic and, at best, he says, only a temporary expedient, not to be considered as offering a permanent solution of the ills that now afflict American agriculture. Mr. Mount, with other California bankers, is working with the co-operative farm organizations of that State in an effort to bring about this desired condition. Branch banking, he holds, has been of material benefit to the farmers of California. The fluidity of funds permits the ready transfer of money from communities where it is not needed to communities where the demand exists. "With greater efficiency and the application of better scientific facts to its problems, agriculture, should have an early return to a condition of prosperity," he declared. "This applies not only to California but to the farm areas of the country at large. We feel that the problem of mounting costs as well as that raised by increased production must be met by improvement in the orderly marketing of farm products, which can only be done by improving the efficiency of the co-operatives. We find that where we have an efficient co-operative organization, there is no farm problem; where there is no efficient co-operative, there you find your real problem."

#### Argentine Government Bonds—Tenders for Purchase Through Sinking Fund.

J. P. Morgan & Co. and The National City Bank of New York, as fiscal agents, have issued a notice to holders of Government of the Argentine Nation external sinking fund 6% gold bonds, issue of Oct. 1 1925, due Oct. 1 1959, to the effect that \$172,195 in cash is available for the purchase for sinking fund of so many of the bonds as shall be tendered and accepted for purchase at prices below par. Tenders of bonds with coupons due on and after April 1 1929 should be made at a flat price, below par, at the offices of J. P. Morgan & Co., 23 Wall St., or at the head office of The National City Bank of New York, 55 Wall St., prior to 3 p. m. Nov. 1 1928.

J. P. Morgan & Co. and The National City Bank of New York, as fiscal agents, have also issued a notice to holders of Argentine Government loan 1926, external sinking fund 6% gold bonds, public works issue of Oct. 1 1926, due Oct. 1 1960, to the effect that \$92,491 in cash is available for the purchase for the sinking fund of so many of the bonds as shall be tendered and accepted for purchase at prices below par. Tenders of bonds with coupons due on and after April 1 1929 should be made at a flat price, below par, at the offices of J. P. Morgan & Co., 23 Wall St., or the head office of The National City Bank of New York, 55 Wall St., prior to 3 p. m. Nov. 1 1928.

#### Argentine Government Bonds Drawn for Redemption.

J. P. Morgan & Co. and The National City Bank of New York, as fiscal agents, have issued a notice to holders of Argentine Government loan 1927, external sinking fund 6% gold bonds, public works issue of May 1 1927, due May 1 1961, to the effect that \$106,000 principal amount of the bonds has been drawn by lot for retirement at par and accrued interest on Nov. 1 out of sinking fund moneys. Payment on the drawn bonds will be made upon presentation and surrender at the office of J. P. Morgan & Co., 23 Wall St., or the head office of The National City Bank of New York, 55 Wall St., on Nov. 1, after which interest on drawn bonds will cease.

J. P. Morgan & Co. and The National City Bank of New York, as fiscal agents, have likewise issued a notice to holders of Government of the Argentine Nation external sinking fund 6% gold bonds, issue of May 1 1926, due May 1 1960, to the effect that \$103,000 principal amount of the bonds has been drawn by lot for retirement at par and accrued interest on Nov. 1 out of sinking fund moneys. Payment on the drawn bonds will be made upon presentation and surrender at the office of J. P. Morgan & Co., 23 Wall St., or the head office of The National City Bank of New York, 55 Wall St., on Nov. 1, after which date interest on the drawn bonds will cease.

## Bonds of Mortgage Bank of Chile Drawn for Redemption.

Kuhn, Loeb & Co. and the Guaranty Trust Co. of New York, fiscal agents for Mortgage Bank of Chile guaranteed sinking fund 6% gold bonds of 1928, due April 30 1961, have issued a notice to holders of interim certificates representing bonds of this issue, announcing that \$100,000 principal amount of these bonds has been drawn by lot for redemption at par on Oct. 31 next. Holders of certificates representing drawn bonds are entitled to receive payment at the principal office of the Guaranty Trust Co. of New York out of moneys received by it applicable thereto. Interest on drawn bonds will cease on the redemption date.

#### Bonds of External Loan of Italy Drawn for Redemption.

J. P. Morgan & Co., as sinking fund administrator, has issued a notice to holders of Kingdom of Italy external loan sinking fund 7% gold bonds, due Dec. 1 1951, to the effect that \$1,717,300 principal amount of the bonds has been drawn by lot for redemption at par on Dec. 1 out of sinking fund moneys. Payment on the drawn bonds will be made upon presentation and surrender at the offices of J. P. Morgan & Co., 23 Wall St., on and after Dec. 1, after which date interest on the drawn bonds will cease.

#### Chain Store Financing Aggregating over \$85,000,000 Sets New Record in First Nine Months.

During the first nine months of 1928 there were 40 offerings of chain store securities, aggregating more than \$85,000,000, according to the October "Review" of Shields & Co., Inc., just issued. This is believed to establish a new record for any similar period, both in number of offerings and in aggregate amount involved. It includes only offerings of securities of retail merchandising chains, and does not include service chains such as laundries and chains which consist primarily of manufacturing units which do not retail directly to the public, nor security offerings by companies operating chains of theatres. This compares with offerings in similar periods of previous years as follows:

	No. of	
	Offerings.	Amount.
1925	. 12	\$23,798,000
1926		22,904,000
1927		52,415,000
100	40	85 605 000

Department store chains were in first place in new financing for the first nine months of 1928, both in number of issues and in aggregate amount. There were seven offerings of chain department store securities, aggregating \$20,020,000. This compares with other types of business as follows:

	No. of			
		Amount.		
Department store chains	7	\$20,020,000		
Drug store chains	- 6	17,128,000		
Five and ter cent and notion chains.		14,117,000		
Grocery chains		10,031,000		
Shoe chains		7.768.000		
Restaurant chains		6.000,000		
Women's appeared		5.272.000		

Other chain store businesses, in order of the amount of financing involved, were: furniture chains, auto supplies, confectionery, bake shops, stationery and electrical fixtures. Based on the record made during the first nine months of the year, it is probable, it is said, that chain store financing during 1928 will substantially exceed that for 1927, when it amounted to nearly \$100,000,000, made up of 34 offerings. This compares with approximately \$50,000,000 in 1925, and approximately \$32,000,000 in 1926.

#### Survey by John Nickerson & Co. of Periods Marking Peak of Railroad Common Stocks—Outlook for Traffic Earnings.

In 16 of the past 25 years, railroad common stocks reached their peak during November, December, or January—and in

only 9 years in this quarter-century period was the annual summit attained in any of the other calendar months. That is brought out in the current financial review issued by John Nickerson & Co., Inc.—not as a prophecy as to this season's high for rails, but as a matter of record revealing the well defined path in previous years. The number of times, according to the review, when railroad common stocks reached their high point for the year in each of the twelve calendar months (during the past 25 years), is as follows: Never in February; 1 year, in March; never in April; 1 year, in May; never in June; 1 year, in July; 1 year, in August; 2 years, in September; 3 years, in October; 3 years, in November; 5 years in December; 8 years in January.

The outlook for a bulge in traffic and earnings over the remainder of 1928 and the first two months of 1929 is, it is stated, decidedly favorable. In that connection, each month's loadings in the first half of this year showed a smaller per cent. decrease from 1927 than did the preceding month (ranging from an 8.1% drop in January to a 1.4% decline in June); and car loadings from July 1 to date show a gain. The trend, by quarters, is indicated as follows:

1928	1927	1928 Chang	
Loadings.	Loadings.	Cars.	%
January-March quarter11,789,448	12,541,131	-751,683	-6.0
April-June quarter12,667,657	12.979.815	-312.158	-2.4
July 1-September 15 11 420 043	11 398 409	+21 634	+02

It is pointed out that these favoring conditions suggest that the present and the nearby future may offer attractive opportunities to pick up choice rails for long pull possibilities, despite current relatively high average prices—and especially in the event a general reaction brings still more inviting prices for certain rails on which the investor is thoroughly informed.

#### Foreign Funds Factor in Supporting Advancing Prices on New York Stock Exchange According to Bank of America, N. A.

Attracted by prevailing high rates of interest, foreign funds, which because they do not pass through the hands of reporting banks are not shown in Federal Reserve compilations, appear to be a factor in the credit currently used to support advancing stock prices, the Bank of America Naitonal Association reports in its review of business conditions, issued this week. The survey says:

"There seems little reason to question that the rapid advance of prices on the Stock Exchange is receiving some support in the form of foreign funds attracted here by our high interest rates. Much of this money is apparently entering the market directly without passing through the hands of the reporting banks. This might well be the explanation of the increase of \$214,000,000 during August in brokers' loans as reported by the New York Stock Exchange."

The bank does not anticipate that the movement of gold to this country from London, forecast by a recent shipment, will reach large proportions. It states:

"High interest rates here have served for the time at least to check the export of gold from this country and to bring a small shipment of this metal from London. It is possible that additional amounts will follow but there appears to be very little probability of a gold import movement of important size to offset the net loss in the last twelve months of more than \$575,000,000 gold."

In its discussion of the money market, the bank characterizes the advance in time rates on collateral loans as the most significant development in the last few weeks. In spite of the higher return now offered by such loans, it continues, their volume has been steadily declining while an increasing amount of money has been loaned out on call at advancing rates, thus indicating the belief of lenders that higher rates are in prospect. The review notes that attempts to reduce the amount of money loaned in the stock market for the account of organizations other than banks appear thus far to have been ineffective.

As to Federal Reserve policy, the bank sees in the purchases of acceptances and securities in the open market evidence of some relaxation on the part of the Reserve Board in its apparent effort to reduce the volume of credit outstanding.

"Business is well above the level of this time last year and promises to continue active," the review says in summarizing general business conditions. It adds:

"While some unforeseen development, such as a flurry in the stock market, might alter this favorable outlook, no untoward influence which might serve to check business in the next few months is now apparent. The political campaign is not proving a disturbing factor, no issues of major importance in the business world being at stake.

"Indications point to a continuation of firm money in the immediate future. We are entering the period of heaviest commercial demand for credit with a heavy volume of business and the prospect of very good yields in the major crops. Credit requirements for financing this broad movement of goods into consuming channels will be correspondingly large,

while at the same time there is no immediate prospect of a reduction in the amount of money employed in the security markets. The fact that banks are taking in their time loans and increasing the amount loaned on call is evidence that rates are expected to continue their advance at least for the immediate future. There is no reason, however, to fear that legitimate business will be permitted to suffer for lack of funds as the resources available are ample for that purpose."

#### Brokers Loans on New York Stock Exchange at \$5,513,639,685 Reach New High Record.

The largest total of outstanding brokers' loans on the New York Stock Exchange was announced this week when the figures for Sept. 30, were made public. The loans at that date aggre ated \$5,513,639,685, an increase of \$462,-202,280 over the Aug. 31 figures, which totaled \$5,051,-437,405. Only once before did the figures go beyond the five billion dollar mark-May 31 1928, when they reached \$5,274,046,281—the high mark prior to the latest showing. In the September 30 total the demand loans are given as \$4,689,551,974, while the time loans are shown as \$824,-087,711. Stating that "high money rates of the past few weeks have played their part in swelling the total," the "Wall Street Journal" of Oct. 3, said:

Wall Street was prepared for a large increase in the figure, but was scarcely looking for the figure that was reported. There are a number of explanations offered. In the first place the difference is largely due to the new Clearing House regulations which went into effect Sept. 1 whereby street loans handled by local banks for others than banks are charged a commission that shall be solved by the state of the state of the state of  $\frac{1}{2}$  of  $\frac{1}{2}$  of  $\frac{1}{2}$  of the principal amount of loan (as compared with former charge of  $\frac{5}{6}$  on interest received), all such loans to be \$100,000 or in multiples thereof. To evade this charge many corporations have been making their street loans direct to brokers and not through the banks as formerly. For this reason the increase in Stock Exchange loans greatly ceeded its expansion in Federal Reserve figures last month.

In addition, it is understood there has been liquidation on a considerable scale of holdings by investment trusts and large pools. While this created While this created a new supply of funds, new borrowers have come in. Borrowing is now on a broader scale than it has been for some time as securities formerly owned by these groups outright have been sold to smaller purchasers who are buying with the aid of borrowed funds. This tendency is much greater than last spring.

The following is the statement issued Oct. 2 by the Stock Exchange:

Total net loans by New York Stock Exchange members on collateral contracted for and carried in New York as of the close of business Sept. 30 1928, aggregated \$5,513,639.685.

The detailed tabulation follows:

(1) Net borrowings on collateral from New York banks or trust companies \$3,938,873,300 \$708,522,267 \$

(2) Net borrowings on collateral from private bankers, brokers, foreign bank agencies or others in the City of New York 750,678,674 115.565.444

\$4,689,551,974 \$824,087,711
The scope of the above The scope of the above compilation is exactly the same as in the loan

report issued by the Exchange a month ago.

The compilations of the Stock Exchange since the issuance of the monthly figures by it, beginning in January 1926,

#### New York Stock Exchange Reopens Negotiations For Purchase of Postal Building.

Negotiations have been re-opened by the New York Stock Exchange with the Mackay companies for the purchase of the 20-story Postal Telegraph Building at 20 Broad St., says the "Times" of Oct. 4. From that paper we also take the following:

It was learned yesterday that the deal. which has been discussed at various times for more than a year, is about to be closed.

The Stock Exchange, it is understood, plans to take over the building as an annex to its present quarters at Wall and Broad Sts. The two buildings adjoin, both extending from Broad to New St. The Stock Exchange already

has under lease three floors of the Postal building and is housing the "bond crowd" in part of this space.

a possibility, it was said yesterday, that if the Exchange buys

a building it will raze it and build an annex especially to meet its needs.

No information could be obtained as to the price being considered.

Last September, when the deal was first discussed, it was reported that the Mackay interests were asking about \$9,000,000 for the property. The figure mentioned in connection with the present negotiations, however, is said to be considerably lower. The property has an assessed valuation of \$3,000,000.

#### Security Prices Have "Outrun Demonstrated Values" According to John J. Raskob-Readjustment Necessary.

Indicating no appreciable effect on stock market operations resulted from a warning on Oct. 4 by John J. Raskob regarding security prices, which he said have "so far outrun demonstrated values, earning power and dividend returns, that a material readjustment is necessary before they will again be attractive to the prudent investor," the "Herald-

Tribune" of Oct. 5 said:
The market yesterday was in an uneasy mood, but it received Mr. Raskob's words with equanimity, although traders admitted the remark might have precipitated a bear movement three months ago.

The same traders admitted that they eagerly followed Mr. Raskob's tip last March, when he said General Motors stock was selling too low and should advance to twelve times its earnings. They figured he meant General Motors should go to 225 and they all hastened to buy. It rose overnight 2¼ points and rose 8¾ points during the day, reaching a new high of 199. Since then it has gone up to 219, taking the market with it in a bull move-

ment that has been a cause of great satisfaction to investors.

Yesterday they discounted Mr. Raskob's statements as political rather than financial, and suspected him of being willing to cause a break in the market so that the Democrats might make capital of it.

#### Mr. Raskob's statement follows:

Newspaper statements and gossip which have credited recent spectacular advances in certain securities to my activity in the stock market are entirely without foundation for two very good reasons. In the first place, since I have taken this position as Democratic National Chairman I have not

een near my office and have not purchased any stock whatsoever.

'In the second place, it is my opinion that security prices have so far out run demonstrated values, earning power and divided returns that a material readjustment is necessary before they will again be attractive to the prudent investor. The course of the bond market is a good indication of where the investor stands in relation to present security prices. Dividend returns are low and money rates high.
"While I consider the business out look sound, I cannot see anything in

the future to warrant the belief that corporations can increase their dividend payments sufficiently to make the yield on present security prices compare favorably with the high cost of money.

'My name has frequently been mentioned as being prominently identified with the Chrysler Corp. and Radio. As a matter of fact, I have never owned and do not now own a single share of stock of the Chrysler Corp. and the stock in the Radio Corporation which I hold was purchased outright by me a long while ago and is held as an investment. "I am not interested directly or indirectly in any pool or stock market

operations. All securities held by me are owned outright for the reason that it seems imprudent to be substantially in debt with the stock market and money market in the present position."

#### Brokerage Firm of Saylor & Wichelman, Inc., Davenport Iowa, in Bankruptcy.

A voluntary petition in bankruptcy was filed on Sept. 24 in the United States District Court at Davenport, Iowa, against the firm of Saylor & Wichelman, Inc., brokers, of Davenport, according to a dispatch from that city on Sept. 24 to the Des Moines "Register." Liabilities were listed at between \$185,000 and \$200,000. "Frozen assets" and inability to collect outstanding notes and accounts receivable from customers were given as the reason for the failure of the firm in a public notice issued on the same day (Sept. 24) to the creditors. The failed firm in addition to its main office in Davenport operated branches in Carroll, Muscatine, and Sioux City, Iowa, and in Rock Island, Ill. The officers were Harry G. Saylor, President; Bruce L. Nutting, Vice-President, and E. H. Wichelman, Secretary and Treasurer. Advices on the following day (Sept. 25) from Davenport to the same paper, stated that the American Trust Co. of Davenport on that day had been named as trustee for the creditors of the failed firm by Walter A. Newport, Referee in bankruptcy and had posted a bond of \$340,000. Continuing the dispatch said:

Meanwhile accountants were at work on the books of the bankrupt rm. Accounts were being balanced and Attorney Francis Harrison, who filed the petition in bankruptcy, announced that a meeting of creditors would be called as soon as the affairs of the company were investigated to the extent that an intelligent report could be made.

#### Yearly Figures of New York Clearing House-July 3 Transactions Largest on Record-William Woodward Re-elected President.

New high records of clearing transactions are revealed in the annual report of the New York Clearing House Association presented at the annual meeting on Oct. 2. The total transactions for the year ending Sept. 30 1928 reached \$407,920,343,622, as compared with \$341,828,210,316 the previous year and \$325,640,437,707 for the year ending

death.

\$2,413,126,043.15 213,449,950.02

\$2,626,575,993.17 \$2,413,126,043.15 244,022,297.37

Sept. 26 1926. Of the total transactions during the year just closed the exchanges totaled \$368,917,656,546, while the balances aggregated \$39,002,687,075. The largest day's transactions on record were those for July 3 1928, when they reached \$2,626,575,993. The following are the details for the year ending Sept. 30 1928 as presented in the General Manager's report:

The Clearing House transactions for the year have been as follows:

Exchanges	\$368,917,656,546.92 39,002,687,075.33
Total transactions	\$407,920,343,622.25
The average daily transactions: Exchanges Baiances	\$1,217,550,021.60 128,721,739.52
Total	\$1,346,271,761.12 years):

Total. \$6,118.503,889.752.98

\$2,872,670,826.23 36,040,072,658.87 33,167,401,832.64 collection department also make exchanges at the Clearing House, making 30 institutions clearing direct.

There are 3 banks and trust companies in the city and vicinity, not members of the Association, that make their exchanges through banks that are members, In accordance with constitutional provisions.

William Woodward, President of the Hanover National Bank, was re-elected President of the Association at the annual meeting on Oct. 2. G. Edwin Gregory, Vice-President and Comptroller of the National City Bank, has been reelected Secretary of the Association. The following also continue in their respective posts: Manager, Clarence E. Bacon, and Assistant Manager, Edward L. Beck. Jackson E. Reynolds, President of the First National Bank, has become Chairman of the Clearing House Committee; the other members of that committee are: Arthur W. Loasby, President Equitable Trust Co.; Chellis A. Austin, President Seaboard National Bank; William C. Potter, President Guaranty Trust Co., and Charles E. Mitchell, President National City Bank.

#### Governor Strong of New York Federal Reserve Bank In Hospital.

Governor Benjamin Strong of the New York Federal Reserve Bank who has been in ill health for some time was taken to the New York Hospital on Thursday evening, Oct. 4 for observation and treatment because of intestinal disturbances. Since 1916 Governor Strong has suffered ill health which has occasioned his absence from the Bank from time to time.

#### Federal Reserve Bank of New York on Gold Movement.

Discussing the gold movement, the Federal Reserve Bank of New York in its Monthly Review Oct. 1 says:

In September the net results of exports, imports, and earmarkings show a small loss of gold to this country, amounting, according to a preliminary calculation, to \$1,500,000. The only important movement resulting directly from the position of the exchanges was the importation of \$2,434,-000 of gold from England on the 21st. A shipment of \$2,000,000 was made to Italy towards the end of the month. There were other minor imports Chiefly from Latin America and exports to Mexico, and to the British and Dutch colonies in the Far East. The amount of gold held here under earmark showed a net increase of \$1,200,000.

Elsewhere, interest in gold movements centered chiefly upon London and Berlin. Germany is reported to have taken approximately \$20,000,000

in gold from London and to have received gold from Russia and Denmark. Thus, in the four weeks ended Sept. 22, the Reichsbank has been able to ncrease its gold holdings by roughly \$22.500,000.

### Death of Clarence W. Barron of "Wall Street Journal."

To the many expressions of regret from Government officials, business leaders, bankers and others, here and abroad, occasioned by the news of the death of Clarence W. Barron, President of Dow, Jones & Co., publishers of the "Wall Street Journal," we add our own expressions of the sense of loss to journalism suffered in the passing of this outstanding and able figure in the financial newspaper world. The death of Mr. Barron occurred at the Battle Creek Sanitarium, Battle Creek, Mich., on Oct. 2. Funeral services were held at Boston yesterday, Oct. 5. In addition to the "Wall Street Journal," Mr. Barron's interests also included the Boston "News Bureau" and the Philadelphia "News Bureau." He was also President of the advertising concern

of Doremus & Co. Kenneth C. Hogate, Vice-President of Dow, Jones & Co., writing a tribute to Mr. Barron's memory in the "Wall Street Journal" of Oct. 3, gave the following account of his last hours:

The end of a life seidom equalled in activity and vigor came peacefully. Near midnight Sunday Mr. Barron was dictating. Soon thereafter he went to sleep. Late in the morning efforts were made to arouse him.

But he had fallen into a coma to emerge only momentarily before death.

In periods of consciousness he invariably inquired of his Secretary:

"What is the news? Are there any important messages?

Mr. Barron's illness began more than a month ago. 18 hours of every day, conqueror of previous crises in which his life had been despaired, he carried on.

Sept. 9 he went to Battle Creek suffering from catarrhal jaundice. At no time since could full hope be held for his recovery. Last week there was apparent improvement. But he was not so well Sunday, and for 24 hours the end has been inevitable. Pneumonia developed shortly before

A summary of Mr. Barron's career is taken as follows from the Oct. 3 issue of the "Wall Street Journal"

Clarence Walker Barron was born July 2 1855 in a vineclad stone house on Cross Street in the north end of Boston. In his early years the family which was ancestrally related to Governor Carver of the Plymouth Colony, moved to Charlestown, close to the Bunker Hill monument. After grammar schooling in Charlestown, Mr. Barron was graduated from the English High School in Boston in 1873

In high school he specialized in chemistry, physics and mathematics, in which he took advanced courses. He took the first Lawrence prizes for essays in both 1872 and 1873 as Franklin Medal scholar, his subjects being "Transcontinental Railways" and "Civil Service Reform." While at school he mastered shorthand without a teacher during vacation hours, and his first business experience was as a stenographic reporter associated with J. M. W. Yerrington, the veteran Boston court reporter.

Turning to newspaper work, he spent a few weeks with the Boston "Daily News" of that time, writing on business and economics, before he wa twenty. His first news triumph, in his first week, was in that line, in covering a seemingly unimportant meeting of the Social Science Association. Wendell Phillips engaged in debate William Lloyd Garrison, Gamaliel Bradford and Edward Atkinson on economic problems following the panic of 1873. The other papers thought it too deep and dry. Barron, using his stenographic experience, wrote a story entitled "Wendell Phillips on Finance," which called for extra editions, suddenly popularized financial

Finance, which cannot not extra cultions, studies and packed the next Association meeting.

For 11 years from 1875 Mr. Barron was financial reporter and editor on the Boston "Transcript," his articles on Atchison, Burlington and other Western roads attracting great attention. In July 1887, when about 31, Mr. Barron decided there was need of a financial service that would publish financial news during the day in bulletin form, then gathering its substance into a financial newspaper. The "Boston News Bureau," "financial Bible of New England," was the result.

Mr. Barron arranged for news interchange with Dow, Jones & Co., then publishing financial bulletins and the "Wall Street Journal" in New York, and established wire service between the two cities. In 1896 he founded the "Philadelphia News Bureau."

In 1901 Mr. Barron acquired control of Dow, Jones & Co. and the "Wall Street Journal," operating page news printing tickers and the leading financial journal in America. In 1921 he founded "Barron's" the national Financial weekly. Mr. Barron has also headed the advertising agency activities of Doremus & Co. in New York and other cities.

Besides his widespread newspaper interests, involving incessant travel and intensely personal activities—such as keeping 18 telephones at command in his Boston home—Mr. Barron was the author of several authoritative books on finance and economics and the world political conditions as affecting them, during and since the World War. The list includes: "War Finance, as Viewed from the Roof of the World in Switzerland"; "The Mexican ance, as Viewed from the Roof of the World in Switzerland." "The Mexican Problem," first clearly setting forth the oil wealth of Mexico; "The Audacious War," as result of European research at outbreak of the war; "Twenty-Eight Essays on the Federal Reserve Act," of much influence when that Act was being framed; and "A World Remaking, or Peace Finance," discussing after-war finance and economics

Mr. Barron always delighted to call himself first a farmer, as owner of 25 farms and pieces of farms in Cohasset and Hingham. He was a leader in New England in production of certified milk for babies and one of the foremost United States breeders of registered Guernsey stock. active in the councils of the Swedenborgian denomination, particularly in the matter of its publications. As a public speaker Mr. Barron was in keen demand, but able to accept only about one out of forty invitations. favorite recreations were yachting and fishing.

#### Freight Car Requirements for Fourth Quarter of Year-Over Nine Million Cars Needed-Increase of 4.9% Over Last Year.

Shippers of the country, through estimates of the Shippers' Regional Advisory Boards, anticipate that carload shipments of the 29 principal commodities in the fourth quarter of this year (the months of October, November and December) will be approximately 9,279,472 cars, an increase of 431,599 cars above the corresponding period of 1927, or 4.9%, the Car Service Division of the American Railway Association announced on Oct. 2. The Shippers' Regional Advisory Boards, covering the entire United States, furnish these estimates periodically to the Car Service Division in order that the railways may have a guide as to the service they are to be called upon to perform in a given quarter. The Association's announcement says:

These estimates are based on the best information obtainable at the preent time by the commodity committees of various boards as to the outlook, so far as transportation requirements are concerned.

Of the 13 Shippers' Regional Advisory boards, 11 anticipate an increase in their respective districts in transportation requirements for the fourth quarter of the year compared with the same period last year, while the other two expect a decrease. The 11 boards which estimated an increase over the preceding year were the Atlantic States, Allegheny, Great Lakes, Northwestern, Pacific Coast, Southeastern, Southwestern, Middle Western, Trans-Missouri-Kansas, New England and the Pacific Northwest boards.

Those estimating a decrease were the Central Western and the Ohio Valley boards.

The estimate by each Shippers' Regional Advisory Board as to what freight loadings by cars are anticipated for the 29 principal commodities in the fourth quarter this year compared with the corresponding period in 1927 and the percentage of increase or decrease follows:

		Per Cent of
Board- 1927.	1928.	Inc. or Dec.
New England 165,511	170,330	2.9 increase
Atlantic States 997,485	1,057,793	6.0 increase
Ohio Valley1,228,685	1,116,819	9.1 decrease
Northwest 480,265	495,569	3.2 increase
Central Western 366,837	358,054	2.4 decrease
Pacific Coast 360,228	366,656	1.8 increase
Pacific Northwest 292,156	299,602	2.5 increase
Allegheny1,034,500	1,195,858	15.6 increase
Great Lakes 547,817	605.418	10.5 increase
Southeast1,006,201	1,046,847	4.0 increase
Mid-West1,278,383	1,366,449	6.9 increase
Trans-Missouri-Kansas 456,964	490.422	7.3 increase
Southwest 632,841	709,655	12.1 increase

The large comparative increases in freight car requirements over last year in the Allegheny, Great Lakes and Southwestern regions are due to a number of factors. In the Great Lakes region, for instance, it is due to the anticipated heavier movement of ore and concentrates, automobiles, trucks and parts, and also potatoes. In the Allegheny region it is due in part to the anticipated heavier movement of lime, plaster and cement, chemicals and explosives, paper, printed matter and books, and also to coal, although in considering the latter item consideration must be given to the fact but little coal was shipped from the Allegheny district during the corresponding period in 1927, owing to the suspension of activities at many bituminous mines. In the Southwestern region the anticipated requirements for freight cars are expected to be stimulated by the heavier movement of grain, cotton, lumber and a number of other commodities.

In submitting reports to the Car Service Division, each board estimated

In submitting reports to the Car Service Division, each board estimated what freight car requirements will be for the principal industries found in the territory covered by that board. On the basis of this information, it is estimated that of the 29 commodities, increases in transportation facilities will be required for 23, as follows: All grain; flour, meal and other mill products; hay, straw and alfalfa; cotton, cotton seed and products, except oil; citrus fruits; other fresh fruits; other fresh vegetables; coal and coke; ore and concentrates; clay, gravel, sand and stone (including gypsum, crude and powdered): salt; lumber and forest products; petroleum and petroleum products; iron and steel; castings, machinery and boilers; cement; lime and plaster; agricultural implements and vehicles other than automobiles: automobiles, trucks and parts; fertilizers; paper, printed matter and books, and chemicals and explosives.

For canned goods, which includes all canned food products, catsup, jams, jellies, olives, pickles and preserves, freight car requirements are expected to be about the same as for the fourth quarter in 1927.

Commodities for which a decrease is estimated are: Potatoes; live stock: poultry and dairy products; sugar, syrup, glucose and molasses, and brick and clay products.

The estimate as to what transportation requirements will be for various commodities for the fourth quarter, compared with the same period last year, follows:

Commodity-	Actual, 1927.	Estimated, 1928.	Est. Per Cent Inc. (+) or Dec. (-).
	468.325		+8.6
Grain, all			,
Flour, meal and other mill products	249,852	,	+6.7

olives, pickles, preserves, &c.)	51,448	51,465	
Total all commodities listed	8,847,873	9,279,472	+4.9

#### President Coolidge Appoints Emergency Board Under Railway Labor Act to Investigate Wage Dispute on Western Roads.

Under a proclamation issued by him under date of Sept. 29 President Coolidge has named an emergency board, in accordance with the provisions of the Railway Labor Act, to investigate and report to him within 30 days regarding the wage dispute between Western railroads and the trainmen and conductors' unions. The members of the Emergency Board, as announced at the White House on Sept. 29 are: James R. Garfield of Cleveland, Ohio, Secretary of the Interior in the Roosevelt administration; Walter P. Stacy of Raleigh, N. C., Chief Justice of the Supreme Court of North Carolina; Prof. Davis R. Dewey of the Massachusetts Institute of Technology, Cambridge, Mass.; Chester H. Rowell of Berkeley, Calif., and George T. Baker of Davenport, Iowa. Mr. Rowell was formerly a member of the Cali-

fornia Railroad Commission. Mr. Baker is connected with educational work in Iowa. Associated Press accounts from Washington on Sept. 29 said:

The dispute affects about 70,000 conductors and trainmen and 47 railroads and their subsidiaries. The dispute has been in existence for several months and defles attempts of the Federal Board of Mediation to find a solution.

The United States Board of Mediation announced that the newly created emergency board would convene in Chicago, Oct. 2 to begin its investigation. Under the Railway Labor act the board has 30 days from the date of its creation within which to conplete its investigation and to report to the President. The law further provides that during this period and for 30 days thereafter "no change, except by agreement, shall be made by the parties to the controversy in the conditions out of which the dispute arose."

An item regarding the failure of the efforts of the Federal Board of Mediation to effect an adjustment of the dispute appeared in our issue of Sept. 29, page 1756.

### ITEMS ABOUT BANKS, TRUST COMPANIES, ETC.

Two New York Stock Exchange memberships were posted for transfer this week at the new high record price of \$425,000 each—that of Townsend Lawrence to John C. Newsome and that of George W. Hodges to Edward J. Rice. This is an increase of \$10,000 over the last preceding transaction.

A sale of a Detroit Stock Exchange membership was reported this week for \$26,500, a new high record price. A membership was sold in March for \$7,500, another early in May for \$10,500 and three later in the same month for \$15,000 each.

Congressman William W. Cohen was the principal guest and speaker at the regular monthly meeting of the Chamber of Commerce of the State of New York on Oct. 5. Prior to the regular meeting, a special meeting of the Chamber was held to elect a Commissioner of Pilots. Leonor F. Loree, President of the Chamber, presided.

The Chemical National Bank has moved its Main Office to 165 Broadway, corner of Cortlandt Street, where it opened for business on Monday, October 1st. It occupies a handsome new building especially constructed for its use, which has been made a part of the well known Beneson Building. The banking space extends through from Broadway to Church Street with an entrance on each, occupying a total of 56,000 square feet. The main banking floor contains a space of 17,000 square feet. The Chemical's new home represents the very latest in decoration and equipment. The lobby and platform space is especially unique and beautiful, being finished in natural colored teakwood trimmed with Botticino marble, giving the bank a light and inviting appearance. The building is constructed in such a way that all departments of the bank are easily accessible to customers, including Trust, Foreign, Securities, Compound Interest, and Safe Deposit Vaults.

This is the second move made by the Chemical Bank since it was founded 104 year ago at 216 Broadway opposite St. Paul's Church where it was the first bank to locate on Broadway at a time when it was felt that no bank should go north of Wall Street. In 1850 the Chemical moved to 270 Broadway where it has remained until today. The removal of the Main Office to the financial district is a part of a general program of development and expansion inaugurated by this institution several years ago. Within the past three years seven branches have been opened. The Brooklyn Office was opened last year. Recently a securities company was organized, which is already in operation. Started strictly as a commercial bank, The Chemical has expanded its activities during recent years to include every phase of banking from securities to compound interest accounts. Its Trust and Foreign Departments have had very rapid growth. The Chemical's Capital today is \$6,000,000; Surplus and Undivided Profits more than \$20,000,000.; Total Resources \$225,000,000. The The Chemical National Co. Inc. has a capital and surplus of \$4,000,000, making the capital funds of the two institutions more than \$30,000,000.

Nathan S. Jonas, President of Manufacturers Trust Company, announces the association of William E. Ford with that company in the capacity of Assistant Secretary. Mr. Ford was formerly Assistant Vice-President of the Guardian Trust Company of Newark, and prior to that position spent thirteen years with the Liberty National Bank of New York and its successor, the New York Trust Company, in various capacities, including Managership of the Credit Department.

Chatham Phenix National Bank and Trust Co. of New York established a branch outside Manhattan, with the opening of offices at Long Island City on Monday, October 1. It is the fifteenth location of the Chatham Phenix and the first office of a National Bank to be established within the boundaries that defined Long Island City prior to its merger into Greater New York. The branch is housed in the newly finished Chatham Phenix Building on Queens Plaza. Commenting on the reasons for the development of the bank's policy regarding the location of its branch offices, Henry R. Johnston, Vice-President of the Chatham Phenix, said:

"The population of Queens has risen from less than a half million in 1920 to virtually a million to-day. The volume of its manufactures would place it among the first fifteen cities of the country. In a dozen years since 1915, sales of tickets at Queensboro subway stations have grown from less than six millions to more than one hundred and seven millions. The value of building construction begun last year in Queens is said to exceed that in any American city with the single exception of Chicago. The growth of Greater New York beyond the Queensboro Bridge has been extraordinary and consistent and the Chatham Phenix is simply following that growth."

John A. Olsen, Vice-President, will be in charge of the branch.

Some 2,600 clerks and junior executives of local banking institutions, registered for the educational courses of the New York Chapter, Inc., American Institute of Banking, a division of the A. B. A., were in attendance at the start of the school sessions on Oct. 1. The New York Chapter, Inc., has an enrollment comparing favorably with that of many of America's leading colleges and universities. Registration last week, exceeding 2,600, marked an increase of 16% as compared with last year and set a new peak in the history of the Chapter. A total of fifty-three courses will be given this year by the Chapter, the faculty consisting of 76 members. All classes and lectures will be held at the Chapter rooms in the Graybar Building where sufficient space is occupied to house all of its activities.

On Thursday, Sept. 13 a dinner and meeting of the board of consuls in the Building Trades Club formally opened the twenty-eighth year of activity for New York Chapter, Inc., American Institute of Banking, the educational section of the American Bankers Association. The Institute, which has a membership of approximately 6,000 of the younger bank men of the city most of whom are also numbered among its students, affords instruction by Columbia professors and practical bank men and this year has arranged courses in business, economics, domestic foreign banking as well as foreign and domestic trade. These are divided into nine preparatory, twenty-eight standard and sixteen special courses and range from fundamentals to specializations. Located in its quarters in the Graybar Building, New York Chapter lists among its new courses to be given this year in co-operation with Columbia University, a new three-year standard course in International Banking. In addition, there will be new courses in foreign banking systems, public security analysis bank auditing, bank administration seminar, current economic and financial problems, advanced public speaking and real estate

Capital and surplus of the new Lefcourt Normandie National Bank, recently chartered by the Comptroller of the Currency at Washington to provide a new national bank for the mid-town section of Manhattan, will be \$3,000,000; \$2,000,000 capital and \$1,000,000 surplus, according to A. E. Lefcourt to whom the charter was granted. Plans for the organization of the new institution are nearing completion and an announcement will be made shortly of the officers and directors of the bank, Mr. Lefcourt stated. Contracts have been issued for the construction of the new banking quarters in the 26-story Lefcourt Normandie Building, now being erected at the southeast corner of Broadway and 38th St. These quarters will be in the form of a concourse occupying the first two floors of the building.

Mr. Lefcourt pointed out that the stock of the new bank will be chiefly in the hands of the officers, directors, advisory board and depositors. It is expected that the bank will be ready to open early in January. Mr. Lefcourt announces that the bank will apply for membership in the New York Clearing House Association. Among the trades that will be represented on the Board will be women's garment manufacturers industry, jewelry, theatrical, children's and infants wear, millinery, retail dry goods, real estate, men's wearing apparel, haberdashery, building supplies, department stores

and chain stores. Mr. Lefcourt is President of the A. E. Lefcourt Realty Holdings and a director of several banks. The organization of the new bank was referred to in these columns Aug. 18, page 910.

The capital account of the Guaranty Trust Co. of New York, including surplus and undivided profits, exceeds \$100,000,000 for the first time in the statement of the company's condition as of Sept. 28 1928, issued Oct. 3. Undivided profits of \$10,479,367, representing a gain of \$1,247,623 in the last quarter, bring the total of the company's capital, surplus and undivided profits to \$100,479,367. Deposits of \$657,643,277 show an increase of \$21,297,799 over the corresponding statement a year ago. The company's total resources are \$838,129,668, as compared with \$765,-128,460 on Sept. 30 1927.

To provide a forum in the financial district for the discussion of current financial problems and policies, Dean A. Wellington Taylor, of the Graduate School of Business Administration of New York University, announced this week that a number of conferences on current banking and investment problems has been arranged to take place each Thursday evening in the Governors' Room of the New York Stock Exchange. Men prominent in the banking and investment field are scheduled to attend the conferences and participate in the discussions which will be lead by outstanding experts in each field. The current policy of the Federal Reserve system will be analyzed by W. Randolph Burgess, Assistant Federal Reserve Agent at the Federal Reserve Bank of New York. The outlook for American investment of capital abroad will be taken up by Raleigh S. Rife, economist of the Guaranty Company. The trend in banking legislation at the present time will be the subject of a conference to be held October 18 by Dr. H. Parker Willis, first secretary of the Federal Reserve Board and Professor of Banking at Columbia University. Because of his part in the evolution of the Federal Reserve Act, Dr. Willis' views are looked forward to with interest.

George P. Auld, former Accountant-General of the Reparations Commission, will address the conference on the transfer problem, including the related subject of the interallied debts and a possible settlement of this vexing problem through an international financial arrangement. Other experts on foreign investments who will discuss international problems are Dr. Harry Friedman, member of the firm of Speyer & Company; Dr. Max Winkler of Bertron, Griscom & Company; Dr. Marcus Nadler of the Institute of International Finance; Dr. Ludwig Bendix, international banker, and Major Robert Warren of Case, Pomeroy & Company. A session will also be devoted to investment trust problems and policies, under the lead of Dr. William H. Steiner.

At a meeting of the directors of Stone & Webster and Blodget, Inc., on Oct. 3, at 120 Broadway, Cyrus Y. Ferris was added to the board and F. Kenneth Stephenson was elected a Vice-President.

Norman C. Stenning, President of the Anglo-South American Trust Co., 49 Broadway, is in receipt of cable advices from London to the effect that the Anglo-South American Bank, Ltd., of which the Anglo-South American Trust Co. is the New York representative, has declared an interim dividend at the rate of 5 shillings per share, less tax, payable on Oct. 22. This is equivalent to 10% per annum. The annual meeting will be held on Oct. 16.

The closing by the State Superintendent of Banks, Frank H. Warder, of the private bank of L. Scotto & Sons at 238 Columbia St., Brooklyn, was announced on Sept. 29 in the following notice posted on the doors of the bank:

State of New York, Banking Department: Pursuant to the provisions of Section 57 of the Banking laws of the State of New York, I have this day taken possession of Raphael Scotto, private bankers, doing business as L. Scotto & Sons, 238 Columbia Street.

FRANK H. WARDER, Superintendent of Banks.

The New York "Times" of Sunday, Sept. 30, in its report of the matter, after stating that several hundred persons gathered about the entrance to the bank following the posting of the notice, went on to say in part:

The bank, it was said, closed early Friday afternoon, following a visit of employees of the State Banking Department. The crowds continued to gather and grow larger yesterday morning until the arrival of a police detail from Hamilton Avenue Station in charge of Captain Charles Gallagher. Then they split into smaller groups and took up positions near by, where they secretly showed their friends their bankbooks. Most of the 600 or so denositors had carried small accounts.

depositors had carried small accounts.

Shortly after noon, several banking officials entered the bank and in a few minutes returned to the street carrying large satchels containing all

the cash held in the bank. The officials boarded an automobile guarded n and were taken to the Brooklyn Trust Co. on Montague St., where the money was deposited.

The bank, which was founded in 1899, is reported to have reover \$600,000, although it was said that its capital amounted to only \$25,000. According to a statement filed in November 1926, the bank's deposits were more than \$500,000.

A later issue of the "Times" (Oct. 2) stated that two petitions in involuntary bankruptcy were filed on Oct. 1 in the Federal Court in Brooklyn against Raphael Scotto, doing business as L. Scotto & Sons, closed on Sept. 29 because of alleged irregularities. The pet tions fixed the liabilities at \$850,000 and assets, in cash deposits, securities and other property, at \$500,000. Judge Moscowitz, it was said, appointed Sidney F. Strongin and Nathan L. Goldstein, recevers under a joint bond of \$100,000, with instructions to contnue the business to the extent of carrying out existent commitments and contracts, but to accept no new deposits or otherwise conduct a general banking business. The order also directed Superintendent of Banks Warder and his deputies, it was said, to turn the bank over to the receivers and barred all litigation against it except in the banktuptcy

Herman L. Weisman, receiver for the failed James V. Lago Bank at 154 West 14th St., this city, which was closed on July 3 after the discovery of a shortage of more than { 20 ),000, announced on Oct. 2 that a 40% dividend, amounting to approximately \$320,000, was ready for distribution to more than 2,000 of the 3,000 depositors of the institution, according to the New York "Times" of Oct. 3 Notices would be sent shortly, it was said, to the depositors by Peter B. Olney, Jr., referee in bankruptcy, and checks coud be distributed from the new office of the James V. Lago Estate, 15 Park Row. The "Times" furthermore stated that onefifth of the depositors, many of which are Spanish sailors, shepherds and farm hands, have not filed proofs of claims, which the law requires them to do within six months of the bankruptey. The closing of the James V. Lago Bank was noted in the "Chronicle" of July 7, page 59, and its affairs referred to in our issue of July 21, page 362.

John P. Carlson and John E. Larney were elected directors of the Traders National Bank of Brooklyn on Sept. 20. Mr. Carlson is President of John P. Carlson, Inc., manufacturers of printers' and lithographers' ink. Mr. Larney is a coal merchant.

Resources of the Manufacturers Trust Co. as of Oct. 1 were \$355,915,825, as compared with resources of \$288,-897,037 on the same date last year, according to the quarterly statement of the company issued this week. In the resource account is included cash on hand and in the Federal Reserve and other banks, \$40,493,639, as compared with \$42,415,171 a year ago; United States Government and other public securities, \$44,275,981, as compared with \$44,616,605 a year ago, and loans of \$208,282,554, as against loans of \$142,741,999 on Oct. 1 1927. In the liability column the company lists capital of \$17,500,000 as compared with \$15,250,000 on Oct. 1 last year. Surplus and undivided profits are listed at \$33,393,506, which compares with \$28,072,376 a year ago. Deposits are given as \$275,821,005 as against \$234,398,559 on Oct. 1 last year, or an increase of \$41,422,446 for the 12-months period.

The consolidation of the two Rochester (N. Y.) banks, namely the Union Trust Co. of Rochester, and the National Bank of Rochester, indicated in our issue of Aug. 4 last, page 636, became effective on Sept. 29 under the title of the former. The enlarged bank is capitalized at \$4,000,000 with surplus of \$4,500,000 and has total resources of \$70,-

On Oct. 1 the Industrial Trust Co. of Providence, R. I., opened for business in its new building. The institution, which has resources of more than \$100,000,000, has five offices in Providence and branches in East Providence, Woonsocket, Pascoag, Pawtucket, Bristol, Warren, Newport, Westerly and Wickford. It is a member of the Federal Reserve System.

The Boston "Transcript" of Sept. 26 reported the election of Frank B. Bemis as a director of the American Trust Co. of that city. Mr. Bemis is a trustee of a number of estates and a director of several utility companies.

W. J. Fowler has resigned his position as Deputy Commissioner of Banks for Massachusetts to join the staff of the First Natonal Bank of Boston. Shortly after the war,

in which he served as Chief Yeoman in the United States Naval Reserve Forces, Mr. Fowler was appointed an Assistant Bank Examiner by the Massachusetts Bank Commissioner. He worked his way up in the Commissioner's office through Director of Division of Trust Companies to Deputy Commissioner, which position he has held for the past three years. Mr. Fowler will take up his new duties with the First National Bank of Boston on Oct. 15.

Directors of the Merchants' National Bank of Boston on Sept. 27 voted to increase the surplus from \$2,000,000 to \$3,000,000 by transferring \$1,000,000 from undivided profits account, according to the Boston "Transcript" of that day.

A charter was issued by the Comptroller of the Currency on Sept. 19 for the newly organized Needham (Mass.) Bank, reference to which was made in these columns on Aug. 11. The new institution, which will be known as the Needham National Bank for Savings and Trusts, is capitalized at \$150,000 and will have a surplus, it is understood, of \$75,000. According to the Boston "Herald" of Sept. 26, the bank was to open for business on Oct. 1 in temporary quarters on Chestnut Street, Needham. Its stock was oversubscribed, mostly by Needham people, the paper mentioned said, and its directors are all Needham men. Work will start shortly, it is said, on a modern bank building to be erected in the heart of the business section of the town, at the corner of Great Plain and Highland avenues. The officers are: Horace A. (Carter, President; James M. McCracken, Vice-President Ralph E. Bailey, Secretary, and Robert M. Tappan, Treas-

The respective stockholders of the Corn Exchange National Bank & Trust Co. of Philadelphia and the Oxford Bank & Trust Co. of that city on Oct. 2 unanimously approved the proposal to consolidate the institutions under the title of the latter (indicated in the "Chronicle" of Aug. 25 last, page 1060), and when approved by the Comptroller of the Currency the main office and branches of the Oxford Bank will continue under the present officers and employees as the Oxford, Wissinoming, Burholme, Bridesburg and Orthodox Street branches of the enlarged Corn Exchange National Bank & Trust Co. As stated in our previous item, the consolidated bank will have resources of approximately \$95,000,000. Charles S. Caldwell will continue as head of the new bank and B. E. Effing, President of the Oxford Bank & Trust Co., will become a Vice-President.

Frank R. Rohrman on Oct. 4 was elected a member of the Board of the Northern Trust Co. of Philadelphia, according to the Philadelphia "Record" of Oct. 5.

Parker S. Williams, counsel for the Federal Reserve Bank of Philadelphia, on Oct. 4 was elected President of the Provident Trust Co. of that city to succeed J. Barton Townsend, whose death occurred recently, according to the Philadelphia "Record" of Oct. 5. Mr. Williams, who has been a director of the Provident Trust Co. since 1915, is a member of the law firm of Williams & Sinkler, and is a director of the following institutions and corporations: Commonwealth Title Insurance Co., the Provident Mutual Life Insurance Co., Philadelphia Savings Fund Society, Merion Title & Trust Co. of Ardmore, Lumbermen's Insurance Co., Philadelphia National Insurance Co., Western New York & Pennsylvania Ry. Co. and the Mine Hill & Schuylkill Haven RR.

Application has been made to the Governor of Pennsylvania for a charter for a new Philadelphia Bank, to be known as the Plaza Trust Co. The new bank will be located in the business centre of Philadelphia and will start with a capital of \$4,000,000 and a surplus of \$1,000,000. The stock, the par value of which is \$100, is being offered at the price of \$125 a share, of which \$100 will be devoted to capital and \$25 to surplus account. On the temporary board of directors are John E. McCully, Walter Silverwood, Joseph A. Brady, Thomas K. Over Jr., Herbert P. Robinson, John B. Obert, William K. Barclay Jr., Roy A. Heymann, Arthur Peck, Lowrie Montgomery, Louis W. Robey, John M Hendricks, N. Paul Kenworthy, J. Lee Patton, Russell H. Thompson and John F. L. Morris.

The Broad Street Trust Co. of Philadelphia on Oct. 1 formally opened its new bank building at the Northeast corner of Broad and Stiles Sts., that city. The new home was necessitated by the growth and expansion of the company, which is capitalized at \$1,000,000 with surplus and undivided profits of \$602,000 and deposits in excess of \$3,000,000. It maintains a branch office (Central Branch Bank) at the Northeast corner of 12th and Arch Streets. Its officers are: Joseph W. Salus, President; Hubert J. Horan, Jr., Vice-President; H. J. McCaully, Secretary and Treasurer, Louis E. Mill and Allen C. Mueller, Asst. Secretaries and Treasurers, and Francis K. Hammon, Title Officer.

That sale of a block of stock in the Belmont Trust Co. of Philadelphia, constituting virtual control of the institution, had been consummated, was announced on Sept. 27, according to the Philadelphia "Ledger" of Sept. 28, which went on to say:

The identity of the purchasers could not be learned, but it is known that they are friendly to the present management. No change in the executive personnel or policy of the company is contemplated, it was said. The sale of the stock was arranged through Barclay, Moore & Co., O. W. Osterlund, President of the company, could not be reached to discuss the announcement.

Resources of the company as of June 30 1928, exceeded \$4,600,000. addition to Mr. Osterlund, the officers are: Thomas F. Slattery, V.-Pres.; William Dignan, Treasurer and Secretary; Rodney L. Jack, John E. Hagerty and Lewis R. Kelffer, Asst. Treas. & Asst. Sec., and Robert D. Fulmer, Title and Trust Officer. The company maintains offices at 4826 Baltimore Ave. and at 1407 So. 49th St.

An application to organize a new national bank in Souderton, Pa. under the title of the Peoples National Bank, and capitalized at \$100,000, was approved by the Comptroller of the Currency on Sept. 20.

Townsend Scott, senior member of the banking and investment firm of Townsend Scott & Co. and for nearly fifty years prominent in financial circles in Baltimore, died on Oct. 5. Mr. Scott, who was 71 years of age, retired from active business several years ago, but remained head of the firm which was founded in 1832 by his grandfather, Townsend Scott. He is said to have held the only seat on the Baltimore Stock Exchange which has not gone of out one firm or one family since the founding of the Exchange. During his active years in business Mr. Scott assisted in founding and building up several firms and corporations, among them being the old Consolidated Gas & Electric Co. of Baltimore, the United States Fidelity & Guaranty Co. and the Seaboard Air Line RR. Mr. Scott served as a director of these corporations and was the first Treasurer of the Fidelity & Guaranty Co. He was a director of the National Bank of Baltimore for nearly forty years.

On Oct. 1 the City Deposit Bank of Pittsburgh, Pa. opened a trust department and on the same date changed its name to the City Deposit Bank & Trust Co., according to the Pittsburgh "Post-Gazette" of Sept. 27. The officers of the institution are: James R. Mellon, President; James A. Johnston and H. W. Ludebuehl, Vice-Presidents; Robert O. Fulton, Cashier; G. P. Richards, William Warren Johnston, W. E. Richards Jr., Harry D. Johnson and T. Dale Shotts, Asst. Cashiers, and Albert L. Hunter, Trust Officer. In its issue of Sept. 22, the Philadelphia "Ledger" printed the following in regard to this bank:

A 100% stock dividend will be paid to stockholders of the City Deposit Bank of Pittsburgh, Pa. Approval of the plan to increase the capital stock from \$500,000 to \$1,000,000 has been given.

The proposal to merge the United Banking & Trust Co. of Cleveland and the Lake Erie Trust Co. of that city under the title of the former (indicated in our issue of Sept. 15, page 1480) was ratified by the stockholders of the respective institutions on Sept. 28, the consolidation becoming effective at midnight Sept. 30, according to the Cleveland "Plain Dealer" of Sept. 29. Beginning Monday, Oct. 1, business at the three offices, West 25th St. and Lorain Ave., 1612 Euclid Ave., and 7019 Superior Ave., N.E., it was said, would be transacted under the name of the United Banking & Trust Co. The new bank has a capital of \$2,000,000, surplus and undivided profits of \$1,800,000, deposits of about \$30,000,000 and total resources of \$38,000,000. Arthur H. Seibig, who started as a messenger with the United Banking & Trust Co. thirty-seven years ago and who has been its President since 1919, continues as President of the enlarged bank, and Samuel L. McCune, President of the Ohio-Pennsylvania Joint Stock Land Bank, the New York Joint Stock Land Bank, and the Cleveland Securities Co., is Chairman of the Board. William H. Heil, who has been connected with the United Banking & Trust Co. since its establishment, is Vice-Chairman. Other officers of the new organization include J. Horace Jones, C. A. Wilkinson, Reno P. Ransom, (and Secretary) L. C. Kollie and Charles H. Hill, Vice-Presidents; Arthur W. Pleister, Treasurer; William E. Roe, D. A. Berardi and A. M. Rose, Asst. Secretaries; C. J. Steiger, Asst. Treasurer, and John Ross Cassidy, P. C.

Stetzelberger, Russell N. Chase and F. M. Mayer, Assistant Trust Officers.

On Sept. 29 the City National Bank of Dayton, Ohio, (capital \$500,000) and the City Trust & Savings Bank of Dayton (capital \$250,000), affiliated institutions, were consolidated under the title of the City National Bank & Trust Co. of Dayton with capital of \$750,000. The new bank has six branches, all located in the City of Dayton.

On Sept. 29 the City National Bank of Boonville, Ind., and the Farmers & Merchants National Bank of that place were consolidated under the title of the First National Bank of Boonville with capital stock of \$112,500.

The highest honor that the Knights of Pythias of Ohiocan confer—that of Grand Chancellor—was bestowed upon James Dunn, Jr., Vice-President of The Union Trust Company, Cleveland, at the installation ceremonies on Sept. 26, followed by a reception in his honor in the evening which brought to a close the convention of the Grand Lodge in Cleveland September 24th to 26th. More than 25,000 Pythians attended. Mr. Dunn as vice presdident in charge of the Union Trust Company's Income Tax Department has acquired a national reputation on tax matters. Before becoming associated with the bank, in 1917, he was for eight years in charge of the Income Tax Department of the United States Internal Revenue Office in Cleveland.

The State Bank of Chicago has adopted a novel plan to acquaint its depositors and Chicagoans with the smallersized currency which will be issued by the United States Government about July 1 1929. The Bank recently began to distribute certificates the exact size and shape of the new currency on which is printed detailed information concerning the proposed changes. Gaylord S. Morse, of the State-Bank of Chicago, says the bank has a large supply of these certificates on hand and would be glad to give them out to anyone interested.

The advices sent us in this regard go on to say:

The denominations will continue as at present and it is expected that many months, if not years, will be required to withdraw completely all the old money from circulation.

All bills of \$100 and under, except the \$1 notes, will have engravings of buildings on the reverse side. The \$1 bills, and the denominations higher than \$100, will have ornate backs.

Denominations of the bills will not be reduced, but will correspond to past issues. One, 2, 5, 10, 20, 50, 100, 500, 1000, 5000 and 10,000 bills of the new small dimensions will be distributed through the nation's banks in return for worn-out old currency. The exchange is not to be confined to replacement of ragged and torn bills, however, and it is expected that many practically new notes will be replaced in the interest of making the change complete within as short a time as is possible.

Information printed on the certificates issued by the State Bank of Chicago includes the names of men whose portraits will appear on the face of the new currency, as follows: \$1 bills, Washington; \$2 bills, Jefferson; \$5 bills, Lincoln; \$10 bills, Hamilton; \$20 bills, Jackson; \$50 bills, Grant; \$100 bills, Franklin; \$500 bills, McKinley; \$1000 bills, Cleveland; \$5000 bills, Madison, and \$10,000 bills, Chase.

The change is being made in the interest of economy and ultimate greater convenience in the handling of paper money.

The dollar bills, which will constitute 53% of the total of almost a billion notes of various denominations to be issued, have already been printed.

Printing of the \$2 bills will be started soon.

"Manufacturers of pocket books," said Mr. Merse, "are looking forward to a boom in business since the new notes are only 6 5-16 by 2 11-16 inches and will require a different form of bill fold or pocket-book to carry

That the Peoples Trust & Savings Bank of Chicago will give its stockholders valuable rights under a plan for increasing the capital of the institution from \$1,000,000 to \$2,500,-000, was reported in the "Chicago Journal of Commerce" of October 3. The directors voted on October 2 to recommend the increase in capital to the stockholders, the 15,000 shares (par value \$100 a share) of additional stock to be offered to the stockholders at \$200 a share in the proportion of 1½ shares of new stock for each share of old stock owned. A special meeting of the stockholders will be held on Nov. 15 to vote on the proposed increase, it was stated. Continuing the paper mentioned said:

Part of the proceeds will go to increase capital of the Peoples Securities Co., the investment subsidiary of the bank. When the increase is approved the bank will have capital of \$2,500,000, surplus of \$1,000,000 and undivided profits and reserve in excess of \$1,000,000.

According to Earle H. Reynolds, president, the action is being taken as this time to meet the rapidly expanding business of the bank.

We learn from the Chicago "Post" of Sept. 19 that a new bank-the Unity Trust & Savings Bank-was formally opened at 3909 West North Avenue, that city, on Sept. 8. The new bank is one of the strictly locally owned neighborhood banks of Chicago, H. M. Ellinwood, President of the Cragin State Bank of Chicago, heads the new institution. Mr. Ellinwood was reported as saying that a hundred of the stockholdersjo the Unity Trust & Savings Bank are community residents and that fifteen of the sixteen directors are local business and professional men. The bank is capitalized at \$200,000 and has combined surplus and reserve accounts of \$60,000. The "Post" furthermore stated that in the first week the bank was in operation 2,000 accounts were opened.

John A. Reynolds, Vice-President of the Union Trust Company of Detroit, in charge of the business extension department, was invited by The Friendly Conference of the general agents, managers and superintendents of the Philadelphia Association of Life Underwriters, to address a dinner meeting of some of Philadelphia's leading business and professional men, October 2. Mr. Reynolds' topic was 'Friendly Counsel from a Banker.' The invitation was in recognition of Mr. Reynolds' constructive work in the building of a business extension department for a trust company.

A press dispatch from Rock Island, Ill., on Sept. 27, printed in the St. Louis "Globe-Democrat" of Sept. 28, reported that the First National Bank of Aledo, Ill., an institution capitalized at \$50,000, was closed by order of its directors on that day (Sept. 27) because of depleted reserves. The closing followed a bank examination, the dispatch stated.

Effective Sept. 30, the Franklin National Bank of Newark, Ohio, and the Old Home Building Association Co. of that city, were consolidated under the title of the Union Trust Co., according to advices from Newark on that date to the Cleveland "Plain Dealer." The two institutions have combined resources of \$7,500,000 and the new bank will be capitalized at \$300,000. The officers are Emmet M. Baugher, Chairman of the Board; Warren T. Suter, President; C. C. McGruder, Senior Vice-President, and J. H. Franklin, Cashier. The Franklin National Bank was organized in 1845, while the Old Home Building Association Co. was founded in 1880. Reference to the proposed merger appeared in the "Chronicle" of June 9, page 3544.

D. Dwight Douglas, President of the First National Bank of Detroit, has announced the appointment of Garnet W. O'Neil, Comptroller, and Ivo S. Faurote, an Assistant Vice-President, to the official staff of the bank's Fisher Building branch, which is expected to be opened early in October, according to the Detroit "Free Press" of Sept. 29, which continuing said:

Mr. O'Neil entered the First National bank in 1911, and was made assistant auditor in 1922. In 1923, he became comptroller. Mr. Faurote has been connected with the bank since 1905. He became credit manager in 1919, and Assistant Vice-President in 1922.

The following has been received this week from the First Wisconsin National Bank, Milwaukee:

Announcement has been made that the name of the Grand & Sixth National Bank will be changed to "Sixth Wisconsin National Bank." There is a greater significance for this bank in its new name, since it identifies it both as to location and affiliation. The Sixth Wisconsin National Bank, which was organized three years ago, is one of the nine banks affiliated with the First Wisconsin National Bank. The Second Wisconsin National Bank, located at Second at Wisconsin, is another of the First Wisconsin's affiliated banks. The new name will become effective at once.

Arthur Davidson, Secretary and Sales Manager of the Harley-Davidson Motor Co.; Henry W. Marx, real estate, loans and insurance, and Milton O. Kaiser, Secretary of the First Wisconsin Co., were elected to the board of directors of the Vliet Street State Bank, Milwaukee, at a meeting of the stockholders held Sept. 26. The Vliet Street State Bank is affiliated with the First Wisconsin National Bank.

Sale of stock of the First National Bank of Norman, Okla. twenty-eight business men of that place and vicinity, placing control of the institution in the hands of Cleveland County residents, was announced on Sept. 19 by Phillip C. Kidd, President of the bank under the new regime, according to a dispatch from Norman on that day to the "Oklahoman." Resources of the bank at the close of business Sept. 17. it was stated, were \$1,321,976 and its deposits \$1,157,316. Mr. Kidd was promoted to the Presidency from Vice-President, an office he had held for the last fifteen years. He succeeds E. B. Johnson. Three new Vice-Presidents who will serve with Mr. Kidd are E. H. Stubbeman, President of the Van Pick Oil Co., S. G. Ambrister, a grain and coal dealer, and Charles S. Smith, a stockman living near Newcastle, Okla. The bank was established at the opening of Oklahoma Territory in 1889, Mr. Johnson becoming its President the following year. For several years, however, Mr. Johnson has not taken an active part in its affairs.

Sale of stock of the First National Bank of Norman, Oklato 28 business men of that place and vicinity, placing control of the institution in the hands of Cleveland County residents, was announced on Sept. 19 by Phillip C. Kidd, President of the bank under the new regime, according to a dispatch from Norman on that day to the "Oklahoman." Resources of the bank at the close of business Sept. 17, it was stated, were \$1,321,976 and its deposits \$1,157,316. Mr. Kidd was promoted to the Presidency from Vice-President, an office he had held for the last fifteen years. He succeeds E. B. Johnson. Three new Vice-Presidents who will serve with Mr. Kidd are E. H. Stubbeman, President of the Van Pick Oil Co., S. G. Ambrister, a grain and coal dealer, and Charles S. Smith, a stockman living near Newcastle, Okla. The bank was established at the opening of Oklahoma Territory in 1889, Mr. Johnson becoming its President the following year. For several years, however, Mr. Johnson has not taken an active part in its affairs.

Formal announcement of the purchase of the Bank of Collinston, Collinston, La., by the Citizens' State Bank & Trust Co. of Bastrop, La., was made on Sept. 27 by E. B. Folse, President of the latter, according to a dispatch from Bastrop on Sept. 28, appearing in the New Orleans "Times-Picayune" of the following day. The combined resources of the institutions are in excess of \$500,000, it was stated. The Collinston bank opened as a branch of the Citizens' State Bank & Trust Co. on Sept. 27. Miss Ella N. Pipes, formerly Cashier of the Collinston bank, has been made Manager of the branch.

Closing of the Bank of Camden, Camden, Ala., on Sept. 20, following a run on the institution, was reported in a dispatch from that place on the same date to the Montgomery (Ala.) "Advertiser," which read as follows:

Following a run staged on the Bank of Camden, Wednesday, that institution failed to open this morning on the advice of the board of directors. No depositor will suffer loss, according to officials of the bank.

When it became apparent Wednesday that a systematic run was in progress, arrangements were made to secure additional funds to meet all demands, and a meeting of the directors was called for last night. At this meeting the decision was reached to close the doors until re resentatives of the Alabama Banking Department could arrive on the scene and make an examination. Judge Thomas was called and requested to send an examiner to take charge of the situation.

The run is charged to a "whispering" campaign against the bank, after

The run is charged to a "whispering" campaign against the bank, after which depositors became uneasy. Every check presented during banking hours Wednesday was paid and the depositors are assured that sufficient assets are on hand to pay off every dollar held for depositors. W. J. Bonner is president of the bank, and R. C. Jones is cashier.

The Citizens' National Trust & Savings Bank, Los Angeles, has established a travel department, located on the main floor at the head office, Citizens National Bank Building, Fifth and Spring streets. Its function will be to assist customers of the bank in their travel plans, making reservations, securing tickets and passages and obtaining needed information. All important steamship lines of the world will be represented. The department will be under the management of Harold G. De Golia, the grandson of a Placerville pioneer, who went to Los Angeles from New York in 1849. Mr. De Golia has been in the steamship business since 1912 with the Union Steamship Co., New Zealand Line, Cunard Line and Mattson Navigation Co. He is resigning the position of Assistant General Passenger Agent of the last named company to manage the travel department for the bank.

Announcement was made on Sept. 22 by Leo M. Meeker, President of the Pan-American Bank of Los Angeles, that D. W. Hall, for the past 11 years an official of the Mechanics & Metals National Bank and the First National Bank of New York City, had been elected a Vice-President of his institution and had already assumed his new office, according to the Los Angeles "Times" of Sept. 23. Besides his regular duties as Vice-President, Mr. Hall will give special attention to the development of new business for the Pan-American Bank. The personnel of the institution is now as follows: Leo M. Meeker, President; C. L. Hill and D. W. Hall, Vice-Presidents; S. A. Lansing, Cashier, and J. M. McEvers and H. F. Pierce, Assistant Cashiers. Hr. Mall is a former Secretary of the Iowa Bankers' Association, it was furthermore stated.

The promotion of Fred D. Gibbs, Manager of the Santa Monica (Cal.) branch of the Security Trust & Savings Bank of Los Angeles, to the position of Assistant Vice-President in the commercial loan department at the head office, was announced on Sept. 22, according to the Los Angeles "Times" of the same date. Mr. Gibbs, it was said, would take over his new duties on Oct. 1. He has been active as a leader in various movements for civic development, having been

director of the Chamber of Commerce and president of the Greater Santa Monica Club. He is now president of the Santa Monica Clearing house Association, it was said.

Advices from Aberdeen, Wash. to the Seattle "Post-Intelligencer" on Sept. 19 stated that the Hayes & Hayes Bank of that place, which failed in Feb. 1927, will pay a third dividend, 10%, on claims amounting to \$3,650,000 on Oct. 8, according to F. R. Amende, the liquidating agent for the institution. This dividend will bring the total amount paid by the bank up to 60% of the total allowed claims, it was said. An order approving the payment of the dividend and providing for payment of liquidation expenses of \$17,000, it was stated, was approved on that day (Sept. 19) by Judge W. E. Campbell. The dispatch furthermore said:

Bank officials expect the bank to pay one more dividend of 10 per cent, it was stated. The liquidation is claimed to have been the most rapid in the state's history.

Failure of the Hayes & Hayes Bank, which was capitalized at \$300,000, was noted in the "Chronical" of Feb. 19 1927, page 1009, and its affairs referred to in our issue of Oct. 8 1927, page 1928.

A system, already in operation by banks in this country, making possible the deposit of funds after banking hours, has been put into force by the Midland Bank, Ltd. of London, an announcement in the matter stating:

The Midland Bank is adding further to the list of services available to the customers of a modern bank. Managers of theatres, cinemas and restaurants, shopkeepers, and in fact traders generally who conduct businesafter the usual local banking hours have always had to retain in their possession considerable quantities of cash overnight or during week-ends or holiday periods. This they have had to do under conditions perhaps not always calculated to assure the maximum of safety combined with convenience.

The present innovation is designed to provide for such cases as these, not by extending the hours of banking business but by means of a mechanical apparatus available for use during those hours when the doors of the bank are closed. This apparatus, known as the Night Safe, is already in operation at the Midland Bank's branch at 20 and 22 King St., Hammersmith, and is also in course of installation at a number of offices in other metropolitan districts and at several provincial branches. If found generally acceptable the system may be extended to additional branches in busy shopping and treading centres.

The Night Safe itself, which is constructed by the Chatwood Safe Co., Ltd., is inside the bank building and is connected, by means of a chute, with a fitting built into the outside wall of the bank. Access to the Night Safe is gained by a revolving door in this fitting, the door being controlled by a special key provided by the Bank. The customer is also furnished with a leather wallet in which he places cash, checks, &c. The wallet bears a distinctive number and is fastened with a Chubb lock which may be opened only by means of a second special key. After unlocking and opening the revolving door on the outside wall of the bank the customer places the wallet on a small platform which rotates as the door closes, thus permitting the wallet to travel by way of the chute into the Night Safe. Here it remains until the customer or his representative calls some time during banking hours for the wallet to be delivered to him.

One of the terms under which customers may avail themselves of this new facility is that the wallet may be used solely for the purpose of placing therein articles intended for the credit of his account. The Bank is not deemed to have received for the credit of a particular account any cash, checks, &c., placed in the wallet until the customer or his representative has opened the wallet and paid in the contents to the credit of the account.

There would appear to be many advantages in the scheme, and it is confidently anticipated that the Night Safe will be warmly welcomed by numerous tradesmen wherever it is installed as well as by treasurers of churches, clubs and societies.

The Midland Bank has since announced that the Night Safe service inaugurated at the King St., Hammersmith, office has been extended to the branch at 117 and 119 Balham High Road, Balham, London, S. W. 12.

### THE WEEK ON THE NEW YORK STOCK EXCHANGE.

The stock market suffered a sharp reaction on Tuesday and Wednesday as a result of the heavy realizing sales but recovered on Thursday and Friday. Speculative activity centered largely in motor stocks, though specialties, industrials and railway equipment shares enjoyed a good part of the early improvement. The weekly statement of the Federal Reserve Bank showed an increase in brokers' loans amounting to \$45,270,000, carrying the total to a new high of \$4,569,978,000. Call money moved upward from 6% on Saturday to its former high level for this year at 10% in the final hour of Monday. As the week advanced the rate gradually worked downward to 6½% on Thursday and to 6% on Friday. Railroad shares were conspicuous in the trading during the short session on Saturday, Canadian Pacific leading the advance with a gain of more than four points to 203, followed by New York Central which was heavily bought and moved forward two points to 176. Missouri-Pacific also advanced two points to 73% and good gains were recorded by some of the other members of the group. In the motor section Chrysler was the outstanding feature and again raised its top to a new high level at 11934, though it closed somewhat lower. General Motors opened at 211 and moved briskly forward to 216. United States

Steel common was fairly active and sold up to 159 and stocks like Gillette Safety Razor and National Dairy Products were especially buoyant, both reaching new high levels. General Ice Cream made a new top above 84 and Montgomery Ward climbed upward about eight points. Chrysler was the outstanding feature of the trading on Monday and again lifted its top with an advance of five points to 1241/2. General Motors closed with a fractional loss. Hudson slipped back a point or more and Graham-Paige was off about a point. United States Steel common was active but did not reach its previous top. Specialties attracted considerable speculative attention. Case Threshing Machine moving up to 376, as compared with its previous final at 3631/2. Montgomery Ward was in strong demand early in the session and made a brisk advance to 264, but slipped back in the final hour. Copper shares were higher, especially Anaconda and Calumet & Arizona, and oil stocks were firm.

Heavy selling characterized the market on Tuesday, though a better tone developed in the final hour and much of the early loss was recovered. General Motors opened about two points higher, but lost all of its gain later in the day. Chrysler moved up to its previous top at 124%, but failed to hold its gain, and there was considerable selling at lower prices in Hudson, Hupp, Studebaker and Packard. United States Steel common sold up to 160 in the early trading, but dropped back and closed at 158. Ludlum Steel moved against the trend and sold up to 74%, as compared with its previous final at 69%. Wright Aeronautical dipped ten points from its early high and both Radio Corporation and Montgomery Ward lost about five points each. The flood of selling that swept into the market in the early trading on Wednesday carried many active stocks to lower levels, the losses ranging from one to five points below the previous close. As the day advanced, however, the tone improved and the market gradually increased in strength and numerous recoveries from the early lows were recorded at the close. General Motors opened on a block of 15,000 shares at 2101/2, or nearly four points below its previous final. Chrysler broke from 1231/4 to 119, but recovered later in the day. Hudson, Packard and Studebaker also felt the effects of the early liquidation and moved downward. Montgomery Ward dropped rapidly to 250 and American Smelting & Refining receded three points to 239. Allied Chemical & Dye and Radio Corporation also suffered heavily. United States Steel common was down nearly three points, but recovered in the final hour. Ludlum Steel, on the other hand, moved against the trend and raised its top to 80 with a net gain of six points.

The market again moved briskly forward on Thursday after a further break at the opening. Chrysler was conspicuous in the motor group and made a spectacular advance close to 132, but finally closed at 129 1/8 with a net gain of 31/8 points for the day. General Motors moved ahead to 2175% and closed at 2151/2 with a gain of two points. Oil shares were unusually active, particularly Barnsdall "A" stock which made an advance of three points and crossed 39. Specialties again moved to the front under the leadership of General Railway Signal which bounded forward five points to above 111. Collins & Aikman gained about eight points to 70 and substantial gains were recorded by Victor Talking Machine, Penick & Ford, American Zine, Lead & Smelting, Gillette Razor, International Nickel and Case Threshing Machine. Steel industrials attracted considerable attention, United States Steel common rising close to its record top, followed by Bethlehem, Republic Iron & Steel and Youngstown, all of which reached higher levels. Railroad shares moved lower. Stocks continued to move upward on Friday and many new tops were recorded all along the line. Motor issues were the outstanding strong features of the session, and Chrysler surged forward to its highest peak under the present share capitalization. Dodge Bros. "A" stock and Hupp Motors also broke into new high ground and substantial gains were recorded by several other of the independent motors. Steel shares were higher for a time, most of the interest concentrating on United States Steel common and Bethlehem Steel, the latter raising its top to a new high. Railroad shares made little progress. Specialties continued to attract considerable interest, especially such issues as American Zinc and Universal Pipe & Radiator, both of which reached new top levels. Other issues attaining new peaks were Barnsdall "A" and "B" stocks, General Ice Cream, Pressed Steel Car, Allied Chemical, International Nickel, Pierce Oil pref.,

Penick & Ford, American Zine and Texas & Pacific Coal & Oil. The final tone was good.

#### THE CURB MARKET.

Many new high record prices were established in active sessions of the New York curb market throughout the week. Reactionary movements caused an uneven trend to prices but in the main they reached higher levels. Allied Packers stock and bonds more than doubled in price on the announcement of consolidation with Hygrade Food Products. Auburn Automobile advanced from 84 to 1163/4 and closed to-day at 114. Balaban & Katz ran up from 891/4 to 100. Bancitaly Corp. was off from 1281/8 to 1235/8. Bendix

Corp., class B gained 46 points to 206. Checker Cab Mfg., com. sold up from 64 to 76% and ends the week at 75%. Columbia Graphophone continued its upward movement: advancing from 87 to 1011/2. Hygrade Food Products sold up from 493/4 to 701/2 and finished to-day at 691/2. Neisner Bros. com. improved from 941/2 to 108 and sold finally at 1071/4. Schulte Real Estate Co. moved up from 33 to 451/2 and rested finally at 45. Isaac Silver & Bros. sold up ten points to 64 and reacted finally to 61%. A. G. Spaulding & Bros., com. improved from 210 to 253. Tubize Artificial Silk, class B advanced from 4851/2 to 5291/2 and sold finally at 525. Utilities show little change. Mohawk & Hudson Power rose from 40 to 45% and closed to-day at 44%. Oils were slightly lower. Hygrade Food Prod. 6% bonds sold at 402, an advance of 127 points over the last previous sale. These bonds are convertible into stock and the latter has shown decided improvement this week.

A complete record of Curb Market transactions for the week will be found on page 1933.

### Course of Bank Clearings.

Bank clearings the present week will show a substantial increase compared with a year ago. Preliminary figures compiled by us, based upon telegraphic advices from the chief cities of the country, indicate that for the week ending to-day (Saturday, Oct. 6) bank exchanges for all the cities of the United States from which it is possible to obtain weekly returns will be 20.2% larger than for the corresponding week last year. The total stands at \$14,361,965,738, against \$11,951,280,316 for the same week in 1927. At this centre there is a gain for the five days ending Friday of 25.4%. Our comparative summary for the week follows:

Clearings—Returns by Telegraph. Week Ended Oct. 5.	1928.	1927.	Per Cent.
New York	\$7,494,000,000	\$5,977,000,000	+25.4
Chicago	711.694.174	615,507,449	+15.6
Philadelphia	546,000,000	498,000,000	+9.6
Boston	501,000,000	541,000,000	-7.4
Kansas City	135,872,798	119,013,300	+14.2
St. Louis		139,600,000	-2.1
San Francisco	206,358,000	188,396,000	+9.5
Los Angeles		150,140,000	+19.4
Pittsburgh		150,877,636	+24.8
Detroit		146,002,563	+32.5
Cleveland		124,290,977	+5.8
Baltimore		103,406,001	-10.2
New Orleans		53,122,235	+13.3
Thirteen cities, 5 days	\$10,587,677,372	\$8,806,356,211	+20.2
Other cities, 5 days		1,232,741,370	+12.0
Total all cities, 5 days	\$11.968,304,782	\$10,039,097,581	+ 19.3
All cities, 1 day	2,393,660,956	1,912,182,735	+25.2
Total all cities for week	\$14,361,965,738	\$11,951,280,316	+20.2

Complete and exact details for the week covered by the foregoing will appear in our issue of next week. We cannot furnish them to-day inasmuch as the week ends to-day (Saturday), and the Saturday figures will not be available until noon to-day. Accordingly, in the above the last day of the week has in all cases had to be estimated.

In the elaborate detailed statement, however, which we present further below, we are able to give final and complete

results for the week previous—the week ended Sept. 29. For that week there is an increase of 13.2%, the 1928 aggregate of clearings for the whole country being \$12,267,137,393, against \$10,835,254,749 in the same week of 1927. Outside of this city the increase is only 4.3%. The bank exchanges at this centre record a gain of 19.0%. We group the cities now according to the Federal Reserve districts in which they are located and from this it appears that in the New York Reserve District (including this city) there is an improvement of 18.2%, while in the Boston Reserve District there is a loss of 6.2% and in the Philadelphia Reserve District of 2.2%. In the Cleveland Reserve District the totals are larger by 9.4%. On the other hand in the Richmond Reserve District clearings show a diminution of 6.4%, and in the Atlanta Reserve District of 7.9%. The Chicago Reserve District betters its total of last year by 10.4%, and the St. Louis Reserve District by 7.2%, but the Minneapolis Reserve District suffers a decrease of 5.3%. The Kansas City Reserve District shows a 20.7% expansion, the Dallas Reserve District 9.8%, and the San Francisco Reserve District 13.1%.

Canada	420,092,953	384,413,579	+9.3	319,227,746	398,369,312	

We also furnish to-day a summary by Federal Reserve Districts of the clearings for the month of September. For that month there is an increase for the whole country of 7.8%, the 1928 aggregate of the clearings being \$49,412,-141,653, and the 1927 aggregate \$45,832,139,890. Although this year's total for the month of September of \$49,412,-141,653 does not establish a new high monthly total, it is the highest total ever reached in the month of September in any year. New York City is responsible for the greater part of the increase, its gain being 13.2%. Outside of this city the increase is only 0.4%. In the New York Reserve District (including this city) the totals for the month are larger by 12.9%, but in the Boston Reserve District there is a decline of 4.9%, and in the Philadelphia Reserve District of 4.6%. The Cleveland Reserve District shows a gain of 4.0%, but the Richmond Reserve District shows loss 10.4%, and the Atlanta Reserve District of 19.6%. The Chicago Reserve District records 3.6% increase, but in the St. Louis Reserve District clearings have decreased 1.3%, and in the Minneapolis Reserve District 6.2%. The Kansas City Reserve District shows 10.1% increase, the Dallas Reserve District 3.9%, and the San Francisco Reserve District 10.9%.

Weekly Return of New York City Clearing House .-Beginning with Mar. 31, the New York City Clearing House Association discontinued giving out all statements previously issued and now makes only the barest kind of a report. The new return shows nothing but the deposits, along with the capital and surplus. We give it below in full:

STATEMENT OF THE MEMBERS OF THE NEW YORK CLEARING HOUSE ASSOCIATION FOR THE WEEK ENDED SATURDAY SEPT. 29 1928.

Philadelphia Banks.—The Philadelphia Clearing House return for the week ending Sept. 29, with comparative figures for the two weeks preceding, is given below. Reserve requirements for members of the Federal Reserve System are 10% on demand deposits and 3% on time deposits, all to be kept with the Federal Reserve Bank. "Cash in vaults" is not a part of legal reserve. For trust companies not members of the Federal Reserve System the reserve required is 10% on demand deposits and includes "Reserve with legal depositaries" and "Cash in vaults."

Beginning with the return for the week ending May 14, the Philadelphia Clearing House Association discontinued showing the reserves and whether reserves held are above or below requirements. This will account for the queries at the end of the table.

### Weekly Return of the Federal Reserve Board.

The following is the return issued by the Federal Reserve Board Thursday afternoon, Oct. 3 and showing the condition of the twelve Reserve banks at the close of business on Wednesday. In the first table we present the results for the system as a whole in comparison with the figures for the seven preceding weeks and with those of the corresponding week last year. The second table shows the resources and liabilities separately for each of the twelve banks. The Federal Reserve Agents' Accounts (third table following) gives details regarding transactions in Federal Reserve notes between the Comptroller and Reserve Agents and between the latter and Federal Reserve banks. The Reserve Board's comment upon the returns for the latest week appears on page 1892, being the first item in our department of "Current Events and Discussions."

### Weekly Return for the Member Banks of the Federal Reserve System.

Following is the weekly statement issued by the Federal Reserve Board, giving the principal items of the resources and liabilities of the 635 member banks from which weekly returns are obtained. These figures are always a week behind those for the Reserve banks themselves. Definitions of the different items in the statement were given in the statement of Dec. 12 1917, published in the "Chronicle" of Dec. 29 1917, page 2523. The comment of the Reserve Board upon the figures for the latest week appears in our department of "Current Events and Discussions," on page 1892 immediately following which we also give the figures of New York and Chicago reporting member banks for a week later.

PRINCIPAL RESOURCES AND LIABILITIES OF ALL REPORTING MEMBER BANKS IN EACH FEDERAL RESERVE DISTRICT AS AT CLOSE OF BUSINESS SEPT. 26 1928 (In thousands of dollars).

Resources (Concluded)-	Oct. 3 1928.	Sept. 26 1928.	Oct. 5 1927.
Gold head abroad	218,000	216,000	172.000
Uncollected items	217,268,000		187,254,000
Bank premises	16,675,000		16,276,000
All other resources	1,107,000		4,058,000
Total resources	1,556,802,000	1,519,184.000	1,589,969,000
Liabilities—			
Fed', Reserve notes in actual circulation.	339,506,000		
Deposits-Member bank, reserve acet	902,802,000		
Government	10,117,000		
Foreign bank (See Note)	1,215,000	2,814,000	1,693,000
Other deposits	7,992,000	6,955,000	15,967,000
Total deposits	922,126,000		
Deferred availability items	173,495,000		
Capital paid in	49,343,000		
Surplus	63,007,000	63,007,000	61,614,000
All other liabilities	9,325,000	8,827,000	3,596,000
Total liabilities	1,556,802,000	1,519,184.000	1,589,969,000
Ratio of total reserves to deposit and Fed', R a've note liabilities combined. Contingent liability on bills purchased	63.3%	67.4%	74.2%
for foreign correspondents	76,999	76,738,000	53,061

NOTE.—Beginning with the statement of Oct. 7 1925, two new items were added in order to show separately the amount of balances held abroad and amounts due to foreign correspondents. In addition, the caption, "All other earing assets," previously made up of Federal Intermediate Credit Bank dependences, was changed to "Other securities," and the caption, "Total earning assets" to "Total bills and securities." The latter term was adopted as a more accurate description of the total of the rederal Reserve Act, which, it was stated, are the only items included therein.

## New York Curb Market—Weekly and Yearly Record

In the following extensive list we furnish a complete record of the transactions on the New York Curb Market for the week beginning on Saturday last (Sept. 29) and ending the present Friday (Oct. 5). It is compiled entirely from the daily reports of the Curb Market itself, and is intended to include every security, whether stock or bonds, in which any dealings occurred during the week covered:

Week Ended Oct. 5		Friday Last Sale	Week's	Range	Sales for Week	Ran	ige sin	ce Jan.	1.

#### CURRENT NOTICES.

- -F. Donald Arrowsmith has become associated with Wertheim & Co. as manager of the sales department.
  -Eastman, Dillon & Co. have ready for distribution, an analysis of the General Ice Cream Corp.
- -Prince & Whitely, 25 Broad St., New York, are distributing an analysis of Southern Railways.
- —Bristol & Willett's Over-the-Counter Review contains an analysis of National Casket Co.
- -E. N. Townsend Co., 111 Broadway, New York, has issued its current analysis and quotation pamphlet of Long Island Banks and Trust Com-
- —Edwin Weisl & Co., members New York Stock Exchange, have opened branch office at 604 Fifth Ave., under the management of Arthur G.
- —Robjent, Maynard & Co., 111 Broadway, New York, has prepared an October list of investment suggestions yielding from 4.40 to 7.50%.
- -J. R. Williston & Co., 5 Nassau St., New York, announce that Emile de Planque has become a General Partner in their firm.

Latest Gross Earnings by Weeks.—In the table which follows we sum up separately the earnings for the fourth week of September. The table covers two roads and shows 25.36% increase over the same week last year.

Fourth Week of September.	1928.	1927.	Increase.	Decrease.
Buffalo Rochester & Pittsburgh Canadian Pacific	\$487,532 6,977,000		\$1,587,000	\$76,722
Total (2 roads)	\$7,464,532	\$5,954,254	\$1,587,000 1,510,278	\$76,722

In the table which follows we also complete our summary of the earnings for the third week of September.

Third Week of September.	1928.	1927.	Increase.	Decrease.
Previously reported (8 roads) Canadian National Georgia & Florida Nevada-California-Oregon	\$10,572,594 6,057,295 25,900 25,572	4,845,997 37,900		\$12,000
Total (11 roads)	\$16,681,361	\$14,445,792	\$2,247,569	\$12,000

In the following table we show the weekly earnings for a number of weeks past:

		TF	eek.	Current Year,	Previous Year.	Increase or Decrease.	%
				8	8	8

#### American Smelting & Refining Co. (& Subsidiaries). (Semi-Annual Report—Six Months Ended June 30 1928.)

Simon Guggenheim, President, says:

After deducting bond interest, depreciation, obsolescence, ore depletion, taxes (including estimated United States and Mexican income taxes) and dividends for the 6 months amounting to \$1,750,000 on the preferred stock, company earned upon the common stock \$6,469,451, or \$10.60 \( \frac{1}{2} \) per share for the six months' period, which is at the rate of \$21.21 per year. This figure is obtained after charging against earnings \$459,808, representin

unamortized bond discount and expense applicable to, and the premium on, \$4,250,000 series B 6% bonds called for payment April 1 1928. If the bonds had not been retired, the earning on the common stock for the period would have been \$11.27 per share, or at the rate of \$22.64 per year. The annual interest on the bonds called is equal to an earning of 42c, per share per year on the outstanding common stock.

Total current and miscellaneous assets amount to \$95,631,076 more than 4.74 times total current and miscellaneous liabilities of \$20,169,837.

At the end of the period, company had on hand, in cash, call and time loans and U. S. Government securities, \$36,848,497, an increase of \$1,465,679 over the same items at Dec. 31 1927.

#### American Sumatra Tobacco Corporation.

(Second Annual Report-Year Ended July 31 1928.)

President Louis Leopold says in brief:

The prospects for the coming year look favorable. The crops which we have harvested are good, and the market conditions are in our favor. I believe the coming year should show a substantial gain over the present.

#### International Agricultural Corporation.

(19th Annual Report-Fiscal Year Ended June 30 1928.)

Total .....\$6,711,961 \$6,154,995

President John J. Watson says in substance:

Total \_\_\_\_\_\$6,711,961 \$6,154,995

The corporation is in satisfactory financial condition, having net current working assets at the close of the year of \$9.801.135, showing a net increase in current assets during the period of \$1,459.207.

The net profits for the year, after interest paid on bonds outstanding, bank loans, depreciation of plants, and depletion of phosphate rock mined, are \$1,448.605. In this amount there is included an item of \$143.924 recovered from the Mixed Claims Commission, which represents an award given by the Commission for losses to the corporation during the World

War. Of this amount \$112,118 has already been paid, the balance to be paid in accordance with the plan of settlement of the Mixed Claims Com-

mission.

A substantial part of the year's business was done on a cash basis and a reserve which is considered ample has been set up to provide for any losses which might be sustained on time sales.

During the year a dividend was declared on the prior preference stock to stockholders of record on Aug. 15, which was paid on Sept. 1.

The corporation mined and sold the largest tonnage of phosphate rock of any year in its history.

While the fertilizer output of the corporation has shown an increase over the figures of any previous year, yet the conditions of the industry are such that the corporation on the other hand has been able to show only a relatively small percentage of net profit on its turnover.

There is a gradually increasing demand for fertilizer as the farmer is coming to realize that one of his greatest aids in reudcing the cost of raising his crop is the use of scientifically prepared fertilizer, and it is the policy of this corporation to study the farmer's requirements in fertilization and to produce a fertilizer of the highest quality to meet his crop needs.

The demand for our by-products has increased to a point where we hope that these departments will show a profit before the close of the next fiscal year.

#### GENERAL INVESTMENT NEWS

#### STEAM RAILROADS.

President Coolidge Appoints Rail Dispute Board: J. R. Garfield and four others will investigate wage controversies in West.—N. Y. "Times," Sept. 30, p. 16.

Surplus Freight Cars.—Class 1 railroads on Sept. 15 had 173,724 surplus freight cars in good repair and immediately available for service, the Car Service Division of the American Railway Association announced. This was a decrease of 15,071 cars compared with Sept. 8, at which time there were 188,795 cars. Surplus coal cars on Sept. 15 totaled 46,405, a decrease of 2,292 within approximately a week, while surplus box cars totaled 91,922, a decrease of 7,993 for the same period. Reports also showed 15,841 surplus stock cars, a decrease of 2,069 cars under the number reported on Sept. 8, while surplus refrigerator cars totaled 10,588, a decrease of 2,300 for the same period.

Matters Covered in "Chronicle" of Sept. 29.—(a) Leonor F. Loree denied permission to continue as director of Missouri-Kansas-Texas RR.—I.-8. C. Commission vacates authorization to hold similar positions on two roads, p. 1730; (b) Wood railway cars not to be discarded, p. 1756.

#### Canadian National Rys.—Inquiries for Cars.-

Canadian National Rys.—Inquiries for Cars.—
Having placed orders for passenger and freight locomotives, the cempany has issued inquiries for other equipment for both services
Inquiries are now being made for 1.500 50-ton box cars and 30 tank cars.
These 1.500 cars when purchased will replace a number of older box cars scrapped annually. These cars will answer all requirements as to devices and capacity, and when used in the grain trade each car of this type is capable of carrying 2,000 bushels of grain. Owing to increasing standards in roadbed and motive power, freight cars are being built larger and these newer types displace cars of less capacity.

For the passenger service inquiries have been issued for 25 first-class coaches, two combination baggage-smoking cars and 15 sleepers. These latter are of the 12-section, one drawing-room type.

Orders for the equipment outlined above will be placed during the autumn months.—V. 127, p. 1803.

#### Chicago St. Paul Minneapolis & Omaha Ry.—Equipment Trusts Authorized-Commission Upholds Competitive Bidding-Frowns Upon Placing Obligations Privately.

Bidding—Frowns Upon Placing Obligations Privately.—

The 1.-S. C. Commission on Sept. 25 authorized the company to assume obligation and liability in respect of \$540,000 equip. trust of 1917 certificates series "F," to be issued by the Farmers' Loan & Trust Co. under an agreement dated Feb. 5 1917, as amended June 1 1920; the certificates to be offered for sale at competitive bidding and sold to the highest bidder, and the proceeds used in the procurement of certain equipment. The report of the Commission says in part: The applicant invited bids for the certificates from 40 banks and banking houses, and it received but one bid, 98.815% and accrued interest. As the average annual cost to the applicant on that basis would be about 5.0075%, the bid was rejected. Subsequently the certificates were offered to Kuhn, Loeb & Co., who have agreed to purchase them at 99.42% and accrued interest. On that basis the average annual cost to the applicant would be approximately 4.875.

Our views as to the advantages of competitive bidding are set forth in our report in Western Maryland Equipment Trust, 111 I. C. 434, decided June 23 1926. Since the date of that report, except in a few cases where we felt that the facts justified other disposition, we have required that carriers requesting authority to assume obligation and liability in respect of equipment obligations offer them for sale at competitive bidding. Of interest in this connection is the following table covering the sales of equipment obligations in amounts of \$100,000 and over to bankers, and resales by them to the public, in cases where complete sales information is available:

	Sal	es of Equipment	Obligation	8.	
		Weighted Average.			
Year.	Principal Amount Sold.	Spread in Price to Bankers and to Public per \$100	Cost per Cent. to Carriers.	Yield % to Public.	
1920 (7 mos.)	\$2,400,000 19,621,000		7.13 6.81	6.81 6.465	
1922	86,390,000 255,168,000	2.33	$\begin{array}{r} 5.74 \\ 5.72 \\ 5.26 \end{array}$	5.31 5.34 4.945	
924 925 926	$198,333,000 \\ 100,216,000 \\ 92,313,000$	1.80	5.14 4.95	4.85 4.71	
1927 1928 (6 mos.)	60,097,000 28,185,000	0.66	4.59	4.49	

\*Competitive bidding inaugurated July 1 1926.

\*Competitive bidding inaugurated July 1 1926.

During the early part of the current year equipment obligations sold in some instances on such bases that the cost to the carriers was as low as 4.23%. Certain developments in the financial situation during the past few months have narrowed the investment market, with a resulting increase in rates on long-term securities, including equipment obligations. We feel, however, that this condition does not warrant a change in our policy with respect to the disposition of equipment obligations. Moreover, we are of the opinion that we should do nothing that would tend to discredit the method of disposing of equipment obligations that has been employed with success for the last two years or that would result in the withdrawal of the support of the investment houses that have participated in the sale of such securities. We can hardly expect bankers to continue to submit tenders for equipment obligation on invitation from carriers if the carriers may reject all bids and after thus testing the investment market place the obligations privately. We are of the opinion that if the offers received for the equipment obligations are not satisfactory the carriers should again call for tenders and accept the most favorable bid or should reject all bids and resort to temporary financing until there is such an improvement in the investment market as will enable a sale to be made on satisfactory terms. In accordance with these views, authority to assume obligation and liability in respect of the certificates under consideration will be granted upon condition that the certificates again be offered for sale at competitive bidding and sold to the highest bidder.—V. 126, p. 3112.

Condon Kinzua & Southern RR .- Operation of Line .-The I.-S. C. Commission on Sept. 21 issued a certificate authorizing the company to operate in interstate and foreign commerce a line of railroad extending from Condon in a general southerly direction to Kinzua, approximately 24 miles, all in Gilliam and Wheeler Counties, Ore.

The Commission also authorized the company to issue \$203,600 of capital stock (par \$100); the stock to be delivered at par to the Kinzua Pine Mills Co. in part payment for railroad and equipment acquired.

The application of the company is so far as it requested authority to assume obligation and liability of an open account indebtedness of the Kinzua Lumber Co. and sought approval of the issuance of a promissory note for \$125,000 to the Kinzua Lumber Co. was dismissed.

The company was incorp. May 8 1928 in Delaware and authorized to do business in Oregon on May 29 1928. It has an authorized capital stock of \$500,000.

The line which it proposes to operate was constructed in 1927 and 1928 by the Kinzua Pine Milis Co., and financed by the Kinzua Lumber Co. At Condon it connects with the end of a branch line of the Oregon-Washington RR. & Navigation Co., which branch extends in a southerly direction from the latter's main line at Arlington, Ore.

Erie RR.—New Director.—
Walter P. Chrysler has been elected a director, succeeding Gerogs E. arcy.—V. 127. p. 679.

Kansas City Southern Ry.—Missouri-Kansas-Texas RR. to Withdraw Application to Acquire Stock.—See Missouri-Kansas-Texas RR. below.—V. 127, p. 818.

Missouri Illinois RR.—Proposed Sale.— See St. Joseph Lead Co. under "Industrials" below.—V. 125, p. 2932.

Missouri-Kansas-Texas RR .- Files Notice with Commission to Withdraw Application for Authority to Acquire Control of Kansas City Southern and Cotton Belt.—In a statement issued to the press, Oct. 5, the Missouri-Kansas-Texas RR. announced that it has filed with the I.-S. C. Commission formal withdrawal of its application for authority to acquire control of the Kansas City Southern and the Cotton Belt. The statement continues:

The company has decided on this course after consultion with Mr. Loree, Chairman of the Board of the Kansas City Southern, and Mr. Winslow Pierce, Chairman of the Board of the Cotton Belt, who are in accord with

Pierce, Chairman of the Board of the Cotton Belt, who are in accord with this decision.

At the time the plan was formulated and the application filed, the proposed bases for the exchange of stocks of the companies involved had been reached with considerable difficulty, owing to a number of factors affecting the relative values of the securities. The plan, however, had been prepared with great care and it was believed that the bases of exchange suggested would be fair to the holders of all securities involved, and would be a practical one. These bases conformed at the time approximately to the current market values of the various stocks.

Since that time, and by reason of substantial changes in market prices, the ratio or bases of exchange provided by the plan are so materially out of line that it seems doubtful whether the Commission would approve the terms of acquisition suggested, or whether, even if it did so approve the stockholders of the Kansas City Southern and the Cotton Belt should exchange their shares in an amount sufficient to enable the plan to become operative.

When the application was filed, the Missouri-Kansas-Texas Co. felt convinced that the proposed unification would, as a transportation proposition, be to its own advantage, as well as to that of the other carriers concerned and would be greatly to the public interest and the benefit of the territory served. The company feels that any plan, in order to be successful before the Commission and with the stockholders of the various companies, would have to be developed in the light of changed conditions and with the concurrence of all carriers involved.

—New Chairman.—

New Chairman .-M. H. Cahill, formerly Vice-President in charge of operations of the Seaboard Air Line Ry., has been elected a director and chairman of the board, succeeding L. F. Loree.

Recently the I.-S. C. Commission revoked a part of a previous order authorizing Mr. Loree to serve as a Director of the M.-K.-T. RR. This automatically removes him as chairman of that board.—V. 127, p. 1804.

Missouri Pacific RR.—Bonds Sold.—Kuhn, Loeb & Co. have sold at 99¼ and interest \$25,000,000 1st and ref. mtge. 5% gold bonds, series G, due Nov. 1 1978.

Coupon bonds in \$1.000 denom., registerable as to principal, exchangeable for fully registered bonds and reexchangeable under conditions provided in the mortgage. Interest payable M. & N. The bonds of this series will be redeemable as a whole or in part, upon 90 days' previous notice, on any interest date on and after Nov. 1 1933, and on or before Nov. 1 1973, at 105% and int., and thereafter at their principal amount and accrued int. plus a premium of ½% for each 6 months between the redemption date and the date of maturity.

Issuance and sale of these bonds are subject to the approval of the I.-S. C. Commission.

Listing.—Application will be made in due control of the school of the second of

Listing.—Application will be made in due course to list these bonds on the New York Stock Exchange.

Data from Letter of Chairman Wm. H. Williams, New York, Oct. 4.

Listing.—Application will be made in due course to list these bonds on the New York Stock Exchange.

Data from Letter of Chairman Wm. H. Williams, New York, Oct. 4.

Purpose.—The purpose of this issue is to reimburse the treasury of the company for capital expenditures heretofore made, to provide in part for the company for capital expenditures heretofore made, to provide in part for the company is improvement program for 1929, and for other corporate purposes.

Security.—Bonds are secured by a first lien on 3.409 miles of railroad of the company together with valuable terminal properties, depots and bridges, and, subject to \$125.181.500 principal amount of prior itens on various parts of the system, for the retirement of which list k ref. mage, bonds are reserved, on the remaining 3.372 miles of the directly owned lines of the company and the appurtenances thereof, a total of 6.781 miles of railroad. They are in addition secured, subject to certain of said prior liens and in respect to part of the equipment subject to certain of said prior liens and in respect to part of the equipment subject to certain of said prior liens and in respect solo of the company, which, on July 31 1928, had a depreciated book value of \$74.416.227 over outstanding equipment trust certificates, and on \$23,703,000 par value of preferred stock of the trust certificates, and on \$23,703,000 par value of preferred stock of the trust certificates, and on \$23,703,000 par value of preferred stock of the rail of the public \$137,840,500 of 1st & ref. mage, 5% bonds, being at the rate of \$40,434 per mile on the 3,400 miles of railroad on which the bonds are a first lien. The aggregate of the prior liens and the list & ref. mage, without making any allowance for the other valuable property on which they are a lien. The prior liens may not be increased; they may be acquired or deposited under the list & ref. mage.

Subsidiaries.—in addition to its directly owned lines the company owns 87 % of the stock of line many for the prior liens may not be

the sum of \$450,000,000, no additional bonds shall be issued without the consent of a majority in amount of the stockholders and then only to the extent of 80% of the cost of work done or property acquired.

By the terms of the 1st & ref. mtge., bonds may be issued in series, bearing interest at such rates (not exceeding 6% per annum) and maturing at such time (but not earlier than June 2 1948), as the board of directors shall, from time to time, determine. Under the terms of the mortgage, bonds are reserved to retire prior lien bonds and further bonds may be issued from time to time for additions, betterments, improvements, construction or purchase of additional railroads, terminals, equipment and for other corporate purposes under the restrictions and limitations provided in the mortgage.

See St. Joseph Lead Co. under "Industrials" above.—V. 122, p. 2795.

New York Chicago & St. Louis RR.—Notes.—

The 1.-S. C. Commission on Sept. 24 authorized the company to issue a promissory note for, or promissory notes aggregating, not exceeding \$5,000,000, and to issue from time to time a similar note or notes in renewal of any such original note or notes, or any renewal thereof; the proceeds of the original note or notes to be used as additional working capital and in meeting other lawful cash requirements.

The report of the Commission says in part:

The applicant represents that its available cash at the close of business on Aug. 31 1928, together with its estimated net receipts from operation and cash receipts from other sources from that date to Jan. 1 1929, will be much less than the amount estimated to be needed to meet its lawful cash requirements for the same period. A statement filed with the application shows for the period given estimated cash requirements as follows:

Taxes, fixed charges, principal and sinking fund payments, and dividends.

\$5,633,439

 dividends
 \$5,633,439

 Land for Cleveland Terminal development
 2,389,625

 New construction
 2,800,000

 Working capital (minimum requirement)
 2,000,000

Total

The statement shows estimated cash resources totaling \$7,174,670, or \$5,648,304 less than the estimated amount of cash requirements for the period. The proceeds of the proposed note or notes will be used by the applicant for additional working capital and in meeting its other cash requirements as indicated.

It is stated in the application that the proposed nete or notes will be payable 120 days or four months after the date or dates thereof, with interest at the rate of not exceeding 6% per annum, the cost to the applicant, including discounts and commissions, not to exceed 6% per annum, and that renewal notes will mature not later than May 1 1931. The original and renewal note will mature not later than May 1 1931. The original and renewal note or notes will be issued either with or without collateral security. The applicant represents that probably not more than \$5,000,000 of notes payable 120 days or four months after the date thereof will be issued and that it will desire to borrow the remainder of the \$5,000,000,000, whether \$1,500,000 or more, before the end of the year upon a note or notes for a longer term, probably maturing May 1 1931, and to pledge as collateral security for the last-mentioned note or notes a part of the refunding mortgage bonds, series C, which it is seeking authority to issue by application in Finance Docket No. 7097, now pending. It is requested that authority be granted to issue the original note or notes payable either (1) 120 days or four months after the date or dates thereof, or (2) not later than May 1 1931.

We feel that the present condition of the investment market is temporary and that the applicant should within the ensuing year be able to market its bonds at advantageous prices. For that reason our order will provide that all notes to be issued thereunder shall mature not later than Dec. 31 1929.

Data from Letter from E. W. Hill, Vice-President of the Company. Data from Letter from E. W. Hill, Vice-President of the Company. Business.—Company supplies electric power and light service, through extensive transmission and distribution systems aggregating 3,231 miles, to a large part of the State of Arkansas. Among the 161 communities served in the prosperous agricultural, industrial and mining regions through which the transmission lines extend are Little Rock, Pine Bluff and El Dorado. Company also owns and operates the electric railway systems in Little Rock and Pine Bluff and does some steam heating, water and ice business. The total population in the territory served is estimated at 304,000. Security.—The bonds are secured by a 1st mtge. on the major portion of the company's physical property, and by a direct mtge. on the remainder of its physical property, subject to two closed issues of underlying divisional bonds and certain minor real estate mortgages. Only \$2,000,500 of these underlying divisional bonds, which mature in 1933 and 1938, are now outstanding with the public. The mortgage provides for the issuance of additional bonds upon conditions therein stated and contains provisions permitting modifications with the assent of the holders of not less than 85% in aggregate principal amount of the outstanding bonds.

Capitalization Outstanding upon Completion of this Financing.

Community Telephone Co.—Subsidiary Company.—See Inland Telephone Co. below.—V. 126, p. 3751, 1194.

Compania Hispano-Americana de Electricida, ("Chade").—American Shares Offered.—L. F. Rothschild & Co. are offering "American shares" representing deposited shares series E. "American shares," which are priced on application, are exchangeable for series E shares after Jan. 6 1929. Series E shares will be entitled to dividends at rate of only one-half for the fiscal year 1928.

Present Offering.—This present offering is a portion of 20,000 "American shares" representing 20,000 deposited series E shares of "Chade", which constitute part of said issue of 600,000 shares (60,000,000,000 pesetas par value) issued pursuant to action of the board of directors June 28 1928, of which

409,000 shares have been offered to present shareholders at par and 180,000 shares have been offered in Europe by a syndicate headed by Mendelssohn & Co., Amsterdam and Nederiandsche Handel-Maatschappil, Amsterdam. American shares will be issued by Guaranty Trust Co. of New York as depositary, under a deposit agreement, to be entered into providing for the deposit of series E shares and the issuance of American shares thereunder in the proportion of one American share for each deposited E share of the company of the par value of 100 pesetas.

The deposit agreement will, in substance, provide that cash dividends received by the depositary upon deposited shares, if not received in United States dollars, shall be converted into dollars at the rate or rates of exchange then current and the proceeds (less charges and expenses) will be paid by the depositary to registered holders of American shares; that American shares will be exchangeable at any time after Jan. 6 1929, for the same number of deposited shares (deliverable as provided in said deposit agreement); that the voting rights attached to the deposited shares may be exercised in accordance with the stipulations contained in the deposit agreement: and that additional E shares may be deposited, on or after Jan. 7 1929, and American shares be issued therefor in proportion as stated above.

Weters — Compania Hispane-Americans de Electricidad, S. A. ("Chade")

Jan. 7 1929, and American shares be issued therefor in proportion as stated above.

History.—Compania Hispano-Americana de Electricidad, S. A. ("Chade") was incorp. June 22 1920 in Madrid to take over various enterprises in South America owned by the D. U.E.G. (Deutsch-Ueberseelsche Elektricitaets-Gesellschaft) which had been operating electric works in Buenos Aires and other parts of South America since 1901; and to engage in the construction, management and financing of electric power, light and transportation enterprises in America.

Business.—The company owns and operates approximately 83% of the electric light and power properties serving the City of Buenos Aires (population in excess of 2.000.000 and Aveillaneda (population approximately 188.000) and through subsidiaries owns and operates electric light and power properties serving suburbs of Buenos Aires, electric and gas properties in the Province of Buenos Aires and electric and tramways properties in the Province of Buenos Aires and electric and tramways properties in the City of Mendoza. Company also has important investments in various European utility and management companies.

on the first day of March next following the date of each sinking fund pay ment.

Data from Letter of W. F. Rust, President, Sept. 28.

Company.—Incorp. in Connecticut. Owns and put into operation Sept. 25 1928 a new and modern by-product gas and coke plant at New Haven. Conn. This plant, designed and erected under the supervision of the Koppers Co., is located on approximately 70 acres of water front offering advantageous facilities for economic water transportation of raw materials, and includes a bat ery of 61 of the most modern and efficient Kopp rs combination coke ovens at the Becker type, by-product plant and other auxiliary equipment necessary for the manufacture of gas, coke and resultant by-products. The annual capacity at which this plant will operate is approximately 250,000 tons of high grade coke, 5,100,000,000 cubic feet of gas, 4,000,000 gallons of tar and 11,000,000 pounds of ammonium sulphate. The plant will be capable of producing at least a 25% greater output. The design of the plant is such that it can readily be increased to at least three times present capacity.

After the completion of this financing, the Connecticut Coke Co. (through Koppers Gas & Coke Co.) will become a wholly owned subsidiary of the Koppers Co., which has become the largest and most successful builder of gas and coke plants and has designed and completed plants now producing over 75% of the by-product coke in the United States and Canada. Koppers Gas & Coke Co. is a large owner and operator of other merchant coke plants, selling the gas produced under long term contracts to public utility companies and also engaging, on a large scale, in the market ting of coke, tar, ammonium sulphate and by-products of their operations.

New Haven Gas Light Co. and Hartford Gas Co., distributing gas without competition in the cities of New Haven and Hartford, Comn., and adjacent communities, have entered into contracts whereby they have agreed to purchase their entire gas requirements from the Connecticut Coke Co. for a period extend

increase in sales for the past five years having bee	an as follows:
Year—	Cubic Ft. Gas Sold.
1924	3.979.000.000
1925	4.181.000.000
1926	4.393.000.000
1927	4.669.000.000
1928 (partiy estimated)	4.893.000.000
It is estimated that sales for the year 1020	will amount to more than

1828 (partiy estimated).

It is estimated that sales for the year 1929 will amount to more than 5,100,000,000 cubic feet.

The company's production of coke will be disposed of in part to the large number of industrial consumers in the territory and also marketed as a high grade smokeless fuel for domestic use, its quality and comparative cheapness rendering it preferable to hard coal for household requirements. There are many established markets for the by-products.

Purpose.—The proceeds from the sale of these bonds, together with the proceeds from the sale of the sale of

Pro Forma	a Balance S.	heet as of Sept. 1 1928.	
Assets— Plant, property equipm't, &c Cash Other current assets Deferred charges to operation	\$9,715,380 320,900 879,200	Liabilities— 6% cumul. preferred stock Common stock & surplus 1st mtge. 5% gold bonds	2,135,380 5,500,000
(F)-A-1	911 710 400	m-4-1	011 510 100

Earnings.—Based upon the operating results of similar plants which it owns and manages, Koppers Gas & Coke Co. has conservatively estimated annual net income, after all expenses including liberal charges for main-

tenance, available for interest, depreciation and taxes at \$1,310,000 or about five times the maximum annual interest charges on the bonds to be presently issued and, after liberal allowances for depreciation, at \$960,000 or about 3½ times such charges.

Sinking Fund.—Company will covenant under the terms of the trust agreement to pay annually to the trustee as a sinking fund on each Jan. 1. commencing Jan. 1 1934. \$355,000 to be used for the purchase, upon tenders made on or before each Jan. 25. of bonds at less than the current redemption price. To the extent that this fund is not exhausted by tenders, bonds shall be called by lot for redemption on the first day of March next following the date of each sinking fund payment.

#### Danbury & Bethel (Conn.) Gas & Electric Light Co.-Acquisition.

The company has acquired the franchise and equipment of the Danbury & Bethel Power & Transportation Co., covering the town of Newton, Conn., and the district between the towns of Danbury and Monroe on the Housatonic River.—V. 125, p. 1459.

Danbury (Conn.) Power & Transportation Co. See Danbury & Bethel Gas & Electric Light Co. above.—V. 125. V. 125, p. 1459.

Detroit Edison Co.—Stock Application.—
The comoany has applied to the Michigan P. U. Commission for authority to issue \$15,000,000 common stock, the proceeds of which will be used to refinance construction and additions already made.

Gross earnings for the year ended Aug. 31 1928 were \$50,247,388 against \$46,786,783 for the year ended Aug. 31 1927.—See V. 127, p. 1674.

Engineers Public Service Co., Inc.—To Acquire Puget Sound Power & Light Co. Through Exchange of Stock.—130,000 Shares of \$5.50 Preferred Stock to Be Offered Shortly.—Arrangements whereby the control of Puget Sound Power & Public Power & Light Co. may be expected to pass to Engineers Public Ser-

Arrangements whereby the control of Puget Sound Power & Light Co. may be expected to pass to Engineers Public Service Co. were discolosed yesterday when the directors of the Puget Sound Co. voted to recommend to stockholders the acceptance of an offer made by the Engineers directors for exchanging Engineers stock for Puget Sound stock.

Under the proposed plan of exchan e the holders of Puget Sound Power & Light common will receive, for each share they deposit before November 17, 114 shares of Engineers Public Service common and 14 shares of Engineers \$5.50 dividend preferred, each full share of which carries a warrant, exercisable between Nov. 1 1929 and Nov. 1 1938, for the purchase of one share of Engineers common at \$68. As a large amount of the Puget Sound common stock has already assented to the exchange it is expected that the plan will be consummated. In connection with the foregoing offer and for other corporate purposes the Engineers Public Service Co. has sold to a banking group for offering in the near future 130,000 shares of the newly created \$5.50 preferred stock with warrants as mentioned above.

According to Charles W. Kellogg, President of Engineers Public Service Company, the acquisition should be of value to the customers and stockholders of the Puget Sound Co. in strengthening its credit position and should prove beneficial to stockholders of the Engineers company in still further diversifying the territory served by its subsidiaries. "The addition of the Puget Sound Co. to the Engineers group." Mr. Kellogg said to-day. "will increase the annual consolidated gross earnings by about \$15,000 000. or 50%, besides adding to the areas now served in 11 states an area ni the Pacific Northwers about as large as New England exclusive of Maine. The Puget Sound commany serves 508 communities and has over 125,000 customers; more than 60% of all the farms in the territory use the company's service. Over ¾ of its earnings are from the light and power for the coverher with the fact that over 4-5 ths of th

As part of the proposed plan the Engineers stockholders will be asked to authorize the issue of about 180.000 shares of \$5.50 preferred, and the Puret Sound stockholders to authorize 300.00 shares of \$1.50 dividend junior preferred, to be sold to the Engineers Co. at \$25 per share. the proceeds to be used by the Puret Sound Co. to extend its power facilities, retire a portion of the debt and for other corporate purposes.

Initial Com. Cash Div.—Stock Distribution To Be Made.—
The directors on Oct. 1 declared an initial quarterly dividend of 25c. per share on the common stock payable Jan. 2 1929.

In addition to this cash dividend, the board determined on the policy of paying further common dividends in common stock semi annually beginning Apr. 1 1929 at the rate of 1-25th of a share per annum.—V.

Harrisburg (Pa.) Rys.—Resumes Preferred Dividends.—
The company has resumed paying dividends on its preferred stock, it is announced. The stockholders on Oct. 2 received checks for a 2% semi-annual dividend on the 6% cum. pref. issue. Accumulations on this issue now total 30%.

The 3% dividend due on April 1 last was omitted because of reduced revenues under the old 6-cent fare, the officials said at the time, and 3 months after passing that dividend the increase in the trolley fare was announced.—V. 122. p. 2190.

Hartford Electric Light Co.—Extra Dividend.—
The directors have declared an extra dividend of 12½ cents per share in addition to the regular quarterly dividend of 62½ cents per share, payable Nov. 1 to holders of record Oct. 20 (not Oct. 1 as previously reported). See V. 127. p. 1525.

Holyoke (Mass.) Water Power Co.—Larger Regular Div.—
The company on Oct. 2 paid a quarterly dividend of 5% to holders of record Sept. 26. In the previous quarter, a quarterly dividend of 3% and an extra of 2% were paid.—V. 125, p. 3059.

Company.—Organized in Delaware. Owns or controls 26 subsidiarles which operate a general telephone business in the States of Ohio, Wisconsin, Minn. and Penn. The properties have records of successful operation extending over various periods up to 29 years and serve without competition 14 cities and towns in Ohio, 37 in Wisconsin, 10 in Minnesota and four in Pennsylvania. In addition telephone service is furnished to adjacent rural areas. The system of the company includes 61 telephone exchanges providing service to 19,882 stations. The subsidiarles in cash State are so grouped as to provide an interchange of toll service, and saisfactory traffic arrangements with the Bell System and other telephone systems afford nationwide service. The subsidiaries of the company own over 1,055 miles of toll circuit, and over 16% of the companies 'gross income is derived from toll service. The total population of the territory served is estimated to be in excess of 170,000.

Capitalization—

Authorized.

1,000 shs. 3,750 shs.

Common stock (no par value) — 10,000 shs. 3,750

a Auditional bonds may be issued as provided under the terms of the indenture.

Security.—These bonds will be a direct and primary obligation of the company and will constitute its only funded debt, and in addition thereto will be secured by deposit with the trustee of at least 97% of the outstanding capital stock (except qualifying shares) of all the subsidiaries in Wisconsin, Minnesota and Ohio and 93% of the outstanding capital stock (except qualifying shares) of the Pennsylvania subsidiary. The trust agreement will further provide that so long as any of these bonds are outstanding and unpaid, any and all funded obligations or preferred stock and the proportionate part of the common stock of any of the subsidiary companies, subsequently issued, shall be piedged with the trustee under the terms of the trust agreement.

Earnings.—Consolidated earnings of the properties for the 12 months ended July 31 1928 are reported as follows:

3479 301

Annual interest charges on entire funded debt (this issue) \$193,233

Annual interest charges on entire funded debt (this issue) \$63,000

a Operating expenses includes \$1,462 representing earnings applicable to minority stock interest.

Provisions of Issue.—The trust agreement requires the pledge with the trustee of not less than 90% of all subsequent issues of common stock and all subsequent issues of preferred stock and funded indebtedness of the subsidiary companies.

Additional bonds may be issued in series, on following basis, provided net consolidated earnings for 12 consecutive calendar months within 15 calendar months immediately prior to the application for the issuance of such additional bonds, shall have been not less than 2½ times the total interest charges on all bonds outstanding under the trust agreement and on all additional bonds then proposed to be issued, and then only:

(a) For not in excess of 75% of the cost, or fair value, whichever is lower, of extensions, enlargements, additions, betterments or improvements to the properties owned or operated by the subsidiaries.

(b) For subsequently acquired subsidiaries or systems in an amount. not in excess of 66 2-3% of the fair value as determined by independent engineers, provided the company owns or is concurrently acquiring not less than 90% of the common stock of each company to be operated as a subsidiary.

(c) To refund a like principal amount of bonds of any previous series of bonds issued and outstanding under the trust agreement.

Purpose.—Proceeds will be used in part for retirement of indebtedness incurred in the acquisition of properties, and for other corporate purposes.

Control.—All of the common stock of the company is owned by the Community Telephone Co.

Kaministiquia Power Co., Ltd.—Retires Pref. Stock.—

Kaministiquia Power Co., Ltd.—Retires Pref. Stock.—All of the outstanding 7% cumul. preference shares were called for redemption as of Oct. 1 last at 105 and divs. at the Montreal Trust Co., Place d'Armes, Montreal, or 61 Yonge St., Toronto, Canada.—V. 127, p. 1390.

3 Mos. \$627,177 87,269

Kansas Natural Gas Co.—Dissolved.—
Incident to the policy of grouping all natural gas activities of the Empire Gas & Fuel Co. under one organization—the Cities Service Gas Co.—officials of the Empire companies have announced the dissolution of the Kansas Natural Gas Co. ("Gas Age-Record.")—V. 118, p. 2832.

Long Island Lighting Co.—Larger Dividend.—
The directors have declared a quarterly dividend of \$1 per share on the common stock (no par value), compared with 75c. per share in the six previous quarters. The dividend is payable Nov. 1 to holders of record Oct. 16.—V. 125, p. 1709.

Massachusetts Utilities Associates.—Listed.—
The common shares have been authorized for the Boston Stock Exchange list when and as the same may be released by the voting trustees.—V. 127, p. 1807.

Montreal Light Heat & Power Consolidated.—Rates.— The company, in an advertisement, says:

The company, in an advertisement, says:

It has been the consistent practice of the company to reduce its rates from time to time, as warranted by economies in operation, in order that its customers may share in its prosperity concurrently with its shareholders. Following this established policy the company takes pleasure in announcing to its customers a reduction in electric lighting and power rates as follows:

Effective on consumption after next regular bi-monthly meter readings net electric lighting rates will be reduced \( \frac{1}{2} \) of 1 cent per kilowatt-hour.

Effective Nov. 1928, billing a reduction of 5% in the charges for electricity, as based on metered consumption (kilowatt-hours), and 5% "Service charge" for electricity suppled at primary voltage will be allowed on all service sold at standard rates except where the supply is used in whole or in part for re-sale for lighting, power or other purposes. These reductions will be applicable on bills paid within ten days.

In order that flat-rate customers may benefit by one or other, or both, of these reductions the option is given them to convert to metered service. Included in these rates is the Federal income tax (to which the electrical companies, or their customers, in the Province of Quebec contributed approximately \$1.000.000 for the year 1927) from which the consumers of electricity in certain other Provinces are free.

We have repeatedly petitioned the Federal Government to remove this discrimination against consumers in the Province of Quebec and have promised to pass the benefit to our customers, but so far our efforts have been without avail. Our customers are invited to exercise every legitimate influence possible in support of our efforts on their behalf.

The present is the 13th reduction in electric lighting rates.

The following table illustrates how the company has consistently shared its prosperity with its customers:

Net Rate per Year K.w.h. Year K.w.h. Year K.w.h. 1908. 12.75c. 1913. 6.40c. 1925. 3.50c. 1910. 9.00c. 1925. 3.50

Northern Ohio Power Co.—To Retire Outstanding \$3 283 100 of Ten-Year 7% Secured Gold Bonds.—

The Allied Power & Light Corp. announces that its affiliated company the Northern Ohio Power Co., has called for redemption on Nov. 1 1928 at 100 and int., its outstanding \$3,283,100 10-year 7% secured gold bonds due 1935. Any of these bonds tendered prior to Nov. 1 to the Northern Ohio Power Co. at the office of Allied Power & Light Corp., 20 Pine St., N. Y. City. will be accepted at par and int. to date of payment.

Redemption of these bonds is another step in the consolidation of the Northern Ohio Power Co. with the Penn-Ohio Edison Co. and Penn-Ohio Securities Corp. which was announced Sept. 14. This will result in one company, viz.: Penn-Ohio Edison Co. and a more simplified financial structure. At that time subscription rights were given to common stock-holders of Penn-Ohio Edison Co. to subscribe to common stock at \$35 per share to the extent of 1-10th of their holdings. Subscription warrants expire on Oct. 15. Arrangements have been made for the underwriting of all stock which is not subscribed for by the stockholders.—V. 127, p. 1675.

Pacific Lighting Corp.—Earnings.—
The corporation and subsidiaries report for the 12 months ended Aug. 31 1928 earnings of \$3.71 a share on average amount of stock outstanding for the year. This includes undistributed earnings accruing to the corporation from operations of the Ventura Fuel Co., in which it owns a 50% interest. Gross revenue for the 12 months totaled \$29,329,444. Net earnings after all charges, including operating expenses, taxes, bond interest, depreciation and pref. stock dividends, amounted to \$4.591,199. Undistributed earnings from the half interest in the Ventura Fuel Co., which are not included in the above amount, were \$86,104.—V. 127, p. 1807.

Penn-Ohio Edison Co.—Electric Ourput.—

A new record monthly power output of 89,175,000 k. w. h. is reported by the operating subsidiaries of this company for September, a gain of 17.3% over the 75,990,000 k. w. h. output of September 1927. The total for the 12 months ending Sept. 30, likewise a new record, was 952,585,000 k. w. h., as against 925,450,000 k. w. h. in the preceding 12 months.

Public Service Electric & Gas Co.—New Switching Stations Soon Open for Operation.

tions Soon Open for Operation.—

Two more links in the \$26,000,000 electric power tie-up of the company now nearing completion will soon be open for operation. The links which comprise the new \$6,000,000 switching station at Roseland, N. J., and the \$2,000,000 switching plant at West Orange, N. J., were "energized" for a test on Sept. 29 and will soon be in operation.

The completion of these two stations is a further step towards the formation of one of the largest electric pools in the world. Through the new plants the combined output of the generation stations of this company, the Philadelphia Electric Co. and the Pennsylvania Power & Light Co. can pass.

Power from the Pennsylvania Power & Light Co. will be transmitted to the new Roseland station over an 82 mile line from Siegfried, Pa. From Siegfried, a 49 mile line from Philadelphia Electric Co. The Roseland and Philadelphia stations will be connected by a 77-mile line, the whole forming the power ring. At Roseland, connection is made with lines of the Public Service company, through the new switching station at Athenia. The West Orange switching station is the newest point of supply for Essex County. Energy is received from two steel tower lines from the Roseland switching station.—V. 127, p. 1254, 953.

Puget Sound Power & Light Co.—Proposed Acquisition

Puget Sound Power & Light Co.—Proposed Acquisition by Engineers Public Service Co., Inc.—See latter company above.-V. 127, p. 1391.

Rhine-Westphalia Electric Power Corp. (Rheinisch Westfalisches Elektrizitatswerk Aktien-Gesellschaft). —American Shares Sold.—The National City Co. have sold at \$51 per share flat 80,000 American shares common stock. The offering does not represent any additional corporate financing.

"American Shares," Representing Common Stock Listed .-

American Shares," Representing Common Stock Listed.—
The New York Stock Exchange has authorized the listing on a "when issued" basis, temporary certificates to be issued by the National City Bank of New York, as depositary, for 80,000 American shares, with authority to admit to the list on official notice of issuance such temporary certificates for American shares, with further authority to admit to list such additional certificates for American shares as may be issued by the depositary pursuant to a deposit agreement, dated as of Aug. 1 1928, each such American share to represent 100 reichsmark par value of the common stock (bearer shares) of the Rhine-Westphalia Electric Power Corp.—V. 127, p. 1807.

Rockland Light & Power Co.—Bonds Called.—
The company has called for redemption Nov. 1 all of the outstanding 1st mtge. 5½% gold bonds, series A, due May 1 1955, of the Catskill Power Corp., at 105 and int. Payment will be made at the Bankers Trust Co., 16 Wall St., N. Y. City.

Any of the aforesaid 1st mtge. bonds presented at the Bankers Trust Co., with all unmatured coupons attached, at any time on or after Oct. 1 and prior to Nov. 1, will be purchased at 105 and int. to Nov. 1, less bank discount at the rate of 4% per annum from the date of purchase to Nov. 1 1928.—V. 126, p. 3590.

Saranac River Power Corp., Plattsburg, N. Y.—Bonds Offered.—Morey, Guibord & Co., Inc., and Parker, Robinson & Co., Inc., are offering at 99½ and int. \$300,000 1st mtge. sinking fund 6% gold bonds, series A. The offering does not represent new financing. does not represent new financing.

Dated as of Jan. 1 1928; due Jan. 1 1948. Int. payable J. & J. at Central Union Trust Co. of New York, trustee. Red., all or part, by lot on any int. date on at least 60 days' notice at 105 and int. Denom. \$1,000 and \$500 c^\*. Sinking fund payable annually, beginning Jan. 1 1929, in cash or series A bonds at principal amount equal to 2% of greatest principal amount of series A bonds previously issued, such cash to be applied to the purchase of series A bonds at not exceeding the redemption price or to redemption of series A bonds. Authority for the assumption by the corporation of these bonds has been obtained from the P. S. Commission of New York. The corporation agrees to pay interest without deduction for Federal income tax not exceeding 2% per annum.

Security.—Bonds are secured by a 1st mtge. on property of the corporation appraised by American Appraisal Co. as of May 15 1927 at a depreciated

value of over \$750,000, and also by a mortgage, subject to a lien of \$282,000 principal amount, on additional property of the corporation appraised by the same appraisers as of the same date at over \$570,000 depreciated value.

Pref. Stock Offered.—The same bankers are offering 3,000 shares 7% cumulative pref. stock (each share carrying one-half share of common stock) at \$100 per unit. These shares have been acquired from stockholders.

have been acquired from stockholders.

Pref. stock entitled to cumulative dividends at the rate of \$7 per annum, payable Q.-J. Red. on any div. date at \$110 and divs. on at least 30 days notice; entitled to \$100 and divs. upon liquidation, dissolution or windingup, and upon defauit of four quarterly divs. entitled to exclusive voting power so long as any dividend thereon is in arrears. Transfer agent, Bank of New York & Trust Co., New York.

Trust Co., New York.

Issuance.—Authority has been obtained from the P. S. Commission.

Data from Letter of M. C. Taylor, Vice-President of Corporation.

Properties.—Corporation, organized in New York in 1923, owns two hydro-electric power plants with an aggregate rated capacity of 7,950 h.p., of which 6,450 h.p. is available for existing contracts, and facilities for the remaining 1,500 h.p. are complete except for generating equipment. Corporation also owns approximately 400 acres of land along the Saranac River; rights to the flow of the Saranac River for the development of hydro-electric power and a 450-foot dam and 550-foot penstock in operation. The Saranac River is recognized as one of the most important streams for the development of hydro-electric power in the State of New York. Corporation's operating revenue is derived from the sale of power to public utility and industrial concerns. Over 90% of the corporation's operating revenue is assured by minimum annual power contracts running until Aug. 1 1948.

Data from Letter of Simon F. Rothschild, Pres. of the Company. Business.—The Abraham & Straus store, now the largest department store in Brooklyn, is the outgrowth of a business founded over 60 years ago. In 1885 the enterprise was moved to a site in the square block in which the present store is located. This district has since become the shopping center

Alles & Fisher, Inc.—Earnings.—
The "Boston News Bureau" says: The company reports for the half-year ended June 30 1928 net earnings before taxes of \$312,000, a gain of approximately 42% over the \$220,000 figure shown in the corresponding half of 1927. After allowing 12% Federal taxes in 1928 half, or \$37,440, net was equivalent to \$1.83 a share on 150,000 shares. This compares with \$1.26 a share in 1927 first half after allowing 13½% Federal taxes. Because operations since the turn of the year indicate even greater rate of gain and because the cigar manufacturer enjoys by far his most lucrative period in the closing months of the year, indications point to a most prosperous 12 months.—V. 126, p. 2793.

Alliance Investment Corp.—Stock Offered.—Howe Snow & Co., Inc., are offering 19,000 shares common stock (no par value) at market (about \$22). This stock is outstand ng and does not represent new financing by the company.

type. The corporation may, under construction and sell securities and obligations of a diversified nature both foreign and domestic.

Investments—Ample means for safeguarding the choice and amount of investments is provided by the certificate of incorporation.

The corporation may not invest more than 7½% of its capital and surplus in the securities of any one company; and even stricter limitations are imposed on the purchase of foreign securities.

No bonds or stocks of any company are eligible for purchase unless (1) such company has been established for a period of at least three years, or is an outgrowth of companies previously in existence for at least three years, and (2) reliable information is obtainable with respect to history, management, assets, earnings and income of such companies.

At the present time the invested funds of the corporation are in approximately 235 separate issues of bonds and stocks of representative railroad, public utility and industrial companies, and in the stocks of leading banks and insurance companies, and bonds of foreign countries. As of August 31, 1928, the investment fund was approximately 14.8% in bonds, 78.3% in preferred and common stocks and 6.9% in cash.

Earnings.—The earning power of the corporation is directly dependent upon the amount of assets invested and available for investment. Net earnings after all expenses and before provision for Federal and state taxes of the corporation for the 3 years and 3 months ended June 30, 1928, averaged about 12% annually on the average amount invested and cash on hand during that period.

The average funds invested and cash on hand and the earnings of the corporation as officially reported for the 12 months ended Dec. 31 1927 and for the six months ended June 30, 1928 were as follows:

6 Mos. End.12 Mos. End.

Allied Packers, Inc.—Proposed Merger.—
President Frank R. Warton announced that a tentative agreement has been reached with representatives of the Hygrade Food Products Corp. looking toward the reorganization of the Allied Packers, Inc., and its looking toward the proposed plan cash and (or) stock of the Hygrade corporation. Details of the proposed plan are being worked out and it is expected that a committee within the next 10 days will promulgate a plan calling for the deposit of the Allied Packers securides.—V. 126, p. 718.

American Basic Business Shares Corp.—Reserve Fund American Basic Business Shares Corp.—Reserve Fund
The reserve fund of Fixed Trust Shares stood at \$1.24 per share on June
30 1928, an increase of 24% in the 12 months ended that date, according
to a 32-page booklet just issued by F. J. Lisman & Co. analyzing Fixed
Trust Shares. During the six year period ended December 31 1927, the
average annual return on the group of stocks underlying each unit of Fixed
Trust Shares, was 1.48 per share, this being the aggregate of cash dividends
and the proceeds from the sale of rights and stock dividends.

The reserve fund of Fixed Trust Shares was set up with a view of making
certain that the holder would receive a minimum return of \$1 per annum,
or 50 cents per share every 6 months. This fund was started on the basis
of \$1 per share; it is to be built up to \$1.50 per share through the accumulation of all earnings above the 50 cents payable semi-annually. When it
has reached \$1.50 per share, all earnings above this amount will be distributed to the holders of the Fixed Trust Shares.—V. 127, p. 548.

American Founders Trust below.—V. 127. p. 1678.

American Founders Trust.—Transformation Completed.
The transformation of this Trust into American Founders Corp. was declared operative on Sept. 29 by the committee of trustees appointed managers under the plan of transformation.
Shares in the Trust are being deposited with the Seaboard National Bank as depositary. When the certificates for stock of the corporation are ready, they will be exchanged for the certificates of deposit. Two shares of corporation common stock will be exchanged for one common share in the Trust, other classes being exchanged share for share.
Rights to buy class B common stock of Second International Securities Corp. will be issued to all who deposit their American Founders Trust shares by Oct. 10. See also V. 127, p. 1678, 954, 825.

American Phenix Corp.—Dividend No. 2.—

American Phenix Corp.—Dividend No. 2.—
The directors recently declared a dividend of 1½%, or 75 cents per share, on the general stock, par \$50, payable Oct. 5 to holders of record Oct. 1. An initial quarterly dividend of like amount was paid on July 2 last.—V. 126, p. 4084.

American Smelting & Refining Co.-Seeks Control of Michigan Copper & Brass Co.

Michigan Copper & Brass Co.—

The company has secured an option to purchase class B stock of the Michigan Copper & Brass Co. at \$10 a share until Oct. 15 1928, provided 90% or over of the stock is deposited for sale at that price.

It is believed that final audit will confirm preliminary audits, and that the necessary number of shares of class B stock will be deposited. Final decision will be announced about Oct. 9.

Preliminary to the purchase of the class B stock by American Smelting company, the stockholders of the Michigan Copper & Brass Co. voted to increase the capitalization from 300,000 shares par \$10, to 300,000 shares of no par class A stock, entitled to \$1.20 a share and callable at \$20 a share but having no voting power, and 300,000 shares of no-par class B stock which shall have voting power. The Michigan laws do not permit preferred issues of stock, but the class A stock is virtually a callable preferred issue.

Under the recapitalization plan each share of old stock of the Michigan

ferred issue.

Under the recapitalization plan, each share of old stock of the Michigan company will receive one share of no par class A and one share of no par class B stock.

This change of capitalization was approved by over 87% of the outstanding stock, and over 75% of the outstanding class B stock has been deposited for sale at \$10 to the American Smelting & Refining Co. under the agreement outlined.—V. 127, p. 1106.

Certain Calif., Conn., Mass. and Penn. taxes refundable. Manufacturers Trust Co., trustee.

Data from Letter of A. C. Schnee, Vice President of the Company. Company.—Company is a Delaware corporation, organized in January 1928, to invest in real estate which, at the time of purchase, is under long

term "net lease" to a chain store company of recognized standing. It is the practice of chain store companies to select only the best locations in growing communities, after an exhaustive study of the locality in question, and experience shows that property of this nature tends to increase substantially in value. The company now owns six such properties and is about to acquire twelve others.

Purpose.—Proceeds from the sale of these first mortgage collateral 5½% gold bonds and an issue of \$1,100,000 rent trust certificates junior to these bonds will be used to acquire, through wholly owned subsidiaries, 12 new properties, each under net lease to one of the following: F. W. Woolworth Co., Louis K. Liggett Co., W. T. Grant Co., J. J. Newberry Co., F. & W. Grand 5-10-25 Cent Sotres, Inc., McLellan Stores Co., and Metropolitan Chain Stores, Inc.

Security.—These bonds will be a direct obligation of the company and will be secured by assignment to and deposit with the trustee of closed first mortgages on 11 of the properties referred to above of aggregate principal amount and interest requirement equal to this issue. None of these mortgages will be in excess of 60% of the actual cost of the respective property.

Net Leaser —Each of the properties is under "net lease" to one of the

amount and interest requirements equal mortgages will be in excess of 60% of the actual cost of the respective property.

Net Leases.—Each of the properties is under "net lease" to one of the above chain store companies. The net lease provides that, in addition to the monthly net rental, the tenant pays maintenance charges, taxes, insurance premiums, assessments and all other charges. All leases extend beyond the maturity of these bonds, excepting one which expires in 1953.

Earnings.—Except in the case of one lease, rental payments are graduated upward over the period of each lease and even during the first year of this issue will aggregate over twice the interest requirements of these bonds. Rental payments are made direct to the trustee under the indenture securing the junior issue of rent trust certificates, which provides that such payments shall be applied first to the interest requirements of the mortgages securing these first mortgage collateral 5½% gold bonds.

Atlantic Lee Manufacturing Co.—Initial Div.—Earns.—

Atlantic Ice Manufacturing Co.—Initial Div.—Earns.—
An initial dividend of \$1 per share has been declared on the common stock payable Oct. 15 to holders of record Oct. 1.

The company, which operates 23 artificial ice plants in Eastern Pennsylvania, Southern New Jersey, Dealware and Maryland, reports for the 12 months ending Aug. 31 1928, gross earnings of \$586,061 and a balance, after all interest charges, amortization, taxes and depreciation of \$91,022.

Atlantic & Pacific International Corp.—Representative.
The corporation announces the appointment of C. E. Wheeler & Co.,
27 State St., Boston, Mass., as the distributor in New England of its
securities. The firm will represent the corporation in Massachusetts,
Rhode Island, Maine, New Hampshire, Vermont, Newfoundland, Ontario,
Quebec and the maritime provinces.—V. 127, p. 1810.

Aviation Corp. of the Americas.—Linking of the Three Americas—Stock of Company Placed Privately.—

Americas—Stock of Company Placed Privately.—

Linking the three Americas—North, Central and South—by a single airway and bringing the West Indies, Central America and Panama within one and two days of the United States, was accomplished when the organization of Aviation Corp. of the Americas was completed and its first board of directors was elected in New York City.

The new company, forming what is believed to be the largest international air mail and passenger system in the world, is headed by Richard F. Hoyt as Chairman of the Board, and Cornelius Vanderbiit Whitney as President, and is sponsored by men identified with the development of American air transportation and prominent banking interests. It will own all of the outstanding stock of Pan American Airways, Inc., which pioneered the airway to the Latin Americas and was the first international air mail and passenger service from the United States.

Through Pan American Airways, Inc., as its operating company, Aviation Corp. of the Americas will project and manage a system of international air mail and passenger routes especially between the United States, the West Indies, and Centra' and South America, over the largest airway mileage of any transport company in the world.

The Aviation Corp. of the Americas has outstanding 223,400 shares of no par value common stock, representing an investment of substantially over \$3,000,000. In his announcement concerning the formation of the new company, made from the offices of Hayden, Stone & Co. in New York City, Mr. Hoyt stated that all of this amount had been subscribed privately and that the company does not contemplate any public financing at this time.

Under contracts already awarded by the United States Government,

and that the company does not contemplate any public financing at this time.

Under contracts already awarded by the United States Government, Aviation Corp. of the Americas, through its operating company. Pan American Airways, Inc., will operate air routes extending 4,023 miles in length through 12 different countries, aggregating a yearly operating distance of 2,441,366 miles over a single system. Of this total 1,992,086 miles will be flown on a daily schedule and the remaining 449,280 miles will be added on a three-day-a-week schedule. Extensions already under contract and additional lines to be put into operation will nearly double this aggregate mileage.

will be flown on a daily schedule and the remaining 449,280 miles will be added on a three-day-a-week schedule. Extensions already under contract and additional lines to be put into operation will nearly double this aggregate mileage.

Serving on the board of directors of Aviation Corp. of the Americas, which is also the new board of Pan American Airways, Inc., according to the announcement of Mr. Hoyt, are: R. F. Hoyt (Hayden, Stone & Co.), C. V. Whitney (director Guaranty Trust Co.), J. T. Trippe (Pres. Pan American Airways, Inc.), Robert Lehman (Lehman Bros.), Lyman Delano (Executive V.-Pres. Atlantic Coast Line RR.), S. M. Fairchild (Pres. Fairchild Aviation Corp.), W. A. Harriman (W. A. Harriman & Co.), Leonard Kennedy (Leonard Kennedy & Co.), George Mixter (Stone & Webster), S. Sloan Colt (V.-Pres. Farmers Loan & Trust Co.), E. O. McDonnell (member G. M.-P. Murphy & Co.), W. H. Vanderbilt, Grover Leoning (Pres. Leoning Aeronautical Corp.), Graham B. Grosvenor (V.-Pres. Fairchild Aviation Corp.), John A. Hambleton (Hambleton & Co.), R. B. Be Vier (Pres. Be Vier & Co.), Robert W. Atkins (Hayden, Stone & Co.).

Pan American Airways, Inc., has been operating, under contract with the United States and Cuban Governments, an international daily air mail and passenger service from Key West to Havana during the past 11 months, with the highest rated efficiency of any air transport company (1928 a new five-year contract, the errest to be issued unpartment.) If reign Air Mail Act, was awarded Pan American Airways. Inc., at the rate of \$2 per air plane mile for transportation of United States mial to Havana. Recently the company was awarded two 10-year air mail contracts by the United States Government for extension of air transport service between Miami and Cristobal, Canal Zone, an operating distance of 4,654 miles daily and between Miami and San Juan, Porto Rico, a distance of 2,880 miles to be operated three days a week. Both of these contracts were awarded at the rate of \$2 per mile.

The first of the new contra

Bancitaly Corp.—To Make Distribution in Bank America Stock .-

Barnsdall Corp.—Reduces Debentures.—
The corporation on Oct. 4 announced that it had retired \$1,000,000 of its 15-year 6% debentures. At the beginning of 1928 there were \$24,-863,500 of these debentures outstanding.—V. 127, p. 1810.

Bastian-Blessing Co., Chicago. To Increase Capitalization-Interest in Company to be Acquired by United Cigar Stores Co. of America.

The stockholders will vote Oct. 26 on increasing the authorized common stock (no par value) from 107.500 shares to 127.900 shares. At last accounts there were outstanding \$2,500 shares of common stock and 10,000 shares of no par \$7 cum. conv. pref. stock. The latter is convertible on the basis of 2½ shares of common stock for each pref. share held.

The United Cigar Stores Co of America will acquire a large interest in the Bastian-Blessing Co. and will purchase all of their soda fountain requirements from the Bastian concern for a period of ten years, according to L. G. Blessing, Vice-President.

Part of the proceeds from the sale of the Bastian stock to the United Cigar Stores Co. will be used to redeem 5,000 shares of Bastian preferred as of Jan. 1. The balance of the funds will be used to increase the capacity of the plants.—V. 126, p. 2795.

Beardsley & Wolcott Mfg. Co.—Rights—Acquisition, &c.
The stockholders recently approved the issuance of 22,000 additional shares capital stock of which 3,740 shares were issued in part payment for the Berbecker & Rowland Manufacturing Co. and 18,260 are offered for subscription at \$25 per share to stockholders at the rate of 41½ new shares for each 100 shares held. Payment for the new stock is called for Oct. 25 1928.

There is no public offering of the new stock, but the increased amount has been underwritten by Putnam & Co. of Hartford, Conn.; McEldowney & Co. of Bridgeport, Conn., and the R. F. Griggs Co.
The board of directors of the Company consists of Charles E. Beardsley, Pres., Waterbury, Conn.; Frank E. Wolcott, V.-Pres., Hartford, Conn.; Rowley W. Phillips, Sec.; Henry W. Adams Jr., Irvin W. Day, Wm. Shirley Fulton, Elton S. Wayland, Waterbury, Conn., and George T. Wigmore, Naugatuck, Conn.

Beth lehem Properties, Inc.—Merger.— A certificate has been filed at Albany, N. Y., merging this company and One East Fifty-fifth Street Corp.—V. 127, p. 263.

Borden Co.—Acquisition Announced. The company announced Oct. 3 that negotiations had been completed for the acquisition of the Kennedy Dairy Co. of Madison, Wis.; the Clover Leaf Milk Co. of Chicago and the Thompson Malted Milk Co.

the Clover Leaf Milk Co. of Chicago and the Thompson Malted Milk Co. of Wisconsin.

Pres. Arthur W. Milburn says: "The Thompson product is largely distributed in package form, whereas the Borden product is bulk; thus, the Thompson company reaches a different class of consumer and to a large extent its sales are concentrated in territory heretofore undeveloped by the Borden Co. There are two plants, one in Waukesha, Wis., and the other about to commence operations at Trenton, Ontario, Canada. The latter enjoys a particular strategic position, not only with respect to production and sales in Canada, but also as to export sales. It is also note worthy that this is the only malted milk plant now operating in the Dominion. The business will be continued in the name of the Thompson's Malted Milk Co. under vitually the same management to which the company owes its present success.

"The Kennedy Dairy Co. is regarded very highly and is engaged in the distribution of fluid milk as well as the manufacture and sale of a high grade lee cream in the city of Madison, Wis. The business will be continued in the name of the Kennedy Dairy Co. under the presidency of A. H. Kramer, and will assume its logical place with our other units in that territory."

"A further move in the extension of our business in the city of Chicago is the acquisition of the Clover Leaf Milk Co. The company has operated successfully as fluid milk distributors on Chicago's South Side for a number of years and will serve to further augment our business in this section. The company will be merged with the Borden's Farm Products Co., of

"All the acquisitions mentioned above have strong potentialties and we believe are logical aditions to our company. The consideration as to all of the above has been Borden Co.'s stock."—See also V. 127, p. 1811

Borg-Warner Corp.—Earnings The company reports net profits for the eight months ended August 31 1928 of \$30,285,844 after charges, depreciation and Federal taxes. This is equivalent after allowing for the three months' dividend requirements on \$3,500,000 new 7% preferred stock, to \$7.38 a share (par \$10) earned on 410,000 shares of common stock. On August 31,1928, cash on hand was \$3,400,000.—V. 127, p. 1256.

(S. F.) Bowser & Co.—Omits Common Dividend.—
The directors have decided to omit the quarterly dividend ordinarily payable at this time on the outstanding \$2,025,100 common stock, par \$100. The last distribution made on this issue was 1½% on July 2 1928.—V. 120, p. 3190.

Boyshform Corp.—Stock Offering.—
Kirby, Reed & Co., Inc., have underwritten 50,000 shares of participating preference stock and 25,000 shares of common stock, both of no par value. It is expected that the stock will be publicly offered next week in units of 2 shares of the preference stock and one share of common.

The corporation was incorporated in Delaware in 1927 to take over the assets of Boyshform Brassiere Co., organized in 1919. The trademark "Boyshform" has been advertised in every section of the country and is internationally known. The company owns and occupies a modern brick and steed fireproof building of 30,000 square feet, located at 147th St. and Concord Ave., N. Y. City. The plant is equipped with up-to-date labor saving machinery and present capacity is about \$3,000,000 per year.

The proceeds from the sale of this issue will be used for expansion and other corporate purposes. The company plans to acquire other nationally known companies manufacturing kindred lines.

Proceeding Committee.—

Brooklyn Properties Corp.—Protective Committee.—
As a result of three successive defaults in the payment of principal or interest on the first mortgage 6½% serial gold loan certificates, holders of these securities in a notice issued Oct. 4 by a newly formed protective committee, are urged to deposit their holdings immediately with the fidelity Trust Co., 120 Broadway, New York as depositary, for the enforcement of their rights and the protection of their interests.

The protective committee headed by Albert F. Beringer, chairman and including Harold C. Knapp, Nathaniel F. Glidden, Harold F. O'Keefe and Clarence E. Hale, points out in its notice, that not only has the corporation defaulted in the payment of the principal due Oct. 1 1927; in the payment of interest due April 1 1928 on outstanding certificates and in the payment of installments of both principal and interest due on Oct. 1 1928, but that it also has unpaid real estate taxes upon its mortgaged properties.

The notice to certificate holders further states that no deposit will be accepted by the committee after Nov. 1. next, except in the discretion of the committee and on such terms as it may impose.

John S. Prigge, 115 Broadway, New York is secretary of the committee and Cook, Nathan & Lehman, 111 Broadway, New York are counsel.—
V. 119, p. 2183.

(Edward G.) Budd Mfg. Co.--Rights.-

(Edward G.) Budd Mfg. Co.—Rights.—
The common stockholders of record Oct. 5 have been given the right to subscribe on or before Oct. 23 for 98,224 additional shares of common stock (no par value) at \$21 per share, in the ratio of 2 new shares for every 5 shares held. This issue has been underwritten.

Treasurer William B. Read says in part "The company has been operating at moderate volume and with regular profits for the last eight months. These profits for the eight months, up to Sept. 1 have totaled \$1,123,209.

"The volume of business has grown during the year and we now have schedules from our customers which should greatly increase our output by Jan. 1. This should, of course, be reflected in the profits of the company.

"This increased volume of business will absorb a substantial amount of working capital, and it is desirable to provide this working capital through the issuance of stock."—V. 127, p. 413.

Bunker Hill & Sullivan Mining & Concentrating Co.—Extra Dividend of 50 Cents per Share.—

The directors have declared the usual extra dividend of 50c. per share and the regular monthly dividend of 25c. per share, both payable Oct. 4 to holders of record Sept. 29. Like amounts were also paid on Sept. 4 last.—V. 127, p. 1107.

Burmah Oil Co., Ltd.—Debentures Offered—To Acquire Interest in Shell Transport & Trading Co., Ltd.—

The company, according to London dispatches, is offering £4.000.000 of 5½% debentures at par to holders of preference and common shares, in order to acquire a block of \$33,333 ordinary shares of the Shell Transport & Trading Co., Ltd., at £5 1-16 a share. The Shell shares carry rights to take up one new share for each five held, which will bring Burmah's total holdings in the Shell company to 1.000.000 shares.

The debentures are redeemable at par in 1953 or at 102 on or before Jan. 1934, at the option of the company, and carry rights any time up to November 1933 to exchange for common shares of the Anglo-Persian Oil Co. stock held by Burmah on the basis of one share for each £6 debentures. In order to effect this exchange, the Burmah company is forming a voting trust, entitled Boc-Anglo Persian Share Trust, Ltd., to take ever 700,000 shares of Burmah's holdings of 3,561,990 shares of Anglo Persian £1 par common stock.—V. 126, p. 3595.

Burns Bros.—Listing.—

Burns Bros.—Listing.—
The ew York Stock Exchange has authorized the listing of 2,635 additional shares of class A common stock (auth. 100,000 shares) and 2,633 additional shares of class B common stock (auth. 100,000 shares), on efficial notice of issuance and payment in full making the total amounts applied for 100,000 shares of class A common stock and 100,000 shares of class B common stock.

The directors at a meeting held Sept. 21, authorized the issuance and sale to bankers of 2,635 shares of class A common stock and 2,633 shares of class B common stock for cash at a price not less than \$115 and \$35 per share respectively, pursuant to a contract therefor.

The proceeds from the sale of the 2,635 shares of class A common stock and from the 2,633 shares of class B common stock, applied for, will be used for general corporate purposes.—V. 127. p. 826.

Burroughs Adding Machine Co.-Special Cash Dividend.—The directors on Sept. 28 declared a special dividend of \$1 a share on the no par value common stock, payable Oct. 31 to holders of record Oct. 16. On Aug. 17 last a 25% stock dividend was paid, while on Sept. 10 the regular quarterly cash distribution of 75 cents per share was made. (For record of dividends paid since 1905 see Industrial Number of 'Railroad and Industrial Compendium," page 31.)—V. 127,

### Canadian Bank Stocks, Inc.—Report.—

Canadian Bank Stocks, Inc.—Report.—

Boy W. Arnold, President, says:
The net results of the operations during the period from Oct. 1 1927 to Oct. 1 1928 indicate earnings applicable to distribution from dividends, capital increment and rights received but not exercised totaling \$1.30 for each Investment Trust certificate outstanding.

Total disbursement in the way of dividends to the stockholders during this period of time has been \$1. the undistributed surplus being used to exercise rights to subscribe to the shares of the Bank of Toronto at \$200 per share, which shares have a market value of approximately \$300. It was deemed more profitable for the Trust to use the funds in this manner than to distribute them at the present moment; and when the obvious profit of this transaction shall have been taken, consideration will then be given to the distribution of same to the holders of the Investment Trust Certificates.

Since the Trust has been formed and the original securities purchased for their account, the Bank of Toronto has raised its dividend from 12% to their account, the Bank of Toronto has raised its dividend from 12% to the Canadian Bank of Commerce has offered the holders of Standard Bank of Canada an equal exchange of share for share to effect the merger of these institutions. The trust has been a holder of both of these securities and naturally has benefitted by the developments as indicated.—V.

Canadian Bronze Co., Ltd.—To Split Up Shares.—
The stockholders will vote Oct, 18 on increasing the authorized common stock, no par value, from 50,000 shares (40,000 shares outstanding) to 100,000 shares. It is proposed to issue two new shares in exchange for each common share owned.—V. 126, p. 2970.

Chevrolet Motor Co.—Production of Cars & Trucks.— 928—Sept.—1927. Increase. | 1928—9 Mos.—1927. Increase. | 1928—9 Mos.—1928—9 1928—Sept.—1927. 105,616 62,015 —V. 127, p. 1811.

City Financial Corp.—Rights—Acquisition.—
After a special meeting of the directors held last week, it was announced that all of the stock of the newly formed Consolidated Indemnity & Insurance Co., has been acquired by the City Financial Corp. and that stock of the Insurance company will be offered to all stockholders of the City Financial Corp. of record Oct. 27, for subscription at \$28.50 per share, at the rate of one share of Insurance stock for every two shares of class A or class B City Financial Corp. held.—V. 127, p. 1531.

City Mfg. Co. of New Bedford.—Proposed Capital Distribution of \$50 Per Share.—

A special meeting of stockholders will be held Oct. 11, to take action on the following recommendation of the directors: "That one-half of the capital of the corporation be returned to the shareholders and that the capital stock be reduced from \$750,000 to \$375,000 by changing the par value of the shares from \$100 a share to \$50 a share, and to pay from the capital assets of the corporation to each shareholder \$50 a share for each share of stock owned by him." Payments will be made to holders of record Dec. 1. President J. E. Stanton, Jr., stated that the recommendation of the directors is the first step in a process of orderly liquidation. If conditions continue as at present, he added, complete liquidation of the plant will probably follow.—V. 127, p. 686.

Claude Neon Federal Co.—Separate Suits Filed.—
Separate suits for a permanent injunction and for an accounting against the La France Neon Corp. and the Chicago Neon Sign Co., covering the manufacture, lease and sale of Neon tube signs, were filed in the U. S. District Court in Chicago on Sept. 26, by the Claude Neon Federal Co. and the Claude Neon Lights, Inc.

The suits are based on the Georges Claude patent covering the system of illuminating by luminescent tubes and follow a decision of the U. S. Circuit Court of Appeals for the Second Circuit, New York, holding the patent valid and infringed by Rainbow Lights, Inc.

The Claude Neon Federal Co. is owned two-thirds by the Federal Electric Co., of which Samuel Insuli is Chairman, and one-third by Claude Neon Lights, Inc. The company operates in Arkansas, Illinois, Iowa, Kansas, Kentucky, Louisiana, Minnesota, Mississippi, Missouri, Nebraska, North Dakota, Oklahoma, South Dakota, Tennessee, Texas and Wisconsin.—V. 127, p. 1811

Club Aluminum Utensil Co.—Sales.— 1927. \$536,000 Month Ended Sept. 30-Increase. \$266,000

Colgate-Palmolive-Peet Co.—Transfer Agent.—
The Guaranty Trust Co. of New York has been appointed transfer agent in New York for 300,000 shares of preferred stock, par \$100, and 3,000,000 shares of common stock, without par value.—V. 127, p. 552.

Commercial Investment Trust Corp.—Textile Subs. Improving—Opens Eightieth Office.—

Peierls. Buhler & Co., Inc., recently acquired textile division, reports volume for September shows a considerable increase over the corresponding month of last year, and that the first nine months period shows a satisfactory increase over the preceding year.

This corporation, through its subsidiary C. I. T. Corp., announces the opening of local offices at Jersey City, N. J., Greenville, S. C., Erie, Pa., Poughkeepsie, N. Y., Nashville, Tenn., and Utica, N. Y. It now maintains 80 complete branch offices serving every part of the country, in addition to its foreign activities.—V. 127, p. 1394, 1811.

Commonwealth Casualty Co., Philadelphia.—Listing.
The Philadelphia Stock Exchange has authorized the listing of \$1.100,000
110,000 shares of the par value of \$10 each) of capital stock, transferable at the office of the company, 523 Chestnut St., Philadelphia, Pa., and registered by the Provident Trust Co., Philadelphia.

Congregation of Saint Joseph's Roman Catholic Church, Baton Rouge, La.—Bonds Offered.—Hibernia Securities Co., Inc., and Canal Bank & Trust Co., New Orleans, are offering \$300,000 1st mtge. 5% serial gold bonds at 100 and interest.

are offering \$300,000 1st mtge. 5% serial gold bonds at 100 and interest.

Dated Aug. 1 1928; due serially Aug. 1 1930-49. Denom. \$1.000 and \$500. Principal and int. (F. & A.) payable at Hibernia Bank & Trust Co., New Orleans, trustee. Callable all or part on any int. date at 102 and int. upon not less than 30 nor more than 60 days' published notice.

These bonds are the direct obligation of the Congregation of Saint Joseph's Roman Catholic Church, Baton Rouge, La., and are secured by a first mortgage on property belonging to the congregation located in Baton Rouge, La., adjoining the retail business and financial district of the city.

Saint Joseph's Church was formerly known as "La yglesia de los dolores de la Virgen" (Church of our Lady of Sorrow) and is one of the oldest churches in the United States, having been organized during the Spanish regime. The present name was given to the church in 1822, when the old church was rebuilt. The present membership of the congregation is 3,750. The weekly attendance of adults is approximately 2,600. Several years ago the Church of Saint Joseph was rebuilt, enlarged and equipoed with new furniture, fixtures and organ at a cost considerably in excess of \$200,000. The congregation paid this whole amount in less than four years. This church is in charge of Rev. Father F. L. Gassler, under the supervision of Most Reverend Archbishop John W. Shaw, Bishop of the Roman Catholic Diocese of New Orleans, who is ex-officio president of the Congregation of Saint Joseph's Church. The present school site came to the church through a Spanish grant. In May 1928, the President of the United States signed the act by which the title in fee simple was vested in Main St. by 210 feet on Church St. Main St. is the principal East and West business street, and this property is only one block from Third St. and two blocks from the center of the business section. The church building is of Gothic design and is of massive stone construction.

(2) The school property, measuring 497 feet on North St.

Consolidated Lead & Zinc Co.—Omits Dividend.—
The directors have voted to omit the quarterly dividends on the class A and B stocks which ordinarily are paid at this time. The last dividend was 25 cents per share on each class of stock, paid on July 1, prior to which no dividends were paid since April 1 1927.—V. 127, p. 828.

Container Corp. of America.—Stock Increased.—
The stockholders on Oct. 2 increased the authorized class A common stock (par \$20) from 350,000 shares to 600,000 shares and the authorized class B common stock (no par value) from 590,000 shares to 1,200,000 shares.—V. 127, p. 1531.

Conveyancers Title Insurance & Mortgage Co.— Certificates Offered.—Kidder Peabody & Co., The Shawmut Corp. of Boston and Jackson & Curtis are offering at 98¼ and int. to yield 5.40% \$2,000,000 5 year insured 1st mtge. 5% certificates Series "A".

Dated Oct. 1 1928; due Oct. 1 1933. Int. distributed April 1 and Oct. 1 at the office of Conveyancers Title Insurance & Mortgage Co., 30 State St., Boston, Mass. Denom. \$100 and multiples thereof fully registered as to principal and interest. Not callable, in the event of the death of a registered holder of these certificates and upon written notice from his legal representative the company agrees to purchase the certificates at par and accrued interest.

Data from Letter of Preston S. Cotten, Vice-Pres. of the company. Company incorp. in Mass. in 1889 under the name of The Conveyors Title Insurance Co. by a group of men well known in financial and real estate circles. Its present capital and surplus total \$2,200,000. Since 1893 the company has engaged in the business of lending money on first mortgages on real estate, and in selling its mortgages and mortgage securities bearing the company has sold over \$55,000,000 of insured mortgages and mortgage securities, of which over \$40,000,000 have matured and been paid. No holder of these securities has ever lost a dollar of principal or a day's interest.

Certificates.—These insured first mortgage certificates represent undivided interest in certain notes secured exclusively by first mortgages on improved real estate located in Mass. Notes and mortgages in amount equal to the outstanding certificates are deposited with The National Shawmut Bank of Boston as depositary. The first mortgages deposited as security for these certificates are limited to mortgages on completed structures such as private residences, two and three-family houses, stores, apartment houses, and business blocks.

Investors' Insurance.—Holders of these certificates are issured against any Data from Letter of Preston S. Cotten, Vice-Pres. of the company.

Investors' Insurance.—Holders of these certificates are isured against any loss of principal and interest by the Conveyancers Title Insurance & Mortgage Co. These certificates are, therefore, doubly secured: first, by sound first mortgages on real estate; and secondly, by the insurance of an old, experienced and well-established company of large resources.

State Supervision.—Company's business is carried on under the supervision of the Insurance Commissioner of the Department of Banking and Insurance of the Commonwealth of Massachusetts, being subject to the inspection and audit of that Department.

(W. B.) Coon Co., Rochester, N. Y.—Pref. Stock Offered.

Data from Letter of E. B. Bronson, President of the Company.

Company.—A New York corporation, was organized during 1912 as an outgrowth of a business originally founded in 1891. Company is engaged in the more stable segment of the women's shoe industry which gives greater emphasis to foot comfort and shoe service than to "high style."

Company maintains its own sales organization and sells directly to the retailer. Over a period of years the company has secured a wide distribution among retailers by reason of its long established policy to carry large stocks in an extremely wide range of sizes. The shoes manufactured by the company are sold under its own trademarks.

The manufacturing plant of the company is modern in every respect, permitting the most efficient operation. The plant is well located in the manufacturing and business section of the City of Rochester. It is adaptable to many and varied uses.

Earnings.—Net profits of the company available for dividends, for the four years and six months period ended June 30 1928, after providing for depreciation, and after eliminating mortgage interest and non-recurring income and deducting Federal income tax at the current rate of 12% have been as follows:

Curtiss Flying Service, Inc.—Opens Up Service at Portland, Me., Airport.—

perations of this corporation recently organized to establish a nation wide airplane taxi service in connection with a chain of airports and training schools for aviators, were inaugurated last week at the Portland, Me.,

ing schools for aviators, were analyzed as airport.

Establishment of the airport at Portland constitutes the first link in the chain of 25 which the corporation will operate at the start. This number will be increased as the service progresses, and negotiations are already under way for the establishment of additional fields throughout the country, according to President Casey Jones.—V. 127, p. 1812.

Davega, Inc., New York.—Extra Dividend—Sales.—
The directors have declared an extra dividend of 25 cents per share in addition to the regular quarterly dividend of 25 cents per share, both payable Nov. 1 to holders of record Oct. 15. An extra distribution of like amount was made in February last.

| Sales for | Month and 9 | Months Ended Sept. 30. | | 1928—Sept.—1927. | Increase. | 1928—9 | Mos.—1927. | | \$320.893 | \$257,608 | \$63,285 | \$2,525,351 | \$2,104,591 |

Davison Chemical Co.—Acquires Phosphate Co.—
The company has purchased the controlling interest of the Read Phosphate Co. one of the largest independent fertilizer companies in the United States with plants located at Charleston, S. C., Cordele, Ga., Nashville, Tenn., and New Albany, Ind.
The company also acquires the controlling interest in the Weich Chemical Co. of Columbus, O., and the Porter Fertilizer Works of Atlanta, Ga.
The main offices of the Read Phosphate Co. are located at Savannah, Ga., of the Weich Chemical Co. at Columbus, O., and of the Porter Fertilizer Works at Atlanta, Ga. These offices, together with the present managements, will be continued as heretofore.
In acquiring control of these 6 plants, with a combined output of approximately 180,000 tons and adding the tonnage it already has from its Baltimore and 16 other plants, the Davison company brings its total tonnage in line with that of the largest companies in the industry.

A. C. Read, president of the Read Phosphate Co., has been elected a director of Davison Chemical Co.
The Davison company has also purchased the properties of the Gulfport Fertilizer Co. at Gulfport, Miss. This plant at present has a capacity of approximately 30,000 tons a year and will, as the business grows, be in creased by the Davison company, affording another outlet for superphosphate from the latter company's plant at Baltimore.—V. 127, p. 1394.

DeForest Phonofilm Corp.—Sale Confirmed.—

DeForest Phonofilm Corp.—Sale Confirmed.—
Acquisition by the General Talking Pictures Corp. of the entire assets of the DeForest Phonofilm Corp. was confirmed Oct. 2 when the directors of the DeForest Corp. accepted terms previously proposed but undisclosed. All patents, both granted and pending, of Dr. Lee DeForest are included in the assets of the DeForest Co. Among the sound pictures produced under the Phonofilm system are the receptions to Lindbergh and Byrd upon the return of these aviators from their historic flights to Europe. The General Talking Pictures Corp. was organized recently for the purpose of acquiring the rights to Phonofilm and making it a large factor in the sound-picture field.—V. 123, p. 2396.

### Detroit & Canada Tunnel Co .- Contractors Ahead of

Construction of the vehicular tunnel under the Detroit River, begun in June, has progressed to the extent that the first of 10 sections will be placed early next month, it has been announced by bankers for the com-

placed early next month, to has been speeded up wherever possible, it was said, to rush completion of the project so as to relieve traffic congestion on one of the chief motor arteries between Canada and the United States. If the present rate of activity can be maintained, it is hoped the tunnel can be completed in a year or 15 months. Erection of terminals could then be completed by the Spring of 1930.—V. 126, p. 3598.

Dated Sept. 1 1928 and maturing in varying amounts each Sept. 1 from 1931 to 1943 incl. Red. all or part by lot (if in part the last maturing series to be first redeemed) at any time on 45 days notice, at 102 and int. to and incl. Sept. 1 1942 and thereafter to maturity at 100 and int. Interest payable M. & S. at offices of Halsey, Stuart & Co., Inc. in Chicago and New York without deduction for any normal Federal income tax now or hereafter deductible at the source, not in excess of 2% per annum. Denom. \$1,000 and \$500 c\*. The company agrees to reimburse the holders of these debentures upon proper request within 60 days after payment, for the personal property taxes in Penn. and Conn. not exceeding 4 mills, in Maryland not exceeding 4½ mills and in Calif. and the District of Columbia not exceeding 5 mills, per dollar per annum, and for the Mass. income tax not exceeding 6% of interest per annum. These refunds will apply only to residents in those states who have paid said taxes. The Debentures will be exempt from taxes in the State of Michigan.

Data from Letter of Roger M. Andrews, Pres., Sept. 28.

Data from Letter of Roger M. Andrews, Pres., Sept. 28.

Company.—Incorp. in Mich. in 1921. Publishes the Detroit Times which has had one of the most remarkable growths in the history of American newspapers. Starting with a circulation of less than 26,000 daily and no Sunday edition, it has increased its daily evening net paid circulation to more than 300,000 with the exception of Saturday, and its Sunday circulation to more than 325,000. According to independent reports, it has shown an average gain in daily circulation during the last five years more than twice that shown by any other newspaper in Detroit. Average annual paid circulation for the last five years as shown by reports of the Audit Bureau of Circulation is as follows:

12 Months Ended March 31—

Daily\* Sunday

12 Months Ended March 31—	Daily*	Sunday
1928	325.906	336.000
1927	291,585	317,650
1926	234,626	281,560
1925	216,962	248,560
*Saturday figures not included.	193,418	203,702

\*Saturday figures not included.

\*Saturday figures not included.

\*Guaranty.—Unconditionally guaranteed as to the prompt payment of principal and interest by William Randolph Hearst.

\*Provisions.—Indenture will provide, among other things, that real estate not required in the business may be sold and the proceeds therefrom will be applied either to the redemption of debentures or for the acquisition of buildings and (or) equipment to be used in the production of its newspaper. Company will covenant not to pay cash dividends except out of earnings subsequent to Sept. 1 1928 and will not, during the life of these debentures, place any mortgage on its properties, except as security for this issue, or create any additional funded indebtedness without first redeeming all of the outstanding debentures. The indenture will provide for the payments to Halsey, Stuart & Co., Inc. of amounts sufficient to take care of the semi-annual interest and payments of principal of these debentures, such payments on account of interest prior to Sept. 1 1930 to be made 30 days in advance of the respective interest payment dates, and after such date such payments on account of interest and principal to be made monthly; and that such payments when so made shall to such extent satisfy the obligation of the company.

\*\*Purpose.\*\*—Proceeds will be used for the construction of a modern 6 story building to house the newspaper organization of the Detroit Times, for the purchase of new equipment, for the retirement of obligations and for other corporate purposes.

\*\*Earnings.\*\*—Net earnings of The Times Publishing Co. before depreciation, amortization, Federal income taxes and interest have been certified by independent auditors as follows:

\*\*Twelve months ended\*\*—December 31 1926\*\*

Twelve months ended— December 31 1926— December 31 1927— July 15 1928—	390.359
Average	\$461,103 150,000

Business and Property.—The company owns in fee or controls under long-term leases valuable metropolitan Detroit real estate comprising the major portion of the block bounded by Cass Ave., Bagley Ave., Grand River Ave. and West Park Place. Company will covenant in the indenture to erect a thoroughly modern six-story building which will be used in its entirety for the operations of the Detroit Times. Company will purchase a substantial amount of new equipment and through the economies which ithopes to effect by use of the new building and equipment, should materially increase profits. Company has recently increased the price of its evening

paper from 2c. to 3c., resulting in an increase in net earnings, the entire benefits of which are not reflected on the above earnings statement.

All of the outstanding capital stock of the company, except directors' qualifying shares, is owned and controlled indirectly by William Randolph Hearst.

Dictograph Products Co., Inc.—Organized.—See Dictograph Products Corp', below.

Dictograph Products Corp.—Transfer of Assets—To Retire Pref. Stock—Dissolution Value of Common Stock \$7.59 a Share .-

S7.59 a Share.—

It is announced that the Dictograph Products Co., Inc., a Delaware Corp., has been formed to take over the assets and to continue the business of Dictograph Products Corp. No change of management, personnel or of business policy is involved in this reorganization.

The Dictograph Products Co., Inc., has an authorized capitalization of 500,000 shares of no par value capital stock, of which 200,000 shares, a number equivalent to the outstanding common stock of the Dictograph Products Corp., will be presently outstanding.

Under the reorganization plan, whereby the dissolution of Dictograph Products Corp. was authorized by its stockholders, the preferred stock was called for redemption at \$120 per share and accrued dividends. Common stockholders were offered the option of exchanging their stock on a share for share basis with that of the new company or of accepting \$7.59 per share, the dissolution value arrived at by Certified Public Accountants.

P. W. Andrews is President of the new company.—V. 126, p. 1818.

Dodge Brothers, Inc.—Pref. Stock Called.—
Notice has been received by the New York Stock Exchange of the calling for redemption of the preference stock of Dodge Bros., Inc., on Jan. 15 1929 at 105 and divs. Said stock should be surrendered at the National City Bank, 55 Wall St., N. Y. City.

Arrangements have been mede (subject to termination without notice) whereby in advance of the redemption date any holder of preference stock may surrender (as above stated) the certificate or certificates representing such stock for redemption and receive 105 and divs. from July 15 1928 to the date of such surrender. See also V. 127, p. 1812.

Fafnir Bearing Co., New Britain, Conn.—Extra Div.—An extra dividend of 50 cents per share was paid Oct. 1 in addition to e regular quarterly dividend of like amount.—V. 123, p. 1638.

Fairchild Aviation Co.—To Offer Stock.—
Negotiations are under way whereby a block of stock of the company is to be purchased by group of bankers. Heretofore the stock has been privately held, but due to company's rapid expansion it has become necessary to raise additional working capital.

(The) Fair (Department Store), Chicago.—Sept. Sales. Pres. D. F. Kelly states that sales last month were the greatest of any September in the company's history, being 35¼% larger than in that month last year and 8% greater than in the previous record September, in 1920.—V. 126, p. 2483.

Federal Motor Truck Co.—Shipments.—
The company, it is reported, shipped 520 trucks in September, against 713 in August, and 474 in September 1927.—V. 127, p. 1533.

Federated Business Publications, Inc.—Acquis., &c.—
The corporation has acquired a controlling interest in the Scientific Press, Inc., which will begin the publication of a new magazine, "Distribution Economy," according to an announcement by officials.

Total \$15,254,009 Total \$15,254,009 Total \$15,254,009

Fostoria Glass Co., Moundsville, W. Va. -50% Stock Dividend.-

The directors on Oct. 1 declared a 50% stock dividend, payable Nov. 1 to holders of record Sept. 18. The directors also declared the regular dividend of 5%. The company recently authorized an increase in the capital stock from \$1,000,000 to \$3,000,000 to enlarge the business.

Calena-Signal Oil Co. (Pa.).—Reorganization Approved.
The stockholders on Oct. 1 approved the plan of reorganization, under which holders of preferred stock will receive cash at the rate of \$75 and two shares of common stock of the new corporation to be formed for each share of preferred stock owned. Holders of common stock will be entitled to receive one share of new common for each full share held. (See V. 127, p. 689 and \$29).

The stockholders also authorized the sale of various properties in the United States and abroad to the Texes Co. Properties in this country include the Bayway, N. J. terminal, a plant at East Cambridge, Mass. and stations at Cincinnati, East St. Louis and Jacksonville, Fla.

Approximately 80% of the stock has been deposited under the reorganization plan, and the reorganization committee will accept further deposite for a limited time. Originally it had been contemplated that at least 90% of the stock must be deposited before the plan could be declared operative.

of the stock must be deposited before the plan could be declared operative.

The Galena Oil Corp. was incorporated in Delaware on Oct. 1 with an authorized capital of 300,000 common shares of no par value. This corporation will acquire the remaining operating properties and business of the company, including the main plant at Franklin, Pa., and its inventories, accounts and bills receivable and securities, subject only to such changes therein as may result from the ordinary course of business, and also the entire outstanding capital stocks of Franklin Lead Oxide Co. and Galena-Signal Oil Co., Ltd. (of England). There will also be placed in the treasury of the new corporation as working capital approximately \$400,000. The new corporation will issue for the purposes of the plan 280,000 shares of common stock without par value. It will in effect represent the operating properties not disposed of by the company. The plan does not contemplate the creation of any funded indebtedness by the new corporation. If the plan is declared operative so as to include the distribution of cash and common stock of the new corporation, said common stock will be so distributed; otherwise all of said common stock (other than directors' qualifying shares) will be held in the treasury of the company.—V. 127, p. 1813.

General Mills, Inc.—Initial Common Dividend.—
The directors have declared an initial quarterly dividend of 75 cents per share on the common stock, no par value, payable Nov. 1 to holders of record Oct. 15. (See also V. 126, p. 4089).—V. 127, p. 1534.

serial 6% sinking fund gold bonds at prices ranging from 99½ and int. to 100 and int. according to maturity.

Dated Sept. 1 1928; due serially 1929-1936. Callable all or part on 30 days' notice, on any int. date, at 100 and int. plus a premium of ¼ of 1% for each year or fraction thereof of unexpired term. Denom. \$1,000, \$500 and \$100 c\*. Principal, and int., payable at the office of Baker, Fentress & Co., Chicago. Continental National Bank & Trust Co., and Calvin Fentress, Chicago, trustees. Interest payable without deduction for normal Federal income tax up to 2%.

Business & History.—Company is engaged in the manufacture and sale of sugar and yellow pine and Douglas fir. It is owned and directed by experienced lumbermen who have been associated in the business from its inception. Company was organized in 1902 with a small capital, and has been successfully operating at and near Glendale, Ore., since that date. Surplus earnings, above dividends paid, have been largely reinvested in standing timber tributary to its operations, and to meet the growth in its business, it is now replacing the former plant with a new sawmill of greatly increased capacity.—Bonds are the direct and only funded obligation of the company and are specifically secured by direct first mortgage on the properties of the company, conservatively valued as follows: 160,903,000 feet of timber \$353,000; plants plantsite, logging railroad and equipment (including \$123,000; plants plantsite, logging railroad and equipment (including \$123,000 cash reserved for completion of new Glendale mill) \$280,000; total security \$633,000.

Operations & Earnings.—The net earnings of the company before completion and depreciation but after Federal taxes, available for payment of interest and debt principal for the 3½ years ended June 30, 1928, averaged \$27.595 annually. Average annual production of lumber during this period was 7,312,000 feet. Based upon the same realization per thousand feet, i. e. \$3.77, and without giving effect to the lowered cost of produc

(S. M.) Goldberg Stores, Inc.—Listing.—
The common stock has been admitted to trading on the New York Curb Market. This company, which was financed last June by Eastman, Dillon & Co., operates a chain of 11 women's apparel stores located in 9 cities throughout the United States.—V. 127, p. 1110.

Gold Dust Corp.—Listing.—

The New York Stock Exchange Sept. 17 authorized the listing of additional voting trust certificates representing \$1,250 shares (no par value) common stock on official notice of issuance n part payment for 115,000 shares of American Linseed Co. common stock; and additional voting trust certificates representing up to 193,855 of shaers (no par value) common stock to be offered to stockholders on the basis of one share for each two shares held.

By a resolution of the board of directors at a meeting held on Sept. 7 1928, the president of the corporation was authorized to purchase for the corporation 115,000 shares of American Linseed Co. stock for \$6,250,000 and \$1,250 shares of common stock (voting trust certificates) of the corporation. By further resolution of the board of directors at the meeting it was decided to offer to holders of voting trust certificates for common stock the right to subscribe at \$30 per share to common stock (voting trust certificates), at the rate of one share for each two shares in respect of which voting trust certificates may be outstanding on a record date to be determined by the president. The record date is Sept. 25 1928, and the right to subscribe expires Oct. 15 1928. The entire offering has been underwritten.

The proceeds from the sale and exchange of the additional shares of common stock, will be used to reimburse the corporation for cash expended in the purchase of American Linseed Co., Akron, O.—Rights.—

Goodyear Tire & Rubber Co., Akron, O.—Rights.—

Goodyear Tire & Rubber Co., Akron, O.-Rights.-The company on Oct. 3 announced that stockholders would receive rights to subscribe to additional shares of common stock at \$50 a share in the ratio of one new share for every four held. On the basis of the company's capitalization, this will mean the issuance of approximately 200,000 shares of stock. The proceeds will be used in the expansion of the manufacturing facilities of the company.—V. 127, p. 1814.

The Chatham Phenix National Bank & Trust Co. has been appointed depository under agreement of the company securing an issue of \$135,000 guaranteed 1st mtge. certificates secured by bond and mortgage of Scheckter Building Corp., covering premises at South Fulton Ave. and East 5th St., Mt. Vernon, N. Y.—V. 127, p. 1535.

Guardian Assets Corp.—Trustee.—
The Chatham Phenix National Bank & Trust Co. has been appointed trustee of an issue of \$4,000,000 5% gold debentures, maturing July 1 1943.

Hart & Cooley Co., Hartford, Conn.—Extra Dividend.—
The company on Oct. 1 paid to holders of record Sept. 24 an extra dividend of 50 cents per share in addition to the regular quarterly dividend of \$1.25 per share. Like amounts were also paid on July 2 last, while on April 2 1928 an extra disbursement of 75 cents per share was made.—V. 127, p. 115.

Hart-Parr Co.—Proposed Recapitalization.—
Simplification of the capital structure of the company is planned by the retirement of the present outstanding bonds and both classes of preferred stock through the sale of 33,000 shares of new preferred and 88,000 shares additional common stock, according to an announcement made on Sept. 26. The privilege of subscribing to the new stock will be offered the stockholders. It is proposed to increase the authorized common stock (no par value) to 500,000 shares from 200.000 shares. The new financing will provide for the retirement of \$1,000,000 of 6% 1st mortgage bonds, \$1,412,900 of 7% 1st pref. stock and 6,930 shares of class A participating pref. stock and to provide additional working capital.

The new pref. stock is to be redeemable on any dividend date upon not less than 30 and not more than 45 days' notice at 105 and divs. The stock is to be convertible into common stock for each nine shares of preferred, and after Nov. 1 1930, and to and including Nov. 1 1930, on the basis of 20 shares of common stock for each nine shares of preferred, and after Nov. 1 1930, and to and including Nov. 1 1930, the exchange may be made on the basis of two shares of common for each share of pref. Conversion rights are void after Nov. 1 1935, and to and including Nov. 1 1930, the class A partic, preference stock is callable ail or part at the company's option on any dividend date after 60 days' notice at 105 and divs. The class A partic, preference stock is callable all or part at the option of the company at \$30 a share on or before Nov. 1 1935, after six months' notice, during which notice period holders of this class of stock may convert their holdings share-for-share into common stock.

It is unofficially reported that common stockholders will be offered the rights to subscribe to three shares of new preferred and eight shares of common for each ten shares of common stock held.—V. 127, p. 691.

Hartsville Print & Dye Works, Hartsville, S. C.—Bonds Offered.—Trust Company of South Carolina, Hartsville, S. C.; Fred'k E. Nolting & Co., Inc., State Planters' Bank & Trust Co., Richmond, Va., and Investment Corp. of Norfolk, Va., are offering at 100 and int. \$300,000 1st mtge. 6½% sinking fund convertible gold bonds.

mtge. 6½% sinking fund convertible gold bonds.

Dated Oct. 1 1928; due Dec. 31 1943. Denom. \$1.000 and \$500 c\*.
Interest payable J. & J. Callable by lot, upon notice, on and after Dec.
31 1931, for sinking fund purposes, and as a whole at option of the company. Call price 107½ for Dec. 31 1931, and Dec. 31 1932, and at ½
of 1% less each year thereafter. Trust Co. of South Carolina, Hartsville,
S. C., trustee and transfer agent and registrar for the preferred stock.
Principal and interest payable at office of the trustee, and at office of
Fred'k E. Nolting & Co., Inc., Richmond, Va.

Convertible at the option of the holder at any time after date of issue
and prior to call into 8% cumulative preferred stock. §

Capitalization.

\$300,000

Horn & Hardart Co.—25c. Extra Dividend.—
The directors have declared the regular quarterly dividend of 37½ cents and an extra of 25 cents a share on the common stock, both payable Nov. 1 to holders of record Oct. 11. These are the same amounts as paid in each of the previous 5 quarters.—V. 126, p. 4091.

Household Products, Inc.—Acquisition—Rights Likely. The directors have voted to acquire Scott's Emulsion. The English concern will be taken over, representing a part of the business of this product. The transaction will be financed in part from cash on hand and in part by proceeds of an offering of a small amount of stock for subscription by Household Products, Inc., stockholders, giving the latter some rights of value. As of June 30 the corporation had \$1,757,931 cash. There are authorized and outstanding 575,000 shares of no par value capital stock, of which Sterling Products, Inc., owns 150,000 shares.—V. 127, p. 960.

Humberstone (Ont.) Shoe Co., Ltd.—Extra Dividend.— The directors have declared an extra dividend of 50 cents per share on the common stock, no par value, payable Oct. 16 to holders of record, Oct. 1.—V. 122, p. 1618.

Hygrade Food Products Corp.—Merger.—
Consolidation of this corporation with the Allied Packers Inc., now in the process of re-organization (see above), will also involve the Bronx Provision Co., Chris Crozinger, Inc. of Brooklyn, and the Mohawk Provision Co. of Boston, it was stated, and will oe the largest unification to date of ready-to-serve meat producs companies, revolutionizing the distribution of meat not only in the metropolitan area but over the entire country. Combined gross revenues of the concerns involved will be in excess of \$75,000,000 annually, it was said.

The re-organization committee of Allied Packers, Inc., which is headed by George W. Davison, President of the Central Union Trust Co., will have a plan ready calling for the deposit of Allied Packers securities in a little more than a week.

To Retire 1st & Ref. Conv. Gold Bonds on Dec. 1 Next.—
All of the outstanding 1st & ref. mtge. conv. 6% gold bonds, dated Dec.
1 1927, have been called for redemption Dec. 1 next, at 105 and int. Payment will be made at the Empire Trust Co., trustee, 120 Broadway, N. Y.
City.—V. 127, p. 1814.

International Paper & Power Co.—Plan See International Paper Co. below.—V. 127, p. 557.  $-Plan\ Effective.-$ 

International Paper Co.—Plan for Formation of International Paper & Power Co. Declared Operative Oct. 1.—

national Paper & Power Co. Declared Operative Oct. 1.—

The plan for the formation of the International Paper & Power Co. as a holding company for the properties of the International Paper Co. was declared operative Oct. 1. (See V. 126, p. 4091.) It was announced on Oct. 2 that 86% of the 7% pref. stock and 87% of the common stock of the International Paper Co. had been deposited under the plan. Stock-holders who have not yet deposited their stock are being notified by the committee that they have until the close of business Oct. 20 to do so. The committee consists of the following: Frank N. B. Close, Archibald R. Graustein, John R. Macomber, John W. McConnell, John S. Phipps, Albert H. Wiggin and Owen D. Young.

Under the plan 7% preferred stockholders will receive 7% preferred stock of the power company share for share, carrying rights of conversion into class A common stock. Common stockholders will receive three shares of common stock of the new company, one each of the three classes, A. B and C. The power company is expected to acquire control of the extensive power and distributing systems of New England Power Association, the largest utility organization in the New England States, and upon acquiring control will have a capitalization of about \$550,000.000.

Water powers developed and under construction of the International Paper Co. and the New England Power Association with their subsidiaries amount to over 1,300.000 h.p., capable of being increased through further development and utilization of undeveloped sites to a total of over 2.600.-000 h.p. In addition, the New England Power Association system owns and operates about 382,000 h.p. of steam electric capacity.

Company Building Paper Bag Plant at Camden, Ark.—

and operates about 382,000 h.p. of steam electric capacity.

Company Building Paper Bag Plant at Camden, Ark.—

At Camden, Ark., the International Paper Co. is constructing a plant which will have a capacity of over 100,000,000 multi-wall cement bags a year. The plant is being built in conjunction with the kraft paper mill at that point recently completed by the company and wil use over 30,000 tons of kraft paper a year in the manufacture of bags.

The bag plant will be operated by the George & Sherrard Paper Co., a subsidiary of the International Paper Co., which owns a license to make multi-wall valve cement bags under the Bates patents. At Wellsburg. W. Va., the George & Sherrard Paper Co. now has a plant manufacturing paper, which is converted at the plant into bags for the flour, cement, plaster and fertilizer industries. The Wellsburg mill also converts kraft paper into bags for the cement and allied industries.—V. 127. p. 1815.

International Products Corp.—Stock Increased.—
The company has filed a certificate at Dover, Del., increasing the auorized common stock, no par value, from 376,700 shares to 550,000
ares.—V. 126, p. 3937.

Investment Trust of New York, Inc.—New Officer.—
Horace Russell Taylor has been elected Vice-President and director.—
127, p. 1111.

Kaufmann Department Stores, Inc.—Larger Dividend.

The directors have declared a quarterly dividend of 37½ cents per share on the new common stock of \$12.50 par value, payable Nov. 1 to holders of record Oct. 10. This compares with a dividend of 25 cents per share paid on Aug. 1 last (see V. 127, p. 116).—V. 127, p. 1815.

Keith-Albee-Orpheum Corp.—Contract.—
The corporation has concluded arrangements wit the Radio Corp. of America calling for the installation of RCA-Photophone sound reproducing equipment over most of the company's circuit.—V. 127, p. 1684.

Kelly-Springfield Tire Co.—To Increase Common Stock.

The stockholders will vote Oct. 13 on increasing the authorized common stock from 400,000 shares, par \$25, to 1,200,000 shares of no par value, one new share to be issued in exchange for each common share owned. It is proposed to offer to the common stockholders of record Oct. 17 the right to subscribe for additional common stock (no par value) at \$21 per share on the basis of 2 new shares for each share held. The proceeds are to be used to retire all current bank loans and retire the outstanding 8% gold notes.—V. 125, p. 2158.

Data from Letter of H. T. Cherry, Pres., Griffith, Ind., Oct. 4.

History and Business.—Company was incorp. in Nov. 1925 in Delaware to acquire the business of a predecessor company manufacturing molded egg flats, organized in 1922, and certain license agreements and patents. Company is the only concern in the world manufacturing cushion egg case flats which are molded from paper pulp and are used in packing eggs for shipment or storage. The Mapes "holed-tite" cupped flats are generally recognized as superior to all other packing material for the prevention of egg breakage, and their use is urged and recommended by railroads and express companies throughout the United States and Canada. From very small beginnings three years ago the company's business has developed rapidly because of the great advantages of this method of packing, so that to-day over 50% of all the eggs shipped in this country are packed in "holed-tite" flats. Company's production of egg flats during the first eight months of 1928 was substantially greater than the total output of flats during the entire year 1927. or at the rate of 198% of the production of flats during the first eight months of 1927. "Holed-tite" egg flats are marketed by a large number of manufacturers of egg case material to egg packers located all over the United States and Canada, Italy, Germany, Ireland and South American countries, thus insuring wide distribution. Some of the more important users of "holed-tite" flats include Swift & Co., Armour & Co., Wilson & Co., Beatrice Creamery Co., Fairmont Creamery Co., &c. Earnings.—An issue of \$700,000 7% pref. stock, sold in Nov. 1925 to provide funds necessary for the construction of the Kansas City mill and for proper

Financial Position.—Company has no funded debt, bank loans or mercial paper outstanding and redemption of all pref. stock was compon July 1 1928.

Dividends.—The capital stock is on a \$2 annual dividend basis, a sterly dividend of 50 cents per share, payable on Jan. 1 1929 to hold ecord Dec. 15 1928 having been declared by the directors.

Mercantile Mortgage Co., San Francisco.—Bonds Offered.—Harris Trust & Savings Bank, Chicago, are offering \$1,000,000 coll. trust mtge. 5½% gold bonds, series G, at 99 and int.

Dated Oct. 1 1928; due Oct. 1 1943. Int. payable A. & O. at American Turst Co., San Francisco, Harris Trust & Savings Bank, Chicago, or Pacific Coast Trust Co., New York, without deduction for any normal

Federal income tax up to 2%. Denom. \$1.000c\*. Red. on any int. date on 30 day's notice, in whole or in part, at 102 for the first 5 years, 101 for the next 5 years and thereafter at par. American Trust Co., San Francisco, turstee. Bonds are exempt from California personal property tax.

Company.—Was organized under the general corporation laws of California in September of 1925 and makes first mortgage real estate loans on improved urban property in San Francisco metropolitan area and the territory adjacent thereto. The stock of the Mortgage company is owned by the American National Co., the securities company affiliated with the American Trust Co., and the stock of the American National Co. is trusteed for the benefit of the stockholders of the American Trust Co. The American Trust Co. has total resources of nearly \$300,000,000.

The mortgage company has by its trust indenture and by agreement with its bankers agreed to those conservative restrictions which experience has found effective in the safeguarding of this class of investment.

The collateral trust mortgage \$54% gold bonds are the direct obligations of the Mercantile Mortgage Co. which now has a capital, surplus, and undivided profits of over \$1.165,000. In addition the bonds are secured by the deposit with the trustee of first mortgages on carefully selected types of improved urban real estate to an amount always equal in face value to \$110% of the bonds outstanding under the indenture. The bonds may also be secured in the same ratio by cash or bonds and obligations issued by or under the authority of the United States.

Each mortgage deposited must not exceed 60% of the appraised value of the property mortgaged.—V. 125, p. 1334.

Metropolitan Royalty Corp.—Initial Dividend.—

Metropolitan Royalty Corp.—Initial Dividend.—
The directors have declared an initial dividend of 10 cents a share on the capital stock, payable Nov. 1, to holders of record Oct. 20.

The corporation has concluded negotiations for the purchase of the royalty interests of 1,750 full royalty acres representing a portion of 4,000 acres of the most productive section of the Panhandle oil field in Texas, according to an announcement by company officials. The new casing head gasoline plant of the Phillips Petroleum Co., said to be the largest of its kind in the world, is located on the property. The Phillips company also has under construction a large carbon black plant for utilizing raw materials produced in this field.

According to a statement by George K. Henshaw, President of the Metropolitan Royalty Corp., the acquisition has an ultimate royalty value of from 10 to 12 times the purchase price. The acquisition is the second important purchase by the corporation in the last two months, the first being the purchase of 289 full royalty acres in the Chalk Field in Texas in September.—V. 127, p. 1817.

Murray Corp. of America.—To Increase Stock—Rights.—
Chairman, H. O. Barker announced that a special meeting of stockholders will be held on Nov. 15 for the purpose of increasing the authorized capital stock from 300,000 shares to 900,000 shares of no par value, and of approving the issue of 269,333 shares to stockholders at \$15 a share on the basis of one new share for each share held. The proceeds will be used to retire funded debt of approximately \$4,000,000.—V. 127, p. 1817.

Mutual Industrial Service, Inc., N. Y.—Initial Div.—
An initial quarterly dividend of 75 per cents per share was paid Oct. 1
on the class A common stock to holders of record Sept. 30.—V. 127, p. 117.

Nash Motors Co.—Shipments.—
The company in September produced and shipped 20,606 cars of its new 400" series, an increase of 8,007 over September 1927. Since introduction of the "400" series, 74,913 of these cars have been produced and shipped.—V. 127, p. 271.

National Air Transport, Inc .- Passenger Service Temrarily Suspended.-

The tremendous increase in the amount of air mail carried over the company's lines as a result of the reduction in air mail postage has made it impossible for the company to carry passengers on either of its lines. Passenger service was temporarily suspended, effective Oct. 1, until the company has had an opportunity to procure planes of greater capacity. This announcement was made by L. D. Seymour, Assistant General Manager. The announcement further states:

The increase in air mail since the rate was reduced to 5 cents for the first ounce and 10 cents for each additional ounce has exceeded the most optimistic estimates. Mail carried over N. A. T. lines in August, the first month of the new rate, showed an increase of 85% compared with the amount carried in July under the old rate. September figures are even higher than August.

The suspension of passenger service is temporary only. As soon as possible N. A. T. will place on both of its lines new ships of much greater

carrying capacity and suitable for carrying passengers in addition to an increased quantity of air mail and express.

On the eastern division of the N. A. T. lines, between New York and Chicago, 3 large motored planes will be utilized for this new service. These planes will have room for 10 to 12 passengers in addition to mail and will make the flight from New York to Chicago in about 8 hours. Intermediate stops will be made at Toledo and Cleveland. This service will form part of the coast-to-coast air passenger service, connection being made at Chicago with planes operated by Boeing Air Transport, Inc.

This suspension of passenger service will in no way affect the sighseeing service operated in Chicago by the N. A. T. Flying Service with its 3-motored all metal monoplane, nor the taxi service in Chicago and Kansas City.—V. 127, p. 1687.

National Bellas Hess Co.—Acquisition.—
The company announces the purchase of the entire business of the Charles William Stores, Inc., including merchandise, fixtures and good-will. The Charles William Stores is a mail order company doing an annual business of \$17.000,000 and having approximately 1.300,000 customers.

The purchase price will be paid for in cash from earnings. No new financing on the part of the National Bellas Hess Co. will be required, it is announced.

Net Cash Receipts for Month and Nine Months Ended Sept. 30.

1928—Sept.—1927.

3.610.109 \$3.674.305 \$64.196 \$28.038.384 \$24,935.071 \$3.103.313

Note.—1928 figures do not include unprofitable non-textile lines of merchandise which were included in 1927 figures. 1927 figures exclude net cash receipts of Belias, Hess & Co., which was discontinued as a separate organization as of Sept. 1 1927.—V. 127, p. 1399.

National Bond & Mortgage Corp. of Houston, Texas.

—Bonds Offered.—The Century Trust Co. of Baltimore is offering \$1,500,000 1st mtge. coll. trust 6% bonds,

at par and int.

at par and int.

Denom. \$1,000, \$500 and \$100 c\*. Principal payable at office of Century Trust Co. of Baltimore, trustee. North American Car Corp.—New Equipment.—
It is announced that 200 of the latest improved patented Palace Poultry Cars have now been completed, making a total of 600 cars of this type.
The company is now operating 5,268 tank cars, refrigerator cars and Palace Poultry cars, all actively engaged. Crop prospects throughout the country, activity in the oil refining industry and the general heavy movement of all kinds of perishable and liquid products, encourage the belief on the part of the management that continued satisfactory business may be expected, says President H. H. Brigham.—V. 126, p. 3769.

Olcovich Shoe Co., Los Angeles.—Preferred Stock Offered.—Reed, Adler & Co., Los Angeles, are offering \$250,000 7% cumul. conv. pref. stock at \$102 per share and divs.

Preferred as to dividends and as to assets to the extent of \$100 per share plus div. on liquidation. Cumulative dividends payable Q.-J. Cumulative annual sinking fund payable out of net profits, after provision for dividends on cumulative preferred stock, amounting to 5% of the par value of the aggregate of all amounts of preferred stock at any time outstanding. Red. after one year from date of issue, in whole or in part at \$107.50 per share and div. at the option of the company, upon published notice 90 days before next preferred stock dividend date; also redeemable for account of the sinking fund at \$107.50 per share and div. and upon said notice. Dividends exempt from present nromal Federal income tax. Registrar: Farmers & Merchants National Bank, Los Angeles.

Conversion Privilege.—Convertible at the holder's option, at any time before call for retirement or redemption and within 60 days thereafter, into common stock of the company at the rate of five shares of common stock for each share of 7% cumulative convertible preferred stock. Conversion ratio protected by charter provisions.

Assets.—The pro-forma balance sheet as of June 1 1928, adjusted to give effect to the proceeds of the present financing show current assets of \$506,438 as against current liabilities of \$60,129, or a ratio of 8.42 to 1. Net current assets are equivalent to approximately \$178 per share and net tangible assets to over \$208 per share on this 7% cumulative convertible professively.

Purpose of Issue.—Proceeds will be used towards the reduction of bank loans for expansion policies and other corporate purposes.

Oppenheim, Collins & Co., Inc.—New Director.— Edmund C. Lynch, of Merrill, Lynch & Co., has been elected a Director succeeding Bernard Benson.—V. 127, p. 1263.

Overman Cushion Tire Co.—Omits Dividends.—
The directors have voted to omit the quarterly dividends of 37½ cents er share ordinarily payable Oct. 1 on the class A common and class B ommon stock. Distributions at this rate were paid on both issues on ally 1 last.—V. 125, p. 2297.

Pacific Coast Terminals, Ltd.—Bonds Offered.—E. H. Rollins & Sons and William R. Compton Co. are offering \$1,500,000 1st mtge. 6½% 20-year sinking fund gold bonds, Series A, at 98 and int. to yield about 6.70%.

Rollins & Sons and William R. Compton Co. are offering \$1,500,000 1st mtge, 6½% 20-year sinking fund gold bonds, Series A, at 98 and int. to yield about 6.70%.

Dated Aug. 1 1928: due Aug. 1 1948. Int. payable F. & A. Denom. \$1,000 and \$500 e\*. Red. at any time upon 30 days\* notice at 105 and int. up to and incl. Company agrees to pay int. without deduction for any normal Federal income tax not exceeding 2% per annum which the company or the trustee may be required or permitted to pay at the source and to remburse the resident holders upon proper application for personal property taxes in the States of Conn. and Penn. not exceeding 4 mills per annum. In the State of Maryland not exceeding 4½ mills per annum and in the State of Maryland not exceeding 6% on the interest thereon in the State of Mass. Payable principal and interest. in United States gold coin at the Royal Bank of Canada, New York, or at the Crocker First Federal Trust Co., San Francisco, or in gold coin of the Dominion of Canada at the Montreal Trust Co., Vancouver, B. C. Which adjoins the City of Vancouver in the same peninsula. The City of Vancouver Peninsula has a population of about 250,000 and, with the exception of Prince Rupert, which is 500 miles to the north and has a population of about 250,000 and, with the exception of Prince Rupert, which is 500 miles to the north and has a population of about 250,000 and, with the exception of Prince Rupert, which is 500 miles to the north and has a population of about 250,000 and, with the exception of Prince Rupert, which is 500 miles to the north and has a population of about 250,000 and, with the exception of Prince Rupert, which is 500 miles to the north and has a population of about 250. The business of the

basis, the city has guaranteed 7% interest on the company's depending issue.

An agreement has been entered into with the Consolidated Mining & Smelting Co., Ltd., which is expected to result in a very substantial and profitable volume of business for Pacific Coast Terminals Ltd.

7% cumulative preferred stock

20,000
a Interest on the 7% debentures is guaranteed by the City of New Westminster for a period of 20-years.

In addition to the proceeds from the sale of the above securities, the company will, as above stated, obtain \$270,000 from the Government of the
Dominion of Canada under provisions of the Dominion Cold Storage Act
of Canada.

Dominion of Canada under provisions of the Dominion Cold Storage Act of Canada.

Estimated Earnings.—H. G. Butler, (engineer), San Francisco, has estimated annual net earnings available for bond interest, after operating expenses and reserves for Canadian income taxes, at \$269,200. These estimated earnings can reasonably be expected when the terminal reaches a normal operating condition. Annual first mortgage bond interest requirements are \$97,500. These net earnings are equivalent to 2.76 times the annual interest requirements on the bonds to be presently outstanding. and to 2.24 times their annual interest and sinking fund requirements.

Through earnings from recently acquired terminal properties, contracts already obtained from shippers and storage guarantys of the Province of British Columbia and the City of New Westminster, the company is virtually assured of annual net earnings from the date of completion of the project in excess of interest on the first mortgage bonds to be presently outstanding. Upon completion of the present financing, there will be impounded with the trustee sufficient funds to meet the interest charges on these bonds to and including February 1 1930—seven months after the expected date of completion.

Security.—These bonds are the direct obligation of Pacific Coast Terminals Ltd. and are secured by a specific first mortgage on all the physical

assets of the company and a floating charge over the remaining assets and and undertaking of the company. These physical assets, consisting of land, buildings, machinery and equipment, have been appraised as a completed going concern by Macaulay, Nicholls, Maitland & Co., Ltd., of Vancouver, B. C., at a total of \$2,750,000. Accordingly, the \$1,500,000 outstanding first mortgage bonds represent a loan equivalent to only 54% of the appraised value of the assets against which they are a first lien.

The trust indenture provides that \$750,000 additional bonds, to bear interest at not exceeding 6½% per annum, may be issued up to 60% of the cost of additions to the properties of the company when net earnings shall have been not less than twice interest requirements on outstanding first mortgage bonds including those proposed to be issued, or in lieu thereof such additional bonds may be issued to refund Series A bonds.

Sinking Fund.—Company has agreed to impound with the trustee \$60,000 semi-annually, commencing Aug. 1, 1933. Such payment shall be applied by the trustee, first: to the payment of interest on the then outstanding bonds; second: to the purchase of bonds at or below the redemption price, or in calling bonds by lot for payment at the redemption price, or in calling bonds by lot for payment at the redemption price. The sinking fund is calculated to retire about 75% of this issue by maturity. Purpose of Issue.—Proceeds from the sale of these bonds and the debentures and stocks are being used for the acquisition and construction of the company's terminal facilities and for other corporate purposes.

Palos Verdes Estates, Los Angeles.—Bonds Offered.—

Palos Verdes Estates, Los Angeles.—Bonds Offered.—Alvin H. Frank & Co.; Dean Witter & Co.; Banks, Huntley

As indicated above the total security for these bonds has an appraised value of \$10.685,001, or over \$10.685 for each \$1,000 bond.

Income.—Supplementing income from pledged land purchase contracts the first 20% of all principal payments received from all future property sales will be applied by the Bank of Italy National Trust & Savings Association, disbursing agent for Palos Verdes Estates, to sales expenses bond interest, taxes and other similar charges, and a minimum of 25% of all other principal payments applied exclusively to the redemption of Sales for the past 4 years have accounted to the sales and a minimum of 25% of all other principal payments applied exclusively to the redemption of

all other principal payments applied exclusively to the redemption of bonds.

Sales for the past 4 years have exceeded \$800,000 per year. Sales for the first 4 months of 1928 have averaged in excess of \$75,000 per month, or at the rate of more than \$900,000 per year. Based upon a minimum cash payment of 20% of these sales, supplemented by interest and principal payments on all purchase contracts and other accounts receivable, income available from these sources for interest, taxes, etc., will be approximately \$400,000 per year, or over 6 times maximum interest requirements on this issue.

Sinking Fund.—Indenture provides for an annual sinking fund, beginning as of March 1 1928, consisting of 10% of all cash sales and of all principal payments on conditional sales contracts, with a minimum of \$35,000 per year to be paid to the trustee in monthly installments. These funds must be applied exclusively to the retirement of bonds by purchase or call. At the present rate of sales, the operation of this sinking fund is calculated to retire this entire issue prior to maturity.

This action removes the said stock from the unlisted department of the Exchange.—V. 125, p. 3494.

V. 124, p. 2921.

Pittsburgh Post Office-East Liberty-Station (Amero Construction Co.).—Bonds Offered.—Robert Garrett & Sons, Baltimore, are offering \$230,000 1st mtge. (closed) 5½% 10-year sinking fund gold bonds at 100 and int.

Sons, Baltimore, are offering \$230,000 1st mtge. (closed) 5½% 10-year sinking fund gold bonds at 100 and int.

Dated Oct. 1 1928; due Oct. 1 1938. Interest payable A. & O. Demom. \$1.000 and \$500c\*. Red. all or part, on any int. date on 30 days' notice, at a premium of ½ of 1% of the principal amount for each year or fraction thereof between redemption date and the maturity date, but in no event to exceed 102 and interest. Corporation agrees to refund to holders of these bonds, upon proper and timely application, all State, county and municipal taxes which such holder may pay up to ½ of 1% per annum, including the District of Columbia. 5 mills tax and the Mass, income tax, not exceeding 6% per annum, on the interest, all as provided in the indenture. Interest payable without deduction of that portion of the normal Federal income tax not in excess of 2%. Principal and int. payable at the office of Safe Deposit & Trust Co., Baltimore, corporate trustee.

Property.—The Pittsburgh Post Office—East Liberty—Station, being constructed in accordance with plans and specifications approved by the U. S. Government Post Office Department, is located on the Northwest corner of Penn Ave. and Station St., Pittsburgh, Pa. The building will consist of a basement and two stories of modern fireproof construction with ground floor plans and elevations to be as indicated and outlined in specifications and drawings furnished by the Post Office Department. The aggregate area will be 27,000 square feet and the total cubical content 507,000 cubic feet. All furnishings and fixtures, as specified by the Government, will be of the most modern and efficient approved type.

Security.—These bonds will be secured by a closed first mortgage on the land and building at completion have been independently appraised (the appraisers having been selected by the bankers) by Samuel W. Black Co., at \$304,000, and by John A. Sharp at \$305,000.

The Government rentals are payable at the end of each month and the trustee holds a power of Attorney from the

expenses. Sinking Fund.—The mortgage will provide for payments, out of monthly Government rentals, to the trustee as a sinking fund to be regularly applied to the purchase of bonds in the market or for their redemption by lot at their then callable price. The operation of this fund is calculated to retire at least \$75,000 par value of bonds on or prior to maturity, and, on the same basis, during the term of the Government lease all except \$34,000 of the original mortgage of \$230,000 will have been retired, which is less than 26% of the present appraised value of the land alone.

Purcell High School, Cincinnati, Ohio.—Bonds Offered)
—The Provident Savings Bank & Trust Co., Cincinnati, are offering \$325,000 lst mtge serial 5% gold bonds at par and int. (Archbishop John T. McNicholas, trustee.)

Dated Aug. 1 1928: due serially Aug. 1929-1943. Denom. \$1,000 and \$500. Principal and interest (F. & A.) payable at the office of Provident Savings Bank & Trust Co., Cincinnati, trustee. Callable en 30 days' notice in whole or part on any interest date at 102 and interest.

Purcell High School, which is located on Hackberry St., Walnut Hills, just north of Madison Road, Cincinnati, will furnish high school facilities for boys.

These bonds will be secured by a mortgage on the high school, which in the opinion of counsel will be first and best lien thereon. On completion the high school will have a replacement value of about \$550,000.

Annual assessments sufficient to pay the principal and interest on the bonds have been levied against twenty parishes located in the eastern section of Cincinnati, which assessments amount in aggregate to more than twice the amount of this loan.

On the basis of fixed charges and operating costs of office buildings in the financial district of Winnipeg, the managers of the building estimate that taxes, insurance, operating charges and interest and sinking fund charges on the first mortgage bonds will aggregate approximately \$80,600 per year. This would leave available a balance of \$12,650 per year from the proceeds of the lease alone as against interest on these general mortgage bonds of \$7,000 per year.

The one-story annex will be leased to a commercial tenant at a figure which the managers of the building estimate at \$6,000 per year.

St. Joseph Lead Co.—May Sell Railroads.—

The company is negotiating for the sale to the Missouri Pacific RR. of the Mississippi River & Bonne Terre Ry., owned by the St Joseph company, and of the Missouri-Illinois RR. Company, owned by St. Joseph company and 3 other interests. This sale would relieve the St. Joseph Company of its railroad business. It is expected also that the Union Electric Light & Power Co. will purchase the St. Joseph company's power plant in Southeastern Missouri and extend its transmission lines to supply power to the latter company.

eastern Missouri and extend les transmissionelle latter company.

"These transactions, if completed," said President Clinton H. Crane, "will not increase the company's income, but will transfer fixed assets into cash, which should be available for investment in other mining properties."

—V. 126, p. 3314.

Seton Leather Co.—Dividend No. 2.—
The directors have declared the regular quarterly dividend of 50 cents per share on the common stock, payable Nov. 1 to holders of record Oct. 16. An initial quarterly dividend of like amount was paid on Aug. 1 last.—V. 126, p. 4098.

Sharp Mfg. Co., New Bedford, Mass.—May Liquidate.— President Joseph T. Kenney, Sept. 17, in a letter to the stockholders, said:

Sharp Mfg. Co., New Bedford, Mass.—May Liquidate.—President Joseph T. Kenney, Sept. 17, in a letter to the stockholders, said:

Owing to conditions beyond the control of the management, the corporation is now faced with a very serious situation. The future operation of the mill depends upon the ability of the management to raise a substantial sum of money from the stockholders.

In the latter part of the year 1924, a change in management in the affairs of money from the stockholders.

In the latter part of the year 1924, a change in management in the affairs were purchased on the partial payment plan and these looms were installed in the mill in order to take up some of the product of the spindles, as it was found that it was difficult to operate the spindles for the production of sale yarn only.

It is not the debt incurred by the purchase of new looms, there was, at the time of the change in management, a large bank debt, much of which was held by savings banks insisted upon the payment of their notes. These notes were paid by arrancing with other banks for new loans. The first of the payment of their notes. These notes were paid by arrancing with other banks for new loans. The first of the latter is not the payment of their notes. These notes were paid by arrancing with other banks for new loans. The first of the latter is not the latter of latter

South West Pennsylvania Pipe Lines.—To Make Capital Distribution of \$15 per Share—Par Value of Shares Changed.—Secretary V. S. Swisher, Oct. 4 says:

Changed.—Secretary V. S. Swisher, Oct. 4 says:

At the special meeting of the stockholders held October 3, they voted to reduce the capital stock from \$3,500 000 to \$1,750,000; change the par value of the shares of stock from \$100 to \$50 per share: exchange share for share: and set up a capital stock reduction account of \$1,750 000.

The directors at their meeting held immediately after the stockholders meeting authorized the payment of \$15 per share from the capital stock reduction account, and instructed that the transfer books of the company be closed at the end of business on Nov. 15 1928 and be opened for the transfer of the new issue on Jan. 2 1929.

To corrout the above, stockholders are requested to send in their \$100 par certificates immediately by registered mail to the office of the company at Oil City. Penna.

It is expected that the new \$50 par certificates and the checks will be ready for mailing on or about Dec. 31 1928. There will be some delay in preparing and sending out checks and new certificates on account of \$100 par certificates not received before Dec. 10 1928, but subsequent payments will be made as soon as practicable.

No future dividends will be paid on the \$100 par stock. Further payments may be authorized from capital stock reduction account as funds become available.—V. 127. p. 836.

State Bankers Financial Corp.—Advisory Board.—

State Bankers Financial Corp.—Advisory Board.—

Transfer agent, Fidelity Trust Co., Detroit. Registrar, Union Trust Co., Detroit.

Corporation.—Incorp. in Michigan May 4 1926. Manufactures single-motored cabin monoplanes of two types: (1) Stinson-Detroiter, six pass., 220 horse power, Wright-Whirlwind powered type; (2) Stinson-Junior, four pass., 120 horse power, Warner-Scarab powered model.

The corporation manufactures at present in Northville, Mich., adjacent to Detroit, and has had donated to it for five years a flying field on which the corporation owns a hangar.

Finance, Sales and Profits.—Corporation did not begin manufacturing until the latter half of 1926 and completed its first plane in August that year. During this period 8 planes were manufactured and sold; for the year 1927, 34; from Jan. 1 1928 to Aug. 31 1928, 74. On Sept. 18 1928, there were on hand unfilled orders for 13 planes.

The corporation has never had recourse to bank loans or other credit and has financed its operations entirely out of original capital augmented

by the earnings.

The results of its operations according to audit by Lybrand, Ross Bros.

& Montgomery, are as follows:

See Titusville Iron Works Co. below.—V. 124, p. 386.

Titusville (Pa.) Iron Works Co.—Proposed Merger.—
The Baltimore "Sun", Sept. 27, contains the following:
Plans have been made for a merger of the Titusville Iron Works, Titusville Forge Co. and Struthers-Wells Co. into a new company to be known as the Struthers & Wells Titusville Corp. according to a letter sent stock-holders of the first-named company. The consolidation has been approved by officers and directors of the companies involved and now awaits ratification by stockholders through deposit of stock.

The authorized stock of the new company will consist of \$4,000.000 7% preferred and 150,000 shares of no par common stock. There will be outstanding 89,750 shares of common, of which 79,750 shares are to be issued in acquiring the old companies. The Struthers & Wells Titusville Corp. also will issue between \$1,500,000 and \$1,750,000 ist mtge. 15-year 64% sinking fund bonds, which, it is understood, Robert Garrett & Sons and outof-town bankers have agreed to underwrite subject to approval of the deal by the stockholders.

The proceeds of the offering will be used to pay off the funded debt of the Titusville Iron Works and Titusville Forge Co., amounting to \$1,224,-000, it was stated. Both of these issues are largely held in Baltimore, and local bankers are represented on the board of directors of each company.

The Titusville Iron Works 8% preferred stock is to get \$115 par value of new preferred stock for each \$100 par value, and the common stock is to be exchanged for common stock of new company in the proportion of two new shares for each share of old stock, under the consolidation plan.—

V. 125, p. 1473.

Toddy Corporation.—Earnings.—
The company reports earnings for the six months ended on June 30 of \$81.853 before taxes, equal to \$2.02 a share on the class A stock.—V.126, p. 3944.

Tung-Sol Lamp Works, Inc.—Extra Dividend.—
The usracture have declared an extra dividend of 50c. a share on the conv. A and the common stock, in addition to the regular quarterly dividend of 45c. a share on the A stock, and 20c. a share on the common, all payable Nov. 1 to holders of record Oct. 20.
On Nov. 1 1927 an extra dividend of 20c. a share was paid on both of these issues.—V. 127, p. 1118.

265 Fourth Avenue Corp.—Depository.—

United Biscuit Co. of America.—To Increase Stock.—
The stockholders will vote Oct. 15 on increasing the authorized common stock (no par value) from 378,000 shares to 750,000 shares.—V. 127, p. 426.

United Cigar Stores Co. of America.—Proposed Acquis. See Bastian-Blessing Co. above.—V. 127, p. 1266.

United Reproducers Corp.—Co-registrar, etc.—
The Guaranty Trust Co. of New York has been appointed co-registrar and the Seaboard National Bank of the City of New York as co-transfer agent for 75,000 shares of class A stock, no par value, and 150,000 shares of class B stock, no par value.

United States Cast Iron Pipe & Foundry Co.—To Create New Preferred Stock.—
The stockholders will vote Oct. 8 on approving the creation of 600,000 shares of 1st pref. stock (voting) and 180,000 shares of 2nd pref. stock (non-voting), both of \$20 par value. See also V. 127, p. 123, 1691.

United States Steel Corp.—Number of Stockholders.—
There were 104.203 holders of common stock on the date of the closing of books for the September dividend. This was an increase of 5,867 from the June figure of 98,336 and compares with 97,000 a year ago.

The number of preferred holders at the closing of the books for the August dividend was 67,689, compared with 68,650 three months previous and 71,301 a year ago.—V. 127, p. 837, 1542.

Universal Pipe & Radiator Co.—Change in Personnel.— James D. Rhodes has been elected a Director and President, succeeding L. B Ladoux, who becomes first Vice-President. Albert C. Lehman, Irving F. Lehman and George P. Rhodes have also been elected directors.— V. 127, p. 563.

Valvoline Oil Co.—Debentures Called.—
The company has called for redemption Nov. 1 at 104 and int. \$34,500
15-year 7% gold debentures, due May 1 1937. Payment will be made at the Equitable Trust Co., trustee, 11 Broad St., N. Y. City.—V. 127, p. 1542.

Van de Kamp's Holland Dutch Bakers, Inc.-Initial

The directors recently declared initial quarterly dividends of \$1.62½ and 37½ cents per share, respectively, on the \$6.50 preferred and common no par stocks, payable Oct. 1 to holders of record Sept. 29.—V. 127, p. 427.

Vorcione Corp.—Initial Dividends.—
The directors have declared an initial quarterly dividend of 70 cents per share on the partic. preference stock, no par value, payable Nov. 15 to holders of record Nov. 1. (See also offering in V. 127, p. 970.)

Wardman Real Estate Properties, Inc.—Trustee.—
The Central Union Trust Co. of New York has been appointed trustee for \$11,000,000 1st mtge. & ref. gold bonds. See offering in V. 127, p. 1692.

Wayne Pump Co.—New Line of Pumps, &c.—
The company will make announcement late in November of an entirely new line of gasoline pumps covering the whole field from the cheapest hand-operated visible pump to the most elaborate power-operated, metermeasuring pump, according to President W. M. Griffin. The line of air compressors will be increased at the same time. Closely following this, announcement will be made of several new items to be added to Wayne's line, including an automatic air stand from which tires can be filled to any desired pressure, a new hoist for wrecking cars, a frame straightener by means of which an automobile frame of axle can be straightened without removing the body, and other devices of this nature, all of which can be sold to filling stations and garages, where the present sales organization is calling constantly. V. 127, p. 970.

Wahar & Hailbrower Line (& Subs) — Earnings

Weber & Heilbroner, Inc. (& Subs.).—Earnings.—
For the six months ended Aug. 31 1928, the company reports net profits of 3434,186 after depreciation but before taxes. This figure includes profit on sale of store lease.—V. 126, p. 4102.

Westfield Manufacturing Co.—Stocks Listed.—
There have been placed on the Boston Stock Exchange list temporary certificates for 11,000 shares (auth. 12,000 shares, par \$100) pref. stock with authority to add thereto, on notice of issuance and payment in full, 1,000 additional shares; and temporary certificates for 40,000 shares (total authorized issue) each share without par value common stock.

Company was organized in Mass. Aug. 20 1915 and is engaged in the manufacture and sale of bicycles and children's vehicles, with plants at Westfield, Mass.
Transfer agents, First National Bank, Boston, Mass., and Chase National Bank, New York. Registrars, State Street Trust Co., Boston, Mass., and Equitable Trust Co., New York.—V. 120, p. 716.

Wilcox-Rich Corp.—Merger Completed.—

Mass., and Equitable Trust Co., New York.—V. 120, p. 716.

Wilcox-Rich Corp.—Merger Completed.—

Merger of the Wilcox Products Corp. and Rich Products Corp., which was approved by stockholders of the two companies Sept. 18 was completed this week. The new company began operation Oct. 1 1928. On this date trading in the class A and class B stocks of the new company on the Detroit and Chicago Stock Exchanges began.

Trading in the stock of the two component companies ceased at the close of business Sept. 29 1928. The Detroit and Chicago Exchanges have ruled that the certificates of both companies will be good delivery for 10 days from that date.

Stockholders of the companies are being advised to exchange their present certificates for certificates in the Wilcox-Rich Corp. at the Guardian Trust Co. of Detroit or the Illinois Merchants Trust Co., Chicago.

Production in all of the plants of the combined company are at record capacity and it is expected that the last quarter will set a new record in the history of the company. Plans for re-arranging the facilities of the plants to bring about the operating economies made possible by the merger, are being put into effect.

Officers of the Wilcox-Rich Corp. are: C. H. L. Flintermann, Pres.; Sherwin A. Hill, V.-Pres.; Silas Coleman, Sec.; Allan B. Schall, Treas.; Charles B. McDonald, Asst. Sec. and Asst. Treasurer.

Directors.—Carl Breer, Raymond K. Dykema, George R. Fink, C. H. L. Flintermann, R. F. Flintermann, Edward P. Hammond, Carlton M. Higble, Sherwin A. Hill, M. A. Moynihan, Frank A. Nicol, Wm. T. Schmitt and Fred Zeder.—V. 127, p. 1692.

#### CURRENT NOTICES.

-NEW SUGAR MANUAL.-The firm of Farr & Co. of New York members of the New York Stock Exchange and specialists in sugar securities, are distributing the ninth annual edition of their "Manual of Sugar Com panies." Although primarily designed as a reliable reference handbook for investors, it should be equally valued by those interested in sugar, since it contains information and statistics of production, supply, prices and con-sumption throughout the world. An announcement regarding the publication says: "Features of its contents are the usual statistical reviews of 25 important Cuban, Porto Rican and American producing and refining companies, with synopses of some 85 other sugar companies of the United States, Cuba, Porto Rico, Hawaii, the Philippines, Santo Domingo, Mexico, Hawaii, Central and South America, Java, &c. The new Sugar Institute, Inc. is described with its Code of Ethics explaining its functions with respect to improving the business methods and conditions for the sugar refining companies of the United States. A brief survey of the Porto Rican sugar industry precedes a tabulation of all active sugar mills in that island, with name, location ownership and a 4-year record of individual output, including the last crop. All Cuban centrals are similarly tabulated, with an outline map of Cuba showing location of certain important American controlled mills. A useful reference feature including the table of world sugar crops by countries for the past 3 years, a colored map of the world showing sugar beet and cane growing regions with final figures of the 1926-27 crop, and a table of world consumption showing population by countries and totals for 1927, with per capita consumption by countries for the past three years. The beet sugar industry of the United States is also tabulated with factory capacities by companies and States. The Hawaiian sugar industry is outlined with a comparative 5-year statistical table of six re-resentative companies. In addition there are numerous statistics on sugar production, prices, refineries, weights, &c." The manual is distributed without charge or obligation and a copy may be obtained by request to Farr & Co., 90 Wall St., New York City.

-Investment capital will find its way into the business of financing nall loans just as it has been attracted to other recognized industries according to a study of the small loan industry which has just been completed by Lee, Higginson & Co. With reference to this subject they say: business of lending small amounts of money—of supplying the constant demand of many millions of honest and worthy people who need temporary financial help—is on the threshold of a great development. reformed and regenerated in half the States of the Union, in almost all the most important States, and private capital is flowing into it because it has shown itself to be a safe and profitable form of investment." In a booklet entitled "Lending Money to Small Borrowers" they deal with this and other features of the subject at length.

-Prescott, Wright, Snider Co., 918 Baltimere Ave., Kansas City, Mo., have published a twenty-four-page illustrated booklet in which is given a condensed history of the steady growth and development of their company and its expansion to meet the investment banking requirements of the Southwest. The original forerunner of the firm was established in Kansas City in 1885, being devoted entirely to the purchase and sale of real estate until 1887 at which time it was purchased by Herbert P. Wright, who at once changed the name of the company to the H. P. Wright Investment Co. and devoted all its energies to the purchase and sale of investment securities. In 1899 John A. Prescott established the firm of John A. Prescott & Co. and in 1915 Otho C. Snider joined the Prescott firm as a partner and the name was changed to Prescott & Snider. 1924 the two firms formed the organization of Prescott, Wright, Snider Co., as it operates to-day.

—The October number of "Foreign News and Comments," published by the Hibernia Bank & Trust Co., New Orleans, La., features an interesting article on the oyster industry in the State of Louisiana. The builetin dis cusses the subject from the standpoint of growing and canning oysters, and gives complete statistics up to 1928. In addition, a clear explanation is given of the important uses found for oyster shells. According to this article oysters are consumed in large quantities in Louisiana and Mississippi as an ordinary article of diet, but are regarded as luxuries in most other States. Only 20% of the total crop is apparently consumed in Louisiana, the remainder being canned and shipped to all parts of the Union and to Canada. In addition to discussing Louisiana oysters, the bulletin carries comments on business conditions in Austria, Greece, Australia and New

-Leo J. Filer, member of the Stock Exchange since November, 1924, and floor member for Manowitch Bros. & Filer, 50 Broadway, since the organization of that firm, opened his own Stock Exchange house on Oct. 1 in association with Albert Kastan, also a partner of Manowitch Bros. & Filer. The new firm will be known as Filer & Co., with offices at 39 Broadway, New York. Mr. Filer, who is 37 years old, started in Wall Street with Goldman, Sachs & Co. 20 years ago as office boy. His partner, Mr. Kastan, is well known in the foreign exchange and international banking

—Spencer Trask & Co. has added another partner in the person of William R. Basset, who resigned the Presidency of Miller, Franklin, Basset & Co. a nationally known engineering and accounting organization, to turn banker. Although Mr. Bassett is well known to many Wall Street houses for whom he and his former organization have made investigations and reports, both for underwriting and reorganization purposes, he is even better known nationally as one of the original Hoover engineers and economists.

-Morris, Brown & Co., members New York Stock Exchange, Pitts-burgh, Pa., announce the admission to their firm of Ogden M. Edwards, Jr., and Albert G. Wells as general partners and the retirement of Robert J. Davidson as a partner, both effective Oct. 1 1928. The firm is now composed of the following partners: James E. Brown, Ogden M. Edwards, Jr., and Albert G. Wells.

—Ward, Gruver & Co., members of the New York Stock Exchange, 20 Broad St., New York, have prepared an analysis of the Bethlehem Steel Corp. With present operations running ahead of the third quarter and a satisfactory outlook indicated for the rest of the year, the firm estimates of the year, the firm estimates of the year. mates that earnings per common share for 1928 should exceed the \$5.02 earned in 1927.

-The New York Stock Exchange firm of Newman Bros. & Worms has opened a Newark branch with offices at 25 Academy St., that city, under the joint management of Arthur and Leo Lissner. The firm also holds memberships on the New York Cotton, Coffee and Produce Exchanges, the Chicago Board of Trade, and the National Raw Silk Exchange, Inc.

—The current issue of the Granger Financial Review, published by Sulzbzcher Granger & Co., 111 Broadway, N. Y., devotes its four leading articles to discussions of the Public Service Corp. of New Jersey, Baltimore & Ohio RR., Erie RR. and the Timken Roller Bearing. Co.

—Haliburton Fales, Jr., has become a special partner and William I. Hay has become a general partner in the firm of Hartshorne, Fales & Co., members New York Stock Exchange and New York Curb market, 71 Broadway, N. Y.

—Henry K. Hardon, who has been associated with the foreign department of Redmond & Co. for many years, has just been appointed Manag of the investment department of the J. Henry Schroder Banking Corp.

—J. G. White & Co., 37 Wall St., New York, are distributing a statistical comparison of leading chain store organizations, showing the past progress, present position and prospects of 35 important companies in this field.

—The Philadelphia investment firm of Wall, Syren & Bressler has recently removed its offices from the Public Ledger Building to the new Fidelity-Philadelphia Trust Building, Broad and Walnut Streets, Philadelphia.

—McClure, Jones & Co., 115 Broadway, N. Y. have prepared a live-year comparative analysis and review of New York and Brooklyn banks, trust companies, title and mortgage companies.

—Henry Elgarten, formerly connected with the Bank of United States, has joined the sales department of S. Weinberg & Co., 2 Rector St., N. Y., specialists in bank and insurance company stocks.

—Spencer Trask & Co., 25 Broad St., New York, announces that William R. Basset, formerly President of Miller, Franklin, Basset & Co., has been admitted to general partnership in their firm.

—Frank C. Tiarks and Henry Tiarks, partners of J. Henry Schroder & o. of London, recently arrived for a short visit to the New York offices J. Henry Schroder Banking Corp.

—The firm of A. A. Durante & Co., Inc., with offices at 117 Liberty St., New York, has been formed to transact a general investment business specializing in aeronautical securities.

—Curtis & Sanger, members New York and Boston Stock Exchanges, 49 Wall St., New York., have issued a current quotation pamphlet of bank and insurance company stocks.

—Emil J. Roth has been admitted to the firm of Samuel Ungerleider & Co., members New York Stock Exchange, and several other leading exchanges, as a general partner.

—Palmer and Co., members New York Stock Exchange, 44 Wall St.. New York., have prepared an analysis of Bankers Trust Co. (New York) for distribution to investors.

—Norvin R. Greene, formerly with Tucker, Anthony & Co., has become associated with Rushmore & Greene, 15 William St., New York, specialists in Incorporated Investors.

—Goddard & Co., Inc., of New York and Pittsburgh announce, that Lee M. Crawford has become associated with them as Sales Representative in the Buffalo District.

—Parker, Robinson & Co., 120 Broadway, New York, are distributing a pamphlet discussing the growth and extensive operations of the United States Asbestos Co.

—Wellington & Co., members of the New York Stock Exchange, have prepared a list of securities recommended for the investment of institutional and private funds.

—Ralph B. Leonard & Co., 25 Broad St., N. Y., have prepared an lalysis of National Liberty Insurance Co. including a comparison with 10 her securities.

### COMMERCIAL EPITOME

[The introductory remarks formerly appearing here will now be found in an earlier part of the paper immediately following the editorial matter, in a department headed "INDICATIONS OF BUSINESS ACTIVITY."]

Friday Night, Oct. 5 1928.

COFFEE on the spot was steady without much business. Santos 4s, 23½ to 24c.; Rio 7s, 17½c.; Victoria 7-8s, 17c. Mild coffee met with a moderate demand. Fair to good Cucuta, 23¾ to 24c.; washed, 26¼ to 27¼c.; Colombian, Ocana, 22¼ to 22¾c.; Bucaramanga, natural, 24¾ to 25¾c.; washed, 27¼ to 27½c.; Honda, Tolima and Giradot, 27 to 27¼c.; Medellin, 28½ to 29c.; Mandheling, 36½ to 39c.; genuine Java, 34 to 35c.; Robusta washed, 20½c.; Mocha, 27 to 27½c.; Harrar, 25½ to 26c. Later spot trade was quiet with prices steady; Santos, 4s, 23¼ to 24c.; Rio 7s, 17½c.; Victoria 7-8s, 17c. Most of the cost and freight offers from Brazil at one time were unchanged or lower. Prompt shipment Santos Bourbon 2-3s were quoted at 23.80c.; 3s at 23½ to 23¾c.; 3-4s at 22.65 to 23.20c.; 3-5s at 22.40 to 22¾c.; 4-5s at 22.15 to 22.65c.; 5s at 21.80 to 22.45c.; 5-6s at 21½ to 22c.; 6s at 21.35c.; 6-7s at 21.05 to 21.35c. On the 4th inst. early cost and freight offers were steady in Brazil. For prompt shipment Santos Bourbon 2-3s were here at 24 for 25 at 22.26c. 21.35c. On the 4th list, early cost and freight others were steady in Brazil. For prompt shipment Santos Bourbon 2-3s were here at 24½c.; 3s at 23¾c.; 3-4s at 22.70 to 23½c.; 3-5s at 22.40 to 22¾c.; 4-5s at 22.10 to 22½c.; 5s at 21.90 to 22.30c.; 5-6s at 21.60 to 21.90c.; 6-7s at 20.60 to 22.30c.; 7-8s at 18.10 to 20½c.; part Bourbon 2-3s at 24.65c.; 3-4s at 23c.; 3-5s at 22.95c.; 5s at 21.80c.; Rio 3-5s colory at 18.60c 7-8s at 16½ to 17.10c.; 7s at 17.40c.; Rio 7-8s sold at 16½c. Victoria 7-8s for prompt shipment were offered at 16.20c. and 8s at 15.90c. and 8s at 15.90c.

and 8s at 15.90c.

To-day cost and freight offers from Santos were generally unchanged this morning, although the lower grades were in some instances down a little. The prompt shipment offers reported consisted of Bourbon 2-3s at 24½c.; 3s at 23 to 23.45c.; 3-4s at 22.70 to 23.90c.; 3-5s at 22.40 to 22.65c. Part Bourbon 3-4s at 23 to 24.15c.; 3-5s at 22½ to 22.70c.; 5s at 22c. Peaberry 4s at 22.35 to 22.55c.; 4-5s at 21.90 to 22.40c.; 5s at 21.80c.; 5-6s at 21.80 to 21.90. Rio 7s at 17.10 to 17.40c., and 7-8s at 16.40 to 17.15c. At New York 8,400 bags of Brazilian arrived from Paranagua. The total store stock on the 4th inst. was 278.019 bags and the total for the stock on the 4th inst. was 278,019 bags and the total for the United States, 325,462. There are afloat for the United States, 509,700 bags, making a total visible supply for this country of 835,162 bags which compares with 1,041,041 bags at the same time last year and 1,030,190 bags on Oct. 3 1926. The following resolution was adopted by the Board of Managers of the New York Coffee & Sugar Exchange: "Resolved that absorbing the stamp tax on contracts by customers by a commission house is a violation of the commission laws. Such tax must be charged to and collected from the customers." The New York Coffee & Sugar Exchanges puts the world's visible supply of coffee on Oct. 1 at 5,378,471 bags, a decrease for the month of 136,808 bags. The visible supply on Sept. 1 was 5,515,279 bags and on Oct. 1 last year, 4,621,724 bags.

Futures on the 1st inst. were irregular within narrow limits. Rio ended unchanged to 14 points higher and Santos 4 to 10 Rio ended unchanged to 14 points higher and Santos 4 to 10 points higher. Rio cables were rather weaker closing firmer, however. A small advance occurred in exchange on London; sales were 5,500 bags of Rio, 4,500 of Santos. The outstanding interest in Dec. has recently been considerably reduced. Prices for Rio and Victoria are the only ones that are at all approximating New York Exchange quotations. On the 2nd inst. Santos declined 4 to 10 points net with sales of 9,000 bags and Rio unchanged to 10 points higher with sales of 10,750 bags. Rio cables were firmer early though London Exchange was slightly lower. It was remarked that the spot demand for coffee had shown a slight improvement the spot demand for coffee had shown a slight improvement with prices unchanged for Santos and a shade higher for Rio and Victoria. The market continued to be in the hands of the Brazilian Committee of Defense and so long as this condition lasts, opinions as to the future of the market called useless. Under existing conditions prices are criticized as unduly high but the fact remains that the coffee trade of as unduly high, but the fact remains that the coffee trade of the world is powerless as against the committee, it is said. Recently there has been considerable switching into more distant months. Yet the prevailing quotations for contracts are noticeably below the price at which coffee can be bought and the New York supply of Rio and Victoria coffee is small, the only coffees anywhere near Exchange prices. Now that Sept. liquidation is over, the next active month is Dec. in which some think there is a large interest to be liquidated. This interest, however, some believe, has been much reduced Brazilian traders it seems have pretty well liquidated their holdings in both contracts. To-day Santos futures closed 7 to 15 points higher with sales of 11,000 bags; Rio was 8 to 15 points higher with sales of 20,000 bags. Final prices show an advance on Rio of 27 to 29 points for the week and on Santos of 11 to 20 points.

Rio coffee prices closed as follows:

Spot unofficial 17½ | Mar.....15.85@15.87 | July .....15.10@ ..... Dec.....16.35@ .... | May.....15.53@ .... | Sept.....14.80@ nom

Santos coffee prices closed as follows:

Spot unofficial \_\_\_\_\_ Mar \_\_\_\_\_ 21.44@ nom July \_\_\_\_\_\_ 20.75@20.80 Dec \_\_\_\_\_ 22.00@ \_\_\_\_ May \_\_\_\_ 21.00@ nom Sept \_\_\_\_\_ 20.33@20.34

SUGAR.—Prompt Cuban raws were quiet early in the week; 1,800 tons did, it seems, sell out of store at 3.93c., equal to about 2 5-32c. c. & f., and on the 1st inst. buyers seemed inclined to pay that price and offerings were suddenly withdrawn at that price. Havana cabled that President Machado had said that grinding on the new crop will begin on Jan. 1 and that later he will announce whether or not the Export Corporation will be continued next season. Futures on the 1st inst. ended 2 points lower to 2 higher. Futures on the 1st inst. ended 2 points lower to 2 higher, with sales of 32,400 tons. Havana cables reported further sales of 52,400 tons. Havana cables reported further sales of browns to points west of Suez at as high as 70,000, while other reports said 30,000 to 35,000 tons had been sold for export to Europe exclusively at 10 guilders, or 2 5-32c. c. & f. New York for Cubas. Refined was in fair demand at 5.35c. to 5.40c. with prompt delivery required in most cases. Receipts at Cuban ports for the week were 35,918 tons, against 38,880 in the same week last year; exports 87,332 Receipts at Cuban ports for the week were 35,918 tons, against 38,889 in the same week last year; exports, 87,332 tons, against 69,899 tons in the same week last year; stock (consumption deducted), 629,502 tons, against 671,952 last year. Of the exports, 24,903 went to Atlantic ports, 19,029 to New Orleans, 63 to interior United States, 9,237 to Galveston, 208 to Central America, 6,328 to Canada and 27,564 to Europe. Receipts at United States Atlantic ports for the week were 53,705 tons, against 48,343 in previous week and 49,615 in same week last year; meltings, 65,000 tons, against 61,000 in previous week and 53,000 same week last year; importers' stocks, 247,397, against 260,122 in previous week and 133,843 same week last year; refiners' stocks, 95,728. against 94,298 in previous week and 49,621 last year; 728, against 94,298 in previous week and 49,621 last year; total stocks, 343,125 tons, against 354,420 in previous week

and 183 464 last year.

Futures on the 2d inst. were unchanged to 1 point net lower with sales of 28,000 tons. London was firm, but European hedge selling was a feature. Cuban interests were understood to be selling much. Many fear a renewal of hedge selling. It is the shadow on the market dial. Of prompt Cuba 21,000 bags sold on the 2d inst. at 25-32c. In general refiners bid only 2½c. London cables were steadier with offerings of centrifugal and Javas at 10s. 3d. c.i.f. Java was firmer. Scattered rains in Germany, France, Poland and Czechoslovakia prevailed, but this had no great effect. Beets are now beginning to be harvested. However, rain may be more detrimental than otherwise, particularly if it should be followed by severe frost. Later 1,000 tons ex-store sold at 3.89c. A sale of 3,750 tons of Cuba for October loading at a south side port was to a Canadian refiner at 2.18c. c.i.f. St. John, N. B., which is equivalent to about 25-32c. c.&f. New York. On the 2d inst. Dr. Mikusch reported scattered rains in Germany, France and Poland and more rain in Czechoslovakia. The comment here is that it is too late now for weather developments to help the crop which is about to be harvested. If anything, rain would be more harmful than otherwise, particularly if it should be followed by heavy frost. A rumor was current European hedge selling was a feature. Cuban interests were it should be followed by heavy frost. A rumor was current on the 3d inst. that Japan had bought 50,000 tons of Cubas for October-November shipment, according to one account, and for January-March shipment, according to another, at 1.94c. f.o.b. Havana wired that it knew nothing about such a transaction. On the 3d inst. 66,000 bags sold here at 21/8c. c.&f. or 3.89c. delivered.

London cabled that there has been no confirmation there of reported sales of Cubas to Japan. But another cable re-ported that Java has cabled that 50,000 tons of Cubas for ported that Java has cabled that 50,000 tons of Cubas for Oct.-Nov.-Dec. shipment have been sold at 1.94c. f.o.b. Cuba supposedly for resale to China and Japan. Hamburg cabled: "The market was steady at the decline. Trade demand improving. Weather favorable for harvesting." The Sugar Institute, Inc., gave the total melt of 15 United States refiners up to and including the week ending Sept. 22 at 7,581,561,392 lbs. against 8,552,767,509 lbs. for the same period last year. Refined was 5.35 to 5.40c. with some increase in demand. Samarang, Java cabled that 30,000 tons have been sold by the Syndicate West of Suez. A cable stated that these sugars being of No. 17 Dutch Standard, are not suitable for the United Kingdom, presumably on account of the question of duty. Another cable reported on account of the question of duty. Another cable reported on Oct. 1 sales of 70,000 tons of Java browns for shipment exclusively to Europe at 10 guilders. Of this quantity, the cable says, 30,000 to 35,000 tons have been placed with

refiners, the remainder with operators.

Some say that the weight of supplies that caused the recent decline may be traced to two main causes: (1) The heavy holdings of invisible supplies in 1925, 1926 and part of 1927 all over the world as a result of an abnormally large increase

in the 1924-25 production. (2) The further increase in protected crops and Java. The first reason is called by far the more potent. In this country consumption, some say, has thus far been extremely disappointing. Meltings continue to run about 450,000 tons below those of last year, and although deliveries from refiners practically counterbalance this deficiency, still the expected so-called normal increase in consumption of about 3½% per annum has not taken place. But the very fact that the trade has used up all invisible stocks and are rigidly adhering to a hand-to-mouth regime of buying, is called a bullish factor, for it could lead at any time to a precipitate purchasing movement that would force all refiners into the market. London cabled that an additional cargo of muritous sugars had been sold to the United Kingdom at 10s. with sellers asking 10s. 1½d.; 35,000 tons more of Javas for Oct.-Mar. shipment sold at 10s. 3d. to Holland, supposedly browns. Whether it was new business some doubted.

Some say that the situation at the moment is not very encouraging. Yet with cost and freight sugar at 21/sc. landed in New York they think the short side is hazardous. Later sales were 10,000 bags Porto Ricos second half October and 2,000 tons Cuba out of store both at 3.89c. delivered, also, 1,000 tons of Cubas for October shipment at 2c. f. o. b. The c. & f. quotation was 2½ to 25-32c. A rumor that 10,000 tons of Cuban raws had been sold for Octoberthat 10,000 tons of Cuban raws had been sold for October-November shipment to Europe at 10s. 1½d. appeared to be traceable to the notification to the Sugar Export Commission on Tuesday by the Cuba Trading Co. that it had sold on Monday 10,000 tons at 2.02c. f. o. b. Cuba. This sugar, it was understood was resale for October-November shipment to the United Kingdom at 10s. 1½d. c. i. f. The stock of raw sugar in licensed warehouses to-day is 1,628,348 bags, against 1,740,084 bags at the end of last week and 2,367,218 its highest point on May 26th. To-day prices ended 2 points higher with sales of 17,200 tons. For the week they show little change, i. e. unchanged to 1 higher. Prices they show little change, i. e. unchanged to 1 higher. Prices closed as follows:

LARD on the spot was tending downward late last week. Prime Western 12.60 to 12.70c. in tierces c. & f. New York; refined Continent, 1378c., delivered New York; South America, 14½c.; Brazil, 15½c. On the 3d inst. prices closed unchanged to 7 points lower. Nearby deliveries were the strongest. Yet hogs were 10 to 15c. higher, owing, it is said to smaller arrivals. Liverpool was unchanged to 3d said, to smaller arrivals. Liverpool was unchanged to 3d. lower. Hog receipts at Western points were 64,800, against 97,200 last week and 73,100 last year. Deliveries on October bellies totaled 150,000 lbs. To-day futures closed 2 to 3 points lower with cash demand only moderate. Commission between both bought and cold. Packers did year, little New houses both bought and sold. Packers did very little. New York cleared 106,000 lbs. of lard yesterday. Western hog receipts were 62,000, against 45,000 a year ago. Chicago expects 4,000 to-morrow. Final prices show an advance on December of 10 points but a decline on January of 3 points.

PETROLEUM.—Gasoline was in better demand for export. Stocks abroad are believed to be at a low ebb, owing

to the heavy summer consumption. Gulf prices were steady despite the easier tendency of other markets. line met with a better demand. Far Eastern consumers are purchasing more freely. Here the market was easier. United States Motor gasoline offered freely at 11½c. refin-Yet some refiners quoted 11 3/4c. refinery and 12 3/4c. in tank cars. Tank wagon prices were fairly well maintained. Kerosene was firm with stocks small and consumption increasing. Deliveries against contracts were large. Locally, water white 9c. refinery; in tank cars delivered to nearby trade, 10c. Fuel oils were steady. Bunker oil firmer at \$1.05 refinery for Grade C.

[Tables of prices usually appearing here will be found on an earlier page in our department of "Business Indications," in an article entitled "Petroleum and Its Products."]

RUBBER on Sept. 29th was quiet, closing generally unchanged, though at one time July advanced 10 points. Traders here and in London are believed to be against the market, owing to the Malayan surplus. Estimates of post restriction stocks in the East are increasing. On August 31st last the stock was 65,052 tons of which 52,905 tons were on estates and 12,147 were in dealers hands. On July 31st they were 9,055 tons. At the same time the consumption is well maintained though usually at this time it decreases. Factories are busy with replacement business and operating at a high rate. On the 1st inst. one lot of 312½ tons or 125 lots of December sold at 18.50c. though earlier in the day lots of December sold at 18.50c. though earlier in the day December was down to 18.20c. a decline of 10 points. The closing of December on that day was 18.40 to 18.50c., or at least 10 points net higher than at the previous closing. Pool interests were said to be buying various months. Akron Pool interests were said to be buying various months. Akron is running at or close to full capcity. On the 1st inst. prices closed with October, 18.20 to 18.30c.; December, 18.40 to 18.50c.; January, 18.20 to 18.30c.; March, 18.40c.; May, 18.50 to 18.60c. and July 18.60c. BB contracts: October, 17.80c.; November, 17.70 to 17.90c.; December, 17.70c.; January, February, March, April, May, June, July, August, 17.60c.; September, 17.70c.; spot, 18c.

July, August, 17.60c.; September, 17.70c.; spot, 18c.
On the 2d inst. liquidation sent prices down after an early rise of 10 to 20 points. The sales were 255 lots of 637 tons. London advanced ½ to 3-16d. with Malayan exports in September good. Some outside prices were ½ to ½c. higher. On the 2d inst. prices ended at 18.40 to 18.50c. for December, 18.30 to 18.40c. for January and 18.40 to 18.50c. for March. BB contracts: October, 17.90c.; November, 17.80c.; December, 17.80c.; January, 17.70c., February, March, April, May, June, July and August, 17.17c.; spot, 18.20c. In Singapore on Oct. 1 prices were unchanged to 1-16d. higher. October, 83/6d.; Jan.-Mar. and April-June, 8½d. On the 3d inst. prices ended 10 points off to 10 up with sales of 157 lots or 392 tons. Outside business was only fair and that was towards the close. Central, Western factories are calling for prompt deliveries. November ended on the 3d inst. at 18.20c.; December at 18.40c.; January, 18.20c.; March, 18.30 to 18.40c.; July, 18.60c. BB contracts: October, 17.90c.; November, 17.70 to 17.90c.; December, 17.70c.; January, February, March, April, May, June, July, August, September, 17.60; spot, 18.10c. Out side prices: Smoked sheets, spot and October, 18½ to 18½c.; spot first latex crepe, 19¼ to 19½d.; clean tnin brown crepe, 18 to 18¼c.; specky brown crepe, 18c.; rolled brown crepe, 18 to 163/4c.; No. 2 amber, 18¼ to 18½c. Paras, upriver, fine, spot, 19¼ to 19½c.; coarse, 13¼ to 133/4c.; Acre fine spot, 19¾ to 20c. Brazil, washed dried fine, 26 to 26¼c. Caucho Ball-Upper, 12 to 12¼c. London on the 3d inst. fell 1-16d. Spot and October, 8 9-16d.; November, 85/8d.; December, 8 11-16d.

On the 4th inst. New York rose 10 to 20 points with sales of 229 lots. The Malayan companies produced 18,097,000 On the 2d inst. liquidation sent prices down after an early

fell 1-16d. Spot and October, 8 9-16d.; November, 8 d.; December, 8 11-16d.

On the 4th inst. New York rose 10 to 20 points with sales of 229 lots. The Malayan companies produced 18,097,000 lbs. against 17,821,000 lbs. in July, 15,597,000 in June, 13,-444,000 in May and 8,428,000 in April of this year. The same companies had an outturn of 13,060,000 in August last year. Production from November 1927 to August 1928 is placed at 127,377,000, against 139,612,000 for the same period of 1927. New York ended on the 4th inst. with Dec. 18.60c.; Jan., 18.40 to 18.50c.; March, 18.40 to 18.50c.; March, 18.40 to 18.70c.; July, 18 to 18.70c.; BB contracts: Oct., 18.10c.; Nov. and Dec., 17.90c.; Jan., Feb., March, April, May, June, July, Aug. and Sept., 17.80c.; spot, 18.36c. Outside prices for smoked sheets, spot, Oct. and later, 183/8 to 185/8c.; spot first latex crepe, 191/4 to 191/2c.; clean thin brown crepe, 18 to 181/4c.; rolled brown crepe, 163/8 to 167/8c.; No. 2 amber, 181/8 to 183/8c.; No. 3, 177/8 to 181/8c.; No. 4, 175/8 to 177/8c. Paras, upriver fine spot, 191/4c. to 191/2c.; coarse, 131/4 to 133/4c.; Acre fine spot, 193/4 to 20c. London on the 4th inst. was 1/8d. up; spot and Oct., 8 11-16d. to 83/4d.; Nov., 83/4 to 8 13-16d.; Dec., 8 13-16d. to 83/8d.; Jan.-March, 9 to 91/8d. Singapore 1-16d. off on the 4th; Oct., 81/8d.; Jan.-March and April June, 83/8d. To-day prices advanced 10 to 30 points with sales of 356 lots. They end 40 to 50 points higher than a week ago. week ago.

HIDES.—A fair demand prevailed for frigorifico River Plate hides and the recent sales, mostly to Russia, were 39,000 Argentine steers at 22 9-16c. to 23 %c. American tanners bought only to a small extent. Unsold stocks of Uruguayan steers are small, amounting to but 4,000 hides.

Packer hides have been quiet after recent business at 24c. for native steers, 22½c. for butt brands and 22½c. for Colorados. Country hides were quiet. Common dry hides were dull. Common dry Cucutas, 35c.; Orinocos, 34½c.; Maracaibo and Central America, 33½c.; La Guayra and Savanillas, 33c.; Santa Marta, 34c.

OCEAN FREIGHTS.—The demand for tonnage was moderate.

Moderate.

CHARTERS included tankers San Pedro, clean, Oct., to Boston, 78c.; time, prompt, west coast South America, round, \$1; time, West Indies round, prompt, \$1.44; three months, \$1.92½; six months, \$1.46; two or three months transatlantic, about \$1.07½; grain, 32,000 qrs., Montreal, Nov. 5-20, to Mediterranean, 18c., 18½c. and 19c.; same, last half Oct. to three ports Sweden, 20c.; coal, Hampton Roads to Santos, \$3.75; grain, Montreal to Antwerp or Rotterdam, 14½c., or Hamburg or Bremen, 15½c., Nov. 520; 25,000 qrs. same, first half Nov., to Havre, Dunkirk, 16c. Tankers; Dirty, Gulf to Banes, 27c., Nov. Coal, Hampton Roads, early Oct. to St. Thomas, \$1.75; nitrate, Chile, Oct., to Bordeaux-Hamburg range, 26s.; lumber, 1,250 standards, Pictou or Pugwash to West Britain-East Ireland, 68s. 9d.; one, two discharges, 71s. 3d.; grain, Montreal to Genoa-Naples, 17½c., Nov. 1-10; 48,000 qrs. Montreal spot to Genoa, 15½c., one-third oats guaranteed plus option up to full oats at 2c. more; time, West Indies prompt, round, \$1.75; same \$2.; scrap prompt.

COAL.—Bunker prices were firmer; rates were also up. Noteworthy too, was the fact that for the first time in nearly 18 months bituminous stocks in the United States and Canada gained slightly in August. The total of bituminous and anthracite coal on Sept. 1st was 40,000,000, against 39,415,000 on July 31st, and 59,179,000 on Sept. 1 1927. August bituminous output increased 3,400,000 tons, and hard coal 1,400,000 tons. August consumption stood at 33,890,000 or something larger than in June. Pottsville, Pa. wired that for the first time since 1927, 39 collieries of the Philadelphia & Reading Coal & Iron Co. and independent companies have begun operations on a full time schedule. Later prices were reported unchanged or higher. Standing stocks of domestic anthracite were selling at firm prices. Buckwheat No. 1 \$3, or a little less. No. 2, \$1.75, and No. 3, \$1.35. Hampton Roads steamer loadings on Tuesday totalled 33,178 tons while on Wednesday three New York terminals dumped 369 cars of bituminous coal, the largest of late of tidewater bituminous.

TOBACCO has been as a rule in moderate demand, but a larger trade in Porto Rican tobacco is reported, the demand whetted by the damage by the recent great storm in Porto Rica. None but the first reports of a loss of half the crop were greatly exaggerated. But it reached, it appears, several millions of dollars. Caguas, Cayey and San Juan suffered the most. In the interior some damage was done, but how much is not clear. Havana receipts last week were up to 26,540 bales, an increase over the previous week of 2,200 bales. Pennsylvania broadleaf filler, 10c.; binder, 20 to 25½c.; Porto Rico, 60 to 80c.; Connecticut No. 1, sec. 1925 crop, 65c.; seed fillers, 20c.; medium wrappers, 65c.; dark wrappers, 1925 crop, 40c.; Wisconsin binders, 25 to 30c.; Northern, 40 to 45c.; Southern, 35 to 40c.; New York seconds, 35 to 40c.; Ohio, Gebhardt binder, 22 to 24c.; Little Dutch, 21 to 22c.; Zimmer Spanish, 30c.; Havana, first Remedios, 90 to 95c.; second Remedios, 70 to 75c.

COPPER was quiet. Export demand was better than that for domestic account. No large domestic business is expected until after election, by which time producers, it is believed, will be in the market for January and February requirements. Prices remained at 15½c. c. i. f. Europe and 15½c. Connecticut Valley. Italy was the chief buyer of copper last week. France, England and Germany were good buyers. The Lake district reported deliveries below normal. In London on the 2nd inst. spot, spot standard was unchanged at £24 12s. 6d.; futures fell 2s. 6d. to £65; sales 50 tons spot and 150 futures; electrolytic unchanged at £71 5s. for spot and £71 15s. for futures. In London on the 3rd inst. standard fell 2s. 6d. to £64 10s. for spot and £64 17s. 6d. for futures; sales 600 tons futures; electrolytic unchanged £71 5s for spot and £71 15s. for futures. Later copper was quiet firm at 15¼c. for electrolytic. On the 4th inst. London spot standard advanced 1s. 3d. to £64 11s. 3d.; futures up 2s. 6d. to £65; sales 100 tons spot and 400 futures; electrolytic £71 5s. spot and £71 15s. futures.

TIN was quiet and tending lower. Buying was confined to 5 and 10 ton lots. On the 3rd inst. sales approximated not more than 75 tons. Prices on that date closed at 49¼ for spot and Oct., 49½c. for Nov., 49c. for Dec. and 48½c. for Jan. In London on the 2nd inst. spot standard dropped £3 15s. to £224, futures fell £2 12s. 6d. to £220 17s. 6d.; sales 50 tons spot and 600 futures; Spot Straits declined £3 5s. to £224 10s.; Eastern c.i.f. London off £1 5s. to £225 10s. on sales of 150 tons. In London on the 3rd inst. spot standard declined £1 12s. 6d. to £222 7s. 6d.; futures fell 12s. 6d. to £220 5s.; sales 50 tons spot and 500 futures; spot Straits off £1 17s. 6d. to £222 12s. 6d.; Eastern c. i. f. London fell 5s. to £224 5s. on sales of 200 tons. Later trade was slow and prices little changed. Spot Straits 49¾ to 49½c.; Oct., 49¼ to 49¾c.; Nov., 49½ to 49½c.; Dec., 49½c. and Jan., 49½ to 49c. London on the 4th inst. advanced 2s. 6d. for spot to £222 10s.; futures up £220 7s. 6d.; sales 20 tons spot and 280 futures. Spot Straits up also 2s. 6d. to £222 15s.; Eastern c. i. f. London off 10s. to £223 15s. on sales of 175 tons.

LEAD was in good demand, especially for October delivery. Corroders were good buyers at one time. Prices were steady at 6.32½e. East St. Louis for October and 6.35c. for November and December. New York was 6.50c. In London on the 2d inst. prices fell 3s. 9d. to £21 18s. 9d. for spot and £21 15s. for futures; sales, 150 tons futures. On the 3d

inst. London dropped 2s. 6d. to £22 1s. 3d. for spot and £21 17s. 6d. for futures; sales, 350 tons spot and 400 futures. Later New York was firm but quiet if there was a good trade at the West. Prices were firm at 6.50c. New York and 6.32½c. East St. Louis. London advanced on the 3d inst. and fell back on the 4th 2s. 6d. to £21 18s. 9d. for spot and £21 15s. for futures; sales, 100 tons spot and 300 futures.

ZINC buying has been of a hand-to-mouth nature. The price was 6.25c. East St. Louis. Some inquiry for high grade line for 1929 delivery was reported. In London on the 2ns inst. prices were unchanged at £24 1s. 3d. for spot and £24 7s. 6d. for futures; sales, 200 tons futures. On the 3rd inst. London advanced 1s. 3d. to £24 2s. 6d. for spot and £24 8s. 9d. for futures; sales, 450 tons spot and 150 futures. Later trade was quiet at 6.25c. East St. Louis. September output is not believed to have been excessive. In London on the 4th inst. spot fell 2s. 6d. to £24; futures down 3s. 9d. to £24 5s.; sales, 450 tons spot and 900 futures.

STEEL.—Railroads are buying rolling stock and rails to some extent. Not on a large scale, but the demand is there and it is hoped that before long it will increase. Steel plates are wanted for locomotive building. Tin plates it is suggested may not be reduced in price; pig tin has recently been advancing; the gap between tin and tin plate prices has thus been reduced somewhat. Yet the tin plate output this year has reached a new peak. In the Chicago district they say the steel capacity is being kept at 80% with independents even at 85% against 80% recently. The largest business there is with the railroads and contractors. Large orders are expected for track accessories. The automotive demand continues. Makers of farm implements are buying. Plans for a heavy building program in the Chicago district call for materials. It is told in the trade later that as the fourth quarter opens the orders on hand are large, deliveries stretch further ahead and prices grow firmer. Backlogs are not insignificant; some mills are a month to a month and a half in arrears on deliveries of bars and some kinds of sheets. That is one side of the matter. Pittsburgh on the other hand says it is too soon to attempt to gauge the influence of prices on the output. Some there frankly admit that since Sept. 15 trade has slackened. Scrap steel is reported steadier. August exports of steel and iron were 75,000 tons. Railroad demand for steel is not as large as could be desired. For 9 months freight car orders reached only 24,636, against 44,496. On the other hand makers of light steel and manufacturers of sheets are working at 90%. Pipe trade at Youngstown is good.

PIG IRON.—New York sales last week were estimated at about 7,500 tons. Fourth quarter buying was considered as about finished. Moderate sales are to be expected to small consumers. Filling in trade will take place. But usually well informed people do not look for anything like a brisk trade until the first quarter buying begins. Before the year closes, however, many may be disposed to buy. Some consider the market so firm that buyers will gain nothing by waiting. Specifications in the meantime are so brisk that some furnaces are hard put to it to keep up with them. Buyers in some cases are heard from promptly if there is any delay. Furnace stocks include, it is intimated, a certain proportion of the less desirable grades. The real supply is therefore smaller than it seems to be at the first glance. The melt in New York, New Jersey and Connecticut is increasing. Coke requisitions are large. It is stated that British makers of ferromanganese have raised the price \$5 per ton to \$110 duty paid. A cargo of 3,000 tons of Dutch iron for Bridgeport, it seems, has arrived. No. 2 foundry plain eastern Pennsylvania nominally \$20; Buffalo, \$17 to \$17.50; Virginia, \$20 to \$20.50; Birmingham, \$16.25; Chicago, \$18 to \$18.50; Valley, \$17 to \$17.50; Cleveland delivered, \$17 to \$18; basic Valley, \$16.50 to \$17; Eastern Pennsylvania, \$18.75 to \$19.25.

SILK closed 2 to 4 points higher to-day with sales of 2,145 bales.

WOOL.—Boston reported a better tone. They think that London sales marked the end of any decline. Business, however, was only moderate. Ohio & Penn. fine delaine, 47 to 48c.; ½ blood, 50 to 51c.; ¾ blood, 54 to 55c.; ¼ blood, 55c.; Territory, clean basis, fine staple, \$1.12 to \$1.15; combing, \$1 to \$1.05; fine medium clothing 95c. to \$1; ½ blood staple, \$1.10; ¾ blood, \$1.02 to \$1.07; ¼ blood, 98c. to \$1; Texas, clean basis, fine 12 months, \$1.08 to \$1.10; fine 8 months, 98c. to \$1.; fall, 95c. to 97c.; Pulled, scoured basis, A supers, \$1.05 to \$1.10; B, \$1 to \$1.05; C, 85 to 90c.; Domestic mohair original Texas, 65 to 70c. Australian clean basis in bond, 64 to 70s., combing super, 97c. to \$1.00; 64 to 70s., clothing, 88 to 90c.; 64s. combing, 93 to 95c. In London on Sept. 28th, offerings 9,000 bales and sold to British and Continental buyers at recent prices. Cape cross-bred slipes were frequently withdrawn on firm limits. New Zealand greasy cross-breds best 58s. realized 25½d.; 56s, 24d.; 50s, 22½d.; 48s, 19½d. and 46s, 17½d.; Details: Sydney, 314 bales; scoured merinos, 36½ to 38d.; greasy, 26½ to 30d. Queensland, 632 bales, scoured merinos, 35½ to 37½d.; greasy, 24½ to 20d. Victoria, 217 bales; scoured merinos, 35½ to 37½d.; greasy, 24½ to 20d. Victoria, 217 bales; scoured merinos, 35½ to 37½d.; greasy, 24½ to 20d. West Australia, 2.128 bales; greasy merinos, 13 to 24½d. New

508, 24d.; 508, 22½d.; 488, 19½d. and 408, 11½d.; Details: Sydney, 314 bales; scoured merinos, 36½ to 38d.; greasy, 26½ to 30d. Queensland, 632 bales, scoured merinos, 25 to 43½d.; greasy, 15½ to 20d. Victoria, 217 bales; scoured merinos, 35½ to 37½d.; greasy, 24½ to 27d. West Australia, 2,128 bales; greasy merinos, 13 to 24½d. New Zealand, 4,197 bales; scoured merinos, 35 to 37d.; greasy, 18 to 23d.; scoured crossbreds, 18½ to 39½d.; greasy, 12½ to 25½d. Cape, 329 bales; scoured merinos, 34½ to 37d. Falklands, 1,357 bales; greasy crossbreds, 13½ to 21½d. New Zealand crossbred slipes, 16 to 27d., the latter for halfbred lambs. The auction resumes on Monday and is scheduled to end on Thursday, Oct. 4.

In London on October 1st offerings 11,000 bales, half New Zealand slipe and crossbred. Less support by Continental buying on firm limits; many items withdrawn. Australian merinos comprised most of the bales withdrawn and Queensland medium greasy qualities were also frequently taken out of bidding for the same reason. The price tone was easier with the exception of New Zealand greasy crossbreads. New Zealand greasy crossbreads. New Zealand greasy crossbreads, best 58s realized 27d.; 56-58s, 25½d.; super 56s, 24d.; 48s, 19½d.; 46-48s, 18d.; 46s, shabby 13,46d, to 16,46d. Details:

was easier with the exception of New Zealand greasy cross-breads. New Zealand greasy crossbreds, best 58s realized 27d.; 56-58s, 25½d.; super 56s, 24d.; 48s, 19½d.; 46-48s, 18d.; 46s, shabby, 13½d. to 16½d. Details:

Sydney, 699 bales; scoured merinos, 30 to 35d.; greasy, 24½ to 25½d. Queensland, 2.867 bales; scoured merinos, 25 to 42½d.; greasy, 14 to 22½d. Victoria, 638 bales; scoured merinos, 34 to 39½d.; greasy, 25½ to 26½d.; scoured crossbreds, 18 to 32d. West Australia, 570 bales; greasy merinos, 21 to 24¼d. New Zealand, 6,116 bales; greasy merinos, 14¾ to 21d.; greasy crossbreds, 13½ to 27d. New Zealand halfbred lambs brought 15½ to 24d. A lot of 229 bales of Cape wools was withdrawn.

In London on October 2nd offering 8.885 bales chiefly

In London on October 2nd offering 8,885 bales chiefly Australian greasy and scoured merinos. Continent again brought freely and competing with the British buyers on desirable grades. Withdrawals were on a much smaller scale and prices continued irregular. New Zealand 711 bales, mostly scoured crossbred pieces, realized 28d.; medium conditioned slipe crossbred best, 18½c. Details:

Sydney, 1,655 bales; greasy merinos, 17 to 29d. Queensland, 2,369 bales; scoured merinos, 26½ to 39½d.; greasy, 13½ to 25d. Victoria, 1,518 bales; scoured merinos, 21½ to 39½d.; greasy, 22½ to 29½d.; scoured crossbreds, 18½ to 30d. South Australia, 1,385 bales; scoured merinos, 20 to 32½d.; greasy, 17 to 22½d.; scoured crossbreds, 18 to 28d. West Australia, 882 bales; greasy merinos, 14 to 24½d. A lot of 337 bales of Cape wools was withdrawn.

In London on Oct. 3 offerings 9,430 bales, including much greasy merino, best, which was in good demand. Inferior grades were often withdrawn at easier rates. New Zealand selection mostly slipe, failed to satisfy owners' limits and resulted in many withdrawals. Best half-bred lambs sold at 24½d. The present series closed to-morrow. Details:

Sydney, 2,340 bales; scoured merinos, 26 to 33d.; greasy, 12 to 26\forall d. Queensland, 1,240 bales; scoured merinos, 14 to 22\forall d.; greasy, 30 to 41d. Victoria, 1,716 bales; scoured merinos, 16\forall to 26\forall d.; greasy, 28\forall to 39d.; scoured crossbreds, 22\forall to 37\forall d.; greasy, 17\forall to 20\forall d. South Australia, 380 bales; greasy merinos, 20\forall to 23d. West Australia, 534 bales; greasy merinos, 20\forall to 23d. New Zealand, 3,032 bales; greasy crossbreds, 14 to 23\forall d. Victoria greasy comeback sold at 19\forall to 26\forall d. A lot of 191 bales of Cape wools was withdrawn.

In London on Oct. 4 auctions closed with offerings of 7,800 bales, making the total for the series approximately 140,000 bales. British bought 35,500 bales; Continent, 55,500 bales and America, 1,000 bales. Withdrawals, 48,000 bales and included 13,000 unoffered. Values on the balance were 10d. to 15d. below the July sales. Both merinos crossbreds and best New Zealand greasy crossbred 58s realized 26½d.; 17s bales of 50s, 46 to 48d.; 16 bales of 46s, 15d. The next series will open Nov. 20. Details:

Sydney, 1,263 bales; scoured merinos, 30½ to 34½d.; greasy, 20 to 25d. Victoria, 623 bales; scoured merinos, 30 to 39½d.; greasy, 24 to 26½d. Queensland, 714 bales; greasy merinos, 15½ to 19d. Tasmania, 114 bales; greasy merinos, 22 to 26d. New Zealand, 1,781 bales; greasy crossbreds, 14 to 26½d. Cape, 270 bales; greasy merinos, 12 to 17d. Puntas. 2,996 bales; greasy crossbreds, 13¼ to 23d. New Zealand halfbred lambs slipe, 16 to 26d. Puntas slipe, 23 bales, realized 12¾ to 23½d.

Sydney decided to resume sales on Tuesday, Oct. 2 according to London advices. Several sales scheduled for the past fortnight had to be postponed because of the dock workers' strike. Melbourne, Victoria, cabled Oct. 2 that Maritime and Transport Workers' Unions had decided to fight the shipowners and extend the present port strike, now only partially effective. At Melbourne on Oct. 3 there was a representative offering. Demand good; prices firm. The quantity of wool entering into manufacture in August at 550 mills operated by 490 manufacturers was 45,102,626 lbs. grease equivalent against 38,099,091 in July, according to the United States Census Bureau. No reports were received from 13 manufacturers operating 61 mills equipped with approximately 20% of the total machinery of the country. Still reports received gave a very good idea of the consumption.

#### COTTON

Friday Night, Oct. 5 1928.

THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening the total receipts have reached 532,796 bales, against 417,651 bales last week and 336,659 bales the previous week, making the total receipts since the 1st of August 1928, 1,992,340 bales, against 2,361,016 bales for the same period of 1927, showing a decrease since Aug. 1 1928 of 368,676 bales.

\* Beginning with the season of 1926, Houston figures include movement of cotton previously reported by Houston as an interior town. The distinction between port and town has been abandoned.

The exports for the week ending this evening reach a total of 348,106 bales, of which 48,647 were to Great Britain, 30,484 to France, 130,027 to Germany, 35,096 to Italy, nil to Russia, 64,749 to Japan and China and 39,103 to other destinations. In the corresponding week last year total exports were 302,261 bales. For the season to date aggregate exports have been 1,190,514 bales, against 1,265,879 bales in the same period of the previous season. Below are he exports for the week:

\* Estimated

Speculation in cotton for future delivery has been slow aside from some heavy concentrated liquidation on the approach of Oct. 8 the day on which the Government report will appear. Prices have backed and filled within narrow limits. Latterly they have declined. Bullish news practically fell flat. Bear news at times fell quite as flat. Everybody preferred to await the Government estimate. Half a dozen estimates or more averaged 14,145,000. Some were as low as 13,595,000; others were up to 14,751,000; not generally over 14,554,000, against 14,439,000 a month ago, 12,955,000 raised last year and 17,911,000 in 1926. The ginning was another question of interest. Private estimates of the quantity ginned up to Oct. 1 were 4,700,000 to 4,800,000 bales, or possibly 33.6% of the crop against 46.5 up to the same time last year, 31.8 in 1926, 42.2 in 1925, 33.2 in 1924 and 38.9 as a four-year average. Spot markets were active and for a time higher. The basis in general seemed firm. A relative scarcity of staples is feared; 1 inch and above is not freely offered. The delta crop seems to be smaller than had been expected, i. e., 600,000 to 650,000 bales. Japan has been recently buying freely at the South. Mostly it is now stated the demand is from the home trade. Worth Street has been fairly active and firm. The textile trades, it is declared, have turned the corner in the United States. Two well-known mills in North Carolina, the Proximity and the White Oak, have abandoned curtailment. Some mills, it is said, cannot deliver certain goods before Jan. 1. Charlotte, N. C. reported fire fabric mills doing a good business and well sold ahead. At Gastonia a large yarn plant has resumed work. Manchester, England, has had a better trade. The Bombay mill strike is over. Work will be resumed on Saturday of this week. Shanghai auctions are going better. The Lille, France, district seems to be a failure; 1,500 struck in the Roubaix and Tourcoing districts; other districts are against the strike. On declines, the market has run into buying orders. It recovered rather easily. There is a belief in some quarters that after the Government report is out of the way, cotton will advance. The theory of some is that even with an estimate of 14,500,000, a decline would be temporary. If it is about 14,000,000, it is argued higher prices would rule. The persistence of a good trade demand has been an outstanding feature.

But of late, prices have declined a little day after day under the influence of pre-Bureau selling and weather for the most part good despite some unwelcome rains in Tennessee, Arkansas, Mississippi and Alabama. Liverpool, New York and New Orleans have all been disposed to go slow pending the publication of the Government report on Monday, Oct. 8. Latterly, spot sales have fallen off and prices have declined. Liverpool's cables have been rather colorless. A strike is reported of 100,000 workers in the Lodz textile district of Poland and there seems to be labor unrest in Germany. The New Bedford strike has not been

settled.

The weekly report was more favorable than was expected. It stated that in the more easterly States of the Belt, especially in the Carolinas, the weather was much better and considerable recovery from the effects of re-cent storms was reported in places, although some lowlands were still too wet and it was rather cool in northern districts. In Georgia further rains in the South were unfavorable, but elsewhere the weather was dry, sunny and favorable, though opening was retarded in the North by low temperatures and there is much soiled staple, with continued reports of bolls rotting in the South. In the Central States temperatures were near normal as a rule, with much sunshine, which promoted rapid opening of bolls and produced conditions generally favorable for picking and ginning. There were some local reports of continued boll In Oklahoma, warm dry weather favored rapid opening, with picking and ginning advancing satisfactorily, though continued dryness, especially in the West, has been unfavorable, with the general condition of the crop spotted. In Texas, spottedness is also noted with condition ranging from poor in the heretofore dry sections of the South to very good in parts of the North, and some deterioration in northern districts because of shedding and root rot; picking and ginning made mostly good advance.

To-day prices declined some 11 to 15 points, ending barely

steady, owing to continued liquidation in preparation for the Government report on Oct. 8. There was some hedge selling, but that was not a feature. The dribbling out of long cotton had a certain effect. On the other hand, there was enough trade buying to curb the decline. There were reports of a big Poland strike. Not that it had any direct influence, but the mood is one of caution. Wall Street, Liverpool and the South sold. Some spot interests bought 10,000 bales of January and March. This, with other trade buying and covering of shorts, together with a lack of any hedge pressure, tended to rein up any decline. Final prices show a decline for the week of 20 to 27 points. Spot cotton declined 15 points to-day, ending at 19.10c, for middling, a drop for the week of 20 points. The average crop estimate by the members of the Exchange here is 14,150,000

a Houston stocks are now included in the port stocks; in previous years they formed part of the interior stocks.

\* Estimated.

Continental imports for past week have been 111,000 bales. The above figures for 1928 show an increase from last week of 318,387 bales, a loss of 1,222,494 from 1927, a decrease of 482,674 bales from 1926, and a gain of 263,-926 bales from 1925.

AT THE INTERIOR TOWNS the movement—that is, the receipts for the week and since Aug. 1, the shipments for the week and the stocks to-night, and the same items for the corresponding periods of the previous year, is set out in detail below:

\*Discontinued. \* Includes the combined totals of 15 towns in Oklahoma.

The above total shows that the interior stocks have increased during the week 128,692 bales and are to-night 139,903 bales less than at the same time last year. The receipts at all towns have been 46,482 bales more than the same week last year.

OVERLAND MOVEMENT FOR THE WEEK AND SINCE AUG. 1.—We give below a statement showing the overland movement for the week and since Aug. 1, as made up from telegraphic reports Friday night. The results for the week and since Aug. 1 in the last two years are as follows:

19	028	1927	
Oct. 5— Shipped— Week.	Since Aug. 1.	Week.	Since Aug. 1.
Via St. Louis 4,393 Via Mounds, &c. 432	21,562 1,454	4,403 4,300	30,933 19,634
Via Rock Island       247         Via Louisville       247         Via Virginia points       3,869         Via other routes, &c       8,773	129 2,358 36,807 54,535	$\frac{1,667}{6,132}$ $\frac{4,600}{4}$	5,171 49,279 50,406
Total gross overland	116,845	21,102	155,467
Overland to N. Y., Boston, &c         701           Between interior towns	3,600 3,274 95,518	3,082 384 16,609	17.802 $3.775$ $103.310$
Total to be deducted16,131	102,392	20,075	124,887
Leaving total net overland * 1,583	14,453	1.027	30,580

\* Including movement by rail to Canada.

The foregoing shows the week's net overland movement this year has been 1,583 bales, against 1,027 bales for the week last year, and that for the season to date the aggregate net overland exhibits a decrease from a year ago of 16,127 bales.

WEATHER REPORTS BY TELEGRAPH.—Reports to us by telegraph this evening denote that the weather during the week has been favorable in most sections of the cotton belt. Temperatures have been higher and rainfall has been scattered with precipitation mostly light to moderate. Cotton has opened rapidly and picking and ginning have made good progress.

Texas.—Picking and ginning have made good advance in this State. Progress and condition of cotton varies greatly depending on the locality, ranging from poor to very good.

Mobile, Ala.—The weather has been favorable and picking is progressing rapidly. All gins are in operation. The crop is short in this territory.

RECEIPTS FROM THE PLANTATIONS.—The following table indicates the actual movement each week from the plantations. The figures do not include overland receipts nor Southern consumption; they are simply a statement of the weekly movement from the plantations of that part of the crop which finally reaches the market through the outports.

Week Ended	Rece	ipts at P	orts.	Stocks at	Interior T	Receipts from Plantations

The above statement shows: (1) That the total receipts from the plantations since Aug. 1 1928 are 2,287,658 bales: in 1927 were 2,730,912 bales, and in 1926 were 2,935,629 bales. (2) That although the receipts at the outports the past week were 532,796 bales, the actual movement from plantations was 661,488 bales, stocks at interior towns having increased 128,692 bales during the week. Last year receipts from the plantations for the week were 517,045 bales and for 1926 they were 748,126 bales.

WORLD SUPPLY AND TAKINGS OF COTTON.— The following brief but comprehensive statement indicates at a glance the world's supply of cotton for the week and since Aug. 1 for the last two seasons, from all sources from which statistics are obtainable; also the takings or amounts gone out of sight for the like period.

Cotton Takings,	19	28.	193	27.	
Week and Season,	Week.	Season.	Week.	Season.	
Visible supply Sept. 28			613,072 2,000 56,000	4,961,754 $3,587,785$ $144,000$ $114,500$ $225,860$ $152,000$	
Total supply	5,009,189 4,432,505		6,044,150 5,654,999	9,185,899 5,654,999	
Total takings to Oct. 5_a Of which American Of which other	576,684 324,684 252,000	2,316,977	276,151	3,530,900 2,532,540 998,360	

\* Embraces receipts in Europe from Brazil, Smyrna, West Indies, &c. a This total embraces since Aug. 1 the total estimated consumption by Southern mills, 1,000,000 bales in 1928 and 1,051,000 bales in 1927—takings not being available—and the aggregate amounts taken by Northern and foreign spinners, 2,308,177 bales in 1928 and 2,479,900 bales in 1927, of which 1,316,977 bales and 1,481,540 bales American.

b Estimated.

INDIA COTTON MOVEMENT FROM ALL PORTS.— The receipts of India cotton at Bombay and the shipments from all India ports for the week and for the season from Aug. 1, as cabled, for three years, have been as follows:

Danel	pts at-		19	28.	11	27.	1926.			
October 4.			Week.   Since Aug. 1.		. Week.	Since Aug. 1.	Week.	Since Aug. 1.		
Bombay			7,000 51,0		2,000	144,000	9,000	137,000		
Exports For the			Week.		Since August 1.					
from-	Great Britain.	Conti- nent.	Japan& China.	Total.	Great Britain.	Conti- nent.	Japan & China.	Total.		
Bombay— 1928	2,000	21,000 4,000 10,000 4,000	2,000	37,000 6,000 2,000 12,000 4,000	6,000 9,000 1,000 12,000 12,500 7,000	102,000 60,000 61,000 71,000 102,000 84,000	226,000 130,000 132,000	334,000 119,000 194,000 83,000 114,500 91,000		
Total all— 1928 1927 1926	2,000	31,000 4,000 4,000	2,000	49,000 6,000 6,000	18,000 21,500 8,000	173,000 162,000 145,000	226,000 130,000 132,000	417,500 313,500 285,000		

According to the foregoing, Bombay appears to show an increase compared with last year in the week's receipts of 5,000 bales. Exports from all Indian ports record an increase of 43,000 bales during the week, and since Aug. 1 show an increase of 103,500 bales.

ALEXANDRIA RECEIPTS AND SHIPMENTS.—We now receive weekly a cable of the movements of cotton at Alexandria, Egypt. The following are the receipts and shipments for the past week and for the corresponding week of the previous two years.

Alexandria, Egypt, Oct. 3.	19	28.	19	27.	1926.				
Receipts (cantars)— This week Since Aug. 1		30,000 16,058	28 1.02	80,000 29,304	225,000 639,564				
Export (bales)—	This Week.	Since Aug. 1.	This Week.	Since Aug. 1.	This Week.	Since Aug. 1.			
To Liverpool To Manchester, &c To Continent & India To America	9,000 9,000 5,000	52,705	7,750 10,500	15,450 21,929 55,412 17,013		23,742			
Total exports	23,000	107,932	18.250	109,804	17.000	101,278			

Note.—A cantar is 99 lbs. Egyptian bales weigh about 750 lbs.

This statement shows that the receipts for the week ending Oct. 3 were 360,000 cantars and the foreign shipments 23,000 bales.

MANCHESTER MARKET.—Our report received by cable to-night from Manchester states that the market in yarns is firm and in cloths is steady. Demand for both India and China is improving. We give prices to-day below and leave those for previous weeks of this and last year for comparison:

## BREADSTUFFS

Friday Night, Oct. 5 1928.

Flour prices have recently shown that they could advance, but trade has not shown that it could improve as circum-stances are. The buyer keeps to small purchases. Mills are doing less business than in August. The grinding is smaller. That is reflected in the noteworthy firmness of mill and the smallness of the supply. As to the export trade, one has to watch the clearances to get anything like a trustworthy idea

of what is going on. Judged from this angle the Continent was recently a large buyer, mainly, however, of Canadian flour. Prices have shown little change this week. The

flour. Prices have shown little change this week. The Census Bureau report of production for August was 10,202,000 bbls. against 9,617,000 last year. For two months' production was 18,618,000 against 17,993,000 last year. The amount of wheat per barrel is this year 4.62 bushels per barrel, against 4.59 bushels last year. This report covers the production of mills which in 1925 produced approximately 91.2% of the total flour output then reported.

Wheat advanced slightly, export demand most of the week being quiet. But the firmness of Winnipeg and an evidently strong technical position, together with the firmness of corn, prevented any decline. On Sept. 29 prices were irregular. They were at one time ½ to 1½c. higher and at another ½ to 1¾c. lower, or some 2c. under the earlier high. Liverpool advanced ¾ to ½d., reflecting in some degree unfavorable crop reports. Australia needed rain and conditions were said to be backward. The demand for nearby wheat, ble crop reports. Australia needed rain and conditions were said to be backward. The demand for nearby wheat, moreover, was better. Importers are said to be buying fumoreover, was better. Importers are said to be buying lutures abroad in expectation of a decrease in the world's supply on Oct. 1. Besides, other foreign crop news was rather unfavorable. For instance, Russia, Rumania, Bulgaria and India reported adverse conditions. Southern Ukraine and Central Europe have dry weather, which retards seeding of winter crops. On the 1st inst. prices declined 1½ to 1½c., with Liverpool and Buenos Aires lower, beneficial rains in Australia and Argentina and big Northwestern receipts. To Australia and Argentina and big Northwestern receipts. To cap the climax, there was an increase of 6,665,000 bushels in the visible supply, making the total 110,047,000 bushels, the largest at this date for many years. A year ago it was 78,383,000 bushels. Early prices led by Winnipeg advanced by the largest at the larg ½ to ½c. Winnipeg advanced 1½ to 1½c. and was a conspicuous feature at first. It reacted later and ended ½c.

lower to 1/4c. higher.
On the 2d inst. Winnipeg set the pace for a time with a On the 2d inst. Winnipeg set the pace for a time with a rise of 2½c. to 3c., accompanied by reports of lower gradings. Liverpool ended ½ to 1½d. High record receipts at Winnipeg did not matter; neither did fine weather nor increased Northweastern receipts, a large increase in stocks and Northwestern shipments of spring wheat to Chicago apparently impending. But India it was said, bought several cargoes of Manitoba and Argentina. Some of the Russian crop reports were unfavorable. The refusal of the market to go down and stay down under the weight of the market to go down and stay down under the weight of bearish news as to the crop movement and lack of important business, impressed some people as significant. Export sales were only about 250,000 bushels. The Canadian crop estimates in the thre Provinces were 476,000,000 to 547,-000,000 bushels. The Canadian visible supply totaled 32,-771,000 bushels, indicating an increase of 9,531,000 bushels. It brought the visible supply for North America up to a new high record. On the 3d inst. prices declined ¾ to ⅙c. with Winnipeg lower, the technical position weaker, and hedge selling apparent. Some 1,250,000 bushels of wheat were said to have been booked for shipment from Duluth to Chicago. Export sales were estimated at 300,000 bushels. Bradstreet estimated the world's visible supply at 244,796,000 bushels, or an increase of 35,234,000 bushels for the week. the week.

To-day prices ended ½ to ½c. higher in American markets with Winnipeg up 1 to 1½c. Export sales were 800,000 to 1,000,000 bushels largely durum, with some Manitoba taken from the Pacific. England bought a fair quantity of durum. Some exporters state that No. 2 hard at the Gulf is cheaper now than Manitoba. Minneapolis cash prices were firmer. Liverpool closed ¾ to 1½d. higher and Buenos Aires 1¾ to 1½c. higher. Continental future markets were firmer. India was said to have had rains where they are needed. Saskatachewan reports greater frost damage to crop and grade than expected. Final prices show a rise for the week of ½c.

May 121% 120% 123% 122% 123% 124%

Indian corn has been the popular purchase and prices have risen under the spur of an excellent cash demand, and reports of export business. September delivered declined sharply on September 29th. It fell 9½c. Liquidation was there and demand petered out as the month ended. But later months resisted pressure and on that day ended only ½ to ¼c. lower. This resistance was said to be partly explained by lower. This resistance was said to be partly explained by intimations of an export demand at prices below the market Washington wired that Secretary Jardine advised farmers on the 4th inst. to feed an additional 50,000,000 bushels of corn to cattle, hogs and poultry this year in order to utilize the bumper crop anticipated in recent reports issued by the Department of Agriculture.

On the 1st inst. prices advanced 11/8 to 11/4c. with brisk trading, cash demand good for white and yellow, though slow for mixed except at discounts. Later came heavy selling to secure profits and prices reacted and ended practically un-

Large deliveries were made on September con-Saturday afternoon. The first car of new corn tracts on Saturday afternoon. The first car of new corn from Illinois arrived on the 1st inst. and sold at about 31/2c. from Illinois arrived on the 1st inst. and sold at about  $3\frac{1}{2}c$ . under December. The United States visible supply decreased last week 404,000 bushels against a decrease in the same week last year of 46,000 bushels. The total is now 6,791,000 bushels, against 23,687,000 last year. On the 2d inst. prices advanced  $\frac{1}{2}$  to  $\frac{3}{4}c$ . Private crop estimates averaged 2,965,000,000 bushels. They were called rather bullish, owing to the practical exhaustion of the old corn traceable to a profitable feeding demand. Old corn was in good demand, with receipts small. Warehouse receipts were canceled for shipment of over 700,000 bushels of No. 2 mixed, largely to go to local industries. On the 3d inst. prices ended 1c. net higher on the firmness of cash markets, short covering and reports of a good export business. Sales were estimated at 400,000 bushels.

and reports of a good export business. Sales were estimated at 400,000 bushels.

To-day prices closed ¼ to ½c. higher. Cash corn was up 1 to 2c. in the West, and 2 to 4c. in the Southwest with a good demand. Liverpool ended 2d. higher. Receipts were smaller; also country offerings. Within 24 hours it is said, 500,000 to 600,000 bushels have been sold for export and there was a little export business reported to-day. But resellers abroad were making cheaper prices than the offers from here to-day. Chicago had 2 cars of new corn; one graded white and sampled 25.20 moisture. It sold at 71c. The other was yellow and sold at 68c. Out of 4,800,000 bushels at Chicago 1,360,000 were cancelled for shipment.

Final prices show a rise for the week of 4 to  $4\frac{1}{2}$ c.

## DAILY CLOSING PRICES OF CORN IN NEW YORK.

Oats have been sustained by other grain. Moreover there have been some reports of an export business. On Sept. 29 prices ended 1/4c. lower in a small market, ignored because of the greater interest in other grain. On the 1st inst. prices ended 1/4c. lower with the crop estimated at 1,461,000,000 bushels. Trading was small. The country movement was light. The cash demand was excellent. The United States visible supply decreased 493,000 bushels against 202,000 a year ago. The total is now 15,071,000 bushels against 24,931,000 a year ago. On the 3rd inst. prices were unchanged to 3/4c, higher at the close with an excellent cash demand. to 3/8c. higher at the close with an excellent cash demand. Oats for the time merely follow other grain. On the 3rd inst. prices closed unchanged to ½c. higher in sympathy with the strength of corn. To-day prices closed ¾ to ½c. higher, with other grain higher and the demand fair. Commission houses bought and shorts covered. Some purchasing was said to have been done against export sales. oats were firm. Country offerings were not large. A fair export business was reported. Final prices show a rise for the week of \square to \%c.

Rye has shown individual strength on its own merits with eash markets firm and some export demand, and no great amount of hedge selling. On Sept. 29 September declined 5c. as the delivery passed out, yet ended steady enough with such quotations curiously enough as 109½ to 1-12 in contrast with the closing price on the 28th as 1.09. The spot situation was evidently a sustaining factor. Later The spot situation was evidently a sustaining factor. Later months were  $\frac{7}{8}$  to  $\frac{11}{2}$ c. net lower on Sept. 29. On the 1st inst. prices declined  $\frac{3}{4}$  to 1c. in sympathy with lower prices for wheat. The United States visible supply increased last week 478,000 bushels against an increase in the same week last year of 491,000 bushels. The total is 2,752,000 bushels, against 2,814,000 a year ago. On the 2d inst., prices rose 2c. in response to the advance in wheat, a good cash demand, smallness of receipts, firmness of the premiums and a better export inquiry. of the premiums and a better export inquiry.

On the 3d inst. prices advanced ½ to 3%c. Offerings were light and domestic demand good. The strength of rye was mainly on its own merits. Duluth straight No. 2 was reported to be running 7-10 of 1%. To-day prices ended 1½ to 1¾c. higher with reports of export business. Hedging pressure was light. Commission houses bought and shorts covered. Norway was said to have been buying. Export sales were estimated at 270,000 bushels. Cash rye was strong. A cargo of 109,000 bushels was reported loaded from Duluth for Chicago. Final prices show an advance for the week of

WEATHER BULLETIN FOR THE WEEK ENDED OCT. 2.—The general summary of the weather bulletin issued by the Department of Agriculture, indicating the influence of the weather for the week ended Oct. 2 follows:

fluence of the weather for the week ended Oct. 2 follows:

The first part of the week continued unseasonably cool in the interior valleys and Northwest, under the influence of high barometric pressure, but, at the same time, there was a reaction to warmer in central Rocky Mountain districts and in the Southwest. While it continued cool in Central and Northern States east of the Great Plains, much warmer weather overspread the Plains area about the 28th, and the interior valleys had considerably higher temperatures during the closing days of the week. Rainfall was generally of a local character. The first part of the week had rather widespread showers in most Gulf sections and the Northeast, while the middle days were unsettled and showery over the more eastern States. Otherwise there was very little rainfall until the close of the period when considerable cloudy, unsettled, and showery weather prevailed in the interior States.

Chart I shows that the week, as a whole, was abnormally cool in central and northern States from the Mississippi Valley eastward, where similar conditions prevailed last week. In this area the temperature averaged from 6 deg. to as much as 10 deg. or 12 deg. below normal. Freezing weather was reported at first-order stations along the northern border and locally in central districts, and frost occurred generally. In the South the week had nearly normal warmth, except in the Atlantic coast area where it was cool, and temperatures were near normal also in Pacific coast sections being slightly deficient in most localities. However, over a belt extending from the southwestern Great Plains and southern Rocky Mountain districts to the interior of the Pacific Northwest, the period was relatively warm, with the temperatures averaging from 3 deg. to as much as 7 deg. above normal Freezing weather was reported from first-order stations as far south as northern Iowa and southwestern Nebraska, while in the East temperatures as low as 32 deg., occurred locally as far south as West Virginia. At Peoria

more southeastern States, the middle Atlantic area, and more locally in the Ohio Valley and west Gulf sections. Otherwise the amounts were generally light, with much bright, sunshiny weather prevailing.

With the prevailing fair, sunshiny weather prevailing.

With the prevailing fair, sunshiny weather, seasonal farm work made good advance quite generally, except where fall plowing and seeding were retarded by dry soil. Conditions have improved materially in the south Atlantic area, though some lowlands are still too wet. However, a generous rain is needed over nearly all of the principal wheat producing sections, and there is widespread and morthern States, which came unusually early in many places, did no widespread harm, as staple crops were largely matured when the frost came. Damage to corn was mostly light, but considerable harm to tomatees was reported from parts of the Ohio Valley, principally in Indiana, while late potatoes suffered materially in Kentucky. Some beans and potatoes were also killed in the Lake region. In the Northeast the cool, cloudy conditions retarded the maturing of late crops, but elsewhere, except in the frost area, the bright, sunshiny weather was favorable for maturing, and over the western half of the soil. Recept that moisture is mostly sufficient in the Atlantic area. In the central and northern Great Plains much of the wheat crophas been sown, and some is reported as coming up to a good stand, but a general rain is needed, and seeding has been practically suspended in southern districts. It is also too dry in many portions of the Ohio Valley, especially in the southern parts of Indiana and Illinois and more generally in Ohio and Kentucky. Farther east seeding made good advance. There was some frost damage to buckwheat in New York, and some late flax was harmed in the northern Great Plains, while the gathering of rice in the lower Mississippi Valley and west Gulf area made fair to good advance. There was some frost damage to buckwheat in New York, and some late flax was harmed

The Weather Bureau also furnishes the following resume of the conditions in the different States:

The Weather Bureau also furnishes the following resume of the conditions in the different States:

Virginia.—Richmond: Temperatures below normal; rainfall moderate. Favorable for farm work and good progress made in plowing, cutting corn, and picking apples. Some wheat sown; picking cotton begun. Frosts in middle and extreme western counties: some damage in southwest. North Carolina.—Raleigh: Weather cool and dry, with sunshine during most of last 10 days; favorable for crops, with good progress in field work since first part of week, except ground too wet on lowlands of east. Much corn on ground, part totally destroyed on lowlands. Cotton recovering from recent unfavorable conditions; progress fair to good, except in some flooded areas; good progress in picking, except where ground too wet in east. Preparing land for wheat in west.

South Carolina.—Columbia: Dry and rather cool weather, with abundant sunshine, favorable fer forage harvest, which progressed well, but late corn and truck had insufficient time to recover materially from recent storm stress. Cotton crop made and fruiting practically finished, with resultant damage from storm much less in Pledmont than elsewhere bright sunshine caused rapid opening, with picking and ginning fair progress.

Georgia.—Atlanta: Frequent rains in southern portion very detrimental; dry weather elsewhere favorable for harvesting, but soil too hard to plow in north. Cotton nearly all open, except in north, where retarded by cool weather and picking and ginning keeping up with opening; much dirty and continued retting bolls in south. Corn being housed and fodder pulling completed.

Florida.—Jacksonville: Lowlands too wet for sweet potatoes, peanuts, cane, and truck, and haying unfavorably affected. Some peppers, eggplants, and other truck planted on highlands, but all farm work backward. Little or no oats seeded. Setting strawberries on uplands doing well locally. Most citrus in good condition.

Alabama.—Montgomery: Showers delayed cotton picking and haymaking; vegetation ne

mostly opening rapidly and picking and ginning made generally very good progress; picking nearly finished in many areas of south; boll rot continues in some sections of north and southeast; rust and shedding reported locally.

Mississippi.—Vicksburg: Week generally dry throughout; somewhat cool at beginning, but warmer at close. Although seasonal development of cotton was generally rather poor, the crep opened rapidly and picking and ginning made very satisfactory advance. Progress in housing corn mostly fair. Progress of pastures generally poor.

Louisiana.—New Orleans: First part cool with light showers, followed by warm dry weather. Rain did not materially interfere with picking cotton which progressed very good and well advanced with grade good. Rice harvest made fair progress. Fall truck, pastures, and sweet potatoes need more rain in north, but dry, cool weather needed in south for ripening sugar cane.

Texas.—Houston: Fore part week cool, with light to moderate rain in southern two-thirds: latter part warm and dry. Progress and condition of pastures and minor crops good, where rain, but fair elsewhere. Abundant moisture for fall seeding of truck in south, but soil too dry for germination of winter grains in northern third. Condition of cotton spotted, ranging from poor in south, where dry earlier in season, to very good in portions of north, where seasonal moisture better distributed; average fair; crop made in most of State, but some deterioration in northern division, account shedding and root rot; picking and ginning made good progress in northern districts, but delayed by rain in southern fore part of week.

Oklahoma.—Oklahoma City: Warm, clear weather, with no rain. Progress of cotton fair: crop opening fast and picking and ginning progressed satisfactorily, but yield and quality of stable lowered by continued dryness, especially in west portion; condition spotted, but probably averages fairly good. Corn mostly matured and generally good crop; harvesting. Seeding wheat practically suspended, account

#### THE DRYGOODS TRADE

New York, Friday Night, Oct. 5 1928.

The beneficial influence which the policy of restricted output has exercised over the textile markets during the past month or so, especially with regard to wool and cotton, has undoubtedly been a material factor in achieving the present favorable position. The key to this influence is the fact that curtailed production not only does much to hold prices on a sound basis, but, in so doing, builds a confidence in their stability which is the most effective invitation to buyers. Although it seems to follow that continued curtailment, in the face of the healthy demand such as now animates the markets, would tend to raise prices, manufacturers would avoid pursuing such a policy beyond a point where a reasonable profit could be secured, on account of the risk of diverting that demand into other chan-The practical supposition, therefore, is that factors will try to maintain values at around their present level, and, in accordance with that endeavor, continue to adjust production to ascertainable requirements. Silks are stronger, the responsibility for the rise in prices being attributed partly to recent speculative activity, and partly to the September statistics showing that consumption has maintained high levels. Finished goods are moving fairly well, and extremely attractive innovations in style and Rayons are in an excellent position, with prices stable and manufacturers having difficulty in coping with demand. An item of interest has been the advance showing of spring lines of carpets and rugs by Stephen Sanford & Sons, Inc.,

at unchanged prices.

DOMESTIC COTTON GOODS.—Although no salient progressive feature has distinguished the domestic cotton goods situation during the week, a steady broadening of demand, situation during the week, a steady broadening of demand, coupled with confidence in the stability of prices, appears to justify the assumption that the market is consolidating itself in its improved position. It is reported that large sales of print cloths and sheetings, colored cottons, denims, and various household lines, during September, have merely filled temporary needs, and with distributors' stocks low, a continued and possibly stronger general demand is expected during the current month. More activity is noted in flannels and blankets and there has been growth in the volume of fancies and heavy weight cottons sold. Finished volume of fancies and heavy weight cottons sold. Finished goods as a whole are in better demand, and gray goods are at least holding the ground they have gained. The breadth of the movement may be measured by the foregoing which illustrates the better conditions governing various types of goods, and an optimistic outlook for the future is all the more reasonable in view of the evident intention of manufacturers to continue to limit production. This proceeding, as demonstrated, has a stabilizing effect on prices, which, in eliminating undesirable speculation and insuring confidence, tends to bring about a steady and widely bene-ficial distribution. The action of printers in maintaining current prices on printed goods for the coming spring season, is another encouraging influence, and it is felt that it may have considerable psychological effect on other branches of the trade. Activity in this connection is accentuated, buying having been stimulated by offerings of fast color cloths of high quality and style, at attractive prices. Print cloths 28-inch 64 x 60's construction are quoted at  $6\frac{1}{4}$ c., and 27-inch 64 x 60's at 6c. Graygoods in the 39-inch 68 x 72's construction are quoted at  $9\frac{1}{4}$ c., and 80 x 80's

at 10% c. WOOLEN GOODS.—Conditions in the worsteds and woolen goods market, when compared with those existing approximately a fortnight ago, are very favorable. Stocks are in a healthy position, and a still broader demand is in evidence. The feature of the week has been the strong call for heavy top-coatings of all kinds, especially oxfords, which developed in response to the colder weather. Shortages have been revealed in many places, and buyers have en-countered some difficulties in obtaining needed merchandise. On the other hand, steady movements in many stable lines and in practically all styled cloths, continue, and it is thought that the total fall business will assume very satisfactory proportions. Interest in spring goods has not yet matured. Buyers are having trouble in anticipating style trends and are proceeding cautiously until some definite indications appear. However, increased activity in this direction is expected shortly, and the season's pros-

pects are regarded optimistically.
FOREIGN DRY GOODS.—The more cheerful aspect which business has worn in the linen market of late, has continued to develop during the week. A further broadening of the demand for staple lines has taken place and buyers are manifesting an interest in the new spring dress goods and suitings that augurs considerable activity in that direction. On the other hand, there appears to be no appreciable falling off in the demand for novelties which has featured the market during the past few weeks. Handkerchiefs, particularly the better grades, are selling well and bid fair to continue to do so. Towellings and colored cloths are progressing satisfactorily, and Damask table sets are attracting many buyers. Burlaps have been moderately active. Light weights are quoted at 7.15c., and series of years:

# State and City Department

## MUNICIPAL BOND SALES IN SEPTEMBER.

Realizing the futility of offering their obligations under present market conditions, only 339 municipalities solicited bids for the purchase of bonds during September. Awards during the month totaled \$64,570,326, which compares with \$68,489,963 the previous month and with \$117,571,822 in September 1927. The City of St. Louis, Mo., advertised for bids to be opened on Sept. 28 for \$10,000,000 4% coupon or registered public building and improvement bonds, maturing serially on Oct. 1 from 1933 to 1948 inclusive. No tenders were received, Louis Nolte, City Comptroller, reports. Other municipalities which failed to market their offerings are mentioned below. A \$9,000,000 issue of 4% coupon State of Illinois highway bonds maturing serially on May 1 from 1945 to 1958 incl., was sold on Sept. 18 to two of the competing syndicates who decided to join forces, paying 97.255 for the bonds, a cost basis to the State of about 4.15%. On July 17 this State sold \$13,000,000 4% bonds at 96.267, On July 17 this State sold \$13,000,000 4% bonds at 96.267, the basis cost being about 4.25%. The tabulation below shows all the issues of \$1,000,000 and over which were disposed of:

\$5,003,000 4½% 30-year serial bonds of Allegheny County, Pa., consisting of four issues awarded to a syndicate headed by Harris, Forbes & Co., at 100.659, a basis of about 4.10%.

4,000,000 4% State of Massachusetts bonds maturing serially on July 1 from 1929 to 1958 incl.; awarded to a syndicate headed by Stone & Webster and Blodget, Inc., at 101.036, a basis of about 3.98%.

Stone & Webster and Blodget, Inc., at 101.036, a basis of about 3.98%.

4,000,000 coupon Hetch Hetchy 4½% City and County of San Francisco. Calif. bonds, maturing in equal amounts from 1938 to 1977 incl.; sold to a syndicate headed by the Harris Trust & Savings Bank, at 101.79, a cost basis of about 4.39%.

3,723,000 Cuyahoga County, Ohio. 4½% bonds, consisting of two issues maturing serially from 1929 to 1943 incl., awarded to a syndicate managed by Harris, Forbes & Co. of New York, at 100.16, a cost basis of about 4.47%.

1,500,000 coupon school improvement 4½% City of Louisville, Ky. bonds due on May 1 1966 awarded to a syndicate headed by the Bankers Trust Co., at 101.849, a basis of about 4.15%.

1,367,000 Knoxville, Tenn. bonds consisting of three issues maturing on Aug. 1 from 1930 to 1964 incl.; awarded to a syndicate managed by the First National Bank, New York, at 100.279, a basis of about 4.46%.

1,000,000 State of California, 4½% building bonds due in equal amounts from 1942 to 1945 incl.; awarded jointly to Roosevelt & Son and Estabrook & Co., both of New York, at 100.4699, a basis of about 4.21%.

According to our records municipalities which unsuccess-

According to our records municipalities which unsuccessfully offered their bonds for sale besides the City of St. Louis, mentioned above, are given herewith: The reasons as set forth here were advanced by the officials in reporting the outcome of the offering: \$100,000 4% Shelbyville, Ind., bonds offered on Sept. 4, no bids submitted; \$35,268 6% Georgetown Special School District, Del., bonds offered on Sept. 5, no bids; \$375,000 Plymouth County, Mass., bonds offered as 4s on Sept. 6, all bids rejected, bonds have since been sold at 100.066, a basis of about 4.04%, as 4s and 4½s; \$125,000 water and \$75,000 street 4% St. Albans, Vt., bonds offered on Sept. 10, all bids rejected (see V. 127, p. 1709 for list). The sale of \$1,000,000 not to exceed 4½% grade elimination bonds of Birmingham, Ala., scheduled for Sept. 18, was postponed for the time being, reason for postponement not given. \$31,000 4½% Sayreville, N. J., school bonds offered on Sept. 11, no bids; Tonawanda, N. Y., offered on Sept. 17 \$20,000 4½% bonds, officials report issue as being unsold; \$125,000 Rowan County, N. C., revenue anticipation notes offered on Sept. 3, bids rejected; \$90,000 5% Purcellville, Va., bonds offered on Sept. 14, no acceptable bid received; Clinton, Okla., offered \$600,000 not to exceed 4¾% bonds on Sept. 25, C. Edgar Honnold of Oklahoma City, was the only bidder, offering 100.11 for 4¾s; the bid was rejected. These bonds were unsuccessfully offered on Jan. 10 and on March 13 of this year.

Temporary loans negotiated during the month aggregated \$98,461,002; New York City contributed \$86,038,000 to this

March 13 of this year.

Temporary loans negotiated during the month aggregated \$98,461,002; New York City contributed \$86,038,000 to this total. The total of long-term Canadian bonds sold was \$6,212,282, which includes an issue of \$6,000,000 4½% Province of British Columbia 25-year bonds sold privately (according to a news report) to a syndicate including the Canadian Bank of Commerce, the Dominion Securities Corp., Wood, Gundy & Co.; A. E. Ames & Co., and Dillon, Read & Co. Advance notice of the intentions of the Provincial officials was given in the "Chronicle" of Sept. 22—V. 127, p. 1711. Another report states that the Province of Ontario has sold \$10,000,000 1-year Treasury notes in London on a 5.118% basis. No financing was undertaken by any of the United States Possessions during September.

A comparison is given in the table below of all the various forms of securities placed in September of the last five years:

1928. 1927. 1926. 1925. 1924.

Perm. loans (U. S.). 64,570,326 117,571,822 136,795,778 115,290,336 124,336,682

#### **NEWS ITEMS**

Canada (Dominion of).—Redemption of \$53,000,000 Bonds Scheduled for October.—The following article dealing with the proposed redemption during October of \$53,000,000 maturing bonds and the financial status of the Dominion is taken from the "Financial Post" of Sept. 28:

Within two weeks, the Dominion Government will redeem \$53,000,000 of its obligations. As announced in the "Financial Post" some weeks ago, the government will pay off these maturities largely in cash from surplus

the government will pay off these maturities largely in cash from surplus revenues and also from the proceeds of short term notes which were sold to a syndicate of Canadian bankers not long ago.

The loan to be paid off next month is part of a refunding operation put through in 1923. The total amount covered by refunding was \$200,000,000, but the balance does not mature until 1943. Maturity bears interest at 5% so that the fixed charges which will lapse with it amount to \$2,650,000 per annum.

The retirement of the October maturity in cash will not be the first time

at 5% so that the liked charges which will lapse which the first time per annum.

The retirement of the October maturity in cash will not be the first time recently that this policy has been carried out by the Canadian Finance Minister.

Last year the operation was done on a somewhat larger scale, though all the maturities were not paid off in cash. In the fall of 1927 Dominion loans came due to the amount of \$100,505,650. In November, two of

\$29,068,400 and \$8,000,000 respectively, were redeemed in cash. On the first of December there were maturities of \$63,437,250. Of this amount, \$18,437,250 was retired by cash and the balance was met by the issue of three-year 4% treasury notes to the banks at par for the amount of \$45,-000,000. Thus the amount retired in cash last year was \$55,505,650.

Debt Being Lowered.

The debt statement at the end of August, shows that the net debt of the Dominion was reduced in the first five months of the fiscal year by \$67.275.832. Net debt on Aug. 31 was \$2,229.574.400, as compared with \$2,296.850,232 at the end of the fiscal year in March. This reduction in the net debt was brought about by a variety of changes. The gross debt rose by \$12,000,000, but the active assets increased by \$79,000,000, showing a reduction of \$67,000,000 in round figures.

The increase in the gross debt was due in the main to a larger issue of Dominion notes, while there were increases also in interest charges and in some Government trust funds. On the other hand, there was a falling off in the funded debt of \$13,500,000. The increase in the assets was made up of a rise in the miscellaneous and banking account of \$59,000,000 and in the loans to banks of \$28,000,000. These increases were in turn, offset to some extent by a decline in the specie reserve.

Massachusetts (State of).—Debt Law Amended.— Chapter 396 of the Laws of 1928 amends section 2 of Chapter 44 of the General Laws so that it now reads as follows:

44 of the General Laws so that it now reads as follows:

Section 2.—Except in Boston and except as otherwise expressly permitted by law, cities and towns shall incurr debts only in the manner of voting and within the limitations as to amount and time of payment prescribed in this chapter; out this section shall not be construed as prohibiting any city, town or district from placing additional restrictions, consistent with this chapter, upon the manner of incurring debt, nor as affecting the right of any city, town or district to incur debt under any special act which has or shall become effective after January first, nineteen hundred and twenty-one; unt no debt may be authorized under a special act except by a two thirds vote, unless the act so provides.

Sections 2.—All provisions of special acts effective prior to January first, nineteen hundred and twenty-one which authorize the incurring of liabilities by any poard or officery-one which authorize the incurring of liabilities by any purpose not permitted by general law, or which authorize any such city or town to incur indebtedness for any purpose not permitted by general law, or which authorize any such city or town to incur indebtedness outside the statutory limit of indebtedness for a purpose for which the incurring of indebtedness is provided by general law to be inside said limit, or which authorize the payment of debt by such a city or town in a manner inconsistent with general law, are hereby repealed. Nothing in this act shall be construed as affecting the validity of any act done prior to the effective date of this act in conformity with any special act, or the legality of any debt incurred, or of any bond or note issued, prior to said effective date, in accordance with any special act, or as affecting the liability of pay the principal and interest on any such bond or note.

The act becomes effective Jan. 1 1929.

New York City, N. Y.—Tax Rolls Show Billion and Half

New York City, N. Y.—Tax Rolls Show Billion and Half Increase.—Henry M. Goldfogle, President of the Department of Taxes and Assessments, on Oct. I issued the annual statement bearing on the assessed valuation of city property for the year 1929. The new tax rolls show a tentative total of \$16,788,821,645 in taxable real estate, an increase of \$1,322,637,970 over the 1928 rolls. The statement reads as follows: as follows:

of \$1,322,637,970 over the 1928 rolls. The statement reads as follows:

The tentative assessment of taxable real estate, exclusive of Special Franchises, for the year 1929 for the five Boroughs of New York City is \$16,788,821,645.

To the above amount, Special Franchises are to be added. Special Franchises assessments will not be made up until early next year. Applying, however, last year's experience would give an estimated assessment for Special Franchises of approximately \$505,000,000. The latter sum added to taxable real estate would aggregate a taxable assessment (exclusive of period to taxable real estate would aggregate a taxable assessment (exclusive of period). These figures do not include property partially exempt under the so-called New Building Exemption Ordinances passed during the former housing shortage period. This partial exemption amounts to \$916,343,845.

The total exemptions, wholly as well as partial, on property of every kind and class that under the law is exemptible now aggregates the stupendous figure of \$4,522,644,600. Thus, the total taxable and non-taxable real estate and estimated Special Franchises reaches the gigantic approximate sum of \$21,816,466,245.

The total increase of the taxable assessment of real estate, exclusive of Special Franchises for 1929 over the final assessments made for 1928, is tentatively \$1,443,355,050 ents which under existing law cover merely and only taxible period and property amount to \$1,154,873,450, so that the total tentative assessment of real and personal property, exclusive of Special Franchises is \$18,448,995,095.

In connection with the increase of assessments over that of last year sight must not be lost of the fact that approximately 31,218 new buildings were erected or in course of erection during the year. Many of these were apartment houses, hotels, office structures and commercial buildings of immense size and proportions beautifully designed provided with highly expensive features and of luxurious type.

The light and the aggregate figure

as well as consideration shown for losses which resulted from long continued existing vacancies.

Heretofore a building begun within the assessable year and uncompleted and not ready for occupancy on Oct. 1st was non-assessable. The last Legislature changed this by an amendment by shifting such date to Dec. 15th. This amendment will prove beneficial and advantageous to taxpayers generally making for equality in the distribution of tax burdens. Before the amendment was passed serious abuses crept in because some owners of new buildings sought to escape entirely from building taxation for a year by purposely delaying completion for a few days and some times for a week or two beyond Oct. 1st. It developed from careful investigation that every conceivable scheme and device was employed and untrue representations restored to to escape such taxation. The consequence frequently was that owners of property located in proximity to the structures alleged to be uncompleted but really mainly occupied by tenants on Oct. 1st, had to pay taxes in full while owners of structures where completion was delayed until after Oct. 1st escaped being taxed, though non-completion was merely small in part and the other parts were rented, by technically bringing themselves within the law. Under the recent amendment taxation will be

imposed on buildings completed or partly occupied by Dec. 15th in the assessable year. Thus as I indicated before there will be a fairer distribution of tax burdens, while at the same time there will flow into the treasury additional revenue.

The city receives a proportionate share of the State Income and Corpora-

assessable year. Thus as I indicated before there will be a lairer distribution of tax burdens, while at the same time there will flow into the treasury additional revenue.

The city receives a proportionate share of the State Income and Corporation Tax. In 1927 this yielded the city \$28,037,092. For the first six months of this current year the State has paid to the city \$20,829,966. It is problematical what the last six months of this year will produce.

Though we receive our proportionate share of State Income Tax it must be remembered that for the year 1927 the city paid out of its treasury to the State \$14,126,847, and in view of our present assessment increase the amount of State Tax will be correspondingly increased. In a large measure this demonstrates how tremendously the City contributes to the financial benefit of up-State communities.

Referring to the work of the Tax Department I point to the recent report of the sub-Committee on Budget, Finance and Revenue of the Mayor's Committee on Planning and Survey, wherein it is said: "The technique of real estate assessment and the organization of the Department of Taxes and Assessments in New York City have for many years been the occasion of just pride among the citizens of the city. In these respects New York City has set a standard for the entire country, "and another part referring to the annual reports of the Tax Commissioners which says: "it is one of the most informative of the Tax Commissioners which says: "it is one of the most informative of the reports of the City of New York. It is the most important report dealing with the taxes, tax rates, values and economic changes within the city. The present report is to be commended for its brevity, for its tables showing values, taxes and tax rates for previous years, for its maps, &c." The sub-Committee who thus spoke was composed of some of the most prominent, best known and influential citizens of the city, including many of the largest real estate holders and realty operators, and their commendation

New York State.—Mrs. Knapp Completes Jail Sentence.— On Oct. 3, Mrs. Florence E. S. Knapp, former Secretary of State, completed the thirty-day prison sentence imposed on her on Sept. 4 for misappropriation of funds of the 1925 State census. She was convicted of grand larceny on May 26.—V. 126, p. 3485—after two trials and due to her health, sentence was deferred until Sept. 4, on which day Supreme Court Justice Callaghan of Brooklyn sentenced her to jail. In explaining why he felt it was his duty to impose a prison sentence, Justice Callaghan said:

I have no desire to add to the humiliation of the defendant yet I deem my duty to state the reasons which lead me to impose a prison sentence.

More Than Twelve Offenses. "The records furnished indisputable proof that funds amounting to \$27,605.18 were improperly paid by the State on false certifications by the defendant. Of that sum at least \$17,408.03 was wrongfully received by the defendant and probably a total of \$24,175.82 is traceable directly or indirectly to her. Although the Grand Jury returned but twelve indict-

ments, threre was ample evidence to justify at least thirty. The Grand Jury, however, in its wisdom, evidently felt that no good purpose would be served by finding other indictments.

"When the Governor ordered an investigation of the irregularities with which the defendant was charged, she did not, as is the duty of every public official, lend herself in assisting in a complete investigation of the charges against her, but remained out of the jurisdiction to prevent the Commissioner from causing process papers to be served.

"She filed affidavits which were false and which were no doubt intended to relieve her of the imputation of wrongdoing. Her attitude toward the Commissioner was the same as that evidenced by her in the trial of the indictment upon which she was convicted. She persistently endeavored to defeat the ends of justice, and to carry out her purpose she was guilty not only of perjury but of subornation of perjury.

No Doubt of Guill.

"It is apparent to all who have followed the proceedings that there was not the slightest question of her guilt. Even her friends who have appeared for leniency in her behalf have not ventured to suggest that the charges against her were not fully and thoroughly proved or that she is innocent. "The purpose of punishment is not that society may wreak vengeance against the guilty, but rather for the salutary purpose of warning others that they may not commit like offenses without paying the penalty of the law. One could not feel that his full duty had been discharged if the defendant, in view of the gravity of her offense, were permitted to go free. "I have considered carefully every aspect of her case and all that has been said in her favor and after mature thought and deliberation I am fully convinced that justice would not be served by a suspension of sentence. "I therefore sentence the defendant to thirty days in Albany County jail."

New York State.—Legal Investment List Amended.— Frank H. Warder, Superintendent of Banks, has issued a list, dated Sept. 30 1928, of those securities removed from or added to, the list of legal investments for savings banks. It reads as follows:

endent of Banks made the following In issuing this list, the Superintendent of Banks made the following

statement:

The provisions of Section 52 with reference to the annual list, namely; the Superintendent of Banks is not to be in any way liable for the omission therefrom of any bonds which may be found subsequently to qualify, or for the inclusion therein of any bonds which may be found subsequently not to qualify, apply as well to this announcement.

Texas, State of.—Mandamus Suit Expected on Water Bonds.
—Attorney General Claude Pollard has failed to approve a \$6,500,000 issue of bonds of the Tarrant County Water Control and Improvement District No. 1, giving as his reasons the action taken by the Third Court of Civic Appeals on Mar. 28, last.—V. 126, p. 2357—when it ruled that the Act of 1925 authorizing the formation of water control districts was unconstitutional. He maintains that it would be the wrong procedure to validate the bonds, citing the case of the San Saba Water Control and Improvement District, where bonds were condemned.—V. 127, p. 293. An early mandamus is expected to compel the Attorney General to approve these bonds and clear up the status of the districts. The following is taken from the Dallas "News" of Sept. 25:

Final inspection and discussion of the engineering plans for the Tarrant County Water Control and Improvement District. No. 1 were in progress.

"News" of Sept. 25:

Final inspection and discussion of the engineering plans for the Tarrant County Water Control and Improvement District No. 1 were in progress here Monday with the Board of Water Engineers by Ireland Hampton, attorney, and S. R. Freese, engineer, of the district. The board's early approval is expected.

The plans call for two dams on the Trinity, one in Tarrant County and the other near Bridgeport, Wise County, and the project has a fourfold purpose. It will not only store an immense water supply, but will provide water for power and for irrigation and effect flood control by holding back storm waters.

There was a discussion Monday oetween Attorney General Claude Pollard and Hampton regarding the legal aspects of the water control and improvement bonds. The \$6,000.000 record for the Tarrant County District has been placed in the department and is the basis of discussion which will also determine the status of twelve or fifteen other districts.

Expect Mandamus Suit.

Last term the Austin Appellate Court condemned bonds of the San

Last term the Austin Appellate Court condemned bonds of the San Saba Water Control and Improvement District for reasons similar to those District for reasons similar to those in Archer County road district case, now pending on appeal to the Supreme Court. Because of that holding Pollard is not approving bonds for water control and improvement districts.

districts.

This will probably result in an early mandamus to compel the Attorney General to approve such bonds, particularly to clarify the atmosphere as to the status of converted districts, those organized as water improvement districts, and then put them under the new law regulating water control and improvements districts. All these matters were discussed by Pollard and Hampton, but the Attorney General did not agree to approve any bond records under existing conditions. That will force the mandamus. A writ of error or of certiorari to the Supreme Court of the United States would not be taken in a Texas-decided mandamus case, therefore the

appeal to Washington will come in the San Saba case after it is decided by the Supreme Court of Texas and contingent on it holding the bonds valid. If the bonds are held void that would decide the case against the water control and improvement districts and the Attorney General would not Appeal beyond his own Supreme Court. The losing side will appeal. Every effort will be made to get an early decision by the United States Supreme Court in the latter event so that next winter's session of the Texas Legislature can amend the water control and improvement district law to meet the criticisms of the court and assure the issuance o iclearly valid bonds.

#### BOND PROPOSALS AND NEGOTIATIONS.

\$75,000 issue of 4½% serial tuberculosis hospital bonds.

JONES COUNTY DISTRICT (P. O. Laurel) Miss.—BOND SALE CORRECTION.—We are now informed by the Commercial National Bank & Trust Co. of Laurel that the sale to them of a \$750,000 issue of road bonds, reported in V. 127, p. 1707, was erroneous. The following is their communication on the port:

"Replying to yours of Sept. 27, Jones County recently authorized the issuance of \$750,000.00 road bonds for the construction of a hard surface road running through the county from north to south and for the use of building other hard surface roads leading out of this city. They, however, have not sold but \$300,000.00 of this issue. This amount was recently sold and purchased by this bank, the First National Bank of this city, and four other interested bond houses. These bonds have not yet been delivered but are in process of delivery now."

both awarded to Harris, MacKeen & Co. of Torento, at a price of 98.

BRITISH COLUMBIA (Province of).—BOND SALE CONFIRMED.—
The unofficial report which appeared in.—V. 127, p. 1841—relative to the private sale of \$6,000,000 bonds to a syndicate composed of the Canadian Bank of Commerce, the Dominion Securities Corp, Wood, Gundy & Co., and A. E. Ames & Co., all of Canada, and Dillon, Read & Co. of New York, was confirmed, according to the Montreal "Gazette" of Oct. 2, which said:
"Hon. W. C. Shelly, Minister of Finance, Saturday confirmed the sale of \$6,000,000 twenty-five-year, four and one half per cent. Province of British Columbia debentures to yield 4.92 per-cent. The sale was made by private transaction to a Canadian syndicate with United States financial houses also interested.

Mr. Shelly stated, however, the financial policy of the Government would be to sell bonds by public tender. The recent sale by private transaction, he said, was made after the Finance Department had thoroughly canvassed the situation and obtained the best financial advice, including that of the banks of the Province from paying an extremely high rate of interest," Mr. Shelly said, quoting less favorable terms received by Eastern Provinces in recent sales."

EAST WHITBY TOWNSHIP (P. O. Columbus), Ont.—BON OFFERING.—Sealed bids will be received by P. G. Purves, Townsh Clerk, until 4 p. m., Oct. 12, for the purchase of two issues of school bno aggregating \$70,000 to bear interest at the rate of 4½% and mature 30 annual instalments. These are the bonds offered unsuccessfully Sept. 4—V. 127, p. 1149.

GRAND MERE, Que.—BOND SALE.—The \$50,000 issue of 5% semi-annual improvement bonds offered on Oct. 1—V. 127, p. 1841—were awarded to Rene L. Lerclec, Inc. of Montreal, at 99.161. The bonds are dated Sept. 1 1928 and mature serially in 30 years.

MELFORD, Sask.—BONDS NOT SOLD.—The \$65,000 water works extension system bonds authorized to bear nterest at the rate of either 5½ or 6% offered on Sept. 15—V. 127, p. 1419—were not sold as no tender submitted was accepted. The bonds will be reoffered in the spring.

WESTON, Ont.—BOND ELECTION.—An election will be held on Jan. 1, to allow the rate-payers to pass on a \$100,000 sewer debenture by-law according to the Sept. 28 issue of the "Monetary Times" of Toronto.

#### NOTICE.

Notice is hereby given that sealed bids will be received until 10:00 o'clock a. m., on October 17th, 1928, by the Board of County Commissioners of Dare County, North Carolina, at the Court House in the Town of Manteo, N. C., for the purchase of \$38,500 School Funding Bonds, dated August 1st, 1928, and maturing \$2,000 August 1st, 1930 to 1939, \$5,000 August 1st, 1940 to 1942 and \$3,500 August 1st, 1943, all inclusive, without option of prior payment, inclusive. without option of prior payment, bearing interest at the rate of 6% per annum, payable semi-annually, both principal and interest payable at the First National Bank, in the City and State of New York.

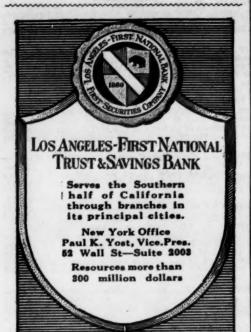

Bidders must present with their bids a certified check upon an incorporated bank or trust company unconditionally payable to the order of the County for two per cent of the face value of the bonds bid for, to secure the County against any loss resulting from the failure of the bidder to comply with the terms of his bid.

The right is reserved by the Board of County Commissioners to reject any or all bids or to accept the bid deemed most advantageous to the County.

MELVIN R. DANIELS, Clerk, Board of County Commissio Manteo, North Carolina.

## AN OPPORTUNITY!

The business of a company manufacturing Pharmaceutical Products (established 25 years ago), due to lack of progressiveness and the advanced age of Proprietor has been permitted to gradually dwindle away entirely and presents a real opportunity for a young aggressive man with vision enough to modernize containers, labels, advertising literature, etc. Over 30 different preparations such as Tooth Paste, Stomach Alterative, Expectorant, Cold Cream, Corn Cure, Hair Tonic, Eye Wash, Ear Drops, Eczema Salve, etc., etc., many of which are used by eminent specialists in their homes and in their hospital work. This is a nucleus for a real big business and sale is being made to liquidate loans. Price \$10,000 with half cash and balance on terms to responsible party. Principals only. Address Box B2, Financial Chronicle, 90 Pine St., New York City.

### EXECUTIVE

having a background of ten years experience with financial houses, desires connection with progressive firm.

These are his qualifications—advertising manager, sales manager, office manager, sales correspondent and salesman.

His judgment is relied on by a wide circle of investors.

He has sound reasons for seeking change from present connection. Box T1, Financial Chronicle, 90 Pine St., New York City.

Young married college man (Princeton) 7 years' training with Bank and Investment houses, desires new connection with institution or investment house. Highest references. Box V-1, Chronicle, 90 Pine St., New York.

### TRADER.

Eight years' experience firms handling unlisted and over-the-counter securities desires new connection. Available immediately. Box AZ 1, Financial Chronicle, 90 Pine St., N. Y.

# UNLISTED STOCK TRADER

presently employed by a N. Y. Stock Exchange firm, desires to make a change. Address, Box H. S. 1, Financial Chronicle, 90 Pine St., N. Y.
